v1030 WIDOW.,DIV.: MONTH OF DEATH, SPOUSE 4

Description of variable:

Month spouse died, fourth marriage

Until 2000:

<If respondent was married at least four times and is now widowed or divorced>

Please, tell me again in which year you got married.

In case you have been married more than once, please start with the year of your first marriage.

(Int.: Use table to record answer(s).)

Would you please tell me when you were widowed or got divorced?

(Int.: Please be careful to ascertain for each marriage:

a) year respondent got married

b) year of divorce or death of spouse.)

2010:

<If respondent was married at least four times (incl. civil partnership) and is now widowed or divorced>

For each of your marriages, beginning with the first, please tell me when the marriage took place and when it ended.

When did you marry for the {nth} time?

(Int.: Please find out informally whether:

The marriage is the last marriage

The marriage is not the last marriage)

(Int.: Please find out informally how the marriage ended:

The marriage ended in divorce

The marriage ended in death of spouse)

(Int.: Please ask in which month and year the marriage was dissolved by divorce or the marriage partner died.)

0 Respondent is currently married or never married (code 1, 2, 5-7 in V955), no fourth marriage, fourth spouse is not dead; not available 1980-1986, 1990, 1992-1998, 2002-2008, 2012, 2014

v1038 SPOUSE: CITIZENSHIP AT BIRTH

<If spouse has German citizenship, but not since birth>

What was your husband's/wife's citizenship at birth?

(Int.: Multiple responses possible, unless 'stateless' selected.)

0 Respondent is widowed, divorced, lives separated or has never married (code 2-5 in V955); spouse does not have German citizenship (code 2-24 in V1033); not available 1980-1994, 1998-2004, 2008-2014

1 None (at birth stateless)

2 Denmark

3 France

4 Greece

5 Great Britain and Northern Ireland

6 (Republic of) Ireland

7 Italy

8 Former Yugoslavia or one of its successor states (Bosnia and Herzegovina, Serbia and Montenegro, Croatia, Macedonia, Slovenia)

9 The Netherlands

10 Austria

11 Poland

12 Portugal

13 Romania

14 Sweden

15 Switzerland

16 Former Soviet Union (USSR) or one of its successor states (Russia, Kazakhstan, Ukraine, etc.)

17 Spain

18 Former Czechoslovakia or one of its successor states (Czech Republic, Slovakia)

19 Turkey

20 Hungary

21 USA

v1041 PRESENT SPOUSE: AGE

Description of variable:

<If respondent is married (from 2002: and lives with spouse)>

Age of current spouse

0 Not married (code 3-5, 8, 9 in V955), from 2002 also: living separated (code 2, 7 in V955); not available 1980-1984, 1994-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

Basic rules for calculating age

Age calculation for all ALLBUS surveys followed these basic steps: First, age was calculated by subtracting the year of birth (V1039) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1040) were compared. If the month of the interview preceded the month of the respondent's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the respondent's month of birth came after the last month of fieldwork, it could be assumed that the respondent had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 2000-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the respondent's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the respondent had been interviewed before his or her birthday and the age calculated from year of birth and year of survey was reduced by 1.

v1044 PRES.SP.: GENERAL SCHOOL LEAVING CERT.

<If respondent is married (1994-1998, from 2002: and lives with spouse)>

What general school leaving certificate does your spouse have?

Which of the following applies to your spouse?

(Int.: Please present card. Only one choice possible. Please request highest certificate only.)

0 Respondent is widowed, divorced or never married (code 3-5, 8, 9 in V955), 1994-1998, from 2002 also: respondent is living separated (code 2, 7 in V955); not available 1986

1 Finished school without school leaving certificate;

1991 East: Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

7 From 1986: Still at school

97 Refused

98 Don't know

99 No answer

Derivation of data:

From 1980 to 1984 ALLBUS used a single question to collect data on the respondent's current spouse, if the respondent was married, or alternatively on the respondent's previous spouse, if the respondent was widowed or divorced. The data was originally stored in the same variable. For this cumulative data set, the information on current and previous spouses was recoded into separate variables.

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

v1045 PRES.SP.: OCCUPATIONAL TRAINING

<If respondent is married (1988, 1990: and spouse has finished school)>

What occupational training did your spouse complete?

(Int.: Please present card. Ask for last qualification only.)

0 Respondent is widowed, divorced or never married (code 3-5 in V955), 1988, 1990 also: spouse is still at school (code 7 in V1044); not available 1986, 1991-2014

1 No completed vocational training (including vocational school without apprenticeship)

<Keinen beruflichen Ausbildungsabschluß (auch Berufsschule ohne Lehre)>

2 Completed trades/crafts or agricultural apprenticeship

<Berufsschulabschluß mit gewerblicher oder landwirtschaftlicher Lehre>

3 Completed commercial or other apprenticeship

<Berufsschulabschluß mit kaufmännischer oder sonstiger Lehre>

4 Specialized vocational college certificate <Berufsfachschulabschluß>

5 Work placement, internship

<Berufliches Praktikum (from 1988: Berufliches Praktikum, Volontariat)>

6 Master (craftsman), technician or equivalent college certificate

<Meister-/ Techniker- oder gleichwertiger Fachschulabschluß>

7 University of Applied Science degree (or engineering college degree)

<Fachhochschulabschluß (auch Ingenieurschulabschluß)>

8 University degree

9 <From 1988:> Completed other occupational training

97 Refused

98 Don't know

99 No answer

Derivation of data:

From 1980 to 1984 ALLBUS used a single question to collect data on the respondent's current spouse, if the respondent was married, or alternatively on the respondent's previous spouse, if the respondent was widowed or divorced. The data was originally stored in the same variable. For this cumulative data set, the information on current and previous spouses was recoded into separate variables.

In ALLBUS 1980 to ALLBUS 1984 respondents were asked to indicate the occupational training of their spouse by choosing their spouse's last occupational qualification from a list of categories (V1045). Only one answer was permitted. As of 1986, the ALLBUS program uses a multiple response question to collect information on occupational training (compare V1046-V1059). For this cumulative data set, information from this multiple response question (V1046-V1049, V1051-V1053 and V1055-V1059) was recoded in such a way that the data could be merged with the data in V1045. Thus, the time series for V1045 could be extended to cover the period up to 1990. However, due to the largely incomparable systems of education in former East Germany and West Germany, the practice of reconstructing V1045 has been discontinued after 1990.

Users wishing to work with the data in V1045 should take into account the following particularities of the reconstructed data:

- As there is no indication which qualification from the multiple response question is actually the last one, it was assumed that the highest qualification was also the last qualification.
- There is a possibility that the extended list of categories used from 1988 onwards influenced the respondents' answers.
- The response options for the multiple response question contain the additional code 9 'Completed other occupational training'.
- Until 1984, code 1 explicitly includes respondents who attended a vocational school without being in a traineeship scheme.
- In 1980-1984 code 3 was 'Completed commercial or other traineeship'. As of 1986 this category has been restricted to 'Completed commercial traineeship' (compare V1052).

These differences in the actual survey practice can lead to bias in the data. One obvious example is code 3 'Completed commercial or other traineeship'. The frequency count in the reconstructed data is noticeably lower than that in the data for 1980 to 1984.

v1062 SPOUSE: ISCED 1997 - 5 LEVELS

Description of variable:

International Standard Classification of Education (ISCED) 1997, 5 levels - spouse

0 Respondent is widowed, divorced, never married (code 3-5, 8, 9 in V955); 1994-1998, since 2002 also: living apart (code 2, 7 in V955); not available 1986

1 Level 1 - Primary education or first stage of basic education

2 Level 2 - Lower secondary or second stage of basic education

3 Level 3 - (Upper) secondary education

4 Level 4 - Post-secondary non-tertiary education

5 Level 5 - First stage of tertiary education

94 Still at school

99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1044) and on vocational or professional training (V1045, V71048-V1059).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 1997

The International Standard Classification of Education (ISCED) 1997 was developed by UNESCO as an internationally comparable classification of education levels. It provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2006: 7). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (UNESCO 2006: 19). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education (UNESCO 2006: 10).

ISCED 1997 distinguishes seven levels of education (UNESCO 2006: 19):

Level 0 - Pre-primary education

Level 1 - Primary education or first stage of basic education

Level 2 - Lower secondary or second stage of basic education

Level 3 - (Upper) secondary education

Level 4 - Post-secondary non-tertiary education

Level 5 - First stage of tertiary education

Level 6 - Second stage of tertiary education

Using survey data, ISCED 1997 can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). The implementation of ISCED 1997 for ALLBUS is modelled on the practice documented for the German microcensus (comp. Schroedter et al. 2006: 22) and the similar rules laid out in Hoffmeyer-Zlotnik et al. 2010 (76). There are, however, a number of factors that limit the full implementation of ISCED 1997 with ALLBUS data. On the one hand, these limitations are due to the universe sampled for ALLBUS. The ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' cannot be covered with ALLBUS data. On the other hand, there are limitations related to the type and scope of data surveyed. Firstly, this is the case for respondents who are still at school. These respondents cannot be assigned an ISCED level based on the type of school they attend, because this information is not available. Secondly, the ALLBUS-implementation of ISCED 1997 does not include a further differentiation of levels 3 and 5 (Schroedter et al. 2006: 22), because the data on vocational qualifications is not specific enough to accurately distinguish the proposed subcategories in all cases. And finally, ALLBUS does not distinguish between ISCED Level 5 "First Stage of Tertiary Education" and ISCED Level 6 – "Second Stage of Tertiary Education", because information on the type of university degree is only available for the latest cross-section surveys. Instead, all respondents with university degrees are classified at Level 5.

Mapping of qualifications to ISCED 1997 Levels:

Level 0 - Pre-primary education (not covered by ALLBUS)

Level 1: Primary education or first stage of basic education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are

classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower Secondary Education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper Secondary Education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post Secondary Education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Tertiary Education

Respondents who have a technical college or vocational college degree, master craftsmen or respondents with equivalent degrees, and respondents who have a university degree are classified at ISCED-Level 5.

