Notes on the Additional ALLBUS/GGSScompact 2014 (Study No. 5243)

As an alternative to ALLBUS/GGSS 2014 with its relatively complex demography module, GESIS also offers an additional compact version with a reduced number of demographic variables. Providing an easily manageable selection of basic demographic descriptors, this ALLBUS/GGSScompact addresses, amongst others, the needs of newcomers to data analysis. Moreover, access conditions for ALLBUS/GGSScompact are less strict than for the more extensive ALLBUS/GGSS data, because data protection issues are less salient.

However, for reasons of data protection some of the remaining demographic data still had to be simplified. A comprehensive account of recodes can be found in the next section of this document.

Apart from demography, all other questions have been retained in full in the compact version. Moreover, variable labels and variable numbers in ALLBUS/GGSScompact are the same as in the unabridged ALLBUS/GGSS data set. In this way, users may easily move between both versions of the ALLBUS/GGSS data if necessary.
