Notes for Publications Using ALLBUS/GGSS Cumulation 1980–2014

Data Citation:

Usage and analysis of research data as well as any publication of research results based on such data should be connected with information on the data generator, the data source and an identification of the dataset. GESIS Data Archive for the Social Sciences therefore suggests the following minimum standard for the scientific citation of its data sets. Example for release 1.0.0:

ALLBUS/GGSS full version:

GESIS - Leibniz Institute for the Social Sciences (2016): German General Social Survey (ALLBUS) – Cumulation 1980–2014. GESIS Data Archive, Cologne. ZA4584 Data file Version 1.0.0, doi: 10.4232/1.12574

ALLBUS/GGSScompact:

GESIS - Leibniz Institute for the Social Sciences (2016): German General Social Survey (ALLBUScompact) – Cumulation 1980–2014. GESIS Data Archive, Cologne. ZA4585 Data file Version 1.0.0, doi: 10.4232/1.12575

GESIS-library catalogue and ALLBUS Bibliography:

To gain more insight into the use of ALLBUS/GGSS data and to facilitate the exchange of information within the scientific community, authors using ALLBUS/GGSS are requested to send in bibliographic citations and, if possible, two sample copies of completed texts. The information you provide will be made available in the **GESIS-library catalogue**, which is also searchable online as part of the GESIS web presence (please direct any questions concerning the GESIS-library holdings and catalogues to Heidi Dorn (0221/47694-132; e-mail: heidi.dorn@gesis.org) or to Rielies Neitzke (0221/47694-131; e-mail: rielies.neitzke@gesis.org)). Your publication will also be included in the ALLBUS bibliography, a comprehensive documentation of scientific works, including short abstracts, in which ALLBUS/GGSS data were used. This collection of bibliographic data can be searched online at the ALLBUS website. It can also be downloaded in various formats for off-line reference.

Contact:

For questions or suggestions about design and implementation of ALLBUS/GGS surveys please contact Michael Blohm in Mannheim (0621/1246-276, e-mail: michael.blohm@gesis.org).

For questions about the documentation, archiving, time-series production and dissemination of ALLBUS/GGSS data please contact Pascal Siegers in Cologne (0221/ 47694-419; fax: 0221/47694-8419; e-mail: pascal.siegers@gesis.org)

Survey Description: ALLBUS/GGSS Cumulation 1980-2014 (Study No. 4584)

Data Collection Periods:

1980: January 1980 to February 1980

1982: February 1982 to May 1982

1984: March 1984 to June 1984

1986: March 1986 to May 1986

1988: April 1988 to July 1988

1990: March 1990 to May 1990

1991: May 1991 to July 1991

1992: May 1992 to June 1992

1994: February 1994 to May 1994

1996: March 1996 to June 1996

1998: March 1998 to July 1998

2000: January 2000 to July 2000

2002: February 2002 to August 2002

2004: March 2004 to July 2004

2006: March 2006 to August 2006

2008: March 2008 to August 2008

2010: May 2010 to November 2010

2012: April 2012 to September 2012

2014: March 2014 to September 2014

Contents:

The original surveys have been designed to monitor trends in attitudes, behavior, and societal change in the Federal Republic of Germany. The main topics of this cumulative study are:

- 1.) Economy
- 2.) Political attitudes and participation
- 3.) Attitudes relating to the process of German unification
- 4.) Social inequality and the welfare state

- 5.) Confidence in public institutions and organizations
- 6.) National pride
- 7.) Ethnocentrism and Minorities
- 8.) Identification with various political entities
- 9.) Attitudes towards marriage, family and partnership
- 10.) Attitudes towards abortion
- 11.) Questions on AIDS (HIV)
- 12.) Importance of life aspects and job characteristics
- 13.) Free time activities
- 14.) Use of media
- 15.) Health
- 16.) Religion and world view
- 17.) Environment
- 18.) Attitudes towards and contacts with the administration
- 19.) Anomia and fear of crime
- 20.) Personal and collective values
- 21.) ALLBUS-Demography
- 22.) Data on the interview (paradata)
- 23.) Added value

Topics:

- 1.) *Economy*: assessment of the present and future economic situation in Germany and in one's own federal state; assessment of present and future personal economic situation.
- 2.) *Political attitudes and participation*: satisfaction with federal government, state government, German democracy, and with the performance of the German political system (political support); self-placement on left-right continuum; political interest; party inclination; voting intention (Sonntagsfrage); participation in last federal elections; recall of vote in last federal elections; party-sympathy-scales for the CDU, CSU, SPD, FDP, Republicans (Republikaner), NPD, PDS, DKP as well as the Greens (Bündnis 90 / Die Grünen); likelihood of voting for different political parties; political participation; voluntary activities or honorary offices; attitudes towards nuclear energy, the death penalty for terrorists, towards the privatization of publicly owned companies, and towards abortion; democracy scale; perception of individual influence on politics (political efficacy, political alienation); gap between politicians and citizens; self-assuredness with regard to political group work; too much complexity in politics; the politicians' closeness to constituents; personal and average citizen's level of political knowledge; majority capable of working in a political group; participation in the vote as a civic duty; postmaterialism (importance of law and order, fighting rising prices, free expression of opinions, and influence on governmental decisions).
- 3.) *Attitudes relating to the process of German unification*: attitude towards the demand for increased willingness to make sacrifices in the West and more patience in the East; unification is advantageous, for East and West respectively; future of the East depends on the willingness of eastern Germans to

make an effort; strangeness of citizens in the other part of Germany; performance pressure in the new states; attitude towards dealing with the Stasi-past of individuals; evaluation of socialism as an idea.

4.) *Social inequality and the welfare state*: fair share in standard of living; self-assessment of social class and classification on a top-bottom-scale; evaluation of personal occupational success, comparison with father's position and personal occupational expectations for the future; perceived strength of conflicts between social groups; attitudes towards the German economic system and evaluation of policies supporting the welfare state; assessment of access to education; perceived prerequisites for success in society; income differences as incentive to achieve; acceptance of social differences; evaluation of personal social security; attitudes towards expansion or cuts in social services; attitudes towards cuts in the defense budget; perceived stance of the federal government in these matters.

5.) *Confidence in public institutions and organizations*: health service, federal constitutional court, federal parliament, local government, German armed forces, churches, judiciary, television, newspapers, universities, federal government, trade unions, police, political parties, employment offices, retirement insurance, employers' association, the European Commission, the European Parliament, the European Court of Justice.

6.) *National pride*: pride in German institutions and German achievements; pride in being a German.

7.) *Ethnocentrism and minorities*: attitude towards the influx of eastern European ethnic Germans, asylum seekers, labor from EU or non-EU countries; perceived consequences of presence of foreigners in Germany; treatment of foreigners by the administration; ranking in terms of importance of different citizenship requirements; scale of attitudes towards foreigners and contacts with foreigners (split: guest-workers) within the family, at work, in the neighborhood, or among friends; opinion on dual citizenship and on equal rights for foreigners; perceived strength of conflict between guest workers and German citizens; support for the teaching of Islam in public schools; estimation of proportion of foreigners in East and West Germany and in the neighborhood where respondent lives; perceived differences in lifestyle; indicators for social distance to ethnic minorities and foreigners; items on anti-Semitism; perception and evaluation of discriminatory behavior towards foreigners.

8.) *Identification with various political entities*: identification with own municipality, the federal state, the old Federal Republic or the GDR, unified Germany and the EU.

9.) *Attitudes towards marriage, family and partnership*: family as a prerequisite for happiness; marriage in case of steady partnership or if child was born; ideal number of children; attitude towards employment of women and mothers; attitude towards the role of men and women in the family; importance of educational goals; most important educational goals in school; classification of the importance of certain educational aspirations for a child; desired characteristics of children; authoritarianism; importance of the family.

10.) *Attitudes towards abortion*: abortion because of health risks for mother or child; abortion after rape, due to financial situation or by single women not wanting to marry; permitting abortion without restriction; until when to allow an abortion if baby will be severely handicapped, if mother does not want more children, if there is a serious health risk for the mother, if there is not enough money, if the mother does not want to raise the child alone, if the father is against an abortion, if children are not part of lifeplan, if the mother does not give a specific reason.

11.) *Questions on AIDS (HIV)*: knowledge of the disease AIDS; perceived reports in the media; attitudes towards higher health insurance fees for AIDS-infected people; attitudes towards dismissal of AIDS-infected employees and towards entry refusal for AIDS-infected foreigners; attitude towards mandatory registration of HIV-infected individuals; worry about personal AIDS infection; personal protective measures and behavioral changes; AIDS-infected people in one's own circle of friends.

12.) *Importance of life aspects and job characteristics*: family and children, occupation and work, free time and recreation, friends and acquaintances, kinship, religion and church, politics and public life, neighborhood; preferred job characteristics (security, income, responsibility, etc.).

13.) *Free time activities*: reading books; reading magazines; listening to records, CD's, cassettes; watching videos; using the computer; surfing the internet; private further education; relaxing, being lazy; walking or hiking; yoga, meditation; going to restaurants; visiting friends; visiting relatives; playing games; taking short trips; participating in politics; voluntary activities or honorary offices; attending church or religious events; indulging in art and music; do it yourself; active sport; attending sports events, going to the cinema, to pop concerts, jazz or dance events; classic culture (i.e. opera, classical concerts, theater, exhibitions); listening to music; using the internet; online chats and social networks; playing computer games; making music; doing other artistic activities; visiting museums or exhibitions; attending public festivals or fairs.

14.) *Use of media*: musical preferences: folk music (German or other cultures), German pop music ('Schlager'), jazz, pop or what is in the charts, rock, heavy metal, electronic music (house, techno etc.), hip hop / soul / reggae, classical music, opera, musicals; frequency of watching television over the week; taste in television programs: shows and quiz shows, sports, movies, news broadcasts, political magazines, art and culture programs, traditional German "Heimat"-films, detective films, action films, sitcom or entertainment series; frequency of reading a daily newspaper per week.

15.) *Health*: overall health; physical and psychological shape during the last four weeks; health problems' impact on everyday life; chronic illnesses; been sick in the last four weeks; reason for and frequency of seeing a doctor in the last three months; time spent in hospital during the last 12 months; officially recognized disability level; smoking habits; overall life satisfaction; height and weight; consumption of various foodstuffs and beverages; affectedness by unhealthy working conditions and by mobbing; impact of noise and air pollution on living conditions.

16.) *Religion and world view*: belief in God, cosmology, and the meaning of life; self-assessment of religiousness and spirituality; frequency of meditation; attitude towards religiousness; religious indifference; thinking about metaphysical questions; experience with and attitude towards different forms of belief, parabelief and superstition; religion vs. science; attitudes towards the role of religion in society and the world; religious tolerance; membership in a church; present and former denominational membership; funeral by church; marriage in church; baptism of children; frequency of church attendance and prayer; interest in Christian programs in the media; attitude towards person with different faiths marrying into the family; belief in a life after death; belief in heaven, hell, and miracles; belief in reincarnation; belief in the devil, angels and spirits; importance of religion in parental home.

17.) *Environment*: perception of general environmental pollution and personally experienced environmental pollution.

18.) *Attitudes towards and contacts with the administration*: evaluation of administration services and assessment of treatment by the administration.

19.) *Anomia and fear of crime*: interpersonal trust and trust in politicians; social pessimism and orientation towards the future (anomia); fear of crime; fear of unemployment or loss of business.

20.) *Personal and collective values*: basic personal goals (law and order, standard of living, power and influence, fantasy and creativity, security, help marginalized social groups, ability to assert oneself, industry and ambition, tolerance, political engagement, hedonism, faith in God, occupational achievement, self-realization); opinion on various deviant acts with reference to their reprehensibility and the degree to which they deserve prosecution; respect of the law; probability of engaging in various deviant acts in the future; self-reported deviant behavior; assessment of probability of being

caught committing various crimes; lowering the crime rate through severer punishment; own victimization.

21.) *ALLBUS-Demography*: Details about the respondent: month and year of birth, age, gender, citizenship(s) (nationality), number of citizenships; original citizenship, place of residence (federal state, size of municipality, BIK-type of municipality, Boustedt-type of municipality) and length of residence; geographical origin; religious denomination, frequency of church attendance, frequency of attending other place of worship; currently at school or university, school education, vocational training, possession of driver's license, employment status, details about current and former occupation respectively, details about first occupation, fixed-term or permanent employment contract, industrial sector, fear of unemployment or loss of business, affiliation to public service, length of commute, supervisory functions, date of termination of full- or part-time employment, working hours per week (primary and secondary job), size of workplace, length of unemployment, gaps in occupational biography, desire for work, principal source of livelihood, respondent's income, age when leaving parental home, migration to East or West Germany, interest in migrating to East or West Germany or to another EC country, length of residence (in the FRG, in this federal state, current place of residence), country respondent lived in when young, type of dwelling, self-description of place of residence, telephone, height and weight, marital status, marital biography, desire to have children. Details about respondent's current spouse: citizenship(s), number of citizenships, original citizenship, age, religious denomination, school education, vocational training, university degree, employment status, details about current and former occupation respectively, affiliation to public service, date of termination of full- or part-time employment, length of unemployment, fear of unemployment or loss of business.

Details about respondent's former spouse: age, religious denomination, school education, vocational training, details about current and former occupation respectively.

Details about respondent's steady partner: citizenship(s), number of citizenships, original citizenship, age, common household, distribution of household chores, school education, vocational training, university degree, employment status, details about current and former occupation respectively, affiliation to public service, fear of unemployment or loss of business, date of termination of full- or part-time employment.

Details about respondent's parents and grandparents: country of origin, school education of father and mother, university education of father and mother, vocational training of father and mother, details about parents' occupation, religious affiliation.

Description of household: size of household, household income, types of income in household, principal source of income, number of persons older than 17 in household (reduced size of household), number of children size of dwelling place, cat or dog in the household.

Details about household members: family relation to respondent, gender, month and year of birth, age, marital status, income, German citizenship, baptism, religious affiliation, type of school currently attended by children, children's school education, children's university degree.

Details about children not living in the household: number of children not living in the household, sex, age, baptism, religious affiliation, school education, university degree.

Respondent's current memberships (Deutscher Gewerkschaftsbund (DGB) <German Confederation of Trade Unions>, Deutsche Angestelltengewerkschaft (DAG) <German Salaried Employees' Trade Union>, Christlicher Gewerkschaftsbund (CGB) <Christian Federation of Trade Unions>, Union Leitender Angestellter (ULA) <Association of Executive Staff>, Deutscher Beamtenbund (DBB) <German Civil Service Federation>, Deutscher Bauernverband <German Farmers Association>, trade association, Bundesverband der Deutschen Industrie (BDI) <Federation of German Industries>, association of a liberal profession, other occupational association; choral society, sports club, leisure activity club, local citizens club or community club, other social association, association of German expellees or refugees, charitable association, religious/church organization, youth or student organization, political party, citizens' initiative, other club or association); membership status of respondent in various clubs and

organizations; membership in informal groups; previous membership in a trade union.

Friends and acquaintances (ego-centered networks), including information on: gender, age, kinship or type of relationship, school education, employment, occupational position, occupational group, voting behavior, current citizenship and country of origin, spatial distance between alter and ego, comparative economic situation; quality and quantity of contacts, mutual familiarity between friends or acquaintances.

22.) *Data on the interview (paradata)*: Date of interview; beginning and end of interview; length of interview; perceived attractiveness of respondent at beginning and end of interview; taken part in how many interviews; willingness to join panel; reachability of respondent; presence of respondent at home during the last few weekdays; willingness to participate; presence of other persons during interview; presence of spouse, partner or children during interview; presence of other relatives during interview; interference of other persons in the course of the interview; willingness to cooperate and reliability of information from respondent; respondent followed interview on screen; frequency of private Internet use; willingness to participate in an on-line survey; number of attempts to contact the respondent; details about respondent's residential building and assessment of respondent's neighborhood.

Details about the interviewer: gender, age, school education of interviewer; identification number, length of experience as an interviewer.

23.) *Added value*: Body-Mass-Index; Inglehart-Index; family typology, classification of private households (according to Porst and Funk); International Standard Classification of Occupations (ISCO 1968, 1988 and 2008); occupational prestige (according to Treiman); Standard International Occupational Prestige Scale (SIOPS, according to Ganzeboom), International Socio-economic Index of Occupational Status (ISEI, according to Ganzeboom); magnitude prestige (according to Wegener); occupational metaclassification (according to Pappi and Terwey); International Standard Classification of Education (ISCED) 1997 and 2011; class position (according to Goldthorpe); per capita income; equivalised income (OECD-modified scale); weights.

Total Population and Sample:

Universe sampled: Federal Republic of Germany (until 1990: West Germany including West Berlin).

Household samples: From 1980 to 1992 and in 1998, a multi-stage random sample of private households was conducted addressing all persons who were at least 18 years of age (ADM Sample Design).

Person Samples: In 1994, 1996, and from 2000 a two-stage, disproportionate random sample was conducted in West Germany (including West Berlin) and East Germany (including East Berlin), comprising all persons living in private households who were at least 18 years old on 1 January of the year of the survey. In the first sample stage municipalities (Gemeinden) in western Germany and municipalities in eastern Germany were selected with a probability proportional to their number of adult residents; in the second sample stage individual persons were selected at random from the municipal registers of residents.

As of 1991 the ALLBUS sample also includes foreigners living in Germany. Targeted individuals who did not have adequate knowledge of German to conduct the interview were treated as systematic unit non-responses.

Method of Data Collection:

Personal interview with standardized questionnaire (PAPI – Paper and Pencil Interviewing; since 2000: CAPI – Computer Assisted Personal Interviewing), supplementary data from accompanying ISSP surveys (self-completion questionnaires, drop off).

Primary Sampling Units / Sample-Points:

See survey descriptions of individual ALLBUS surveys.

Response Rate:

See survey descriptions of individual ALLBUS surveys.

Data Set:

Number of respondents: 61.194

Number of variables: 1.936

The known literature using ALLBUS-Data is documented in the ALLBUS-Bibliography. This bibliography can be searched online at the [GESIS web presence](#).