Level 6: Second Stage of Tertiary Education (not implemented for ALLBUS)

ISCED-Level 6 would be reserved for respondents who have a research degree (e.g. a doctoral degree).

v1063 SPOUSE: ISCED 2011

Description of variable:

International Standard Classification of Education (ISCED) 2011 - spouse

0 Respondent is widowed, divorced, living apart or never married (code 2-5, 7-9 in V955); not available 1980-2010

1 Level 1 - Primary education

2 Level 2 - Lower secondary education

3 Level 3 - Upper secondary education

4 Level 4 - Post secondary non-tertiary education

5 Level 5 - Short-cycle tertiary education

6 Level 6 - Bachelor's or equivalent level

7 Level 7 - Master's or equivalent level

8 Level 8 - Doctoral or equivalent Level

94 Still at school

99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1044) and on vocational or professional training (V1045, V1048-V1061).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is

coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 2011

The International Standard Classification of Education (ISCED) 2011 is an improved version of ISCED 1997, which was developed by UNESCO as an internationally comparable classification of education levels. Like its predecessor, ISCED 2011 provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2012: 6). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (comp. Section 9 in UNESCO 2012). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education. For ISCED 2011, terms and definitions were updated and the rules of classification were revised. Moreover, the classification was extended to cover early childhood education and to provides a more differentiated classification of tertiary education (UNESCO 2012: 62-68).

ISCED 2011 has "parallel coding schemes for education programmes (ISCED Programmes or ISCED-P) and levels of educational attainment (ISCED Attainment or ISCED-A)" which define nine general educational levels (UNESCO 2012: 21).

ISCED-A Level 0 – Less than primary education

ISCED-A Level 1 - Primary education

ISCED-A Level 2 - Lower secondary education

ISCED-A Level 3 - Upper secondary education

ISCED-A Level 4 - Post-secondary non-tertiary education

ISCED-A Level 5 – Short-cycle tertiary education

ISCED-A Level 6 – Bachelor's or equivalent level

ISCED-A Level 7 – Master's or equivalent level

ISCED-A Level 8 – Doctoral or equivalent level

Using survey data, ISCED can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). There are, however, a number of factors that limit the full implementation of ISCED 2011 with ALLBUS data. Because there is only insufficient data on tertiary education, ISCED 2011 has not been constructed for ALLBUS 1980-2008. Moreover, the ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' is not covered by ALLBUS data. Finally, ALLBUS only implements the highest level of the ISCED 2011 classification. Information of the type needed to form classes on second- and third-digit level (comp. UNESCO 2012: 21f.) is not part of the ALLBUS data.

The implementation of ISCED 2011 could for the most part follow the established practice for ISCED 1997 (comp. Schroedter et al. 2006; Hoffmeyer-Zlotnik et al. 2010). New mappings of qualifications to ISCED levels were only necessary for the area of tertiary education.

Mapping of qualifications to ISCED-A levels

Level 0 – Less than primary education
(not covered by ALLBUS)

Level 1: Primary education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower secondary education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper secondary education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post-secondary non-tertiary education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Short-cycle tertiary education

Respondents who have a technical college or vocational college degree, master craftsmen and respondents with equivalent degrees are classified at ISCED-Level 4.

Level 6: Bachelor's or equivalent level

Respondents who have a bachelor's degree or an unspecified university degree are classified at ISCED-Level 6.

Level 7: Master's or equivalent level

Respondents who have a master's degree or an equivalent degree ("Magister", "Diplom" or "Staatsexamen") are classified at ISCED-Level 7.

Level 8: Doctoral or equivalent level

Respondents who have a research degree (e.g. a doctoral degree) are classified at ISCED-Level 8.

v1067 PRES.SP.: CURRENT OCCUPATION, REF. NR.

<If respondent is married (1994-1998, from 2002: and lives with spouse) and spouse is employed full- or part-time>

Please classify your spouse's occupational position according to this card.

(Int.: Please present card. Record answer code.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha <1980: 20 ha and over>
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3-11 in V1064), 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955)

- 97 Refused
- 98 Don't know
- 99 No answer

Comment:

From 1980-1984, a single question was used to survey the data in this variable together with the data in V1101 (last occupation) and V1130 (last spouse). In 1986 the data in this variable was surveyed together with V1101 (last occupation).

v1068 SPOUSE: CURRENT OCCUPATION, ISCO 1968

Description of variable:

Classification of spouse's occupation according to ISCO 1968

<If respondent is married (1994-1998, from 2002: and lives with spouse) and spouse is employed full- or part-time>

What does your spouse do in his/her main job?

Please describe this work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3-11 in V1064); 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955); not available 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

Comment:

From 1980-1984, a single question was used to survey the data in this variable together with the data in V1102 (last occupation) and V1131 (last spouse). In 1986 the data in this variable was surveyed together with V1102 (last occupation).

v1069 SPOUSE:CURRENT OCCUPAT. MINOR GROUP I68

Description of variable:

Classification of spouse's occupation according to the occupational minor group

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3-11 in V1064), 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955); not available 2012, 2014

104 Not classifiable in classification scheme

107 Refused

v1071 SPOUSE:CURRENT TREIMANPRESTIGE ISCO 1968

Description of variable:

Classification of spouse's occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3-11 in V1064), 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955); not available 2012, 2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v1073 SPOUSE:CURRENT MAGNITUDEPRESTIGE ISCO 68

Description of variable:

Classification of spouse's occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3-11 in V1064), 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955); not available 2012, 2014

997 Refused

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1075 SPOUSE: CURRENT OCCUPATION, ISEI ISCO 68

Description of variable:

Classification of spouse's occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3, 4 in V950), from 2002 also: married but living separated (code 2, 7 in V955); ISCO cannot be coded (code 1004 in V1068), no ISEI value for ISCO code; not available 1980-1998, 2012, 2014

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

v1077 SPOUSE: CURRENT GOLDTHORPE CLASSES I68

Description of variable:

Goldthorpe class scheme, respondent's spouse:

Derived from information on the current occupation of the respondent's spouse.

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3, 4 in V950), from 2002 also: married but living separated (code 2, 7 in V955); insufficient occupational information for classification in class scheme; not available 2012, 2012

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with 1 or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1067 and V1068.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

v1078 SPOUSE: CURRENT OCCUPATION, ISCO 1988

Description of variable:

Classification of spouse's occupation according to ISCO 1988

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3, 4 in V1064), 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955); not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

10008 Don't know

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v1079 SPOUSE: CURRENT OCCUPAT., SIOPS ISCO 1988

Description of variable:

Classification of spouse's occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3, 4 in V1064), from 2002 also: married but living separated (code 2, 7 in V955); ISCO cannot be coded (code 10004 in V1078), no SIOPS value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v1080 SPOUSE: CURRENT OCCUPAT.,SIOPS I88, CAT.

Description of variable:

Classification of spouse's occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS), categorized

v1081 SPOUSE:CURRENT MAGNITUDEPRESTIGE ISCO 88

Description of variable:

Classification of spouse's occupation (ISCO 1988) according to the Magnitudeprestige Scale (MPS)

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3, 4 in V1064), 1994-1998, from 2002 also: married but living separated (code 2, 7 in V955); ISCO cannot be coded (code 10004 in V1078), no MPS value for ISCO code; not available 1980-1991, 2012, 2014

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1082 SPOUSE:CURR. MAGNITUDEPRESTIGE I88, CAT.

v1083 SPOUSE: CURRENT OCCUPATION, ISEI ISCO 88

Description of variable:

Classification of spouse's occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent not married (code 3-5, 8, 9 in V955), spouse not employed full- or part-time (code 3, 4 in V1064), from 2002 also: married but living separated (code 2, 7 in V955); ISCO cannot be coded (code 10004 in V1078), no ISEI value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v1085 PRES.SP.: CURRENT OCCUPATION, ISCO 2008

Description of variable:

Classification of spouse's occupation according to ISCO 2008

0 Respondent is widowed, divorced, living apart (also registered civil partnership) or never married (code 2-5, 7-9 in V955), spouse not employed full- or part-time (code 3, 4 in V1064); not available 1980-2010

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-08)

Source:

Kommission der Europäischen Gemeinschaften 2009: Empfehlung der Kommission vom 29. Oktober 2009 über die Verwendung der Internationalen Standardklassifikation der Berufe (ISCO-08), <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:0047:DE:PDF>, retrieved 19.05.2015.

ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn) based on the source cited above. A German translation of occupational titles was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

Please refer to 'Appendix C' of the variable report for a comprehensive list of codes used in the data.

v1086 SPOUSE: CURRENT OCCUPAT., SIOPS I08

Description of variable:

Classification of spouse's occupation (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent is widowed, divorced, living apart (also registered civil partnership) or never married (code 2-5, 7-9 in V955); spouse is not employed full- or part-time (code 3-11 in V1064); ISCO cannot be coded (code 10004 in V1085), no SIOPS value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v1088 SPOUSE: CURRENT OCCUPAT., ISEI I08

Description of variable:

Classification of spouse's occupation (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is widowed, divorced, living apart (also registered civil partnership) or never married (code 2-5, 7-9 in V955); spouse is not employed full- or part-time (code 3-11 in V1064); ISCO cannot be coded (code 10004 in V1085), no ISEI value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v1101 PRES.SP.: LAST OCCUPATION, REFERENCE NR.

<If respondent is married and spouse is no longer employed full- or part-time >

And which of the job descriptions fits your spouse's last occupational position? Please tell me the appropriate answer code from the card.

(Int.: Please present card. Only one choice possible.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha; <1980:> 20 ha and over
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 15 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 21 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 <Until 1986:> Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of

organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); not available 1994-2014

- 97 Refused
- 98 Don't know
- 99 No answer

Comment:

From 1980-1984, a single question was used to survey the data in this variable together with the data in V1067 (current occupation) and V1130 (last spouse). In 1986 the data in this variable was surveyed together with V1067 (current occupation).

v1102 PRES.SP.: LAST OCCUPATION, ISCO 1968

Description of variable:

Classification of spouse's last occupation according to ISCO 1968

<If respondent is married and spouse is no longer employed full- or part-time>

What did your spouse do in his/her last main job?

