ALLBUS-Cumulation 1980-2010 Supplement

Frequency tables by year and region of interview

Study No. 4576, version 1.0.0, doi: 10.4232/1.11488

GESIS Data Archive for the Social Sciences

About this supplement to the ALLBUS / GGSS 1980-2010 Variable Report:

The Variable Report for ALLBUS/GGSS-Cumulation 1980-2010 contains frequency tables by year for Germany as a whole. The data in these tables is weighted by the person-related East-West weight in V1564. This weight adjusts for the oversample of respondents from the new federal states. Therefore, the numbers in these tables are directly interpretable for Germany as a whole.

One consequence of weighting is that the numbers in the Variable Report do not correspond directly to the data in the unweighted data set. To address this issue, this document contains unweighted frequency tables by year and region of interview. The numbers in these tables correspond directly to the data. However, please note that they only allow separate analyses for East and West Germany.