Further Notes:

This cumulative data set of 20 ALLBUS surveys contains all ALLBUS time series (i.e. all questions that have been surveyed at least two times). Notes on the special relation between the CAPI- and PAPI-surveys in 2000 can be found in the respective codebooks and in the methodological reports for ALLBUS 2000.

A second version of this data set (1161 variables) with a shortened demography module is additionally available as Cumulated ALLBUS/GGSScompact 1980-2014 (Study No. 4585).

The original German documentation is available under Study No. 4582 (Kumulierter ALLBUS 1980-2014) and Study No. 4583 (Kumulierter ALLBUScompact 1980-2014).

A Digital Object Identifier (DOI) for use in data citations is supplied as part of the data set.

How to Read the Variable Report

The following two examples are actual variables from ALLBUS/GGSS 1980-2014. They were chosen so as to cover the broadest scope of information possible.

The red numbers in the examples refer to the explanations that follow below, i.e. they are not part of the actual variable documentation in the variable reports.

Example 1: Question surveyed during field-work

1

v1044 PRES.SP.: GENERAL SCHOOL LEAVING CERT.

2

<If respondent is married (1994-1998, from 2002: and lives with spouse)>

What general school leaving certificate does your spouse have?

Which of the following applies to your spouse?

(Int.: Please present card. Only one choice possible. Please request highest certificate only.)

3

0 Respondent is widowed, divorced or never married (code 3-5, 8, 9 in V955), 1994-1998, from 2002 also: respondent is living separated (code 2, 7 in V955); not available 1986

1 Finished school without school leaving certificate;

1991 East: Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

7 From 1986: Still at school

97 Refused

98 Don't know

99 No answer

4

Derivation of data:

From 1980 to 1984 ALLBUS used a single question to collect data on the respondent's current spouse, if the respondent was married, or alternatively on the respondent's previous spouse, if the respondent was widowed or divorced. The data was originally stored in the same variable. For this cumulative data set, the information on current and previous spouses was recoded into separate variables.

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

Example 2: Derived variable

1

v551 BODY-MASS-INDEX, CATEGORIZED

2

Description of variable:

Body-Mass-Index (BMI), categorized

3

0 2008: no participation in ISSP 'Leisure Time and Sports'; 2012: no participation in ISSP 'Health'; not available
1980-2002, 2006, 2010

- 1 BMI under 18,5 - underweight
- 2 BMI 18,5 to under 25 - normal range
- 3 BMI 25 to under 30 - overweight
- 4 BMI 30 and higher - obese
- 8 Don't know
- 9 No answer, no calculation possible

4

Derivation of data:

This variable groups the data in V550 BODY-MASS-INDEX.

Category boundaries were defined with reference to the cut-off points for underweight, overweight and obesity in adults recommended by the WHO (World Health Organization (2000), 9).

Literature:

World Health Organization 2000: Obesity: preventing and managing the global epidemic. Report of a WHO Consultation. WHO Technical Report Series 894. http://whqlibdoc.who.int/trs/WHO_TRS_894.pdf (retrieved 08 June 2015).

Comment:

In 2008 and 2012, this derived variable was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-data are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

Explanation

1

Each question unit is assigned a unique variable number and variable label.

2

For variables based directly on questions surveyed in the field (example 1), the complete question text, including interviewer instructions and filtering rules, is documented. As far as possible, the exact notation of the original questionnaires is retained.

As of the 1980-2004 edition of the cumulative ALLBUS data handbook, the previous policy of documenting all technical details of the instruments has been dropped, because the wealth of often minute differences that needed to be documented increasingly tended to obscure rather than to clarify survey procedures. Therefore, editorial policy was changed to documenting only those modifications that can be plausibly assumed to influence a respondent's answers. This streamlining of documentation predominantly concerns complex item batteries like the questions on household composition etc. For a full documentation of the technical administration of such questions over the years, please refer to the original questionnaires and data handbooks or variable reports.

Derived variables (example 2), are documented with explanatory notes under the heading 'Description of variable'.

3

Here, the codes of the individual answer categories as they are stored in the data set and the response texts can be found. The latter are taken from the original documents. In rare cases the response texts are complemented and help texts are added.

4

Additional information about the data follows below the documentation of answer codes. There is a distinction between derivation of data, comments and notes:

Derivation of data documents information on how the data in derived variables was prepared.

Comments contain short pieces of additional information.

Notes provide more detailed background information on variables, often including information on theoretical backgrounds or further reading.

5

Most variable descriptions contain crosstabulations by year of survey. Missing values are documented in absolute values only. They are also marked *M* in the tables (due to technical limitations the column heading Missing is often cut off). Valid responses are documented with absolute frequencies and column percentages. Per default, the data is weighted to adjust for the oversample of respondents from the eastern part of the country. It can therefore be regarded as representative of the intended population in Germany as a whole. For your personal analyses on person level the appropriate weight can be found in the end of the data set (weightpow). Please note, what appear to be minor rounding errors in some of the row sums are due to the weighting procedure. This also applies to the percentages in the tables.

Unweighted cross tabulations that show the actual distributions in the data set are documented in a supplement file. Because of the overrepresentation of East German respondents, the numbers in these tables are calculated by year and region of interview from 1991 onwards.

v20 SELF-PLACEMENT ON LEFT-RIGHT CONTINUUM

Many people use the terms "left" and "right" to describe differing political views. Here we have a scale that runs from left to right. If you think of your own political views, where would you place them on this scale?

1980-1998, 2000 PAPI:

Please tick one of the boxes.

(Int.: Please hand over a pencil and the questionnaire. Respondent should tick the appropriate box himself/herself on the next page. Please make sure that the tick is placed inside the box.)

2000 CAPI, 2002-2012:

Please choose one of the boxes and tell me the letter printed underneath this box.

(Int.: Please present card. <2002, 2002:> Ask for and record the appropriate letter.)

v21 POLITICAL INTEREST, RESPONDENT<ORDINAL>

How interested in politics are you? Very strongly, strongly, middling, very little, or not at all?

(Int.: Please read the categories aloud.)

0 Not available 1982 (code 2 in spltt82), 1988

1 Very strongly

2 Strongly

3 Middling

4 Very little

5 Not at all

9 No answer

Comment:

In ALLBUS 1982 there were two different split version of this question. Split 1 used this 5-point scale, while split 2

used the 10-point scale documented in V22 (also comp. spltt82).

v22 **POLITICAL INTEREST, RESPONDENT <SCALE>**

How strongly are you interested in politics?

Here we have a scale that runs from "not at all" to "very strongly." Where would you place yourself on this scale? Please, tick one of the boxes.

(Int.: Hand over a pencil. The respondent should tick the box him-/herself. Please make sure that the tick is placed inside the box.)

0 Not available 1980, 1982 (code 1 in spl82), 1984, 1986, 1990-2014

1 Not at all

2 ..

3 ..

4 ..

5 ..

6 ..

7 ..

8 ..

9 ..

10 Very strongly

99 No answer

Comment:

In ALLBUS 1982 there were two different split versions of this question. Split 1 used the 5-point scale documented in V21, while

split 2 used this 10-point scale (also comp. spl82).

v23 DO YOU TEND TO SUPPORT A POLITIC. PARTY?

Many people in Germany tend to support a particular political party over a long period of time although they may also occasionally vote for another party.

What about you?

Do you - in general - tend to support a particular political party?

0 Not available 1980, 1984-1988, 1991-1998, 2000 CAPI (code 2 in spltt00), 2004, 2006, 2010-2014

1 Yes

2 No

7 Refused

9 No answer

Comment:

In 2000 this variable was surveyed as part of a split questionnaire (comp. spltt00).

v27 ELIGIBLE TO VOTE LAST FEDERAL ELECTION?

Until 1990:

Interview is conducted in:

- The Federal Republic of Germany (go to V31)
- West-Berlin (go to V36)

(Int.: Choose without asking respondent.)

1984-2004:

The last federal election took place on...

(1984, 1986: 06.03.1983)

(1988, 1990: 25.01.1987)

(1991, 1992: 02.12.1990)

(1998: 16.10.1994)

(2002: 27.09.1998)

(2004: 22.09.2002).

Until 1992:

Were you eligible to vote at this time?

From 1998:

Were you eligible to vote in this election?

0 1984 to 1990: Respondent lives in West Berlin; 2004: no participation in ISSP 'National Identity' or ISSP 'Citizenship'; not available 1980, 1982, 1990 (split 1), 1994, 1996, 2000, 2006-2014

1 Yes

2 No

9 No answer

Comment:

In 1990 this variable was surveyed as part of a split questionnaire (comp. spl90).

In 2004, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v29 DID YOU VOTE IN LAST FEDERAL ELECTION?

Until 2004:

Did you vote?

2006, 2008:

The last federal election took place on 18 September 2005. Did you vote in this election?

2010, 2012:

The last federal election took place in September 2009. Did you vote in this election?

2014:

The last federal election took place in September 2013. Did you vote in this election?

0 2004, 2014: No participation in ISSP 'National Identity' or ISSP 'Citizenship';

2012: no participation in ISSP 'Health' or ISSP 'Family, Work and Gender Roles';

not available 1980, 1982, 1990 (code 1 in split90), 1994, 2000

1 Yes

2 No

10 Other person not eligible to vote <screened out in some original surveys>

11 Foreigner, ineligible to vote <reconstructed using german, screened out in some original surveys>

12 Foreigner who nevertheless reported having voted <reconstructed using german>

13 <1984-1990:> resident of West-Berlin <screened out in original surveys>

98 Do not know

99 No answer

Derivation of data:

Because skip patterns for this question changed substantially over the years, it was necessary to revise the assignment and coding of missing values to allow a useful cumulation of the data. Therefore, the coding of missing data in this data set differs significantly from the coding used in the cross-section data sets. In the cumulated data there are only three categories of missing data: code 0 'Not available', code 98 'Don't know' and code 99 'No answer'. Cases that skipped this question for other reasons in the original surveys are documented in codes 10-13.

Original skip patterns:

- From 1984 to 1990 respondents were screened out if they reported being ineligible to vote (code 2 in V27).

Additionally, residents of West-Berlin (code 0 in V27) were screened out, because they were not eligible to vote in national elections.

- In 1991, 1992, 1998, 2002 and 2004 only respondents who reported being ineligible to vote (code 2 in V27) were screened out. Residents of West-Berlin no longer needed to be automatically screened out because they were by then regular German citizens and thus eligible to vote in national elections.

- In the surveys between 2006 and 2012, no respondents were screened out. However, in 2006 respondents could choose 'Not eligible to vote' as an explicit response option.

Comment:

In 1990 this variable was surveyed as part of a split questionnaire (comp. spl90).

In 2004, 2012 and 2014 this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v32 ELIGIBLE TO VOTE LAST BERLIN ELECTION?

Interview is conducted in:

- The Federal Republic of Germany (go to V27)
- West-Berlin (go to V32)

(Int.: Choose without asking respondent.)

The last election of the Berlin state parliament took place on...

<1984:> 10.05.1981.

<1986, 1988:> 10.03.1985.

<1990:> 29.01.1989.

<1984, 1986:> Were you eligible to vote at this time?

<1988, 1990 (split 2):> Were you eligible to vote in this election?

0 Respondent not resident in Berlin;

not available 1980, 1982, 1990 (code 1 in spltt90), 1991-2014

1 Yes

2 No

9 No answer

Comment:

In 1990 this variable was surveyed as part of a split questionnaire (comp. spltt90).

v37 CDU SYMPATHY-THERMOMETER

1980:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, NPD, DKP and The Greens.

1984:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, The Greens, NPD and DKP.

1994:

I would like to know what you think about these political parties today:

CDU, SPD, CSU, FDP, Alliance 90/The Greens, The Republicans and PDS.

1980-1994:

Here we have something like a thermometer. The further up you go on the white boxes, the more sympathy you feel for a particular party. The further down you go on the black boxes, the more you dislike this particular party.

Let's start with the CDU.

(Int.: Present card "Thermometer" (+5 to -5). Circle the reading chosen for each party and be careful not to confuse + and -.)

Generally speaking, what do you think of the Christian Democratic Union <CDU>?

Comment:

Party-sympathy scales were first surveyed in the ALLBUS program in 1980 using a list of seven parties. As documented in the question text, subsequent surveys used adapted lists to fit the developing political landscape. For this cumulation, the data gathered for the parties on the extremes of the political spectrum - NPD and The Republicans on the right, DKP and PDS on the left - was merged into one variable each, so that there

are three uniform data points for a total of seven party-sympathy scales covering comparable political positions.

Here we have something like a thermometer. The further up you go on the white boxes, the more sympathy you feel for a particular party. The further down you go on the black boxes, the more you dislike this particular party.

Let's start with the CDU.

(Int.: Present card "Thermometer" (+5 to -5). Circle the reading chosen for each party and be careful not to confuse + and -.)

And what do you think of the Christian Social Union <CSU>?

Comment:

Party-sympathy scales were first surveyed in the ALLBUS program in 1980 using a list of seven parties. As documented in the question text, subsequent surveys used adapted lists to fit the developing political landscape. For this cumulation, the data gathered for the parties on the extremes of the political spectrum - NPD and The Republicans on the right, DKP and PDS on the left - was merged into one variable each, so that there

are three uniform data points for a total of seven party-sympathy scales covering comparable political positions.

v44 **PROBABILITY: VOTE FOR CDU-CSU**

There is a large number of political parties in Germany. Each one of them would like to have your vote at elections. Please tell me, for each of the following parties, how likely it is that you would ever vote for this party.

Please use this scale.

- 1 on the scale means that it is very unlikely for you.
- 10 on the scale means that it is very likely for you.

You can differentiate your answers using the numbers in between.

(Int.: Please read out statements.

If respondent is not entitled to vote, please ask her/him to answer as if s/he were entitled to vote.)

What about the Christian Democratic/Christian Social Union <CDU/CSU>?

v45 **PROBABILITY: VOTE FOR SPD**

There is a large number of political parties in Germany. Each one of them would like to have your vote at elections. Please tell me, for each of the following parties, how likely it is that you would ever vote for this party.

Please use this scale.

- 1 on the scale means that it is very unlikely for you.
- 10 on the scale means that it is very likely for you.

You can differentiate your answers using the numbers in between.

(Int.: Please read out statements.

If respondent is not entitled to vote, please ask her/him to answer as if s/he were entitled to vote.)

What about the Social Democratic Party <SPD>?

v52 **PROBABILITY: VOTE FOR SCHILL-PARTY**

There is a large number of political parties in Germany. Each one of them would like to have your vote at elections. Please tell me, for each of the following parties, how likely it is that you would ever vote for this party.

Please use this scale.

- 1 on the scale means that it is very unlikely for you.
- 10 on the scale means that it is very likely for you.

You can differentiate your answers using the numbers in between.

(Int.: Please read out statements.

If respondent is not entitled to vote, please ask her/him to answer as if s/he were entitled to vote.)

What about the Schill-Party for a Law and Order Offensive <Schill-Partei (Partei Rechtsstaatlicher Offensive)>?

0 Not available 1980-2000, 2004-2014

v53 **POLIT.ACTIVITY: CITIZENS INITIATIVE**

This question deals with types of behaviour that various people have on occasion chosen in order to protest against something or to make the public aware of a particular issue.

I am now going to read out some of these types of behaviour. Please tell me for each one whether you yourself have ever taken part in such an activity.

If you have not yet taken part in such an activity, please tell me whether you would take part in one, whether you would only take part under extraordinary circumstances, or whether you would not take part under any circumstances.

(Int.: Please present card. Read out the statements.

Please mark one answer for each statement.)

Citizen's action group

0 Not available 1980-1986, 1994-1998, 2000 CAPI (code 2 in split00), 2002-2014

1 Have already taken part in such an activity

2 Would take part if the issue was an important one

3 Would take part in an extraordinary situation

4 Would take part under no circumstances

5 Am not familiar with

7 Refused

8 Don't know

9 No answer

Comment:

In 1988 and 2000 this variable was surveyed as part of a split questionnaire (comp. split88 and split00).

99 No answer

Comment:

In 1990 this variable was surveyed as part of a split questionnaire (comp. split90).

Note:

Views on Political Problems: "The death penalty should be introduced for terrorist acts of violence."

In 1980 and 1990 the question concerning the death penalty for terrorist acts of violence (V113) was surveyed as part of the item battery on political problems documented here in V112-V115.

In ALLBUS 1988 this question was surveyed in a four-item battery on political extremism (F22 in ALLBUS 1988 (ZA1670), which has not been replicated since. The first two questions asked whether a communist or a neo-Nazi should be allowed to teach 15 year old schoolchildren. Next came the question concerning the death penalty for terrorist acts of violence. The fourth question finally asked whether the death penalty should be introduced for child murderers.

v121 OPPOSITION SHOULD SUPPORT GOVERNMENT

We have collected a list of frequently heard assertions reflecting different opinions about people's behaviour. Now we would like to find out what people really think about these assertions. Please, tell us your position on each assertion as follows:

+3 = Complete agreement

+2 = Agreement in essential parts

+1 = Weak agreement

-1 = Weak disagreement

-2 = Disagreement in essential parts

-3 = Complete disagreement

(Int.: Mix cards and present together with list. Circle one answer on each line.)

The job of the political opposition is not to criticize the government, but to support it in its work.

v136 POLITICAL GOALS: MAINTAIN LAW AND ORDER

(Int.: Please present card and leave on display until the end of the question.)

In politics, too, one can't have everything at once. On this card, there are four goals which can be pursued in politics.

If you had to choose between these different goals, which one would seem to you personally to be the most important?

(Int.: Only one choice possible.)

And which goal would be the second most important to you?

(Int.: Only one choice possible.)

And which goal would be third?

(Int.: Only one choice possible.)

<Until 1998:>

(Int.: Tick remaining option as "fourth.")

<From 2000:>

And which goal would be fourth?

(Int.: Only one choice possible.)