Please describe this work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); not available 1994-2014

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

Comment:

From 1980-1984, a single question was used to survey the data in this variable together with the data in V1068 (current occupation) and V1131 (last spouse). In 1986 the data in this variable was surveyed together with V1068 (current occupation).

v1103 PRES.SP.: LAST OCCUPATIONAL MINOR GROUP

Description of variable:

Classification of spouse's last occupation according to the occupational minor group

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); not available 1994-2014

104 Workers with unclassifiable or inadequately described occupation

107 Refused

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

Note:

v1104 PRES.SP.: LAST OCCUPATIONAL MAJOR GROUP

Description of variable:

Classification of spouse's last occupation according to the occupational major group

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); not available 1994-2014

- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others
- 97 Refused

v1105 PRES.SP.: LAST TREIMANPRESTIGE

Description of variable:

Classification of spouse's last occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); not available 1994-2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

Donald J. Treiman 1977: Occupational Prestige in Comparative Perspective, New York: Academic Press. (Hier insbesondere: Appendix A: Standard International Occupational Prestige)

Donald J. Treiman 1979: Begriff und Messung des Berufsprestiges in der international vergleichenden Mobilitätsforschung, in: Franz Urban Pappi (Hg.), Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/ Ts.: Athenäum, 124-168.

Description of variable:

Classification of spouse's last occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); not available 1994-2014

997 Refused

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1109 PRES.SP.: LAST OCCUP.,GOLDTHORPE CLASSES

Description of variable:

Goldthorpe class scheme, respondent's spouse:

Derived from information on the last occupation of the respondent's spouse.

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), 1984-1992 additionally: never been employed full- or part-time (code 9996 in V1093); insufficient occupational information for classification in class scheme; not available 1994-2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with one or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1101 and V1102

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

v1110 PRES.SP.: LAST OCCUPATION, ISCO 1988

Description of variable:

Classification of spouse's last occupation according to ISCO 1988

0 Respondent not married (code 3-5 in V955), spouse employed full- or part-time (code 1, 2, 12 in V1064), never been employed full- or part-time (code 9996 in V1093); not available 1980-1991, 1994-2014

10004 Workers with unclassifiable or inadequately described occupation

10008 Don't know

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v1111 EX-SPOUSE: YEAR OF BIRTH

Description of variable:

Year of birth of last spouse

<If respondent is widowed or divorced>

Please tell me which month and year your (last) spouse was born in.

0 Respondent is currently married or never married (code 1, 2 and 5 in V955); not available 1980-1984, 1990, 1994-1998, 2002-2014

v1114 EX-SPOUSE:GENERAL SCHOOL LEAVING CERTIF.

<If respondent is widowed or divorced>

What general school leaving certificate did your (last) spouse have?

Which of the following applies to your spouse?

(Int.: Please present card. Only one choice possible. Please request highest certificate only.)

0 Respondent is married or never married (code 1, 2, 5 in V955); not available 1986, 1990-2014

1 Finished school without school leaving certificate;

1991 East: Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

7 Still at school

97 Refused

98 Don't know

99 No answer

Derivation of data:

From 1980 to 1984 ALLBUS used a single question to collect data on the respondent's current spouse, if the respondent was married, or alternatively on the respondent's previous spouse, if the respondent was widowed or divorced. The data was originally stored in the same variable. For this cumulative data set, the information on current and previous spouses was recoded into separate variables.

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

v1115 EX-SPOUSE: OCCUPATIONAL TRAINING

<If respondent is widowed or divorced (1988 also: and last/late spouse had finished school)>

What occupational training did your spouse complete?

(Int.: Please present card. Ask for last qualification only.)

0 Respondent is married or never married (code 1, 2, 5 in V955), 1988 also: spouse is still at school (code 7 in V1114); not available 1986, 1990-2014

1 No completed vocational training (including vocational school without apprenticeship)

<Keinen beruflichen Ausbildungsabschluß (auch Berufsschule ohne Lehre)>

2 Completed trades/crafts or agricultural apprenticeship

<Berufsschulabschluß mit gewerblicher oder landwirtschaftlicher Lehre>

3 Completed commercial or other apprenticeship

<Berufsschulabschluß mit kaufmännischer oder sonstiger Lehre>

4 Specialized vocational college certificate <Berufsfachschulabschluß>

5 Work placement, internship

<Berufliches Praktikum; <1988:> Berufliches Praktikum, Volontariat>

6 Master (craftsman), technician or equivalent college certificate

<Meister-/ Techniker- oder gleichwertiger Fachschulabschluß>

7 University of Applied Science degree (or engineering college degree)

<Fachhochschulabschluß (auch Ingenieurschulabschluß)>

8 University degree

9 <1988:> Completed other occupational training

97 Refused

98 Don't know

99 No answer

Derivation of data:

From 1980 to 1984 ALLBUS used a single question to collect data on the respondent's current spouse, if the respondent was married, or alternatively on the respondent's previous spouse, if the respondent was widowed or divorced. The data was originally stored in the same variable. For this cumulative data set, the information on current and previous spouses was recoded into separate variables.

In ALLBUS 1980 to ALLBUS 1984 respondents were asked to indicate the occupational training of their spouse by choosing their spouses last occupational qualification from a list of categories (V1115). Only one answer was permitted. As of 1986, the ALLBUS program uses a multiple response question to collect information on occupational training (compare V1116-V1127). For this cumulative data set, information from this multiple response question was recoded in such a way that the data could be merged with the data in V1115. Thus, the time series for V1115 could be extended to cover the period up to 1990. However, due to the largely incomparable systems of education in former East Germany and West Germany, the practice of reconstructing V1045 has been discontinued after 1990.

Users wishing to work with the data in V1115 should take into account the following particularities of the reconstructed data:

- As there is no indication which qualification from the multiple response question is actually the last one, it was assumed that the highest qualification was also the last qualification.
- There is a possibility that the extended list of categories used from 1988 onwards influenced the respondents' answers.
- The response options for the multiple response question contain the additional code 9 'Completed other occupational training'.
- Until 1984, code 1 explicitly includes respondents who attended a vocational school without being in a traineeship scheme.
- In 1980-1984 code 3 was 'Completed commercial or other traineeship'. As of 1986 this category has been restricted to 'Completed commercial traineeship' (compare V1121).

These differences in the actual survey practice can lead to bias in the data. One obvious example is code 3 'Completed commercial or other traineeship'. The frequency count in the reconstructed data is noticeably lower than that in the data for 1980 to 1984.

v1128 EX-SPOUSE: ISCED 1997 - 5 LEVELS

Description of variable:

International Standard Classification of Education (ISCED) 1997, 5 levels - ex-spouse

0 Respondent is married or never married (code 1, 2, 5 in V955); not available 1986, 1990-2014

1 Level 1 - Primary education or first stage of basic education

2 Level 2 - Lower secondary or second stage of basic education

3 Level 3 - (Upper) secondary education

4 Level 4 - Post-secondary non-tertiary education

5 Level 5 - First stage of tertiary education

94 Still at school

99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1114) and on vocational or professional training (V1115, V1118-V1127).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 1997

The International Standard Classification of Education (ISCED) 1997 was developed by UNESCO as an internationally comparable classification of education levels. It provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2006: 7). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (UNESCO 2006: 19). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education (UNESCO 2006: 10).

ISCED 1997 distinguishes seven levels of education (UNESCO 2006: 19):

- Level 0 - Pre-primary education
- Level 1 - Primary education or first stage of basic education
- Level 2 - Lower secondary or second stage of basic education
- Level 3 - (Upper) secondary education
- Level 4 - Post-secondary non-tertiary education
- Level 5 - First stage of tertiary education
- Level 6 - Second stage of tertiary education

Using survey data, ISCED 1997 can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). The implementation of ISCED 1997 for ALLBUS is modelled on the practice documented for the German microcensus (comp. Schroedter et al. 2006: 22) and the similar rules laid out in Hoffmeyer-Zlotnik et al. 2010 (76). There are, however, a number of factors that limit the full implementation of ISCED 1997 with ALLBUS data. On the one hand, these limitations are due to the universe sampled for ALLBUS. The ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' cannot be covered with ALLBUS data. On the other hand, there are limitations related to the type and scope of data surveyed. Firstly, this is the case for respondents who are still at school. These respondents cannot be assigned an ISCED level based on the type of school they attend, because this information is not available. Secondly, the ALLBUS-implementation of ISCED 1997 does not include a further differentiation of levels 3 and 5 (Schroedter et al. 2006: 22), because the data on vocational qualifications is not specific enough to accurately distinguish the proposed subcategories in all cases. And finally, ALLBUS does not distinguish between ISCED Level 5 "First Stage of Tertiary Education" and ISCED Level 6 – "Second Stage of Tertiary Education", because information on the type of university degree is only available for the latest cross-section surveys. Instead, all respondents with university degrees are classified at Level 5.

Mapping of qualifications to ISCED 1997 Levels:

Level 0 - Pre-primary education (not covered by ALLBUS)

Level 1: Primary education or first stage of basic education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not

finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower Secondary Education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper Secondary Education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post Secondary Education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Tertiary Education

Respondents who have a technical college or vocational college degree, master craftsmen or respondents with equivalent degrees, and respondents who have a university degree are classified at ISCED-Level 5.

Level 6: Second Stage of Tertiary Education (not implemented for ALLBUS)

ISCED-Level 6 would be reserved for respondents who have a research degree (e.g. a doctoral degree).

v1129 EX-SPOUSE: OCCUPATION

<If respondent is widowed or divorced>

1988-1992:

Which of these categories fits your (last) spouse's last occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible.

If divorced: ask for the last occupational position while still married, not after the divorce.

Leave chosen card on table and put other cards to the side.)

0 Respondent is married or never married (code 1, 2, 5 in V955); not available 1994-2014

1 Independent farmer

2 Independent professional

3 Self-employed in trade or craft, industry, service sector, etc.

4 Civil servants/judges/professional soldiers

5 Employees

6 Workers

7 In vocational training

8 Family member assisting in family business

9 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

91 <Until 1986:> Military/alternative community service

96 <Until 1992:> Spouse has never been employed full- or part-time

97 Refused

98 Don't know

99 No answer

Derivation of data:

The data in this variable was directly surveyed only between 1988 and 1992. For all other years this variable groups the data in V1130.

v1130 EX-SPOUSE: OCCUPATION, REFERENCE NUMBER

<If respondent is widowed or divorced>

And which of the listed categories fits your (last) spouse's last occupational position? Please tell me the appropriate reference code from the card.

(Int.: Please present card. Only one choice possible.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha; <1980:> 20 ha and over
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 15 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 21 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Military/alternative community service

- 49 <Until 1986:> Military/alternative community service

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of

organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

0 Respondent is married or never married (code 1, 2, 5 in V955); not available 1994-2014

- 96 Spouse was never employed full- or part-time
- 97 Refused
- 98 Don't know
- 99 No answer

Comment:

From 1980-1984, a single question was used to survey the data in this variable together with the data in V1067 (current occupation) and V1101 (last occupation).

v1131 EX-SPOUSE: OCCUPATION, ISCO 1968

Description of variable:

Classification of last spouse's last occupation according to ISCO 1968

<If respondent is widowed or divorced and the last spouse was employed full- or part-time>

What did your spouse do in his/her last main job?

Does this job, this work have a special name?

(Int.: Please as for a detailed answer.)

1988-1992:

(Int.: If divorced: ask for the last occupational position while still married, not after the divorce.)

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1994-2014

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

Comment:

From 1980-1984, a single question was used to survey the data in this variable together with the data in V1068 (current occupation) and V1102 (last occupation).

v1132 EX-SPOUSE: OCCUPATIONAL MINOR GROUP

Description of variable:

Classification of last spouse's last occupation according to the occupational minor group

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1994-2014

104 Workers with unclassifiable or inadequately described occupation

107 Refused

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v1133 EX-SPOUSE: OCCUPATIONAL MAJOR GROUP

Description of variable:

Classification of last spouse's last occupation according to the occupational major group

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1994-2014

- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others
- 97 Refused
- 98 Don't know
- 99 No answer

v1134 EX-SPOUSE: TREIMANPRESTIGE

Description of variable:

Classification of last spouse's last occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1994-2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v1136 EX-SPOUSE: MAGNITUDEPRESTIGE I68

Description of variable:

Classification of last spouse's last occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1994-2014

997 Refused

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1137 EX-SPOUSE: MAGNITUDEPRESTIGE I68, CATEG.

Description of variable:

Classification of last spouse's last occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS), categorized

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1994-2014

v1138 EX-SPOUSE: OCCUP.,GOLDTHORPE CLASSES

Description of variable:

Goldthorpe class scheme, respondent's last spouse:

Derived from information on the last occupation of the respondent's last spouse.

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); insufficient occupational information for classification in class scheme; not available 1994-2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with one or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 From 1991: Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1130 and V1131.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

v1139 EX-SPOUSE: OCCUPATION, ISCO 1988

Description of variable:

Classification of last spouse's last occupation according to ISCO 1988

0 Respondent is married or never married (code 1, 2, 5 in V955), last spouse has never been employed full- or part-time (code 96 in V1129); not available 1980-1991, 1994-2014

10004 Workers with unclassifiable or inadequately described occupation

10008 Don't know

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v1140 DOES RESPONDENT HAVE A STEADY PARTNER?

<If respondent does not live with spouse>

Do you have a steady partner?

From 1988:

(Int.: A steady partner also means a partner one does not live with.)

0 Respondent is married and lives with spouse (code 1, 6 in V955); not available 1980-1984

1 Yes

2 No

v1146 PARTNER: CITIZENSHIP AT BIRTH

<If partner has German citizenship, but not since birth>

What was your partner's citizenship at birth?

2006:

(Int.: Multiple responses possible, unless 'stateless' selected.)

0 Partner is German by birth (code 1 in V1145), respondent is married and lives with spouse (code 1 in V955), does not have a steady partner (code 2 in V1140) or steady partner is not a German citizen (code 2-24 in V1141); not available 1980-1994, 1998-2004, 2008-2014

1 Stateless at birth

2 Denmark

3 France

4 Greece

5 Great Britain and Northern Ireland

6 (Republic of) Ireland

v1149 PARTNER: AGE

Description of variable:

Until 1992, from 2000:

<If respondent has a steady partner>

1994-1998:

<If respondent has a steady partner who does not live in the same household>

Age of steady partner

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), 1994-1998 additionally: lives with steady partner (code 1 in V1153); not available 1980-1984

997 Refused

998 Don't know

999 No answer

Derivation of data:

Basic rules for calculating age

Age calculation for all ALLBUS surveys followed these basic steps: First, age was calculated by subtracting the year of birth (V1147) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1148) were compared. If the month of the interview preceded the month of the respondent's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the respondent's month of birth came after the last month of fieldwork, it could be assumed that the respondent had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the respondent's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the respondent had been interviewed before his or her birthday and the age calculated from year of birth and year of survey was reduced by 1.

96 1994: No participation in ISSP 'Family and Changing Gender Roles'

98 I can't say

99 No answer

Comment:

In 1994, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v1182 PARTNER: ISCED 1997 - 5 LEVELS

Description of variable:

International Standard Classification of Education (ISCED) 1997, 5 levels - partner

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140); not available 1980-1986

1 Level 1 - Primary education or first stage of basic education

2 Level 2 - Lower secondary or second stage of basic education

3 Level 3 - (Upper) secondary education

4 Level 4 - Post-secondary non-tertiary education

5 Level 5 - First stage of tertiary education

94 Still at school

99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1165) and on vocational or professional training (V1168-V1179).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 1997

The International Standard Classification of Education (ISCED) 1997 was developed by UNESCO as an internationally comparable classification of education levels. It provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2006: 7). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (UNESCO 2006: 19). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education (UNESCO 2006: 10).

ISCED 1997 distinguishes seven levels of education (UNESCO 2006: 19):

Level 0 - Pre-primary education

Level 1 - Primary education or first stage of basic education

Level 2 - Lower secondary or second stage of basic education

Level 3 - (Upper) secondary education

Level 4 - Post-secondary non-tertiary education

Level 5 - First stage of tertiary education

Level 6 - Second stage of tertiary education

Using survey data, ISCED 1997 can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). The implementation of ISCED 1997 for ALLBUS is modelled on the practice documented for the German microcensus (comp. Schroedter et al. 2006: 22) and the similar rules laid out in Hoffmeyer-Zlotnik et al. 2010 (76). There are, however, a number of factors that limit the full implementation of ISCED 1997 with ALLBUS data. On the one hand, these limitations are due to the universe sampled for ALLBUS. The ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' cannot be covered with ALLBUS data. On the other hand, there are limitations related to the type and scope of data surveyed. Firstly, this is the case for respondents who are still at school. These respondents cannot be assigned an ISCED level based on the type of school they attend, because this information is not available. Secondly, the ALLBUS-implementation of ISCED 1997 does not include a further differentiation of levels 3 and 5 (Schroedter et al. 2006: 22), because the data on vocational qualifications is not specific enough to accurately distinguish the proposed subcategories in all cases. And finally, ALLBUS does not distinguish between ISCED Level 5 "First Stage of Tertiary Education" and ISCED Level 6 – "Second Stage of Tertiary Education", because information on the type of university degree is only available for the latest cross-section surveys. Instead, all respondents with university degrees are classified at Level 5.

Mapping of qualifications to ISCED 1997 Levels:

Level 0 - Pre-primary education (not covered by ALLBUS)

Level 1: Primary education or first stage of basic education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are

classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower Secondary Education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper Secondary Education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post Secondary Education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Tertiary Education

Respondents who have a technical college or vocational college degree, master craftsmen or respondents with equivalent degrees, and respondents who have a university degree are classified at ISCED-Level 5.

Level 6: Second Stage of Tertiary Education (not implemented for ALLBUS)

ISCED-Level 6 would be reserved for respondents who have a research degree (e.g. a doctoral degree).

v1183 PARTNER: ISCED 2011

Description of variable:

International Standard Classification of Education (ISCED) 2011 - partner

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140); not available 1980-2010

1 Level 1 - Primary education

2 Level 2 - Lower secondary education

3 Level 3 - Upper secondary education

4 Level 4 - Post secondary non-tertiary education

5 Level 5 - Short-cycle tertiary education

6 Level 6 - Bachelor's or equivalent level

7 Level 7 - Master's or equivalent level

8 Level 8 - Doctoral or equivalent level

94 Still at school

99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1165) and on vocational or professional training (V1168-V1181).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is

coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 2011

The International Standard Classification of Education (ISCED) 2011 is an improved version of ISCED 1997, which was developed by UNESCO as an internationally comparable classification of education levels. Like its predecessor, ISCED 2011 provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2012: 6). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (comp. Section 9 in UNESCO 2012). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education. For ISCED 2011, terms and definitions were updated and the rules of classification were revised. Moreover, the classification was extended to cover early childhood education and to provides a more differentiated classification of tertiary education (UNESCO 2012: 62-68).

ISCED 2011 has "parallel coding schemes for education programmes (ISCED Programmes or ISCED-P) and levels of educational attainment (ISCED Attainment or ISCED-A)" which define nine general educational levels (UNESCO 2012: 21).

ISCED-A Level 0 – Less than primary education
ISCED-A Level 1 - Primary education
ISCED-A Level 2 - Lower secondary education
ISCED-A Level 3 - Upper secondary education
ISCED-A Level 4 - Post-secondary non-tertiary education
ISCED-A Level 5 – Short-cycle tertiary education
ISCED-A Level 6 – Bachelor's or equivalent level
ISCED-A Level 7 – Master's or equivalent level
ISCED-A Level 8 – Doctoral or equivalent level

Using survey data, ISCED can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). There are, however, a number of factors that limit the full implementation of ISCED 2011 with ALLBUS data. Because there is only insufficient data on tertiary education, ISCED 2011 has not been constructed for ALLBUS 1980-2008. Moreover, the ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' is not covered by ALLBUS data. Finally, ALLBUS only implements the highest level of the ISCED 2011 classification. Information of the type needed to form classes on second- and third-digit level (comp. UNESCO 2012: 21f.) is not part of the ALLBUS data. The implementation of ISCED 2011 could for the most part follow the established practice for ISCED 1997 (comp. Schroedter et al. 2006; Hoffmeyer-Zlotnik et al. 2010). New mappings of qualifications to ISCED levels were only necessary for the area of tertiary education.

Mapping of qualifications to ISCED-A levels

Level 0 – Less than primary education
(not covered by ALLBUS)

Level 1: Primary education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower secondary education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper secondary education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss) and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss).

Level 4: Post-secondary non-tertiary education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Short-cycle tertiary education

Respondents who have a technical college or vocational college degree, master craftsmen and respondents with equivalent degrees are classified at ISCED-Level 4.