To maintain law and order in this country

- 1 Most important goal
- 2 Second most important goal
- 3 Third most important goal
- 4 Fourth most important goal
- 8 Don't know
- 9 No answer

Derivation of data:

The coding of the data on Inglehart's political priorities in this data set has been used in the ALLBUS program since 1988. Earlier ALLBUS surveys used a different method of coding the data: In the original data for 1980 to 1986, the first variable recorded the respondent's pick for most important of the political goals in V136-V139. The following three variables then contained the second, third and fourth most important goal respectively. In 1980 and 1982 the fourth most important goal was assigned without asking.

For this cumulative data set, the data from 1980 to 1986 has been recoded in accordance with the survey practice as of 1988. However, because of the different way of recording the data, it is impossible to unambiguously recode codes 7 to 9 into the present format. Therefore, codes 7 to 9 have been uniformly recoded to code 9 in V136-V139.

The following three variables then contained the second, third and fourth most important goal respectively. In 1980 and 1982 the fourth most important goal was assigned without asking.

For this cumulative data set, the data from 1980 to 1986 has been recoded in accordance with the survey practice as of 1988. However, because of the different way of recording the data, it is impossible to unambiguously recode codes 7 to 9 into the present format. Therefore, codes 7 to 9 have been uniformly recoded to code 9 in V136-V139.

v138 POLITICAL GOALS: FIGHT RISING PRICES

(Int.: Please present card and leave on display until the end of the question.)

In politics, too, one can't have everything at once. On this card, there are four goals which can be pursued in politics.

If you had to choose between these different goals, which one would seem to you personally to be the most important?

(Int.: Only one choice possible.)

And which goal would be the second most important to you?

(Int.: Only one choice possible.)

And which goal would be third?

(Int.: Only one choice possible.)

<Until 1998:>

(Int.: Tick remaining option as "fourth.")

<From 2000:>

And which goal would be fourth?

(Int.: Only one choice possible.)

To fight rising prices

- 1 Most important goal
- 2 Second most important goal
- 3 Third most important goal
- 4 Fourth most important goal
- 8 Don't know
- 9 No answer

Derivation of data:

The coding of the data on Inglehart's political priorities in this data set has been used in the ALLBUS program since 1988. Earlier ALLBUS surveys used a different method of coding the data: In the original data for 1980 to 1986, the first variable recorded the respondent's pick for most important of the political goals in V136-V139. The following three variables then contained the second, third and fourth most important goal respectively. In 1980 and 1982 the fourth most important goal was assigned without asking.

For this cumulative data set, the data from 1980 to 1986 has been recoded in accordance with the survey practice as of 1988. However, because of the different way of recording the data, it is impossible to unambiguously recode codes 7 to 9 into the present format. Therefore, codes 7 to 9 have been uniformly recoded to code 9 in V136-V139.

v140 **INGLEHART-INDEX**

Description of variable:

Inglehart-Index

- 1 Postmaterialist
- 2 Postmaterialist mixed-type
- 3 Materialist mixed-type
- 4 Materialist
- 8 Don't know
- 9 No answer

Derivation of data:

The data of the Inglehart-Index has been constructed with reference to Robert Inglehart's work on 'materialist' and 'postmaterialist' value orientations (Inglehart 1971).

The categorization is based on the respondents' statements about their political priorities in V136 to V139. Respondents who rank 'maintaining law and order in this country' and 'fighting rising prices' as the two most important issues are classified as 'materialists'. Respondents who consider 'giving citizens more influence on government decisions' and 'protecting the right of free speech' as the two most important goals are categorized as 'postmaterialists'.

All other respondents show ambiguous priorities in terms of this index and are therefore classified as 'mixed types'. These 'mixed type'-categories can be constructed in a number of ways. In V139 two such 'mixed types' are differentiated. Respondents who rank a 'postmaterialist' item first and a 'materialist' item second are grouped into the category 'postmaterialist mixed type', while the reverse order of preferences is assigned to the 'materialist mixed type'.

Whenever data is missing for one of the two top political preferences, no valid category can be assigned. In this case, the same code as in the missing political preference is assigned.

For further information, compare:

Ronald Inglehart 1971: The Silent Revolution in Europe: Intergenerational Change in Post-Industrial Societies, in: American Political Science Review 65(4): 991-1017.

v141 WEST SHOULD MAKE GREATER SACRIFICES

Until 1992:

Here are some statements. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.
 (Int.: Please present card.)

From 1994:

The following statements are about the situation in the old and new federal states. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.
 (Int.: Please present card. Please circle one response category per item.)

The people in the old federal states should be willing to make greater sacrifices to improve the situation of the people in the new states.

0 Not available 1980-1990, 1996, 2000 CAPI (code 1 in split00), 2002, 2004, 2008, 2012, 2014

1 Completely agree

2 Tend to agree

3 Tend not to agree

4 Completely disagree

8 Don't know

9 No answer

Comment:

In 2000 this variable was surveyed as part of a split questionnaire (comp. split00).

v142 EAST SHOULD SHOW MORE PATIENCE

Until 1992:

Here are some statements. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.
 (Int.: Please present card.)

From 1994:

The following statements are about the situation in the old and new federal states. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.
 (Int.: Please present card. Please circle one response category per item.)

The people in the new federal states should show more patience as far as improving their situation is concerned.

0 Not available 1980-1990, 1996, 2000 CAPI (code 1 in split00), 2002, 2004, 2008, 2012, 2014

1 Completely agree

2 Tend to agree

3 Tend not to agree

4 Completely disagree

8 Don't know

9 No answer

Comment:

In 2000 this variable was surveyed as part of a split questionnaire (comp. split00).

v149 SOCIALISM: GOOD IDEA, POORLY IMPLEMENTED

Until 1992:

Here are some statements. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.
 (Int.: Please present card.)

From 1994:

The following statements are about the situation in the old and new federal states. Please tell me for each statement whether you: completely agree, tend to agree, tend not to agree or completely disagree.
 (Int.: Please present card. Please circle one response category per item.)

Socialism is basically a good idea, it was just put into practice badly.

0 Not available 1980-1990, 1996, 2000 CAPI (code 1 in split00), 2002, 2004, 2008, 2012, 2014

1 Completely agree

2 Tend to agree

3 Tend not to agree

4 Completely disagree

8 Don't know

9 No answer

Comment:

In 2000 this variable was surveyed as part of a split questionnaire (comp. split00).

v150 RESP: FAIR SHARE IN STANDARD OF LIVING?

Compared with how others live in Germany (until 1990: in the Federal Republic):

Do you think you get your fair share (1980 - split 1: of the good things in life), more than your fair share, somewhat less or very much less than your fair share?

0 Not available 1984-1988, 1990 (code 1 in split90), 1994, 1998, 2012

1 Very much less

2 Somewhat less

3 Fair share

4 More than fair share

7 Refused

8 Don't know

9 No answer

Comment:

In 1980 and 1990 this variable was surveyed as part of a split questionnaire (comp. split80 and split90).

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation therefore deviates from that actually used in the field.

v151 SELF-ASSESSMENT OF SOCIAL CLASS, RESP.

There is a lot of talk about social class these days. What class would you describe yourself as belonging to?

1980, 1982 (split 1), 1984-2014:

The lower class, the working class, the middle class or the upper class?

1982 (split 2):

The working class, the middle class, the upper middle class or the upper class?

- 1 The lower class <1982 only in split 1>
- 2 The working class
- 3 The middle class
- 4 The upper middle class
- 5 The upper class
- 6 None of these classes (Int.: Don't read aloud.)
- 7 Refused to select a category
- 8 Don't know
- 9 No answer

Comment:

In 1982 this variable was surveyed as part of a split questionnaire (comp. spl82).

v152 TOP-BOTTOM-SCALE: SELF-CLASSIFIC., RESP.

In our society there are groups which tend to be towards the top and groups which tend to be towards the bottom. Below is a scale that runs from top to bottom.

Thinking of yourself, where would you put yourself on this scale?

1980, 1982, 1986-1991:

(Int.: Hand over pencil and questionnaire.

Ask respondent to tick one of the boxes on the scale. Please, make sure that respondent places tick inside the box.)

1992, 2000-2014:

(Int.: Please mark one box.)

99 No answer

Comment:

In 1992 and from 2000 to 2014, this question was part of the ISSP-modules surveyed together with ALLBUS.

As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation deviates from the coding in the data sets for ALLBUS 1988, 1990, 1992, 2000 and 2002.

v153 OCCUP.SUCCESS: COMPARISON TO FATHER

<If respondent is employed full- or part-time>

If you compare your occupational status today with that of your father, how would you assess your own occupational status: much higher, somewhat higher, roughly the same, lower <2014 split 2: somewhat lower, much lower>?

0 Not employed full- or part-time (code 3-11 in V770); not available 1980, 1982, 1986-1992, 1996-2012

1 Much higher

2 Somewhat higher

3 Roughly the same

4 Lower <2014 split 2: categories 'somewhat lower' and 'much lower' merged for this data set>

98 Occupational status of father unknown

99 No answer

Comment:

In 2014 this variable was surveyed as part of a split questionnaire (comp. spl14_1).

v162 CONFLICTS: PARENTS VS. CHILDLESS PEOPLE

1980 (split 1), 1990 (split 2), 2010:

It is often said that there are conflicts of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these conflicts are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these conflicts are very strong, rather strong, fairly weak, or whether you think there is no conflict at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

1980 (Split 2):

It is often said that there are oppositions of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these oppositions are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these oppositions are very strong, rather strong, fairly weak, or whether you think there is no opposition at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

1980 (split 1), 1990 (split 2), 2010:

Conflict between people with children and those without children.

1980 (split 2):

Opposition between people with children and those without children.

v169 CONFLICTS: WOMEN VS. MEN

1980 (split 1), 1982, 1990 (split 2), 2010:

It is often said that there are conflicts of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these conflicts are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these conflicts are very strong, rather strong, fairly weak, or whether you think there is no conflict at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

1980 (Split 2):

It is often said that there are oppositions of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these oppositions are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these oppositions are very strong, rather strong, fairly weak, or whether you think there is no opposition at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

1980 (split 1), 1982, 1990 (split 2), 2010:

Conflict between men and women.

1980 (split 2):

Opposition between men and women.

v178 CONFLICTS: CHRISTIANS VS. MUSLIMS

It is often said that there are conflicts of interest between different groups in the Federal Republic - for example between different political groups, between men and women, etc.

However, these conflicts are not all equally strong.

I'll list a few such groups and please tell me whether, in your opinion, these conflicts are very strong, rather strong, fairly weak, or whether you think there is no conflict at all between these groups.

(Int.: Please present card. Read out the items and circle one answer for each item.)

Conflict between Christians and Muslims.

0 Not available 1980-2008, 2012, 2014

1 There is none

2 Fairly weak

3 Rather strong

4 Very strong

v200 SUCCESS:DEPENDS ON OWN CLASS POSITION

(Int.: Please present card.)

Here is a card with various views on what social differences in Germany <1984: the Federal Republic> are really like and how things should be.

Please go through the statements one by one and tell me whether you completely agree, tend to agree, tend to disagree or completely disagree.

(Int.: <1984, 1994:> Mark one answer code for each item.)

In Germany (1984: the Federal Republic), the old differences between those who own and those who work still persist. One's personal status depends on whether one belongs to the upper or the lower class.

v201 SUCCESS:DEPENDS ON FAMILY BACKGROUND

(Int.: Please present card.)

Here is a card with various views on what social differences in Germany <1984: the Federal Republic> are really like and how things should be.

Please go through the statements one by one and tell me whether you completely agree, tend to agree, tend to disagree or completely disagree.

(Int.: <1984, 1994:> Mark one answer code for each item.)

In Germany (1984: the Federal Republic) there are still large differences between social classes. What one can achieve in life substantially depends on one's family background.

v211 RESP.: SPEND MORE OR LESS ON DEFENSE?

Some people believe we should spend much less money for defense. Suppose these people are at the one end of the scale, at point number 1. Others feel that defense spending should be greatly increased. Suppose these people are at the other end, at the point number 7. And, of course, some people have opinions somewhere in between at points 2, 3, 4, 5 or 6.

Where would you place yourself on this scale, or haven't you thought much about this.

v216 TRUST: HEALTH SERVICE

I am now going to read out a number of public institutions and organisations.

Please tell me for each institution or organisation how much trust you place in it. Please use this scale. 1 means you have absolutely no trust at all, 7 means you have a great deal of trust. You can differentiate your answers using the numbers in between.

(Int.: Please present card.)

Read out the items and tick one answer each.)

What about...

the health service?

0 Not available 1980, 1982, 1986-1992, 1996, 1998, 2000 CAPI (code 1 in split00), 2004, 2006, 2010, 2014

v222 TRUST: PROTESTANT CHURCH

I am now going to read out a number of public institutions and organisations.

Please tell me for each institution or organisation how much trust you place in it. Please use this scale. 1 means you have absolutely no trust at all, 7 means you have a great deal of trust. You can differentiate your answers using the numbers in between.

(Int.: Please present card.)

Read out the items and tick one answer each.)

What about...

the Protestant church?

0 Not available 1980, 1982, 1986-1992, 1996, 1998, 2000 CAPI (code 1 in split00), 2004-2010, 2014

v228 TRUST: TRADE UNIONS

I am now going to read out a number of public institutions and organisations.

Please tell me for each institution or organisation how much trust you place in it. Please use this scale. 1 means you have absolutely no trust at all, 7 means you have a great deal of trust. You can differentiate your answers using the numbers in between.

(Int.: Please present card.)

Read out the items and tick one answer each.)

What about...

trade unions?

v235 TRUST: EUROPEAN PARLIAMENT

I am now going to read out a number of public institutions and organisations.

Please tell me for each institution or organisation how much trust you place in it. Please use this scale. 1 means you have absolutely no trust at all, 7 means you have a great deal of trust. You can differentiate your answers using the numbers in between.

(Int.: Please present card.

Read out the items and tick one answer each.)

What about...

the European Parliament?

v243 PROUD OF: SOCIAL WELFARE ACHIEVEMENTS

<Since 1991: If respondent has German citizenship>

On these cards you will find a number of things one can be proud of as a German.

Please select the three things you are most proud of.

(Int.: Please shuffle cards and hand over. Place cards not selected to one side and circle selected cards (up to 3) in the answer scheme.)

Social welfare achievements

0 Not selected

1 Selected

2 Not proud of any

6 Since 1991: foreigner (1991, 1996, 2000, 2008: code 3 in german; 1992: code 2 in V28), not available 1980-1986, 1990, 1994, 1998, 2000 CAPI (code 1 in split00), 2002-2006, 2010-2014

9 No answer

Comment:

In 2000 this variable was surveyed as part of a split questionnaire (comp. split00).

v244 PROUD OF: MOST IMPORTANT

Since 1991:

<If respondent has German citizenship>

1988, 1991:

(Int.: If at least two answers were selected in the answer scheme for V238-V244 please go on:)

What are you most proud of?

(Int.: Only one choice possible.)

(Int.: If at least three answers were selected in the answer scheme for V238-V244, please go on:)

And what comes second and third?

(Int.: Only one choice possible for second and third place.)

1996, 2000:

(Int.: If at least two cards were selected, please hand these back again.)

What are you most proud of?

(Int.: Only one choice possible.)

(Int.: If at least three cards were selected, please go on:)

And what comes second and third?

(Int.: Only one choice possible for second and third place.)

What are you most proud of?

0 Not proud of any (code 2 in V237-V243); since 1991: foreigner (code 3 in german); not available 1980-1986, 1990, 1992, 1994, 1998, 2000 CAPI (code 1 in split00), 2002-2006, 2010-2014

1 The Basic Law

2 The Bundestag <German parliament>

3 The achievements of German athletes

4 Economic successes

5 German art and literature

6 Scientific achievements

7 Social welfare achievements

v270 FOREIGN., GUEST WORKERS: ADAPT MORE

1980:

(Int.: Please hand over card.)

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. Again please use the scale below to indicate your opinion

(Int.: Record answers here.)

1984 to 1990, 1994 split 1:

<1994: If respondent has German citizenship>

(Int.: Please present card.)

This question is about the guest workers who live here in the Federal Republic (1994: in Germany):

On this card, there are some statements we have all heard at some time or other when talking about guest workers. Please tell me for each statement to what extent you agree with it. 1 on the scale means you 'completely disagree', 7 on the scale means you 'completely agree'. You can use the numbers in between to differentiate your answer.

(Int.: Record answers here.)

1994 split 2, 1996 to 2006 (CAPI split), 2010, 2012:

<If respondent has German citizenship>

(Int.: Please present card.)

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

2006 (CASI split):

<If respondent has German citizenship>

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best

fits your opinion.

Until 1990, 1994 (split 1):

Guest workers should adapt their way of life a little more closely to the German way of life.

1994 (split 2), 1996, 2000, 2002, 2006, 2010, 2012:

The foreigners living in Germany should adapt their way of life a little more closely to the German way of life.

v272 FOREIGN.,GUEST W.: NO POLIT. ACTIVITIES

1980:

(Int.: Please hand over card.)

On this card, there are some statements we have all heard at some time or other when talking about guest workers.

Please tell me for each statement to what extent you agree with it. Again please use the scale below to indicate your opinion

(Int.: Record answers here.)

1984 to 1990, 1994 split 1:

<1994: If respondent has German citizenship>

(Int.: Please present card.)

This question is about the guest workers who live here in the Federal Republic (1994: in Germany):

On this card, there are some statements we have all heard at some time or other when talking about guest workers. Please tell me for each statement to what extent you agree with it. 1 on the scale means you 'completely disagree', 7 on the scale means you 'completely agree'. You can use the numbers in between to differentiate your answer.

(Int.: Record answers here.)

1994 split 2, 1996 to 2006 (CAPI split), 2010, 2012:

<If respondent has German citizenship>

(Int.: Please present card.)

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

2006 (CASI split):

<If respondent has German citizenship>

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany.

On this card, there are some statements we have all heard at one time or another. Please tell me for each statement to what extent you agree with it.

> 1 on the scale means you 'completely disagree',

> 7 on the scale means you 'completely agree'.

You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best

fits your opinion.

Until 1990, 1994 (split 1):

Guest workers should be prohibited from taking part in any kind of political activity.