Level 6: Bachelor's or equivalent level

Respondents who have a bachelor's degree or an unspecified university degree are classified at ISCED-Level 6.

Level 7: Master's or equivalent level

Respondents who have a master's degree or an equivalent degree ("Magister", "Diplom" or "Staatsexamen") are classified at ISCED-Level 7.

Level 8: Doctoral or equivalent level

Respondents who have a research degree (e.g. a doctoral degree) are classified at ISCED-Level 8.

v1186 PARTNER: CURRENT OCCUPATION

<If steady partner is employed full- or part-time>

1988-1992:

What is your steady partner's current occupational position?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side.)

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986

1 Independent farmer

2 Independent professional

3 Self-employed in trade or craft, industry, service sector, etc.

4 Civil servants/judges/professional soldiers

5 Employees

6 Workers

7 In vocational training

8 Family member assisting in family business

9 <From 1991:> Farmer on a cooperative farm <1991 only for respondents from the new federal states>

97 Refused

98 Don't know

99 No answer

Derivation of data:

The data in this variable was directly surveyed only between 1988 and 1992. For all other years this variable groups the data in V1187.

v1187 PARTNER: CURRENT OCCUPATION, REF. NR.

Until 1992

<If steady partner is employed full- or part-time>

And which of these descriptions fits your steady partner's occupational position? Please tell me the answer code.

(Int.: Hand over the card chosen in V1186 again. Only one choice possible.)

From 1994

(Int.: If steady partner is employed full- or part-time)

Please, classify your spouse's last occupational position according to this card.

(Int.: Please present card.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha
- 13 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees
- 24 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)

52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)

53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)

54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

60 Unskilled worker

61 Semi-skilled worker

62 Skilled worker

63 Foreman

64 Master (crafts- and tradesman), site foreman

65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

70 Trainee in commercial/administrative sector

71 Trainee in trades/crafts sector

72 Trainee in domestic/agricultural sector

73 Civil servant trainee

74 Trainee on short-term work placement/internship

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986

97 Refused

98 Don't know

v1188 PARTNER: CURRENT OCCUPATION, ISCO 1968

Description of variable:

Classification of steady partner's occupation according to ISCO 1968

<If steady partner is employed full- or part-time>

What work does your steady partner do in his/her main job?

Please describe this work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986, 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

v1189 PARTNER: OCCUPATIONAL MINOR GROUP I68

Description of variable:

Classification of steady partner's occupation according to the occupational minor group

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986, 2012, 2014

104 Workers with unclassifiable or inadequately described occupation

107 Refused

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v1190 PARTNER: OCCUPATIONAL MAJOR GROUP I68

Description of variable:

Classification of steady partner's occupation according to the occupational major group

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986, 2012, 2014

1 Professional, technical and related workers

2 Administrative and managerial workers in public service and industry

3 Clerical and related professions

4 Sales professions

5 Service professions (incl. members of the armed forces)

6 Agricultural, animal husbandry and forestry workers, fishermen and hunters

7 Production and related workers, transport equipment operators and laborers

8 Others

97 Refused

98 Don't know

99 No answer

v1191 PARTNER: TREIMANPRESTIGE ISCO 1968

Description of variable:

Classification of steady partner's occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986, 2012, 2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v1193 PARTNER: MAGNITUDEPRESTIGE ISCO 1968

Description of variable:

Classification of steady partner's occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1986, 2012, 2014

997 Refused

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1195 PARTNER: ISEI ISCO 1968

Description of variable:

Classification of steady partner's occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 1004 in V1188), no ISEI value for ISCO code; not available 1980-1998, 2012, 2014

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

v1197 PARTNER: GOLDTHORPE CLASSES ISCO 1968

Description of variable:

Goldthorpe class scheme:

derived from information on the occupation of the respondent's steady partner

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); insufficient occupational information for classification in class scheme; not available 1980-1986, 2012, 2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with one or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1187 and V1188.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

v1198 PARTNER: CURRENT OCCUPATION, ISCO 1988

Description of variable:

Classification of steady partner's occupation according to ISCO 1988

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v1199 PARTNER: SIOPS ISCO 1988

Description of variable:

Classification of steady partner's occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1198), no SIOPS value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v1200 PARTNER: SIOPS ISCO 1988, CATEGORIZED

Description of variable:

Classification of steady partner's occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS), categorized

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1198), no SIOPS value for ISCO code; not available 1980-1998

v1201 PARTNER: MAGNITUDEPRESTIGE ISCO 1988

Description of variable:

Classification of steady partner's occupation (ISCO 1988) according to the Magnitudeprestige Scale (MPS)

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1198), no MPS value for ISCO code; not available 1980-1991, 2012, 2014

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1202 PARTNER: MAGNITUDEPRESTIGE ISCO 88, CAT.

Description of variable:

Classification of steady partner's occupation (ISCO 1988) according to the Magnitudeprestige Scale (MPS), categorized

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1198), no SIOPS value for ISCO code; not available 1980-1991, 2012, 2014

v1203 PARTNER: ISEI ISCO 1988

Description of variable:

Classification of steady partner's occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1198), no ISEI value for ISCO code; not available 1980-1998

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For more information, compare:

Harry B. G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman und J. De Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21(1): 1-56.

Description of variable:

Classification of steady partner's occupation (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1205), no SIOPS value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v1208 PARTNER: CURRENT OCCUPAT., ISEI I08

Description of variable:

Classification of steady partner's occupation (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner not employed full- or part-time (code 3-6 in V1184); ISCO cannot be coded (code 10004 in V1205), no ISEI value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v1216 PARTNER: LAST OCCUPATION, REFERENCE NR.

<If steady partner has previously been working>

And which of these descriptions fits your steady partner's last occupational position? Please tell me the answer code (1991: using this card).

(Int.: Only one choice possible.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha
- 13 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 15 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 21 1 employee or none
- 22 2-9 employees
- 23 10-49 employees
- 24 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

- 0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

- 97 Refused

v1217 PARTNER: LAST OCCUPATION, ISCO 1968

Description of variable:

Classification of steady partner's last occupation according to ISCO 1968

<If steady partner has previously been working>

What work did your steady partner do in his/her last job?

Please describe this work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

1004 Not classifiable in classification scheme

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

v1218 PARTNER: LAST OCCUPATIONAL MINOR GROUP

Description of variable:

Classification of steady partner's last occupation according to the occupational minor group

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

104 Workers with unclassifiable or inadequately described occupation

107 Refused

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v1219 PARTNER: LAST OCCUPATIONAL MAJOR GROUP

Description of variable:

Classification of steady partner's last occupation according to the occupational major group

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

1 Professional, technical and related workers

2 Administrative and managerial workers in public service and industry

3 Clerical and related professions

4 Sales professions

5 Service professions (incl. members of the armed forces)

6 Agricultural, animal husbandry and forestry workers, fishermen and hunters

7 Production and related workers, transport equipment operators and laborers

8 Others

97 Refused

v1220 PARTNER: LAST OCCUPATION, TREIMANPRESTIGE

Description of variable:

Classification of steady partner's last occupation (ISCO 1968) according to the occupational prestige scale

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

Donald J. Treiman 1977: Occupational Prestige in Comparative Perspective, New York: Academic Press. (Hier insbesondere: Appendix A: Standard International Occupational Prestige)

v1222 PARTNER: LAST OCC., MAGNITUDEPRESTIGE I68

Description of variable:

Classification of steady partner's last occupation according to the Magnitudeprestige Scale (MPS)

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

997 Refused

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1223 PARTNER:LAST OCC.,MAGNITUDEPRES.I68,CAT.

Description of variable:

Classification of steady partner's last occupation according to the Magnitudeprestige Scale (MPS), categorized

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); not available 1980-1986, 1994-2014

v1224 PARTNER: LAST OCCUP., GOLDTHORPE CLASSES

Description of variable:

<If steady partner has previously been working>

Goldthorpe class scheme:

Derived from information on the last occupation of the respondent's steady partner

0 Respondent is married and lives with spouse (code 1, 6 in V955), does not have a steady partner (code 2 in V1140), steady partner is working full- or part-time (code 1, 2, 7 in V1184) or has never been working full- or part-time (code 9996 in V1213); insufficient occupational information for classification in class scheme; not available 1980-1986, 1994-2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with one or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure.

(This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1216 and V1217.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

Petra Beckmann und Reiner Trometer 1991: Neue Dienstleistungen des ALLBUS : Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA Nachrichten 15(28): 7-17.

Derivation of data:

The countries in V1226 COUNTRY OF ORIGIN: FATHER <STAGEBSYS> are coded according to the 'Staats- und Gebietssystematik' of the 'Federal Statistical Office' (Statistisches Bundesamt). This coding scheme was

introduced into the ALLBUS program in 2012. The data in this variable was first coded according to the 'Staats- und Gebietssystematik' in 2014.

For a comprehensive list of country codes and further information, compare:

Statistisches Bundesamt 2015: Staats- und Gebietssystematik,

Derivation of data:

The countries in V1230 COUNTRY OF ORIGIN: MOTHER <STAGEBSYS> are coded according to the 'Staats- und Gebietssystematik' of the 'Federal Statistical Office' (Statistisches Bundesamt). This coding scheme was introduced into the ALLBUS program in 2012. The data in this variable was first coded according to the 'Staats- und Gebietssystematik' in 2014.

For a comprehensive list of country codes and further information, compare:

Statistisches Bundesamt 2015: Staats- und Gebietssystematik,

v1234 FATHER: GENERAL SCHOOL LEAVING CERTIFIC.

<If father is known>

What general school leaving certificate does (did) your father have?

Until 1984

(Int.: Read out answers. Please request highest school leaving certificate only.)

From 1986:

(Int.: Please present card. Only one choice possible. Please request highest school leaving certificate only.)

0 Father unknown (code 95 in V1251), 1980 additionally: father is dead (code 93 in V1251)

1 <Until 1984:> None of these;

<From 1986:> Finished school without school leaving certificate;

<1991 East:> Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

97 Refused

v1236 FATHER: OCCUPATIONAL TRAINING, LATEST

<If father is known>

What occupational training did your father complete?

(Int.: Please present card. Ask for last qualification only.)

- 0 Father unknown (code 95 in V1251), not available 1980, 1982, 1991-2014
- 1 No completed vocational training (including vocational school without apprenticeship)
<Keinen beruflichen Ausbildungsabschluß (auch Berufsschule ohne Lehre)>
- 2 Completed trades/crafts or agricultural apprenticeship
<Berufsschulabschluß mit gewerblicher oder landwirtschaftlicher Lehre>
- 3 Completed commercial or other apprenticeship
<Berufsschulabschluß mit kaufmännischer oder sonstiger Lehre>
- 4 Specialized vocational college certificate <Berufsfachschulabschluß>
- 5 Work placement, internship
<Berufliches Praktikum (<from 1986:> Berufliches Praktikum, Volontariat)>
- 6 Master (craftsman), technician or equivalent college certificate
<Meister-/ Techniker- oder gleichwertiger Fachschulabschluß>
- 7 University of Applied Science degree (or engineering college degree)
<Fachhochschulabschluß (auch Ingenieurschulabschluß)>
- 8 University degree
- 9 <From 1986:> Completed other occupational training
- 97 Refused
- 98 Don't know
- 99 No answer

Derivation of data:

In ALLBUS 1984 respondents were asked to indicate the occupational training of their father by choosing their father's last occupational qualification from a list of categories (V1236). Only one answer was permitted. As of 1986, the ALLBUS program uses a multiple response question to collect information on occupational training (compare V1238-V1249). For this cumulative data set, information from this multiple response question (V1238, V1239, V1240-V1243 and V1245-V1249) was recoded in such a way that the data could be merged with the data in V1236. Thus, the time series for V1236 could be extended to cover the period up to 1990. However, due to the largely incomparable systems of education in former East Germany and West Germany, the practice of reconstructing V1236 has been discontinued after 1990.

Users wishing to work with the data in V1236 should take into account the following particularities of the reconstructed data:

- As there is no indication which qualification from the multiple response question is actually the last one, it was assumed that the highest qualification was also the last qualification.
- There is a possibility that the extended list of categories used from 1988 onwards influenced the respondents' answers.

- The response options for the multiple response question contain the additional code 9 'Completed other occupational training'.
- In 1984, code 1 explicitly includes respondents who attended a vocational school without being in a traineeship scheme.
- In 1984 code 3 was 'Completed commercial or other traineeship'. As of 1986 this category has been restricted to 'Completed commercial traineeship' (compare V1242).

These differences in the actual survey practice can lead to bias in the data. One obvious example is code 3 'Completed commercial or other traineeship'. The frequency count in the reconstructed data is noticeably lower than that in the data for 1984.

v1249 FATHER: OTHER VOCATIONAL TRAINING CERT.

<If father is known>

What vocational or professional training does (did) your father have?

Which categories on this list apply/applied to him?

Please tell me the appropriate answer codes.

(Int.: Please present card. Multiple responses possible, unless 'no completed vocational training' is selected.)

Other vocational training certificate

v1250 FATHER: ISCED 1997 - 5 LEVELS

Description of variable:

International Standard Classification of Education (ISCED) 1997, 5 levels - father

0 Father unknown (code 95 in V1252); not available 1980, 1982, 1991, 1992, 1996-2002

1 Level 1 - Primary education or first stage of basic education

2 Level 2 - Lower secondary or second stage of basic education

3 Level 3 - (Upper) secondary education

4 Level 4 - Post-secondary non-tertiary education

5 Level 5 - First stage of tertiary education

99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1234) and on vocational or professional training (V1236-V1249).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 1997

The International Standard Classification of Education (ISCED) 1997 was developed by UNESCO as an internationally comparable classification of education levels. It provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2006: 7). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (UNESCO 2006: 19). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education (UNESCO 2006: 10).

ISCED 1997 distinguishes seven levels of education (UNESCO 2006: 19):

Level 0 - Pre-primary education

Level 1 - Primary education or first stage of basic education

Level 2 - Lower secondary or second stage of basic education

Level 3 - (Upper) secondary education

Level 4 - Post-secondary non-tertiary education

Level 5 - First stage of tertiary education

Level 6 - Second stage of tertiary education

Using survey data, ISCED 1997 can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). The implementation of ISCED 1997 for ALLBUS is modelled on the practice documented for the German microcensus (comp. Schroedter et al. 2006: 22) and the similar rules laid out in Hoffmeyer-Zlotnik et al. 2010 (76). There are, however, a number of factors that limit the full implementation of ISCED 1997 with ALLBUS data. On the one hand, these limitations are due to the universe sampled for ALLBUS. The ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' cannot be covered with ALLBUS data. On the other hand, there are limitations related to the type and scope of data surveyed. Firstly, this is the case for respondents who are still at school. These respondents cannot be assigned an ISCED level based on the type of school they attend, because this information is not available. Secondly, the ALLBUS-implementation of ISCED 1997 does not include a further differentiation of levels 3 and 5 (Schroedter et al. 2006: 22), because the data on vocational qualifications is not specific enough to accurately distinguish the proposed subcategories in all cases. And finally, ALLBUS does not distinguish between ISCED Level 5 "First Stage of Tertiary Education" and ISCED Level 6 – "Second Stage of Tertiary Education", because information on the type of university degree is only available for the latest cross-section surveys. Instead, all respondents with university degrees are classified at Level 5.

Mapping of qualifications to ISCED 1997 Levels:

Level 0 - Pre-primary education (not covered by ALLBUS)

Level 1: Primary education or first stage of basic education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower Secondary Education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper Secondary Education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post Secondary Education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Tertiary Education

Respondents who have a technical college or vocational college degree, master craftsmen or respondents with equivalent degrees, and respondents who have a university degree are classified at ISCED-Level 5.

Level 6: Second Stage of Tertiary Education (not implemented for ALLBUS)

ISCED-Level 6 would be reserved for respondents who have a research degree (e.g. a doctoral degree).

v1251 FATHER: OCCUPATION

1988-1992:

When you were fifteen years old, what was the occupational position of your father?

Please have a look at these cards, choose the appropriate card and tell me the answer code on the card.

(Int.: Hand over card pack. Only one choice possible. Leave chosen card on table and put other cards to the side. Note: If father was not working at this time, please informally ascertain why and circle the appropriate answer code.)

- 1 Independent farmer
- 2 Independent professional
- 3 Self-employed in trade or craft, industry, service sector, etc.
- 4 Civil servants/judges/professional soldiers
- 5 Employees
- 6 Workers
- 7 In vocational training
- 8 Family member assisting in family business
- 9 <From 1991:> Farmer on a cooperative farm
- 90 Father was retired at the time
- 91 Father was unemployed at the time
- 92 Father was in the war/a prisoner of war at the time
- 93 Father was no longer alive
- 94 <From 2012:> Father was not working for other reasons
- 95 Father unknown
- 96 <Until 1986:> Military/alternative community service
- 97 Refused
- 98 Don't know
- 99 No answer

Derivation of data:

The data in this variable was directly surveyed only between 1988 and 1992. For all other years this variable groups the data in V1252.

v1252 FATHER: OCCUPATION, REFERENCE NUMBER

Until 1986:

When you were fifteen years old, what was the occupational position of your father?

Please classify your father's occupational position according to this card.

Please present card.

1988-1992:

(Int.: <1988:> Please display the card chosen in V1251 again.)

And which of these descriptions fits your father's position at that time? Please tell me the appropriate answer code (from 1990: using this card).

(Int.: Only one answer possible.)

From 1994:

When you were fifteen years old, what was the occupational position of your father?

Please classify your father's occupational position according to this card.

(Int.: Please present card. If father was not working at this time, please informally ascertain why and circle the appropriate answer code.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha; <1980: 20 ha and over>
- 13 <From 1982:> 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 <From 1982:> 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties

42 Civil servants carrying out senior administrative duties

43 Civil servants carrying out executive duties, judges

Military/alternative community service

49 <Until 1986:> Military/alternative community service

Employees

50 Plant foreman with employee status

51 Employee with simple duties (e.g. salesperson, clerk, typist)

52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)

53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)

54 Employee with wide managerial responsibilities and decision making powers (e.g. head of organisation/association, managing director, executive of large firm or organisation)

Workers

60 Unskilled worker

61 Semi-skilled worker

62 Skilled worker

63 Foreman

64 Master (crafts- and tradesman), site foreman

65 <From 1991:> Farmer on a cooperative farm <"Genossenschaftsbauer," 1991 only for respondents from the new federal states>

In vocational training

70 Trainee in commercial/administrative sector

71 Trainee in trades/crafts sector

72 Trainee in domestic/agricultural sector

73 Civil servant trainee

74 Trainee on short-term work placement/internship

90 Father was retired at the time

91 <From 1982:> Father was unemployed at the time

92 <From 1982:> Father was in the war/a prisoner of war at the time

93 Father was no longer alive

94 <From 2012:> father was not working for other reasons

95 Father unknown

97 Refused

98 Don't know

99 No answer

v1253 FATHER: OCCUPATION, ISCO 1968

Description of variable:

Classification of occupation of father according to ISCO 1968

<If father is known and has been working at the time>

What work did your father do at that time?

Please describe the work precisely.

(Int.: Please ask for a detailed answer:)

Does this job, this work have a special name?