1994 (split 2), 1996, 2000, 2002, 2006, 2010, 2012:

Foreigners living in Germany should be prohibited from taking part in any kind of political activity.

0 From 1994: no German citizenship (code 3 in german); not available 1982, 1986, 1990 (code 1 in spltt90),

v281 RELIG.INSTRUCTION FOR MUSLIMS IN SCHOOLS

(Int.: Please display card.)

It is being debated whether there should be Islamic religious instruction for Muslim children in state schools.

What is your opinion about this:

Should there be Islamic religious instruction in state schools,
 should there only be Christian religious instruction or
 should there be no religious instruction at all in state schools?

In state schools in Germany, there should be -

v330 WHAT IS THE IDEAL NUMBER OF CHILDREN?

1980, 1982:

What do you consider the ideal family size to be today: father, mother and how many children?

(Int.: Fill in the number of children)

ISSP - 1988, 1994, 2012:

All in all, what do you consider to be the ideal number of children for a family?

(Int.: Fill in the number of children)

0 No child

96 1988, 1994 and 2004: no participation in ISSP; not available 1984, 1986, 1990-1992, 1996-2010, 2014

97 Refused

98 Don't know

99 No answer

Comment:

In 1988, 1994 and 2012 this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v336 WIFE: SHOULD GIVE UP WORK AFTER MARRIAGE

People have different opinions about the role of women in the family and in bringing up children. For each of the statements on the card, please tell me whether you completely agree, tend to agree, tend to disagree, or completely disagree.

(Int.: Please present card. Record one answer code for each statement.)

A married woman should not work if there are not enough jobs to go around and her husband is also in a position to support the family.

v345 WORKING MAN CAN BE GOOD FATHER TOO

(Int.: Please present card.)

People have different opinions about the role of mothers and fathers.

For each of the following statements, please tell me whether you -

completely agree,

tend to agree,

tend to disagree or

completely disagree.

(Int.: Please make sure you are using the right card.)

A father working full-time can normally establish just as close a relationship with his small child as a father who doesn't work.

0 Not available 1980-2010, 2012 (code 1 in spl12_2), 2014

1 Completely agree

2 Tend to agree

3 Tend to disagree

4 Completely disagree

8 Don't know

9 No answer

Comment:

In 2012 this variable was surveyed as part of a split questionnaire (comp. spl12_2).

v361 CHILD: EDUCATIONAL AIM THINK FOR ONESELF

1992:

(Int.: Please present card and leave on display until V363.)

Which of the items on the card do you consider the most important thing a child needs to learn to prepare himself or herself for life?

(Int.: Only one choice possible.)

What do you consider the second most important?

(Int.: Only one choice possible.)

What is the third most important?

(Int.: Only one choice possible.)

What is the fourth most important?

(Int.: Only one choice possible.)

Tick remaining option as 'fifth'.

Please enter a tick in each column.)

1996, 2000:

(Int.: Please present card and leave on display until V363.)

Which of the items on the card do you consider the most important thing a child needs to learn to prepare himself or herself for life?

(Int.: Please enter a tick in each column.)

What do you consider the second most important?

What is the third most important?

And the fourth most important?

(2000:) What is the fifth most important?

(Int.: (1996:) Tick remaining option as 'fifth'.)

To think for himself or herself

v369 DESIRABLE QUALIT.F.CHILDREN:SELF-CONTROL

A Which three qualities listed on this card would you say are the most desirable for a child to have?

(Int.: Present card and leave on display until part D of this question. Mark three responses in column A for this question.)

B Which one of these three is the most desirable of all?

(Int.: Read out the three items chosen before. Let respondent pick the most important one. Mark this item in column B.)

C All of the qualities listed on this card may be desirable, but could you tell me which three you consider least important?

(Int.: Mark these three responses in column C.)

D And which one of these three is least important of all?

(Int.: Read out the items marked in column C. Let respondent pick the least important one. Mark this item in column D.)

...that it has self-control

0 Not available 1980, 1982 (code 1 in spl82), 1984-1991, 1994-2014

1 Least important

2 Among the 3 least important

3 Not rated by respondent

4 Among the 3 most desirable

5 The most desirable

v377 **AGREE: SHLD BE GRATEFUL FOR THE LEADERS**

1996, 2006:

<If respondent has German citizenship>

1996, 2002, 2006, 2012:

(Int.: Please display card.)

To what extent do you agree with the following statements?

Please answer using the scale on this card.

1 on the scale means you 'completely disagree'.

7 on the scale means you 'completely agree'.

You can differentiate your answers using the numbers in between.

We should be grateful for leaders who can tell us exactly what to do and how to do it.

0 1996, 2006: no German citizenship (code 3 in german); not available 1980-1994, 1998, 2000, 2004, 2008, 2010, 2014

1 Completely disagree

v414 HIV-PROTECTION:OTHER MEASURE, RESPONSE 2

(Int.: If respondent has chosen 'other measures', please ask further:)

What exactly have you done?

(Int.: Please note down carefully.)

Other protective measures against AIDS (second response)

0 No measures taken (code 0, 6 in V412), no second response; not available 1980-1986, 1991, 1994-2014

10 Hygiene: e.g. protective gloves or masks, mosquito nets, washing hands, cautious using toilets, apply adhesive bandages to open wounds, general hygiene. Also: no blood transfusions, no blood donation

11 Fidelity: (for persons in a steady relationship) e.g. steady friendship, fidelity, monogamy, sexual contact with spouse only, no changing relationships

13 Information: e.g. get more information, attend public events; stay informed, oriented, up to date

90 Other responses

97 Refused

98 Don't know

v416 IMPORTANCE: OWN FAMILY AND CHILDREN

1980-1998:

The cards here list various spheres of life. We would like to know how important each of these spheres of life is for you.

(Int.: Please shuffle card pack and display.

First explain the response scale using any card.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Please hand over all the cards together.)

Please look at all the cards first. Then for each card tell me the letter on the card and the number you have chosen.

(Int.: One response category must be circled for each card)

2012:

(Int.: Please present card.)

The card here lists various spheres of life.

We would like to know how important each of these spheres of life is for you.

Please answer using the scale on the card.

The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

Please, have a look at all the items on the list first.

(Int.: First of all, let respondent read through the list, then read out statements and get them rated.)

Own family and children

v420 IMPORTANCE: RELATIVES

1980-1998:

The cards here list various spheres of life. We would like to know how important each of these spheres of life is for you.

(Int.: Please shuffle card pack and display.

First explain the response scale using any card.)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Please hand over all the cards together.)

Please look at all the cards first. Then for each card tell me the letter on the card and the number you have chosen.

(Int.: One response category must be circled for each card)

2012:

(Int.: Please present card.)

The card here lists various spheres of life.

We would like to know how important each of these spheres of life is for you.

Please answer using the scale on the card.

The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

Please, have a look at all the items on the list first.

(Int.: First of all, let respondent read through the list, then read out statements and get them rated.)

v424 ASPECTS OF JOBS: JOB SECURITY

1980, 1982 (split 1), 1991:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer.

Record one answer code for each card.)

2010 (card deck):

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Show any card to explain the answer scale:)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Hand over cards individually.)

2010 (CAPI, computerized randomization):

I will now present you with various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Present card.)

On this card there is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you. Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Read out items.)

99 No answer

Comment:

In 1982 this variable was surveyed as part of a split questionnaire (comp. spl82).

Note:

The questions concerning the importance of various job characteristics were asked in varying contexts and constellations in the original surveys:

- ALLBUS 1980 surveyed a list of 10 items (V424-V433). The item sequence was randomized using shuffle cards.

- ALLBUS 1982 and ALLBUS 1991 surveyed an extended list comprising 13 items (V424-V436). The item sequence was randomized using shuffle cards.

- ALLBUS 1992 and ALLBUS 2000 surveyed a subset of the extended list comprising 6 items (V425, V426, V429, V430, V433 and V434). The item sequence was randomized using shuffle cards.

- ALLBUS 2010 surveyed a list comprising 11 items (V424-V434). A two-group split-ballot design was used to test different methods of randomizing the item sequence. In one split-half items were randomized using shuffle cards. In the other split-half the item sequence was randomized by the interview software. V424-V434 contain the data for both split-halves. A corresponding split identifier has not been included in this data set. Users interested in the 2010 split-experiment are advised to refer to the original documentation and data.

v425 ASPECTS OF JOBS: HIGH INCOME

1980, 1982 (split 1), 1991, 1992, 2000:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer.

Record one answer code for each card.)

2010 (card deck):

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Show any card to explain the answer scale:)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Hand over cards individually.)

2010 (CAPI, computerized randomization):

I will now present you with various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Present card.)

On this card there is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you. Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Read out items.)

A high income

v429 ASPECTS OF JOBS: INTERESTING WORK

1980, 1982 (split 1), 1991, 1992, 2000:

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

For your answers, please use the scale from 1 to 7.

(Int.: Shuffle card pack and hand over cards individually, one by one, and let respondent choose an answer.

Record one answer code for each card.)

2010 (card deck):

On these cards there are various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Show any card to explain the answer scale:)

On the right hand side of each of these cards is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you.

Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Hand over cards individually.)

2010 (CAPI, computerized randomization):

I will now present you with various aspects of the world of work and careers. How important to you personally are these job characteristics?

(Int.: Present card.)

On this card there is a scale with 7 categories. The category at the bottom with the number 1 means this sphere of life is unimportant to you. Category number 7 at the very top means this sphere of life is very important to you.

You can use the numbers in between to differentiate your answers.

(Int.: Read out items.)

An interesting job

Comment:

In 1982 this variable was surveyed as part of a split questionnaire (comp. split82).

Note:

The questions concerning the importance of various job characteristics were asked in varying contexts and constellations in the original surveys:

- ALLBUS 1980 surveyed a list of 10 items (V424-V433). The item sequence was randomized using shuffle cards.

- ALLBUS 1982 and ALLBUS 1991 surveyed an extended list comprising 13 items (V424-V436). The item sequence was randomized using shuffle cards.

- ALLBUS 1992 and ALLBUS 2000 surveyed a subset of the extended list comprising 6 items (V425, V426, V429, V430, V433 and V434). The item sequence was randomized using shuffle cards.

- ALLBUS 2010 surveyed a list comprising 11 items (V424-V434). A two-group split-ballot design was used to test different methods of randomizing the item sequence. In one split-half items were randomized using shuffle cards. In the other split-half the item sequence was randomized by the interview software. V424-V434 contain the data for both split-halves. A corresponding split identifier has not been included in this data set. Users interested in the 2010 split-experiment are advised to refer to the original documentation and data.

Comment:

In 1982 this variable was surveyed as part of a split questionnaire (comp. split82).

Note:

The questions concerning the importance of various job characteristics were asked in varying contexts and constellations in the original surveys:

- ALLBUS 1980 surveyed a list of 10 items (V424-V433). The item sequence was randomized using shuffle cards.

- ALLBUS 1982 and ALLBUS 1991 surveyed an extended list comprising 13 items (V424-V436). The item sequence was randomized using shuffle cards.

- ALLBUS 1992 and ALLBUS 2000 surveyed a subset of the extended list comprising 6 items (V425, V426, V429, V430, V433 and V434). The item sequence was randomized using shuffle cards.

- ALLBUS 2010 surveyed a list comprising 11 items (V424-V434). A two-group split-ballot design was used to test different methods of randomizing the item sequence. In one split-half items were randomized using shuffle cards. In the other split-half the item sequence was randomized by the interview software. V424-V434 contain the data for both split-halves. A corresponding split identifier has not been included in this data set. Users interested in the 2010 split-experiment are advised to refer to the original documentation and data.

v482 WATCH TV: AVERAGE VIEWING TIME PER DAY

<If respondent watches TV>

Thinking about the days when you watch TV, how long on average do you watch TV on these days - I mean in hours and minutes?

1998:

(Int.: If a time span is given, please ask for the average viewing time per day. Note down in hours and minutes.)

0 Respondent never watches TV (code 0 in V481)

9996 Not available 1980-1996, 2000-2002, 2006, 2010, 2012

9999 No answer

Derivation of data:

The question surveyed asked for a reply in hours and minutes (e.g.: 2h 30min). For this variable, the viewing time in minutes was calculated from the original data as follows:

Total viewing time = (hours x 60) + minutes

Comment:

N-Valid: 12784

N-Missing: 48410

Minimum: 1

Maximum: 1380

Median: 150.00

Mean: 161.95

Standard deviation: 101.857

v483 WATCH TV: AVERAGE VIEWING TIME, CATEG.

Description of variable:

<If respondent watches TV>

Average viewing time per day, categorized

0 Respondent never watches TV (code 0 in V481); not available 1980-1996, 2000, 2002, 2006, 2010, 2012

1 less than 60 minutes

2 60 to less than 180 minutes

3 180 to less than 360 minutes

4 360 to under 540 minutes

5 540 minutes and more

9 No answer

Derivation of data:

This variable groups the data in V482.

v488 TV INTEREST: POLITICAL MAGAZINES

1998, 2004:

<If respondent watches TV>

(Int.: Please shuffle card pack and give to respondent.)

I have some cards here listing various kinds of TV program. Please tell me how interested you are in each kind of program: very strongly, strongly, middling, very little or not at all.

(Int.: <1998:> Please circle one response category per item.)

2014:

<If respondent watches TV>

(Int.: Please display card.)

Now I'm going to name several television programmes.

Please tell me how interested you are in each kind of programme on this list: very strongly, strongly, middling, little or not at all?

Political magazines

v527 LAST 3 MONTHS:SEEN MD F. CHRONIC ILLNESS

(Int.: Please display card.)

And now, if you think back on the past three months: for what reason or reasons have you seen a doctor in the past three months? Which items on this card apply to you? Please name the appropriate letter or letters.

(Int.: The question concerns visits to doctor's surgeries and out-patient treatments in clinics and casualty departments, but not examinations during an in-patient stay in a hospital or accompanying relatives or children to the doctor.)

(Int.: Multiple responses possible, unless 'not seen a doctor' selected.)

Because of a chronic illness (e.g. diabetes, high blood pressure/hypertension, rheumatism)

v543 NUMBER OF TOBACCO PRODUCTS PER DAY

2014:

<If respondent smokes.>

About how many cigarettes or other tobacco products do you smoke per day?

(Int.: Put down 0 for less than one cigarette per day.)

0 Less than 1 per day

995 Not available 1980-2002, 2006-2012

996 Respondent doesn't smoke (code 2 in V542)

998 Cannot be constructed

999 No answer

Derivation of data:

In ALLBUS 2004 information on tobacco consumption was gathered using three separate questions for the options "cigarettes", "cigar/cigarillos" and "pipes" (comp. F106-F108 in ZA3762). For this cumulative data set, the 2004 data was recoded so that it could be merged with the data from the single question asked in ALLBUS 2014.

How the data was surveyed in ALLBUS 2004:

Filter question 1:

- "Do you smoke? – Yes / No" (V542 in this data set / F104 in ZA3762)

Filter question 2:

- "What do you smoke? – A Cigarettes / B Cigars, cigarillos / C Pipe" (not included in this data set / F105 in ZA3762)

Up to 3 questions on tobacco consumption:

- "About how many cigarettes do you smoke per day?" (V543 in this data set / F106 in ZA3762)

- "About how many cigars/cigarillos do you smoke per day?" (V543 in this data set / F107 in ZA3762)

- "About how many pipes do you smoke per day?" (V543 in this data set / F108 in ZA3762)

Derivation of data for the cumulative data set:

V543 contains the sum of valid answers to the three questions F106, F107 and F108 in ALLBUS 2004 if there is valid data for at least one of these three questions.

V543 is coded as 'No answer' if all three questions F106-F108 in ALLBUS 2004 are coded as 'No answer'.

V543 is coded as 'Respondent doesn't smoke' if all three questions F106-F108 in ALLBUS 2004 are coded as 'Not applicable'.

All other cases are coded as 'Cannot be constructed'.

Comment:

v550 BODY-MASS-INDEX

Description of variable:

Body-Mass-Index (BMI)

96 2008: no participation in ISSP 'Leisure Time and Sports'; 2012: no participation in ISSP 'Health'; not available
1980-2002, 2006, 2010

99 No answer, calculation not possible

Derivation of data:

The data in this variable was calculated based on the information in V546 (body height) and V548 (weight):

$BMI (V550) = \text{weight in kg} (V548) / (\text{body height in meters} (V546) \times \text{body height in meters} (V546))$

Results were rounded to two decimal places.

V550 was coded as "Cannot be constructed" if there was no valid information for one or both of the variables
V546 (body height) and V548 (weight).

Comment:

N-Valid: 9518

N-Missing: 51676

Minimum: 13.86

Maximum: 62.50

Median: 25.2800

Mean: 25.9580

Standard deviation: 4.65383

In 2008 and 2012, this derived variable was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-data are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

Note:

Body-Mass-Index

The Body-Mass-Index (BMI) is used as a general guideline to evaluate human body weight in relation to height. It is defined as the weight of a person (in kg) divided by the square of the person's height (in m):

$BMI = \text{weight (kg)} / (\text{height (m)} \times \text{height (m)})$

As an individual-level indicator of health risks, BMI has some generally recognized shortcomings (comp. World Health Organization (2000), 8-9). It is, however, an established and widely used population-level measure in national and international public health reporting (for the German context compare for example

Arbeitsgemeinschaft der obersten Landesgesundheitsbehörden (2003), 376-379). In World Health Organization (2000) BMI is characterized as „the most useful, albeit crude population-level measure of obesity“ (9).

Literature:

AOLG Arbeitsgemeinschaft der obersten Landesgesundheitsbehörden 2003: Indikatorensatz für die Gesundheitsberichterstattung der Länder. Dritte, neu bearbeitete Fassung. Band 1, Bielefeld: Ministerium für Gesundheit, Soziales, Frauen und Familie des Landes Nordrhein-Westfalen.