0 Father not working, unknown etc. (code 49, 90-95 in V1252); not available 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

1007 Refused

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

v1254 FATHER: OCCUPATIONAL MINOR GROUP ISCO 68

Description of variable:

Classification of occupation of father according to the occupational minor group

0 Father not working, unknown etc. (code 49, 90-95 in V1252); not available 2012, 2014

104 Workers with unclassifiable or inadequately described occupation

107 Refused

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v1255 FATHER: OCCUPATIONAL MAJOR GROUP ISCO 68

Description of variable:

Classification of occupation of father according to the occupational major group

- 0 Father not working, unknown etc. (code 49, 90-95 in V1252); not available 2012, 2014
- 1 Professional, technical and related workers
- 2 Administrative and managerial workers in public service and industry
- 3 Clerical and related professions
- 4 Sales professions
- 5 Service professions (incl. members of the armed forces)
- 6 Agricultural, animal husbandry and forestry workers, fishermen and hunters
- 7 Production and related workers, transport equipment operators and laborers
- 8 Others
- 97 Refused
- 98 Don't know
- 99 No answer

v1256 FATHER: TREIMANPRESTIGE ISCO 1968

Description of variable:

Classification of occupation of father (ISCO 1968) according to the occupational prestige scale

0 Father not working, unknown etc. (code 49, 90-95 in V1252); not available 2012, 2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v1258 FATHER: MAGNITUDEPRESTIGE ISCO 1968

Description of variable:

Classification of occupation of father (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Father not working, unknown etc. (code 49, 90-95 in V1252); not available 2012, 2014

997 Refused

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1260 FATHER: ISEI ISCO 1968

Description of variable:

Classification of occupation of father (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Father not working, unknown etc. (code 90-95 in V1252); ISCO cannot be coded (code 1004 in V1253), no ISEI value for ISCO code; not available 1980-1998, 2012, 2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

v1262 FATHER: GOLDTHORPE CLASSES ISCO 1968

Description of variable:

Goldthorpe class scheme:

Derived from information on respondent's father's occupation

0 Father not working, unknown etc. (code 90-95 in V1252); insufficient occupational information for classification in class scheme; not available 2012, 2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with one or no employee

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)

12 <From 1991:> Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1252 and V1253.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

v1263 FATHER: OCCUPATION, ISCO 1988

Description of variable:

<Complete question text V1123>

<If father is known and has been working at the time>

Classification of occupation of father according to ISCO 1988

0 Father not working, unknown etc. (code 90-95 in V1252); not available 1980-1991

10004 Workers with unclassifiable or inadequately described occupation

10008 Don't know

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva: International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official German translation of the source cited above, which was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v1264 FATHER: SIOPS ISCO 1988

Description of variable:

<Complete question text V1123>

<If father is known and has been working at the time>

Classification of occupation of father (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Father not working, unknown etc. (code 90-95 in V1252); ISCO cannot be coded (code 10004 in V1263), no ISEI value for ISCO code; not available 1980-1998

98 Don't know

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v1265 FATHER: SIOPS ISCO 1988, CATEGORIZED

Description of variable:

<Complete question text V1123>

v1266 FATHER: MAGNITUDEPRESTIGE ISCO 1988

Description of variable:

<Complete question text V1123>

<If father is known and has been working at the time>

Classification of occupation of father (ISCO 1988) according to the Magnitudeprestige Scale (MPS)

0 Father not working, unknown etc. (code 90-95 in V1252); ISCO cannot be coded (code 10004 in V1263), no MPS value for ISCO code; not available 1980-1991, 2012, 2014

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1267 FATHER: MAGNITUDEPRESTIGE ISCO 88, CAT.

Description of variable:

<Complete question text V1123>

<If father is known and has been working at the time>

Classification of occupation of father (ISCO 1988) according to the Magnitudeprestige Scale (MPS), categorized

0 Father not working, unknown etc. (code 90-95 in V1252); ISCO cannot be coded (code 10004 in V1263), no MPS value for ISCO code; not available 1980-1991, 2012, 2014

v1268 FATHER: ISEI ISCO 1988

Description of variable:

<Complete question text V1123>

<If father is known and has been working at the time>

Classification of occupation of father (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Father not working, unknown etc. (code 90-95 in V1252); ISCO cannot be coded (code 10004 in V1263), no ISEI value for ISCO code; not available 1980-1998

98 Don't know

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For more information, compare:

Harry B. G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman und J. De Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21(1): 1-56.

v1270 FATHER: OCCUPATION, ISCO 2008

Description of variable:

<Complete question text V1123>

<If father is known and has been working at the time>

Classification of occupation of father according to ISCO 2008

0 Father not working, unknown etc. (code 90-95 in V1252); not available 1980-2010

10004 Workers with unclassifiable or inadequately described occupation

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-08)

Source:

Kommission der Europäischen Gemeinschaften 2009: Empfehlung der Kommission vom 29. Oktober 2009 über die Verwendung der Internationalen Standardklassifikation der Berufe (ISCO-08), <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:0047:DE:PDF>, retrieved 19.05.2015.

ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn) based on the source cited above. A German translation of occupational titles was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

Please refer to 'Appendix C' of the variable report for a comprehensive list of codes used in the data.

v1271 FATHER: SIOPS ISCO 08

Description of variable:

Classification of occupation of father (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Father not working, unknown etc. (code 90-95 in V1252); unclassifiable or inadequately described occupation (code 10004 in V1270); ISCO cannot be coded (code 10004 in V1270), no SIOPS value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v1273 FATHER: ISEI ISCO 08

Description of variable:

Classification of occupation of father (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Father not working, unknown etc. (code 90-95 in V1252); unclassifiable or inadequately described occupation (code 10004 in V1270); ISCO cannot be coded (code 10004 in V1270), no ISEI value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v1275 RELIGIOUS DENOMINATION: FATHER

1991 (ISSP), 2008 (ISSP):

When you were a child, what religion did your father belong to at that time?

(Int.: Only one choice possible.)

2002, 2012:

<If father is known>

(Int.: Please present card.)

When you were 11 or 12 years old, what religion did your father belong to at that time?

0 Father unknown (code 95 in V1252); 1991, 2008 no participation in ISSP 'Religion'; not available 1980-1990, 1992-2000, 2004-2006, 2010, 2014

1 B The German Protestant church (excluding free churches)

2 C A Protestant free church

3 A The Roman Catholic Church

4 D Another Christian denomination

5 E Another non-Christian religion

6 F No religion

91 Father was no longer alive at the time

92 <1991 (ISSP):> Father no longer alive/unknown

<2008 (ISSP):> Father no longer alive/did not live with respondent

98 Do not know

99 No answer

Comment:

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

In 1991 and 2008, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v1277 MOTHER: GENERAL SCHOOL LEAVING CERTIFIC.

What general school leaving certificate does (did) your mother have?

1984:

(Int.: Read out answers. Please request highest school leaving certificate only.)

From 1986:

(Int.: Please present card. Only one choice possible. Please request highest school leaving certificate only.)

0 Not available 1980, 1982

1 <1984:> None of these;

<From 1986:> Finished school without school leaving certificate;

<1991 East:> Finished school without school leaving certificate, did not finish 8th grade

2 Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling

<Until 1991: Volks-/ Hauptschulabschluß

1991 East: Volksschulabschluß, Polytechnische Oberschule mit Abschluß 8. Klasse

from 1992: Volks-/ Hauptschulabschluß bzw. Polytechnische Oberschule mit Abschluß 8. oder 9. Klasse>

3 Intermediary secondary qualification, after 10 years of schooling

<1991 East: Polytechnische Oberschule mit Abschluß 10. Klasse

from 1992: Mittlere Reife, Realschulabschluß bzw. Polytechnische Oberschule mit Abschluß 10. Klasse

until 1991: Mittlere Reife, Realschulabschluß (Fachschulreife)>

4 Certificate qualifying for studies at a University of Applied Sciences

<Fachhochschulreife (Abschluß einer Fachoberschule, etc.)

1991 East: Fachabitur>

5 Certificate qualifying for studies at university level

<Until 1991: Abitur (Hochschulreife)

1991 East: Abitur, Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)

from 1992: Abitur bzw. Erweiterte Oberschule mit Abschluß 12. Klasse (Hochschulreife)>

6 Other school leaving certificate

<From 1986: Anderen Schulabschluß

1991 West: Anderen Schulabschluß (auch in der ehemaligen DDR oder im Ausland erworbener Abschluß)

1991 East: Anderen Schulabschluß (auch in den alten Bundesländern oder im Ausland erworbener Abschluß)>

v1279 MOTHER: OCCUPATIONAL TRAINING, LATEST

What occupational training did your mother complete?

(Int.: Please present card. Ask for last qualification only.)

- 0 Not available 1980, 1982, 1991-2014
- 1 No completed vocational training (including vocational school without apprenticeship)
<Keinen beruflichen Ausbildungsabschluß (auch Berufsschule ohne Lehre)>
- 2 Completed trades/crafts or agricultural apprenticeship
<Berufsschulabschluß mit gewerblicher oder landwirtschaftlicher Lehre>
- 3 Completed commercial or other apprenticeship
<Berufsschulabschluß mit kaufmännischer oder sonstiger Lehre>
- 4 Specialized vocational college certificate <Berufsfachschulabschluß>
- 5 Work placement, internship
<Berufliches Praktikum; <from 1986:> Berufliches Praktikum, Volontariat>
- 6 Master (craftsman), technician or equivalent college certificate
<Meister-/ Techniker- oder gleichwertiger Fachschulabschluß>
- 7 University of Applied Science degree (or engineering college degree)
<Fachhochschulabschluß (auch Ingenieurschulabschluß)>
- 8 University degree
- 9 <From 1986:> Completed other occupational training
- 97 Refused
- 98 Don't know
- 99 No answer

Derivation of data:

In ALLBUS 1984 respondents were asked to indicate the occupational training of their father by choosing their father's last occupational qualification from a list of categories (V1279). Only one answer was permitted. As of 1986, the ALLBUS program uses a multiple response question to collect information on occupational training (compare V1281-V1292). For this cumulative data set, information from this multiple response question (V1281, V1282, V1284-V1286 and V1288-V1292) was recoded in such a way that the data could be merged with the data in V1279. Thus, the time series for V1279 could be extended to cover the period up to 1990. However, due to the largely incomparable systems of education in former East Germany and West Germany, the practice of reconstructing V1279 has been discontinued after 1990.

Users wishing to work with the data in V1279 should take into account the following particularities of the reconstructed data:

- As there is no indication which qualification from the multiple response question is actually the last one, it was assumed that the highest qualification was also the last qualification.
- There is a possibility that the extended list of categories used from 1988 onwards influenced the respondents' answers.
- The response options for the multiple response question contain the additional code 9 'Completed other

occupational training'.

- In 1984, code 1 explicitly includes respondents who attended a vocational school without being in a traineeship scheme.

- In 1984 code 3 was 'Completed commercial or other traineeship'. As of 1986 this category has been restricted to 'Completed commercial traineeship' (compare V1285).

These differences in the actual survey practice can lead to bias in the data. One obvious example is code 3 'Completed commercial or other traineeship'. The frequency count in the reconstructed data is noticeably lower than that in the data for 1984.

v1293 MOTHER: ISCED 1997 - 5 LEVELS

Description of variable:

International Standard Classification of Education (ISCED) 1997, 5 levels - mother

- 0 Not available 1980, 1982, 1991, 1992, 1996-2002
- 1 Level 1 - Primary education or first stage of basic education
- 2 Level 2 - Lower secondary or second stage of basic education
- 3 Level 3 - (Upper) secondary education
- 4 Level 4 - Post-secondary non-tertiary education
- 5 Level 5 - First stage of tertiary education
- 99 Not classifiable

Derivation of data:

The data in this variable was constructed based on the combination of data on the general school leaving certificate (V1277) and on vocational or professional training (V1279-V1292).