World Health Organization 2000: Obesity: preventing and managing the global epidemic. Report of a WHO Consultation. WHO Technical Report Series 894. http://whqlibdoc.who.int/trs/WHO_TRS_894.pdf (retrieved 08 June 2015).

v551 BODY-MASS-INDEX, CATEGORIZED

Description of variable:

Body-Mass-Index (BMI), categorized

0 2008: no participation in ISSP 'Leisure Time and Sports'; 2012: no participation in ISSP 'Health'; not available
1980-2002, 2006, 2010

- 1 BMI under 18,5 - underweight
- 2 BMI 18,5 to under 25 - normal range
- 3 BMI 25 to under 30 - overweight
- 4 BMI 30 and higher - obese
- 8 Don't know
- 9 No answer, no calculation possible

Derivation of data:

This variable groups the data in V550 BODY-MASS-INDEX.

Category boundaries were defined with reference to the cut-off points for underweight, overweight and obesity in adults recommended by the WHO (World Health Organization (2000), 9).

Literature:

World Health Organization 2000: Obesity: preventing and managing the global epidemic. Report of a WHO Consultation. WHO Technical Report Series 894. http://whqlibdoc.who.int/trs/WHO_TRS_894.pdf (retrieved 08 June 2015).

Comment:

In 2008 and 2012, this derived variable was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-data are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

Note:

Cosmologies

The item battery on cosmologies is part of the module 'Religion and World View'. Both the content of the item battery and the survey mode used to field the questions varied over time.

- The module 'Religion and World View' was first surveyed in ALLBUS 1982. The item battery on cosmologies contained a total of eight items. Only three of these original questions are part of this cumulative data set (V569, V571 and V573), the rest has not been replicated in subsequent ALLBUS surveys. In 1982, this part of the survey was administered as a self-completion questionnaire.

- ALLBUS 1992 surveyed an updated version of the module 'Religion and Worldview'. The item battery on cosmologies now comprised six items (V568-V573), three of which were replicated from the 1982 survey. The questions were administered by an interviewer using a paper questionnaire (PAPI).

- ALLBUS 2002 and ALLBUS 2012 replicated the 1992 module 'Religion and Worldview' with the six-item battery on cosmologies (V568-V573). The questions were administered by an interviewer using an electronic questionnaire (CAPI).

v569 THERE IS A GOD WHO WANTS TO BE GOD F. US

1982:

The next part of our interview deals with whether there is a higher reality one can believe in, beyond the world we live in.

(Int.: Please point to the opposite page.)

On this list there are some opinions in this regard. On the top of the page you will find the possible responses you can use to evaluate each of the opinions. As you can see, each of the responses is assigned a number.

Number 1 means: Completely agree

Number 2 means: Tend to agree

Number 3 means: Have no fixed opinion on this

Number 4 means: Tend to disagree

Number 5 means: Completely disagree

Number 6 means: Have never thought about this

For each of the opinions put down the number of the response which comes closest to your own view.

(Int.: Hand over pencil. Ask respondent to fill in the appropriate answer code on the opposite page.)

1992, 2002, 2012:

The next part of our interview deals with whether there is a higher reality one can believe in, beyond the world we live in.

(Int.: Please, present card.)

Using this scale, please tell me for each of the statements on this card to what extent you agree with it.

There is a God who wants to be God for us.

v574 LIFE ONLY HAS MEANING BECAUSE OF GOD

1982:

Many people ask themselves what meaning life really has. On this page you can find some opinions about the meaning of life.

(Int.: Point again to the opposite page.)

For each of these opinions put down again the number of the response which comes closest to your own opinion.

Number 1 means: I fully agree with it

Number 2 means: I tend to agree with it

Number 3 means: Have no fixed opinion on this

Number 4 means: I don't agree very much with it

Number 5 means: I don't agree at all with it

Number 6 means: Have never thought about this

(Int.: Hand over pencil. Ask respondent to fill in the appropriate answer code on the opposite page.)

1992, 2002, 2012:

Many people ask themselves what meaning life really has. On this card you can find some opinions about the meaning of life.

(Int.: Please, present card.)

Using this scale, please tell me for each of the statements on this card to what extent you agree with it.

Life only has meaning for me because there is a God.

0 Not available 1980, 1984-1991, 1994-2000, 2004-2010, 2014

1 I fully agree with it

2 I tend to agree with it

3 Have no fixed opinion on this

4 I don't agree very much with it

5 I don't agree at all with it

6 Have never thought about this

9 No answer

Comment:

In 1982 this variable was surveyed as part of a split questionnaire (comp. spl82).

Note:

Meaning of life

The item battery on meaning of life (V574-V579) is part of the module 'Religion and World View'. Both the content of the item battery and the survey mode used to field the questions varied over time.

- The module 'Religion and World View' was first surveyed in ALLBUS 1982. The item battery on meaning of life contained a total of ten items. Only four of these original questions are part of this cumulative data set (V574,

V575, V576 and V578), the rest has not been replicated in subsequent ALLBUS surveys. In 1982, this part of the survey was administered as a self-completion questionnaire.

- ALLBUS 1992 surveyed an updated version of the module 'Religion and Worldview'. The item battery on meaning of life now comprised six items (V574-V579), four of which were replicated from the 1982 survey. The questions were administered by an interviewer using a paper questionnaire (PAPI).

- ALLBUS 2002 and ALLBUS 2012 replicated the 1992 module 'Religion and Worldview' with the six-item battery on meaning of life (V574-V579). The questions were administered by an interviewer using an electronic questionnaire (CAPI).

Many people ask themselves what meaning life really has. On this card you can find some opinions about the meaning of life.

(Int.: Please, present card.)

Using this scale, please tell me for each of the statements on this card to what extent you agree with it.

In my opinion, life serves no purpose at all.

0 Not available 1980-1991, 1994-2000, 2004-2010, 2014

1 I fully agree with it

2 I tend to agree with it

3 Have no fixed opinion on this

4 I don't agree very much with it

5 I don't agree at all with it

6 Have never thought about this

9 No answer

Note:

Meaning of life

The item battery on meaning of life (V574-V579) is part of the module 'Religion and World View'. Both the content of the item battery and the survey mode used to field the questions varied over time.

- The module 'Religion and World View' was first surveyed in ALLBUS 1982. The item battery on meaning of life contained a total of ten items. Only four of these original questions are part of this cumulative data set (V574, V575, V576 and V578), the rest has not been replicated in subsequent ALLBUS surveys. In 1982, this part of the survey was administered as a self-completion questionnaire.

- ALLBUS 1992 surveyed an updated version of the module 'Religion and Worldview'. The item battery on meaning of life now comprised six items (V574-V579), four of which were replicated from the 1982 survey. The questions were administered by an interviewer using a paper questionnaire (PAPI).

- ALLBUS 2002 and ALLBUS 2012 replicated the 1992 module 'Religion and Worldview' with the six-item battery on meaning of life (V574-V579). The questions were administered by an interviewer using an electronic questionnaire (CAPI).

v580 SCALE OF RELIGIOUSNESS, RESPONDENT

Would you describe yourself as more religious or more not religious?

We have a scale for this.

Where would you place yourself on this scale?

1982, 1992, 2000 PAPI:

Please tick one of the boxes.

(Int.: Please hand over a pencil and the questionnaire. Respondent should tick the appropriate box himself/herself on the next page. Please make sure that the tick is placed inside the boxes.)

2000 CAPI, 2002, 2010, 2012:

(Int.: Please present card.)

Please choose one of the boxes and tell me the letter under this box.

(Int.: Ask for the appropriate letter and record it.)

v631 WOULD YOU HAVE A CHURCH WEDDING TODAY?

1982:

Suppose you were to marry today:

Would you get married in church or not?

1992:

<If respondent does not live with spouse and has a steady partner who is not employed full- or part-time>

Suppose you were to marry today:

Would you get married in church or not?

2002

<If respondent has a steady partner>

Suppose you were to marry today:

Would you get married in church or not?

0 1992: respondent is married and lives with spouse (code 1 in V955), has no steady partner (code 2 in V1140), steady partner is employed full- or part-time (code 1, 2, 7 in V1184);

2002: respondent is married and lives with spouse (code 1 in V955), has no steady partner (code 2 in V1140);

not available 1980, 1984-1991, 1994-2000, 2004-2014

1 Yes, would marry in church

2 No, would not get married in church

8 Don't know

9 No answer

Comment:

Please note that there have been considerable differences in the skip patterns for this question over the years.

A comparison of the data from 1982, 1992 and 2002 should therefore be carefully considered.

v660 GOVERNMENT AGENCIES WORK TOO SLOWLY

Here is a set of statements about the behavior of civil servants working at government agencies. Think about your personal experiences in dealing with government agencies and tell me the extent to which you agree with each of these views. Use the scale at the bottom of the card to indicate your opinion: The bottom box 1 means that you completely disagree with this statement; the highest box 7 means that you agree completely. Use the numbers in between to qualify your response.

(Int.: Please present card - record answer code.)

The processing of applications and other matters in government agencies usually takes longer than actually necessary.

v665 BETTER NOT CHALLENGE GOVERNMENT AGENCIES

Here is a set of statements about the behavior of civil servants working at government agencies. Think about your personal experiences in dealing with government agencies and tell me the extent to which you agree with each of these views. Use the scale at the bottom of the card to indicate your opinion: The bottom box 1 means that you completely disagree with this statement; the highest box 7 means that you agree completely. Use the numbers in between to qualify your response.

(Int.: Please present card - record answer code.)

It's better not to challenge a government agency even if your complaint is justified.

0 Not available 1982-1988, 1990 (code 2 in spl90), 1991-2014

1 Completely disagree

2 ..

3 ..

4 ..

5 ..

6 ..

7 Completely agree

97 Refused

98 Don't know

99 No answer

Comment:

In 1990 this variable was surveyed as part of a split questionnaire (comp. spl90).

v682 IMPORTANCE: ACHIEVEMENT IN JOB

Everybody has certain ideas that shape their life and behavior. If you think about what you actually want to achieve in your life: How important are the following things for you personally?

(Int.: Please present card.)

Using this scale, please tell me. Choose 1 on the scale if something is unimportant to you, and 7 if something is extremely important to you.

You can differentiate your answers using the numbers in between.

(Int.: Please read out statements.)

Achieving something in one's job / profession

v685 WITH SUCH A FUTURE, NO MORE CHILDREN

Description of variable:

Anomia:

I'm going to read you some statements now. Please tell me after each one whether you have the same or a different opinion.

(Int.: Please present card and read the statements aloud.)

With the future looking as it does, it's almost irresponsible to bring children into the world.

v707 PROHIBIT BY LAW: MERCY KILLING BY DOCTOR

1990:

And what is your opinion concerning the following types of behaviour?

(Int.: Please present card. Shuffle card pack and hand over cards individually.)

2000:

The next question again deals with some of the types of behaviour described in the previous question. If it was up to you, should these types of behaviour be prohibited by law or should they not be prohibited by law?

(Int.: Please present card. Shuffle card pack and hand over cards individually.)

A doctor gives an incurably ill patient a lethal drug on his/her request.

0 Not available 1980-1988, 1990 (code 2 in spl90), 1991-1998, 2000 CAPI (code 2 in spl00), 2002-2014

1 Should be prohibited by law

2 Should not be prohibited by law

8 Don't know

9 No answer

Comment:

In 1990 and 2000 this variable was surveyed as part of a split questionnaire (comp. spl90 and spl00).

v725 APPROVAL: OBEY THE LAW

What is your opinion about the following statement?

"One must always obey the laws regardless of whether one agrees with them or not."

Using the card, please tell me to what extent you agree or disagree with the statement.

(Int.: Please present card.)

0 Not available 1980-1988, 1991-1998, 2000 CAPI (code 2 in spl00), 2002-2014

1 Completely agree

2 Tend to agree

3 Tend to disagree

4 Completely disagree

8 Don't know

9 No answer

Comment:

In 2000 this variable was surveyed as part of a split questionnaire (comp. spl00).

v729 RESPONDENT: AGE

Description of variable:

Age of respondent

997 Refused

999 No answer

Derivation of data:

Basic rules for calculating age

Age calculation for all ALLBUS surveys followed these basic steps: First, age was calculated by subtracting the year of birth (V727) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V728) were compared. If the month of the interview preceded the month of the respondent's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1982 data the following heuristic was additionally applied when there was no valid information on the month of birth: Because data collection had been completed in May of 1982, it was more likely that the respondent had turned one year older after the interview than before the interview. Therefore, the age calculated from the year of survey and the year of birth was reduced by 1 on the assumption that the interview had taken place before the respondent's birthday.

For the 1984 data it was possible to calculate the respondent's actual age at the time of the interview based on the date of the interview and the exact date of birth. If there was only incomplete data for the date of birth, age was calculated using the basic rules outlined above.

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the respondent's month of birth came after the last month of fieldwork, it could be assumed that the respondent had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the respondent's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the respondent had been interviewed before his or her birthday and the age calculated from year of birth and year of survey was reduced by 1.

v732 RESPONDENT: RELIGIOUS DENOMINATION

1980-1984:

What religion do you belong to?

1986-2002:

(Int.: Please present card.)

What religion do you belong to?

(Int.: Only one choice possible.)

From 2004:

(Int.: Please present card.)

May I ask you what religion you belong to?

(Int.: Only one choice possible.)

- 1 The German Protestant church (excluding free churches)
- 2 A Protestant free church
- 3 The Roman Catholic church
- 4 Another Christian denomination
- 5 Another non-Christian denomination
- 6 No religious affiliation
- 7 Refused
- 9 No answer

Comment:

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

v741 HOW OFTEN DO YOU PRAY? <11-POINT SCALE>

1991, 2008:

(Int.: Please tick only one box.)

Now thinking about the present, about how often do you pray?

1994:

About how often do you pray?

(Int.: Please present card. Only one choice possible.)

0 1991, 2008: no participation in ISSP 'Religion'; not available 1980-1990, 1992, 1996-2006, 2010-2014

1 Never

2 Less than once a year

3 About once or twice a year

4 Several times a year

5 About once a month

6 2-3 times a month

7 Nearly every week

8 Every week

9 Several times a week

10 Once a day

11 Several times a day

99 No answer

Comment:

In 1991 and 2008, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v746 RESP: GENERAL SCHOOL LEAVING CERTIFICATE

Until 1984:

What general school leaving certificate do you have?

(Int.: Please read out answers. Request highest school leaving certificate only.)

From 1986:

(Int.: Please present card. Only one choice possible. Request highest school leaving certificate only.)

What general school leaving certificate do you have?

1 Until 1984: None of these

From 1986: Finished school without school leaving certificate

1991 East: Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

7 From 1986: Still at school

99 No answer

Comment:

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

v749 OCCUPATIONAL TRAINING

What occupational training did you complete?

(Int.: Please present card. Ask for last qualification only.)

- 0 Not available 1991-2014
- 1 No completed vocational training (including vocational school without apprenticeship)
<Keinen beruflichen Ausbildungsabschluß (auch Berufsschule ohne Lehre)>
- 2 Completed trades/crafts or agricultural apprenticeship
<Berufsschulabschluß mit gewerblicher oder landwirtschaftlicher Lehre>
- 3 Completed commercial or other apprenticeship
<Berufsschulabschluß mit kaufmännischer oder sonstiger Lehre>
- 4 Specialized vocational college certificate <Berufsfachschulabschluß>
- 5 Work placement, internship
<Berufliches Praktikum; <from 1986:> Berufliches Praktikum, Volontariat>
- 6 Master (craftsman), technician or equivalent college certificate
<Meister-/ Techniker- oder gleichwertiger Fachschulabschluß>
- 7 University of Applied Science degree (or engineering college degree)
<Fachhochschulabschluß (auch Ingenieurschulabschluß)>
- 8 University degree
- 9 <From 1986:> Completed other occupational training
- 97 Refused
- 99 No answer

Derivation of data:

In ALLBUS 1980 to ALLBUS 1984 respondents were asked to indicate their occupational training by choosing their last occupational qualification from a list of categories (V749). Only one answer was permitted. As of 1986, the ALLBUS program uses a multiple response question to collect information on occupational training (compare V751-V764). For this cumulative data set, information from this multiple response question (V751-V754, V756-V758 and V760-V764) was recoded in such a way that the data could be merged with the data in V749. Thus, the time series for V749 could be extended to cover the period up to 1990. However, due to the largely incomparable systems of education in former East Germany and West Germany, the practice of reconstructing V749 has been discontinued after 1990.

Users wishing to work with the data in V749 should take into account the following particularities of the reconstructed data:

- As there is no indication which qualification from the multiple response question is actually the last one, it was assumed that the highest qualification was also the last qualification.
- There is a possibility that the extended list of categories used from 1986 onwards influenced the respondents' answers.
- The response options for the multiple response question contain the additional code 9 'Completed other occupational training'.

- Until 1984, code 1 explicitly includes respondents who attended a vocational school without being in a traineeship scheme.

- In 1986 code 1 'No completed vocational training' also contains respondents who had not yet finished their training at the time of the interview. As of 1988 skip patterns were changed so that respondents who were in occupational training at the time of the interview but had previously earned a different qualification could be assigned their original qualification.

- In 1980-1984 code 3 was 'Completed commercial or other traineeship'. As of 1986 this category has been restricted to 'Completed commercial traineeship' (compare V757).

These differences in the actual survey practice can lead to bias in the data. One obvious example is code 3 'Completed commercial or other traineeship'. The frequency count in the reconstructed data is noticeably lower than that in the data for 1980 to 1984.

v767 RESP.: ISCED 1997 - 5 LEVELS

Description of variable:

International Standard Classification of Education (ISCED) 1997, 5 levels - respondent

- 1 Level 1 - Primary education or first stage of basic education
- 2 Level 2 - Lower secondary or second stage of basic education
- 3 Level 3 - (Upper) secondary education
- 4 Level 4 - Post-secondary non-tertiary education
- 5 Level 5 - First stage of tertiary education
- 94 Still at school
- 99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V746) and on vocational or professional training (V749, V753-V764).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 1997

The International Standard Classification of Education (ISCED) 1997 was developed by UNESCO as an internationally comparable classification of education levels. It provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2006: 7). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (UNESCO 2006: 19). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education (UNESCO 2006: 10).

ISCED 1997 distinguishes seven levels of education (UNESCO 2006: 19):

Level 0 - Pre-primary education

Level 1 - Primary education or first stage of basic education

Level 2 - Lower secondary or second stage of basic education

Level 3 - (Upper) secondary education

Level 4 - Post-secondary non-tertiary education

Level 5 - First stage of tertiary education

Level 6 - Second stage of tertiary education

Using survey data, ISCED 1997 can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). The implementation of ISCED 1997 for ALLBUS is modelled on the practice documented for the German microcensus (comp. Schroedter et al. 2006: 22) and the similar rules laid out in Hoffmeyer-Zlotnik et al. 2010 (76). There are, however, a number of factors that limit the full implementation of ISCED 1997 with ALLBUS data. On the one hand, these limitations are due to the universe sampled for ALLBUS. The ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' cannot be covered with ALLBUS data. On the other hand, there are limitations related to the type and scope of data surveyed. Firstly, this is the case for respondents who are still at school. These respondents cannot be assigned an ISCED level based on the type of school they attend, because this information is not available. Secondly, the ALLBUS-implementation of ISCED 1997 does not include a further differentiation of levels 3 and 5 (Schroedter et al. 2006: 22), because the data on vocational qualifications is not specific enough to accurately distinguish the proposed subcategories in all cases. And finally, ALLBUS does not distinguish between ISCED Level 5 "First Stage of Tertiary Education" and ISCED Level 6 – "Second Stage of Tertiary Education", because information on the type of university degree is only available for the latest cross-section surveys. Instead, all respondents with university degrees are classified at Level 5.

Mapping of qualifications to ISCED 1997 Levels:

Level 0 - Pre-primary education (not covered by ALLBUS)

Level 1: Primary education or first stage of basic education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower Secondary Education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper Secondary Education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post Secondary Education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Tertiary Education

Respondents who have a technical college or vocational college degree, master craftsmen or respondents with equivalent degrees, and respondents who have a university degree are classified at ISCED-Level 5.

Level 6: Second Stage of Tertiary Education (not implemented for ALLBUS)

ISCED-Level 6 would be reserved for respondents who have a research degree (e.g. a doctoral degree).

v768 RESP.: ISCED 2011

Description of variable:

International Standard Classification of Education (ISCED) 2011 - respondent

- 0 Not constructed 1980-2010
- 1 Level 1 - Primary education
- 2 Level 2 - Lower secondary education
- 3 Level 3 - Upper secondary education
- 4 Level 4 - Post secondary non-tertiary education
- 5 Level 5 - Short-cycle tertiary education
- 6 Level 6 - Bachelor's or equivalent level
- 7 Level 7 - Master's or equivalent level
- 8 Level 8 - Doctoral or equivalent level
- 94 Still at school
- 99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V746) and on vocational or professional training (V749, V753-V766).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 2011

The International Standard Classification of Education (ISCED) 2011 is an improved version of ISCED 1997, which was developed by UNESCO as an internationally comparable classification of education levels. Like its predecessor, ISCED 2011 provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2012: 6). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (comp. Section 9 in UNESCO 2012). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education. For ISCED 2011, terms and definitions were updated and the rules of classification were revised. Moreover, the classification was extended to cover early childhood education and to provide a more differentiated classification of tertiary education (UNESCO 2012: 62-68).

ISCED 2011 has “parallel coding schemes for education programmes (ISCED Programmes or ISCED-P) and levels of educational attainment (ISCED Attainment or ISCED-A)” which define nine general educational levels (UNESCO 2012: 21).

ISCED-A Level 0 – Less than primary education

ISCED-A Level 1 - Primary education

ISCED-A Level 2 - Lower secondary education

ISCED-A Level 3 - Upper secondary education

ISCED-A Level 4 - Post-secondary non-tertiary education

ISCED-A Level 5 – Short-cycle tertiary education

ISCED-A Level 6 – Bachelor's or equivalent level

ISCED-A Level 7 – Master's or equivalent level

ISCED-A Level 8 – Doctoral or equivalent level

Using survey data, ISCED can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). There are, however, a number of factors that limit the full implementation of ISCED 2011 with ALLBUS data. Because there is only insufficient data on tertiary education, ISCED 2011 has not been constructed for ALLBUS 1980-2008. Moreover, the ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 ‘Pre-primary education’ is not covered by ALLBUS data. Finally, ALLBUS only implements the highest level of the ISCED 2011 classification. Information of the type needed to form classes on second- and third-digit level (comp. UNESCO 2012: 21f.) is not part of the ALLBUS data.

The implementation of ISCED 2011 could for the most part follow the established practice for ISCED 1997 (comp. Schroedter et al. 2006; Hoffmeyer-Zlotnik et al. 2010). New mappings of qualifications to ISCED levels were only necessary for the area of tertiary education.

Mapping of qualifications to ISCED-A levels

Level 0 – Less than primary education

(not covered by ALLBUS)

Level 1: Primary education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower secondary education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper secondary education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post-secondary non-tertiary education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Short-cycle tertiary education

Respondents who have a technical college or vocational college degree, master craftsmen and respondents with equivalent degrees are classified at ISCED-Level 4.

Level 6: Bachelor's or equivalent level

Respondents who have a bachelor's degree or an unspecified university degree are classified at ISCED-Level 6.

Level 7: Master's or equivalent level

Respondents who have a master's degree or an equivalent degree ("Magister", "Diplom" or "Staatsexamen") are classified at ISCED-Level 7.

Level 8: Doctoral or equivalent level

Respondents who have a research degree (e.g. a doctoral degree) are classified at ISCED-Level 8.

v770 RESPONDENT: CURRENT EMPLOYMENT STATUS

(Int.: Please present card.)

And now let's continue with employment and your occupation. Which of the categories on the card applies to you?

(Int.: Please present card. Only one choice possible.)

1991 East:

(Int.: If there are questions: Employees with contracts on hold should choose an answer corresponding to the number of working hours agreed in their contracts.)

From 2000:

(Int.: Since this is an important question, please try to elicit an answer.

If there are difficulties referring to the classification, here are some pointers for you:

Trainees are considered employees in a regular occupation <full-time or part-time employment>.

FAMILY MEMBERS ASSISTING IN A FAMILY BUSINESS who are full-time or part-time <"half-time"> employees in the business of a household or a family member without having a formal contract are considered employees in a regular occupation (either full-time or part-time).

Employed LESS THAN PART <"HALF"> TIME are persons who are gainfully employed while, at the same time, one of the following applies:

- they attend a FULL-TIME SCHOOL (pupils and students),
- they are registered as UNEMPLOYED or
- they draw a RETIREMENT BENEFIT/PENSION as a result of previous employment.

Persons on PARENTAL LEAVE (excluding those who nevertheless work part-time) or on ANOTHER TYPE OF LEAVE OF ABSENCE are considered not working.)

- 1 Full-time employment
- 2 Part- <"half-"> time employment
- 3 Less than part- <"half-"> time employment
- 4 <1980, from 1986:> Not working
- 5 <Until 1988:> Unemployed
- 6 <Until 1988:> Military/alternative community service
- 7 <1982, 1984:> housewife/househusband, not working
- 8 <1982, 1984:> Retired
- 10 <1982, 1984:> At school, university, in training
- 11 <1982, 1984:> Not working for other reasons
- 12 <1991-1994:> Working short-time <1991 only for respondents from the new federal states>
- 99 No answer

v772 RESPONDENT: CURRENT OCCUPATION

<If respondent is employed full- or part-time>

1988-1992:

What is your current occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side.)

0 Not employed full- or part-time (until 1986: code 3-5, 7-11 in V770; from 1988: code 3-6 in V770)

1 Independent farmer

2 Independent professional

3 Self-employed in trade or craft, industry, service sector, etc.

4 Civil servants/judges/professional soldiers

5 Employees

6 Workers

7 In vocational training

8 Family member assisting in family business

9 <From 1991:> Farmer on a cooperative farm <1991: only for respondents from the new federal states>

91 <Until 1986:> Military/alternative community service

97 Refused

99 No answer

Derivation of data:

The data in this variable was directly surveyed only between 1988 and 1992. For all other years this variable groups the data in V773.

v773 R.: CURRENT OCCUPATION, REFERENCE NUMBER

Until 1986, 1994-2014:

<If respondent is employed full- or part-time>

Please classify your occupational position according to this card.

(Int.: Please present card. Record answer code and also tick it off.)

1988-1992:

<If respondent is employed full- or part-time>

And which of these descriptions fits your position?

Please tell me the appropriate answer code from this card.

(Int.: Please present the card chosen in V772 again. Only one choice possible.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha <1980: 20 ha and over>
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees (1980: 10 or more employees)
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 <Until 1986:> Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
 - 71 Trainee in trades/crafts sector
 - 72 Trainee in domestic/agricultural sector
 - 73 Civil servant trainee
 - 74 Trainee on short-term work placement/internship
-
- 0 Not employed full- or part-time (until 1986: code 3-5, 7-11 in V770; since 1988: code 3-6 in V770)
 - 97 Refused
 - 99 No answer

v774 **RESP.: CURRENT OCCUPATION, ISCO 1968**

Description of variable:

Classification of occupation according to ISCO 1968

<If respondent is employed full- or part-time>

What work do you do in your main job?

Please describe your work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent not employed full- or part-time (code 3-11 in V770); not available 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

v775 R.: CURRENT OCCUPATION. MINOR GROUP I68

Description of variable:

Classification of occupation according to the occupational minor group

0 Respondent not employed full- or part-time (code 3-11 in V770); not available 2012, 2014

104 Workers with unclassifiable or inadequately described occupation

107 Refused

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v776 R.: CURRENT OCCUPATION. MAJOR GROUP I68

Description of variable:

Classification of occupation according to the occupational major group

- 0 Respondent not employed full- or part-time (code 3-11 in V770); not available 2012, 2014
- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others
- 99 No answer

v777 R.: CURRENT TREIMANPRESTIGE ISCO 1968

Description of variable:

Classification of occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent not employed full- or part-time (code 3-11 in V770); not available 2012, 2014

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v779 R.: CURRENT MAGNITUDEPRESTIGE ISCO 1968

Description of variable:

Classification of occupation (ISCO 1968) according to the Magnitude-Prestigeskala (MPS)

0 Respondent not employed full- or part-time (code 3-11 in V770); not available 2012, 2014

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v781 R.: CURRENT OCCUPATION, ISEI ISCO 1968

Description of variable:

Classification of occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI) nach Ganzeboom

0 Respondent not employed full-or part-time (code 3-4 in V770); ISCO cannot be coded (code 1004 in V774); no ISEI value for ISCO code; not available 1980-1998, 2012, 2014

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Harry B. G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman und J. De Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21(1): 1-56.

v783 R.: CURRENT OCC. GOLDTHORPE CLASSES, I68

Description of variable:

Goldthorpe class scheme:

Derived from information on respondent's current occupation

0 Respondent not employed full- or part-time (code 3-11 in V770), insufficient occupational information for classification in class scheme; not available 2012, 2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V773 and V774.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

Petra Beckmann und Reiner Trometer 1991: Neue Dienstleistungen des ALLBUS : Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA Nachrichten 15(28): 7-17.

v784 **RESP.: CURRENT OCCUPATION, ISCO 1988**

Description of variable:

Classification of occupation according to ISCO 1988

0 Respondent not employed full- or part-time (code 3-4 in V770); not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v785 R.: CURRENT OCCUPATION, SIOPS ISCO 1988

Description of variable:

Classification of occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent not employed full- or part-time (code 3-4 in V770), ISCO cannot be coded (code 10004 in V784), no SIOPS value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v786 R.: CURRENT OCCUP., SIOPS ISCO 88, CAT.

Description of variable:

Classification of occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS), categorized

0 Respondent not employed full- or part-time (code 3-4 in V770), ISCO cannot be coded (code 10004 in V784), no SIOPS value for ISCO code; not available 1980-1998

v787 R.: CURRENT MAGNITUDEPRESTIGE ISCO 1988

Description of variable:

Classification of occupation (ISCO 1988) according to the Magnitudeprestige Scale (MPS)

0 Respondent not employed full- or part-time (code 3, 4 in V770), ISCO cannot be coded (code 10004 in V784), no MPS value for ISCO code; not available 1980-1991, 2012

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v789 R.: CURRENT OCCUPATION, ISEI ISCO 1988

Description of variable:

Classification of occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent not employed full- or part-time (code 3-4 in V770), ISCO cannot be coded (code 10004 in V784), no ISEI value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For more information, compare:

v791 **RESP.: CURRENT OCCUPATION, ISCO 2008**

Description of variable:

Classification of occupation according to ISCO 2008

0 Respondent not employed full- or part-time (code 3-4 in V770); not available 1980-2010

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-08)

Source:

Kommission der Europäischen Gemeinschaften 2009: Empfehlung der Kommission vom 29. Oktober 2009 über die Verwendung der Internationalen Standardklassifikation der Berufe (ISCO-08), <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:0047:DE:PDF>, retrieved 19.05.2015.

ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn) based on the source cited above. A German translation of occupational titles was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

Please refer to 'Appendix C' of the variable report for a comprehensive list of codes used in the data.

v792 R.: CURRENT OCCUPATION, SIOPS ISCO 08

Description of variable:

Classification of occupation (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Resondent is not employed full- or part-time (code 3-4 in V770); unclassifiable or inadequately described occupation (code 10004 in V791); SIOPS cannot be constructed from ISCO-Code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v794 R.: CURRENT OCCUPATION, ISEI ISCO 08

Description of variable:

Classification of occupation (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is not employed full- or part-time (code 3-4 in V770); unclassifiable or inadequately described occupation (code 10004 in V791); ISEI cannot be constructed from ISCO-Code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v796 RESPONDENTS INDUSTRY

<If respondent is employed full- or part time>

For what kind of business or employer do you work?

Is something produced (what?), is it a wholesale or a retail business (what is sold?), or what general designation does your place of work have?

(Int.: Carefully record what industry or trade the respondent's place of work belongs to.)

0 Respondent not employed full- or part-time (code 3-11 in V770); not available 1994-2014

1 Agriculture, forestry, horticulture

2 Fishing, fish farming, animal husbandry

3 Utilities (power, water supply)

4 Mining

5 Chemical industry (incl. coal products manufacturing) and petrochemical manufacturing

6 Plastics, rubber and asbestos manufacturing

7 Quarrying and manufacturing of stones, sand and clay; ceramics and glass manufacturing

8 Iron and non-ferrous metal production, foundries and steel manufacturing

9 Steel construction, machinery and motor vehicle manufacturing

10 Electronic products, precision mechanics and optics; manufacturing of EBM-products, musical instruments, sporting and athletic goods, toys and jewellery

11 Wood product and paper manufacturing, printing

12 Leather, textile and apparel manufacturing

13 Food, drink and tobacco

14 Construction

15 Construction - specialty trade contractors

16 Wholesale trade

17 Wholesale trade agents and brokers

18 Retail trade

19 Rail transportation

20 Postal service (including: banking services)

21 Other transportation and other communication services

22 Finance and credit intermediation (commercial banking, savings institutions) except postal banking (code 20)

23 Insurance (except social security)

24 Services provided by companies or professionals, food or laundry services, publishing industries, etc.

25 Non-profit organisations (churches, associations, etc.)

26 Private households

27 Public administration (legislative, executive, justice, military)

28 Social security

97 Industry cannot be categorized or inadequate description

99 No information, refused

Derivation of data:

This classification follows the 'ZUMA-Branchenschlüssel', which is a simplified version of the three digit industry codes from the Federal Statistical Office (Statistisches Bundesamt 1979).

Literature:

Statistisches Bundesamt (ed.) (1979). Systematik der Wirtschaftszweige mit Erläuterungen. Stuttgart: Metzler-Poeschel.

v808 RESPONDENT: LAST OCCUPATION

<If respondent has formerly been employed full- or part-time>

1988-1992:

What was your last occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side.)

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806)

1 Independent farmer

2 Independent professional

3 Self-employed in trade or craft, industry, service sector, etc.

4 Civil servants/judges/professional soldiers

5 Employees

6 Workers

7 In vocational training

8 Family member assisting in family business

9 <From 1991:> Farmer on a cooperative farm <1991: only for respondents from the new federal states>

91 <Until 1986:> Military/alternative community service

97 Refused

99 No answer

Derivation of data:

The data in this variable was directly surveyed only between 1988 and 1992. For all other years this variable groups the data in V809.

v809 RESP.: LAST OCCUPATION, REFERENCE NUMBER

Until 1986, 1994-2014:

<If respondent has formerly been employed full- or part-time>

Please classify your last occupational position according to this card.

(Int.: Please present card and record answer.)

1988-1992:

<If respondent has formerly been employed full- or part-time>

And which of these descriptions fits your last position?

Please tell me the appropriate answer code (from 1990: on this card).

(Int.: Please present the card and enter answer code.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha <1980: 20 ha and over>
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008: 1 employee or none>
- 22 2-9 employees
- 23 10-49 employees <1980: 10 or more employees>
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 <Until 1986:> Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806)
- 97 Refused
- 99 No answer

v810 **RESPONDENT: LAST OCCUPATION, ISCO 1968**

Description of variable:

Classification of last occupation according to ISCO 1968

<If respondent has formerly been employed full- or part-time>

What work did you do in your last main job?

Please describe your work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), <until 1986:> respondent was doing military or alternative community service (code 49 in V809); not available 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

v811 R.: LAST OCCUPAT. MINOR GROUP ISCO 1968

Description of variable:

Classification of last occupation (ISCO 1968) according to the occupational minor group

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), <until 1986:> respondent was doing military or alternative community service (code 49 in V809); not available 2012, 2014

104 Workers with unclassifiable or inadequately described occupation

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v812 R.: LAST OCCUPAT. MAJOR GROUP ISCO 1968

Description of variable:

Classification of last occupation (ISCO 1968) according to the occupational major group

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), <until 1986:> respondent was doing military or alternative community service (code 49 in V809); not available 2012, 2014

- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others
- 99 No answer

v813 R.: LAST OCCUPATION TREIMANPRESTIGE I68

Description of variable:

Classification of last occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), <until 1986:> respondent was doing military or alternative community service (code 49 in V809); not available 2012, 2014

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v815 R.: LAST OCCUPAT., MAGNITUDEPRESTIGE I68

Description of variable:

Classification of last occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), <until 1986:> respondent was doing military or alternative community service (code 49 in V809); not available 2012, 2014

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v817 **RESP.: LAST OCCUPATION, ISEI ISCO 1968**

Description of variable:

Classification of last occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), ISCO cannot be coded (code 1004 in V810), no ISEI value for ISCO code; not available 1980-1998, 2012, 2014

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

v819 R.:LAST OCCUPAT., GOLDTHORPE CLASSES I68

Description of variable:

Goldthorpe class scheme:

Derived from information on respondent's last occupation

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), <until 1986:> respondent was doing military or alternative community service (code 49 in V809); insufficient occupational information for classification in class scheme; not available 2012, 2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)

12 From 1991: Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V809 and V810.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

v820 RESPONDENT: LAST OCCUPATION, ISCO 1988

Description of variable:

Classification of last occupation according to ISCO 1988

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806); not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva:

International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v821 R.: LAST OCCUPATION, SIOPS ISCO 1988

Description of variable:

Classification of last occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), ISCO cannot be coded (code 10004 in V820), no SIOPS value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v822 R.: LAST OCCUPATION,SIOPS ISCO 1988,CAT.

v823 R.:LAST OCCUPATION MAGNITUDEPRESTIGE I88

Description of variable:

Classification of last occupation (ISCO 1988) according to the Magnitude-Prestigeskala (MPS)

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), ISCO cannot be coded (code 10004 in V820), no MPS value for ISCO code; not available 1980-1991, 2012, 2014

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v825 RESP.: LAST OCCUPATION, ISEI 1988

Description of variable:

Classification of last occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806), ISCO cannot be coded (code 10004 in V820), no ISEI value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For more information, compare:

v827 **RESPONDENT: LAST OCCUPATION, ISCO 2008**

Description of variable:

Classification of last occupation according to ISCO 2008

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), respondent has never been employed full- or part-time (code 9996 in V806); not available 1980-2010

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-08)

Source:

Kommission der Europäischen Gemeinschaften 2009: Empfehlung der Kommission vom 29. Oktober 2009 über die Verwendung der Internationalen Standardklassifikation der Berufe (ISCO-08), <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:0047:DE:PDF>, retrieved 19.05.2015.

ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn) based on the source cited above. A German translation of occupational titles was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

Please refer to 'Appendix C' of the variable report for a comprehensive list of codes used in the data.

v828 R.: LAST OCCUPATION, SIOPS ISCO 08

Description of variable:

Classification of last occupation (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), has never been employed full- or part-time (code 9996 in V806); unclassifiable or inadequately described occupation (code 10004 in V827);

SIOPS cannot be constructed from ISCO-Code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v830 R.: LAST OCCUPATION, ISEI ISCO 08

Description of variable:

Classification of last occupation (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is currently employed full- or part-time (code 1, 2, 12 in V770), has never been employed full- or part-time (code 9996 in V806); unclassifiable or inadequately described occupation (code 10004 in V827); ISEI cannot be constructed from ISCO-Code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v835 FIRST OCCUPATION, REFERENCE NUMBER

<If respondent is or was employed full- or part-time>

Please classify your first occupational position according to this card.

(Int.: Please present card and record answer code.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha; <1980:> 20 ha and over
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 <Until 1986:> Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)

54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

60 Unskilled worker

61 Semi-skilled worker

62 Skilled worker

63 Foreman

64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

70 Trainee in commercial/administrative sector

71 Trainee in trades/crafts sector

72 Trainee in domestic/agricultural sector

73 Civil servant trainee

74 Trainee on short-term work placement/internship

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2012

99 No answer

v836 FIRST OCCUPATION, ISCO 1968

Description of variable:

Classification of first occupation according to ISCO 1968

<If respondent is or was employed full- or part-time>

What work did you do in your first main job?

Please describe your work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V744), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

1004 Workers with unclassifiable or inadequately described occupation

1006 <1991:> Still in first job

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

v837 FIRST OCCUPATION, OCCUPATIONAL MINOR GRP

Description of variable:

Classification of first job (ISCO 1968) according to the occupational minor group

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V835), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

104 Workers with unclassifiable or inadequately described occupation

106 <1991:> still in first job

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v838 FIRST OCCUPATION, OCCUPATIONAL MAJOR GRP

Description of variable:

Classification of first job (ISCO 1968) according to the occupational major group

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V835), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

1 Professional, technical and related workers

2 Administrative and managerial workers in public service and industry

3 Clerical and related professions

4 Sales professions

5 Service professions (incl. members of the armed forces)

6 Agricultural, animal husbandry and forestry workers, fishermen and hunters

7 Production and related workers, transport equipment operators and laborers

8 Others

96 <1991:> still in first job

99 No answer

v839 FIRST OCCUPATION, TREIMANPRESTIGE

Description of variable:

Classification of first job (ISCO 1968) according to the occupational prestige scale

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V835), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

96 <1991:> still in first job

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

Donald J. Treiman 1977: Occupational Prestige in Comparative Perspective, New York: Academic Press. (Hier insbesondere: Appendix A: Standard International Occupational Prestige)

Donald J. Treiman 1979: Begriff und Messung des Berufsprestiges in der international vergleichenden Mobilitätsforschung, in: Franz Urban Pappi (Hg.), Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/ Ts.: Athenäum, 124-168.

Christof Wolf 1995: Sozio-ökonomischer Status und berufliches Prestige. Ein kleines Kompendium sozialwissenschaftlicher Skalen auf Basis der beruflichen Stellung und Tätigkeit, in: ZUMA Nachrichten 19(37): 102-136.

v840 FIRST OCCUPATION, TREIMANPRESTIGE,CATEG.

Description of variable:

Classification of first job (ISCO 1968) according to the occupational prestige scale, categorized

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V835), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

1 under 20

2 20 to under 30

3 30 to under 40

4 40 to under 50

5 50 to under 60

6 60 to under 80

7 80 and more

96 <1991:> still in first job

99 No answer

Derivation of data:

This variable groups the data in V839.

v841 FIRST OCCUPATION, MAGNITUDEPRESTIGE I68

Description of variable:

Classification of first job (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V835), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

996 <1991:> still in first job

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

v843 FIRST OCCUPATION, GOLDTHORPE CLASSES

Description of variable:

Goldthorpe class scheme:

Derived from information on respondent's first occupation

0 Respondent is not employed full- or part-time (code 3-11 in V770), respondent has never been employed full- or part-time (code 9996 in V806), 1984 also: military/alternative community service (code 49 in V835), from 1991 also: in training (1991: code 7 in V772; from 1994: code 9996 in V832); insufficient occupational information for classification in class scheme; not available 1980, 1982, 1986-1990, 1992, 1996-2002, 2006-2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V835 and V836.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

v844 FIRST OCCUPATION, ISCO 1988

Description of variable:

Classification of first occupation according to ISCO 1988

0 Never been employed full- or part-time (code 9996 in V806, code 9996 in V832); 2010: no participation in ISSP 'Social Inequality'; not available 1980-1992, 1996-2002, 2006, 2008, 2012

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

Comment:

In 2010, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

The exact wording of the 2010 ISSP-question in the German questionnaire differs slightly from the question used in ALLBUS (comp. V836). The ISSP-source questionnaire uses this wording:

"In this first job, what was your main occupation?

Describe fully, using two words or more (do not use initials or abbreviations).

v845 FIRST OCCUPATION, SIOPS 1988

Description of variable:

Classification of first occupation (ISCO-88) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent has never been employed full- or part-time (code 9996 in V806, Code 9996 in V832); unclassifiable or inadequately described occupation (code 10004 in V844); SIOPS cannot be constructed from ISCO-Code; not available 1980-2002, 2006-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v846 FIRST OCCUPATION, SIOPS 1988, CATEGOR.

Description of variable:

Classification of first occupation (ISCO-88) according to the Standard International Occupational Prestige Scale (SIOPS), categorized

0 Respondent has never been employed full- or part-time (code 9996 in V806, Code 9996 in V832); unclassifiable or inadequately described occupation (code 10004 in V844); SIOPS cannot be constructed from ISCO-Code; not available 1980-2002, 2006-2012

v847 FIRST OCCUPATION, ISEI GANZEBOOM 1988

Description of variable:

Classification of first occupation (ISCO-88) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent has never been employed full- or part-time (code 9996 in V806, Code 9996 in V832); unclassifiable or inadequately described occupation (code 10004 in V844); ISEI cannot be constructed from ISCO-Code; not available 1980-2002, 2006-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For more information, compare:

Harry B. G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman und J. De Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21(1): 1-56.

v849 FIRST OCCUPATION, ISCO 08

Description of variable:

Classification of first occupation according to ISCO 2008

0 Respondent has never been employed full- or part-time (code 9996 in V806, Code 9996 in V832); not available 1980-2012

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-08)

Source:

Kommission der Europäischen Gemeinschaften 2009: Empfehlung der Kommission vom 29. Oktober 2009 über die Verwendung der Internationalen Standardklassifikation der Berufe (ISCO-08), <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:0047:DE:PDF>, retrieved 19.05.2015.

ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn) based on the source cited above. A German translation of occupational titles was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

Please refer to 'Appendix C' of the variable report for a comprehensive list of codes used in the data.

v850 FIRST OCCUPATION, SIOPS I08

Description of variable:

Classification of first occupation (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent has never been employed full- or part-time (code 9996 in V806, Code 9996 in V832); unclassifiable or inadequately described occupation (code 10004 in V849); SIOPS cannot be constructed from ISCO-Code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v852 FIRST OCCUPATION, ISEI I08

Description of variable:

Classification of first occupation (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent has never been employed full- or part-time (code 9996 in V806, Code 9996 in V832); unclassifiable or inadequately described occupation (code 10004 in V849); ISEI cannot be constructed from ISCO-Code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v854 OCCUPATION, REF. NR., METAClass. <PAPPI>

Description of variable:

Occupational position: Metaclassification according to Pappi

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha; <1980:> 20 ha and over
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 15 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 21 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 <Until 1986:> Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

0 Not available 1994-2012

- 96 All individuals relevant for classification without occupational data (= not classifiable)

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the

data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v855 ISCO 1968, METAClassification <PAPPI>

Description of variable:

Metaclassification of occupations according to Pappi, ISCO 1968

0 Not classifiable in the classification scheme; not available 1994-2014

1004 Workers with unclassifiable or inadequately described occupations

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v856 OCCUPATIONAL MINOR GROUP, METACL. <PAPPI>

Description of variable:

Metaclassification of occupation according to Pappi, occupational minor group

0 Not classifiable in the classification scheme, not available 1994-2014

104 Workers with unclassifiable or inadequately described occupation

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v857 OCCUPATIONAL MAJOR GROUP,METACL. <PAPPI>

Description of variable:

Metaclassification of occupation according to Pappi, occupational major group

- 0 Not classifiable in the classification scheme, not available 1994-2014
- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v858 TREIMANPRESTIGE, METAClassificat.<PAPPI>

Description of variable:

Metaclassification of occupation according to Pappi, occupational prestige scale

0 Not classifiable in the classification scheme, not available 1994-2014

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with

hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v860 MAGNITUDEPRESTIGE, METAClass. <PAPPI>

Description of variable:

Metaclassification of occupation according to Pappi, Magnitudeprestige Scale (MPS)

0 Not classifiable in the classification scheme, not available 1994-2014

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

- 1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.
- 2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.
- 3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.
- 4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.
- 5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-

scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v862 GOLDTHORPE CLASSES, METAClassif. <PAPPI>

Description of variable:

Metaclassification of occupation according to Pappi, Goldthorp Class Scheme

0 All individuals relevant for classification without occupational data, not available 1994-2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

The metaclassification of occupations according to Pappi was constructed as follows:

1) All men and unmarried women were, as far as possible, assigned their own current or previous occupation.

2) Women who were married, widowed or divorced were assigned their <ex->spouse's current or previous occupation, even if they had an occupation of their own.

3) School or university students who had never been working full- or part-time were classified according to their fathers' occupation.

4) If rule 1) and 2) do not allow a classification, because of missing information, the respondent is classified according to the occupation of the father.

5) Respondents in military/alternative community service were not regarded as being in full- or part-time employment. Instead they were classified according to their previous occupation (men and unmarried women who had previously been working), according to their spouse's occupation (married or widowed women whose husband was or had been working) or according to their father's occupation.

No occupational metaclassification is possible if one of the relevant sources of occupational data is missing (inadequate description of occupation, refused, don't know or no answer) or if all relevant sources of occupational data register as code 0 'Not applicable'.

Construction of the metaclassification according to Pappi was discontinued with ALLBUS 1994 because the

data on the last occupation of spouses who are not working and the data on the occupation of ex-spouses is no longer part of the ALLBUS- demography.

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

Petra Beckmann und Reiner Trometer 1991: Neue Dienstleistungen des ALLBUS : Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA Nachrichten 15(28): 7-17.

Robert Erikson, John H. Goldthorpe, Wolfgang König, Paul Lüttinger und Walter Müller 1989: The International Mobility Superfile (IMS) - Documentation -, CASMIN-Projekt, Mannheim.

John H. Goldthorpe 1980: Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v863 OCCUPATION, METAClassIFICATION <TERWEY>

Description of variable:

Occupational position: Metaclassification according to Terwey

0 Not available 1980-2000

1 Independent farmer

2 Independent professional

3 Self-employed in trade or craft, industry, service sector, etc.

4 Civil servants/judges/professional soldiers

5 Employees

6 Workers

8 Family member assisting in family business

9 Farmer on a cooperative farm

96 All individuals relevant for classification without occupational data (= not classifiable)

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

1) All respondents who are employed full-time or part-time are classified according to their own current occupation.

2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.

3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Comment:

This variable groups the data in V864.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v864 OCCUPATION, REF. NR., METAClass.<TERWEY>

Description of variable:

Occupational position, reference number: Metaclassification according to Terwey

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha
- 13 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees
- 24 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

- 96 All individuals relevant for classification without occupational data (= not classifiable)

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
 - 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
 - 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
 - 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
 - 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
 - 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.
- If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Note:**Metaclassification of Occupations**

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v865 ISCO 1968, METAClassification <TERWEY>

Description of variable:

Metaclassification of occupation according to Terwey, ISCO 1968

0 Not classifiable in the classification scheme; not available 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v867 OCCUPAT. MAJOR GROUP I68,METACL.<TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1968) according to Terwey, occupational major group

- 0 Not classifiable in the classification scheme; not available 2012, 2014
- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for

metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Note:

Metaclassification of Occupations

v868 TREIMANPRESTIGE I68, METAClass. <TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1968) according to Terwey, occupational prestige scale

0 Not classifiable in the classification scheme; not available 2012, 2014

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

Donald J. Treiman 1977: *Occupational Prestige in Comparative Perspective*, New York: Academic Press. (Hier insbesondere: Appendix A: Standard International Occupational Prestige)

Donald J. Treiman 1979: Begriff und Messung des Berufsprestiges in der international vergleichenden Mobilitätsforschung, in: Franz Urban Pappi (Hg.), *Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundsmerkmalen in allgemeinen Bevölkerungsumfragen*, Königstein/ Ts.: Athenäum, 124-168.

Christof Wolf 1995: Sozio-ökonomischer Status und berufliches Prestige. Ein kleines Kompendium sozialwissenschaftlicher Skalen auf Basis der beruflichen Stellung und Tätigkeit, in: *ZUMA Nachrichten* 19(37): 102-136.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v870 MAGNITUDEPRESTIGE I68, METACL. <TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1968) according to Terwey, Magnitudeprestige Scale (MPS)

0 Not classifiable in the classification scheme; not available 2012, 2014

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v872 ISEI I68, METAClassification <TERWEY>

Description of variable:

Metaclassification of occupation according to Terwey, ISEI (ISCO 1968)

0 Not classifiable in the classification scheme, not available 1980-1998, 2012, 2014

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Harry B. G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman und J. De Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: *Social Science Research* 21(1): 1-56.

v874 GOLDTHORPE CLASSES I68, METACL. <TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1968) according to Terwey, Goldthorpe classes

0 All individuals relevant for classification without occupational data; not available 2012, 2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

1) All respondents who are employed full-time or part-time are classified according to their own current occupation.

2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.

3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.

5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.

6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a

general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g.

married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v875 ISCO 1988, METAClassification <TERWEY>

Description of variable:

Metaclassification of occupation according to Terwey, ISCO 1988

0 Not classifiable in the classification scheme; not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v876 SIOPS I88, METAClassification <TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1988) according to Terwey, SIOPS

0 Not classifiable in the classification scheme, not available 1980-1998

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). v878 MAGNITUDEPRESTIGE I88, METACL. <TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1988) according to Terwey, Magnitudeprestige Scale (MPS)

0 Not classifiable in the classification scheme; not available 1980-1991, 2012, 2014

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

v880 ISEI I88, METAClassification <TERWEY>

Description of variable:

Metaclassification of occupation (ISCO 1988) according to Terwey, ISEI

0 Not classifiable in the classification scheme; not available 1980-1998

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

Note:

Metaclassification of Occupations

The metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father, for those respondents who do not participate in the labor force. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

Pappi himself points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation, comp. V854-V862), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V863-V882). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines

social position.

v882 ISCO 2008, METAClassification <TERWEY>

Description of variable:

Metaclassification of occupation according to Terwey, ISCO 2008

0 Not classifiable in the classification scheme; not available 1980-2010

10004 Workers with unclassifiable or inadequately described occupation

Derivation of data:

The construction of Terwey's metaclassification of occupations proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves, were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

International Standard Classification of Occupations (ISCO-08)

v892 RESP.: LENGTH OF UNEMPLOYMENT IN WEEKS

<If respondent is employed full- or part-time and has been unemployed in the last 10 years>

How long were you unemployed altogether in the last 10 years?

(Int.: If respondent was unemployed more than once, please add up all the periods.)

995 Not employed full- or part-time (code 3-11 in V770), has not been unemployed (code 2 in V891)

997 Refused

998 Don't know

999 No answer

Derivation of data:

The data was originally surveyed as number of months and number of weeks. For this variable, the number of months was converted into weeks using a factor of 4.3. The result was truncated to whole numbers and then added to the number of weeks to get the total number of weeks of unemployment.

Comment:

v894 NOT EMPL.: EVER BEEN UNEMPLOYED BEFORE?

1982-1996:

<If respondent is currently not working full- or part-time, but has been working full- or part-time before>

Have you ever been unemployed (Int.: If respondent is currently unemployed: before) in the last 10 years?

1998-2012:

<If respondent is currently not working full- or part-time, but has been working full- or part-time before, and is not unemployed>

Have you ever been unemployed in the last 10 years?

2014:

<If respondent is currently not working full- or part-time and is not unemployed>

Have you ever been unemployed in the last 10 years?

0 1982-2012: Respondent is working full- or part-time (code 1, 2, 12 in V770) or respondent has never been working full- or part-time (code 9996 in V806), from 1998 additionally: or respondent is currently unemployed (code 3 in V771);

2014: Respondent is working full- or part-time (code 1, 2 in V770) or respondent is currently unemployed (code 3 in V771);

v913 RESP: MONTHLY NET INCOME <OPEN QUESTION>

How high is your own net monthly income (2002: in EUROS)? By this I mean the amount remaining after deductions for tax and social security contributions

Until 1992:

(Int.: For independent farmers and respondents who are self-employed, please ask for the average net monthly income.)

From 1994:

(Int.: For respondents who are self-employed, please ask for average net monthly income after deductions for overheads.)

2002:

(Int.: If respondent can only give a figure in DM, divide that figure by 2.)

0 No personal income

99997 Refused

99998 Don't know

99999 No answer

Derivation of data:

Respondent's personal income

Since 2002, income has been surveyed in EURO in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V913 or #S61_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the DM figures were divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses:

In 1980 and 1982 the respondent's personal income was surveyed using a single, open question (V913). From 1984, a second question using a list of categories (V914) was added as a follow up for those who refused to answer the open question. From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V918) was assumed to equal personal income.

Variable V913 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V918) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V915 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

99 No answer

Derivation of data:

Respondent's personal income

Since 2002, income has been surveyed in EURO in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS-surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V913 or #S61_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the DM figures

were divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses:

In 1980 and 1982 the respondent's personal income was surveyed using a single, open question (V913). From 1984, a second question using a list of categories (V914) was added as a follow up for those who refused to answer the open question. From 1986 to 1992 only respondents who lived in multi-person households were asked to specify their personal income. For respondents living in one-person households, household income (V918) was assumed to equal personal income.

Variable V913 contains the consolidated information of all open questions concerning the respondent's personal income, including the responses of one-person households (V918) from the years 1986-1992. Categorization and integration of this data with the data from the list query was forgone, because there is no unequivocal way of mapping the data from one variable onto the second. V915 provides an example for a consolidation of all data on the respondent's personal income. This variable also includes data from the list query.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

v915 **RESP.:NET INCOME <OPEN QUEST+LIST QUERY>**

Description of variable:

Consolidated monthly net income of respondent

0 No personal income

99997 Refused

99998 Don't know

99999 No answer

Derivation of data:

This variable combines the income data from the open question (V913) and from the list query (V914). For each of the listed categories in V914 the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO and over' was coded as 8750 EURO.

v918 HOUSEHOLD NET INCOME: OPEN QUESTION

How high is the total monthly net income of your household (2002: in EURO)?

By this I mean the amount remaining after deductions for tax and social security contributions.

(Int.: For self-employed, please ask for average monthly net income after deductions for overheads.)

2002:

(Int.: If respondent can only give a figure in DM, divide that figure by 2.)

0 No income

99996 Not available 1980-1984

99997 Refused

99998 Don't know

99999 No answer

Derivation of data:

Household Income

Since 2002, income has been surveyed in EURO in ALLBUS. In order to maintain the intercomparability of the data and with a view to future ALLBUS surveys, the income data from ALLBUS 1980 to 2000 has been converted from DM to EURO values for this cumulated data set. As practiced in ALLBUS 2002 (cf. the interviewer instructions in V918 or #S64_1 in the questionnaire for ZA No. 3700 ALLBUS 2002), the figures in DM were divided by two and the result subsequently rounded to integers.

The collection of income data has been modified over time in order to maximize the number of valid responses:

From 1980 to 1984, household income (V920) was calculated from the collection of data on the individual household members. As of 1986, household income has been surveyed as a separate question (V918) accompanied by a follow up list query (V919) to minimize refusals. Since 1994, respondent's living in one-person households have been screened out from the question on household income on the assumption that for these cases personal income equals household income. Instead, the data on personal income (V913 and V914) has additionally been coded into the household income variable V920 for one-person households.

When analyzing income data, please decide for yourself whether you want to include as valid data persons or households that report a zero income. By default, these cases are already coded as 0, but are defined as missing data.

Comment:

v920 HH INCOME <OPEN QUESTION+LIST QUERY>

Description of variable:

Consolidated net income of household

0 No income

99997 Refused

99998 Don't know

99999 No answer

Derivation of data:

This variable contains a summary of the available data on household income. For 1980 to 1984 it contains the sum of the respondent's personal income (V915) and the income reported for any additional members of the household (V1395, V1410, V1425, V1440, V1455, V1470, V1485). When there was no valid data ('refused', 'don't know' or 'no answer') in any one of these variables, no valid household income was constructed. For 1986 and later, this variable contains the data directly surveyed with the questions documented in V918 and V919. For each of the categories in V919 the mid-point of class entered into the summary. However, the lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open of '7500 EURO and over' was coded as 8750 EURO.

Comment:

Standard deviation: 1426.256

v921 HH INCOME <OPEN QUEST.+LIST QUERY>, CAT.

Description of variable:

Consolidated net income of household, categorized

- 0 No income
- 1 Under 200 EURO
- 2 200 - 299 EURO
- 3 300 - 399 EURO
- 4 400 - 499 EURO
- 5 500 - 624 EURO
- 6 625 - 749 EURO
- 7 750 - 874 EURO
- 8 875 - 999 EURO
- 9 1000 - 1124 EURO
- 10 1125 - 1249 EURO
- 11 1250 - 1374 EURO
- 12 1375 - 1499 EURO
- 13 1500 - 1749 EURO
- 14 1750 - 1999 EURO
- 15 2000 - 2249 EURO
- 16 2250 - 2499 EURO
- 17 2500 - 2749 EURO
- 18 2750 - 2999 EURO
- 19 3000 - 3999 EURO
- 20 4000 - 4999 EURO
- 21 5000 - 7499 EURO
- 22 7500 EURO and more
- 97 Refused
- 98 Don't know
- 99 No answer

Derivation of data:

This variable groups the data in V920.

v922 PER CAPITA INCOME

Description of variable:

Per capita income

0 No income

99996 Cannot be constructed

99997 Refused

99998 Do not know

99999 No answer

Derivation of data:

The data in this variable was calculated using the data on household income in V920 and the number of household members in V1491.

To calculate per capita income, the household income in V920 was divided by the number of household members in V1491. The result was rounded to the next whole number. When there was no valid data for the number of household members, per capita income was coded as 'cannot be constructed'. When there was no valid data on household income, per capita income was coded with the same missing value category as household income.

v924 EQUIVALENT INCOME OECD-MODIFIED SCALE

Description of variable:

Equivalent income: OECD-modified scale

0 No income

999996 Cannot be constructed

999997 Refused

999998 Do not know

999999 No answer

Derivation of data:

The data in this variable was calculated using the data on household income in V920 and demographic information about household members.

Equivalent income (V924) = household income (V920) / household weight

The household weight is computed as the sum of the individual weights of all household members. The first adult member of the household, i.e. the respondent, is considered the head of the household and is weighted by a factor of 1. Other household members age 14 and above are considered as further adult members and are weighted by a factor of 0.5. Members of the household who are 13 or younger are considered children and are weighted by a factor of 0.3.

The result of the computation was rounded to the next whole number.

When there was only incomplete information about household members, equivalent income was coded as 'cannot be constructed'. When there was no valid data on household income, equivalent income was coded with the same missing value category as household income.

Comment:

N-Valid: 48384

N-Missing: 12810

Minimum: 20

Maximum: 43333

Median: 975.00

Mean: 1139.31

Standard deviation: 802.695

Note:

Equivalent household income

Equivalent income measures model household income relative to household composition. In contrast to per capita income, which only considers household size, equivalent income measures use a scale of weights to account for economies of scale and the different economic needs of adults and children.

Different equivalence scales have been proposed. The equivalence scale used in the ALLBUS program is the OECD-modified scale. This scale defines the first adult member of a household as the head of the household, who is weighted by a factor of 1. Other household members age 14 and above are considered further adult

members and are weighted by a factor of 0.5. Members of the household who are 13 or younger are considered children and are weighted by a factor of 0.3.

Example:

According to the OECD-modified scale the members of a household of three, consisting of a single parent and two children age 16 and 11, are assigned the following weights:

- single parent: head of household - 1
- child age 16: counts as additional adult - 0.5
- child age 11: counts as child - 0.3

For an assumed household income of 1800€, the equivalised household income according to the OECD-modified scale would be:

$$1800\text{€} / (1+0.5+0.3) = 1000\text{€}$$

9 No answer

Comment:

For ALLBUS 2004, there is only combined data on income from dependent employment and self-employment.

For ALLBUS 1984 and ALLBUS 2014, there are separate variables for 'wages or salary' (V927) and 'income from self-employment' (V928).

v951 MAIN SOURCE OF HH INCOME <CONSOLIDATED>

Description of variable:

Main source of household income (consolidated)

- 1 Wages or salary (including that of trainees/apprentices) or income from self-employment (self-employed persons, farmers, freelancers)
- 2 Personal savings, building society savings (interest, bonuses)
- 3 Securities (interest, dividends)
- 4 Rent and lease
- 5 Other income from assets
- 6 Retirement benefits <"Renten">
- 7 Pensions <"Pensionen" for civil servants>
- 8 Regular private subsistence payments (e.g. alimony for divorcees, children)
- 9 Child allowance
- 10 Unemployment benefits, etc.
<1984: "Arbeitslosengeld, Arbeitslosenhilfe, Kurzarbeitergeld, Schlechtwettergeld u.ä.">
<2004: "Arbeitslosengeld, Arbeitslosengeld II, Arbeitslosenhilfe, Kurzarbeitergeld, Schlechtwettergeld u.ä.">
- 11 Welfare payments
<1984, 2004: "Sozialhilfe">
<2014: "Sozialhilfe (z.B. Grundsicherung im Alter und bei Erwerbsminderung)">
- 12 Full unemployment benefit <"Arbeitslosengeld I">, (seasonal) short-time allowance and the like
- 13 Reduced unemployment benefit <"Arbeitslosengeld II">, benefits according to "Hartz IV"
- 14 Sickness benefits, maternity benefits
- 15 Child-rearing allowance <2004: "Erziehungsgeld">
- 16 Child-rearing allowance <2014: "Elterngeld, Betreuungsgeld">
- 17 Educational grant for students and pupils, e.g. "BAföG"
- 18 Other grants for education or continuing education, re-training provided by a job centre
- 19 Housing benefits
- 20 Other social benefits
- 21 Other, please specify: _____
- 96 Not available 1980-2002, 2006-2012
- 99 No answer

Derivation of data:

In ALLBUS 2004 and ALLBUS 2014, the multiple response question on sources of household income (V927-949) was followed by a question asking for the main source of household income. Only respondents who had named more than one source of household income received this question, while respondents who had named a single source of household income skipped this question. For this cumulated data set, the data for single income source households and the data from the follow-up question for multiple income source households was consolidated in a single variable containing the main source of income for all households. Cases for which there was no answer in the multiple response question, are also coded as 'no answer' in the consolidated variable.

For a differentiation between households with a single income source and households with multiple sources of income please refer to V950 NUMBER OF INCOME SOURCES IN HOUSEHOLD.

v954 SELF-ASSESSMENT OF PLACE WHERE R LIVES

2000 (ISSP) and 2004 (ISSP):

Which of the following categories best describes the place where you live?

Please tick only one answer.

From 2006:

(Int.: Please display card.)

Which of the categories on this card best describes where you live?

Please tell me the appropriate letter.

0 2000: no participation in ISSP 'Environment'; 2004: no participation in ISSP 'National Identity' or ISSP 'Citizenship'; not available 1980-1998, 2002

- 1 A Big city
- 2 B Suburbs or outskirts of a big city
- 3 C Small city or town
- 4 D Country village
- 5 E Farm or home in the country
- 9 No answer

Comment:

In 2000 and 2004, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v960 MARRIED: MONTH OF WEDDING, MARRIAGE 1

Description of variable:

Month of wedding - first marriage

Until 2000:

<If respondent is married>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: If respondent has been married more than once.)

Would you please tell me, starting with your first marriage, when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent is married and this is not the first marriage (incl. civil partnerships)>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the actual marriage

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: If "the marriage ended in divorce" or "the marriage ended in death of spouse", please ask for the month and year of divorce or death.)

2010:

<If respondent is married for the first time (incl. civil partnership)>

When did you get married?

0 Not married (code 3-5, 8, 9 in V955); not available 1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014

v961 MARRIED: YEAR OF WEDDING, MARRIAGE 1

Description of variable:

Year of wedding - first marriage

Until 2000:

<If respondent is married>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: If respondent has been married more than once.)

Would you please tell me, starting with your first marriage, when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent is married and this is not the first marriage (incl. civil partnerships)>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the actual marriage

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: If "the marriage ended in divorce" or "the marriage ended in death of spouse", please ask for the month and year of divorce or death.)

2010:

<If respondent is married for the first time (incl. civil partnership)>

When did you get married?

0 Not married (code 3-5, 8, 9 in V955); not available 1990, 1992-1998, 2002-2008, 2012, 2014

9997 Refused

9999 No answer

v967 MARRIED: YEAR OF DEATH, SPOUSE 1

Description of variable:

Year spouse died - first marriage

Until 2000:

<If respondent is married and first spouse is dead>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: If respondent has been married more than once.)

Would you please tell me, starting with your first marriage, when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent is married (incl. civil partnerships) and first spouse is dead>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the actual marriage

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: If "the marriage ended in divorce" or "the marriage ended in death of spouse", please ask for the month and year of divorce or death.)

0 Not married (code 3-5, 8, 9 in V955), first spouse is not dead; not available 1990, 1992-1998, 2002-2008, 2012, 2014

v975 MARRIED: MONTH OF DEATH, SPOUSE 2

Description of variable:

Month spouse died - second marriage

Until 2000:

<If respondent is married and second spouse is dead>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: If respondent has been married more than once.)

Would you please tell me, starting with your first marriage, when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent is married (incl. civil partnerships) and second spouse is dead>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the actual marriage

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: If "the marriage ended in divorce" or "the marriage ended in death of spouse", please ask for the month and year of divorce or death.)

0 Not married (code 3-5, 8, 9 in V955), no second marriage, second spouse not dead; not available 1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014

v984 MARRIED: MONTH OF DEATH, SPOUSE 3

Description of variable:

Month spouse died - third marriage

Until 2000:

<If respondent is married and third spouse is dead>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: If respondent has been married more than once.)

Would you please tell me, starting with your first marriage, when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent is married (incl. civil partnerships) and third spouse is dead>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the actual marriage

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: If "the marriage ended in divorce" or "the marriage ended in death of spouse", please ask for the month and year of divorce or death.)

0 Not married (code 3-5, 8, 9 in V955), no third marriage, third spouse not dead; not available 1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014

v994 MARRIED: YEAR OF DEATH, SPOUSE 4

Description of variable:

Year spouse died - fourth marriage

Until 2000:

<If respondent is married and fourth spouse is dead>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: If respondent has been married more than once.)

Would you please tell me, starting with your first marriage, when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent is married (incl. civil partnerships) and fourth spouse is dead>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the actual marriage

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: If "the marriage ended in divorce" or "the marriage ended in death of spouse", please ask for the month and year of divorce or death.)

0 Not married (code 3-5, 8, 9 in V955), no fourth marriage, fourth spouse is not dead; not available 1980-1986, 1990-1998, 2002-2008, 2012, 2014

v1003 WIDOW.,DIV.: MONTH OF DEATH, SPOUSE 1

Description of variable:

Month spouse died - first marriage

Until 2000:

<If respondent was married once and is now widowed or divorced>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: Use table to record answer(s).)

Would you please tell me when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent was married once (incl. civil partnership) and is now widowed or divorced>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the last marriage

The marriage is not the last marriage)

(Int.: Please find out informally how the marriage ended:

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: Please ask in which month and year the marriage was dissolved by divorce or the marriage partner died.)

0 Respondent is currently married or never married (code 1, 2, 5-7 in V955), first spouse is not dead; not available 1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014

v1009 WIDOW.,DIV.: MONTH OF DIVORCE,MARRIAGE 2

Description of variable:

Month of divorce - second marriage

Until 2000:

<If respondent was married at least twice and is now widowed or divorced>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: Use table to record answer(s).)

Would you please tell me when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent was married at least twice (incl. civil partnership) and is now widowed or divorced>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the last marriage

The marriage is not the last marriage)

(Int.: Please find out informally how the marriage ended:

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: Please ask in which month and year the marriage was dissolved by divorce or the marriage partner

died.)

0 Respondent is currently married or never married (code 1, 2, 5-7 in V955), no second marriage, second marriage not divorced; not available 1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014

v1015 WIDOW.,DIV.: MONTH OF WEDDING,MARRIAGE 3

Description of variable:

Month of wedding - third marriage

Until 2000:

<If respondent married at least three times and is now widowed or divorced>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: Use table to record answer(s).)

Would you please tell me when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent married at least three times (incl. civil partnership) and is now widowed or divorced>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the last marriage

The marriage is not the last marriage)

(Int.: Please find out informally how the marriage ended:

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: Please ask in which month and year the marriage was dissolved by divorce or the marriage partner

died.)

0 Respondent is currently married or never married (code 1, 2, 5-7 in V955), no third marriage; not available

1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014