Rule 1

When there is valid data on both the general school leaving certificate and on vocational or professional training, the case is classified according to the combination of the two qualifications.

When the information on the general school leaving certificate is ambiguous ('other school leaving certificate'), the person is assumed to have the equivalent of a basic or intermediary secondary qualification ("Haupt- oder Realschulabschluss").

When the information on vocational or professional training is ambiguous ('other vocational training certificate'), the person is assumed to have the equivalent of a basic or intermediary qualification (e.g. completed apprenticeship).

Rule 2

When there is valid data on the general school leaving certificate but no valid data on vocational or professional training or when the person has no vocational or professional training, the case is classified according to the school leaving certificate.

Rule 3

When there is valid data on vocational or professional training but no valid data on the general school leaving certificate, it is assumed that the person has the minimal school qualification necessary to obtain the vocational or professional qualification and the case is classified according to this combination of qualifications.

Rule 4

When there is neither valid data on the general school leaving certificate nor on vocational or professional training, the case is coded as 99 'not classifiable'.

When the person is still at school according to the data on the general school leaving certificate, the case is coded as 94 'still at school'.

Note:

International Standard Classification of Education (ISCED) 1997

The International Standard Classification of Education (ISCED) 1997 was developed by UNESCO as an internationally comparable classification of education levels. It provides a framework for the description of educational programs that can be applied regardless of the structure of national education systems and a set of rules for assigning educational programs to a taxonomy of educational attainment (UNESCO 2006: 7). The characteristics used to classify educational programs include, for example, the field and type of education, the age at which a program is typically attended, the entrance qualification needed to participate in a program or the type of education it gives access to (UNESCO 2006: 19). ISCED 1997 is designed to encompass all forms of organized learning, i.e. it equally covers vocational and academic education (UNESCO 2006: 10).

ISCED 1997 distinguishes seven levels of education (UNESCO 2006: 19):

- Level 0 - Pre-primary education
- Level 1 - Primary education or first stage of basic education
- Level 2 - Lower secondary or second stage of basic education
- Level 3 - (Upper) secondary education
- Level 4 - Post-secondary non-tertiary education
- Level 5 - First stage of tertiary education
- Level 6 - Second stage of tertiary education

Using survey data, ISCED 1997 can be operationalized for the German educational system as the combination of the attributes general school leaving certificate and highest vocational qualification (Hoffmeyer-Zlotnik et al. 2010: 77). The implementation of ISCED 1997 for ALLBUS is modelled on the practice documented for the German microcensus (comp. Schroedter et al. 2006: 22) and the similar rules laid out in Hoffmeyer-Zlotnik et al. 2010 (76). There are, however, a number of factors that limit the full implementation of ISCED 1997 with ALLBUS data. On the one hand, these limitations are due to the universe sampled for ALLBUS. The ALLBUS sample only includes adult respondents, i.e. persons who are 18 or older. Consequently, ISCED Level 0 'Pre-primary education' cannot be covered with ALLBUS data. On the other hand, there are limitations related to the type and scope of data surveyed. Firstly, this is the case for respondents who are still at school. These respondents cannot be assigned an ISCED level based on the type of school they attend, because this information is not available. Secondly, the ALLBUS-implementation of ISCED 1997 does not include a further differentiation of levels 3 and 5 (Schroedter et al. 2006: 22), because the data on vocational qualifications is not specific enough to accurately distinguish the proposed subcategories in all cases. And finally, ALLBUS does not distinguish between ISCED Level 5 "First Stage of Tertiary Education" and ISCED Level 6 – "Second Stage of Tertiary Education", because information on the type of university degree is only available for the latest cross-section surveys. Instead, all respondents with university degrees are classified at Level 5.

Mapping of qualifications to ISCED 1997 Levels:

Level 0 - Pre-primary education (not covered by ALLBUS)

Level 1: Primary education or first stage of basic education

Respondents who indicate that they did not finish school and have not obtained a vocational qualification are classified at ISCED Level 1. Also classified at ISCED Level 1 are respondents who indicate that they did not

finish school and who did not give a valid answer to the question on occupational qualifications.

Level 2: Lower Secondary Education

Respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and no vocational qualification or only an informal vocational qualification ('on the job training' or 'work placement/internship') are classified at ISCED Level 2.

Level 3: Upper Secondary Education

Respondents who have an entrance qualification for tertiary education ("Fachhochschulreife oder Abitur") and no vocational qualification or only an informal vocational qualification (on the job training or work placement/internship) are classified at ISCED-Level 3. Also classified at ISCED-Level 3 are respondents who have a lower or intermediary school qualification ("Haupt- oder Realschulabschluss") and additionally finished a vocational training program ("Lehre, Teilfacharbeiter- oder Berufsfachschulabschluss").

Level 4: Post Secondary Education

ISCED-Level 4 marks a level of educational attainment that goes beyond secondary education but does not satisfy the standards of tertiary education. This category includes respondents who have an entrance qualification for tertiary education and also finished a vocational training program (e.g. a traineeship program).

Level 5: Tertiary Education

Respondents who have a technical college or vocational college degree, master craftsmen or respondents with equivalent degrees, and respondents who have a university degree are classified at ISCED-Level 5.

Level 6: Second Stage of Tertiary Education (not implemented for ALLBUS)

ISCED-Level 6 would be reserved for respondents who have a research degree (e.g. a doctoral degree).

v1295 MOTHER: OCCUPATION, REFERENCE NUMBER

(Int.: Please present card.)

When you were fifteen years old, what was the occupational position of your mother?

Please classify the occupational position of your mother according to this card.

(Int.: Please enter reference number. If mother was not working at that time, please find out informally what applies and tick accordingly.)

Independent farmers with farmland of:

- 10 Less than 10 hectares
- 11 10 ha - less than 20 ha
- 12 20 ha - to less than 50 ha; <1980:> 20 ha and over
- 13 50 ha and over

Independent professionals (e.g. doctor in private practice, lawyer)

- 14 <From 2010:> no employees
- 15 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 16 2-9 employees
- 17 10 or more employees

Self-employed in trade or craft, industry, service sector etc.

- 20 <From 2010:> no employees
- 21 <From 2010:> 1 employee; <until 2008:> 1 employee or none
- 22 2-9 employees
- 23 10-49 employees; <1980:> 10 or more employees
- 24 50 or more employees

Family member assisting in family business

- 30 Family member assisting in family business

Civil servants/judges/professional soldiers

- 40 Civil servants carrying out simple administrative duties
- 41 Civil servants carrying out middle level administrative duties
- 42 Civil servants carrying out senior administrative duties
- 43 Civil servants carrying out executive duties, judges

Employees

- 50 Plant foreman with employee status
- 51 Employee with simple duties (e.g. salesperson, clerk, typist)
- 52 Employee under loose supervision carrying out complex tasks independently (e.g. senior clerical staff, book-keeper, draughtsman)
- 53 Employee carrying out responsible tasks independently or with limited responsibility for others (e.g. researcher, manager, head of department)
- 54 Employee with wide managerial responsibilities and decision making powers (e.g. head of

organisation/association, managing director, executive of large firm or organisation)

Workers

- 60 Unskilled worker
- 61 Semi-skilled worker
- 62 Skilled worker
- 63 Foreman
- 64 Master (crafts- and tradesman), site foreman

Farmer on a cooperative farm

- 65 Farmer on a cooperative farm <"Genossenschaftsbauer">

In vocational training

- 70 Trainee in commercial/administrative sector
- 71 Trainee in trades/crafts sector
- 72 Trainee in domestic/agricultural sector
- 73 Civil servant trainee
- 74 Trainee on short-term work placement/internship

0 Not available 1980-2002

- 93 Mother was no longer alive
- 94 Mother was not working at the time
- 98 Don't know
- 99 No answer

v1296 MOTHER: OCCUPATION THEN, ISCO 1968

Description of variable:

Classification of mother's occupation according to ISCO 1968

<If mother was working at the time>

2000:

What work did your mother do in her main job?

Please fill in the exact name of her occupation or a precise description of the work she did:

From 2004:

What work did your MOTHER do in her main job? Please describe the work precisely.

(Int.: Please probe:)

Did this job, this work have a special name?

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); 2000: no participation in ISSP

'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

1004 Workers with unclassifiable or inadequately described occupation

1008 Don't know

1009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-68)

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition

1968, Geneva: International Labour Office.

Please refer to 'Appendix A' of the variable report for a comprehensive list of codes used in the data.

Comment:

In 2000, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

v1297 MOTHER: OCCUPATIONAL MINOR GROUP ISCO 68

Description of variable:

Classification of mother's occupation according to the occupational minor group

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); 2000: no participation in ISSP

'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

104 Workers with unclassifiable or inadequately described occupation

108 Don't know

109 No answer

Derivation of data:

Occupational Minor Group

Please refer to 'Appendix D' of the variable report for a comprehensive list of codes used in the data.

v1298 MOTHER: OCCUPATIONAL MAJOR GROUP ISCO 68

Description of variable:

Classification of mother's occupation according to the occupational major group

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); 2000: no participation in ISSP

'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

1 Professional, technical and related workers

2 Administrative and managerial workers in public service and industry

3 Clerical and related professions

4 Sales professions

5 Service professions (incl. members of the armed forces)

6 Agricultural, animal husbandry and forestry workers, fishermen and hunters

7 Production and related workers, transport equipment operators and laborers

8 Others

v1299 MOTHER: TREIMANPRESTIGE ISCO 1968

Description of variable:

Classification of mother's occupation (ISCO 1968) according to the occupational prestige scale

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); 2000: no participation in ISSP 'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

99,8 Don't know

99,9 No answer

Derivation of data:

Occupational Prestige Scale

The occupational prestige scale is based on the ISCO-68 classification of occupations.

The prestige scores in this scale were derived from the results of empirical social research in various countries. Respondents in all participating countries were asked to evaluate a number of occupations according to relative prestige and social status. Based on these evaluations a scale of prestige scores with hypothetical extreme values of 0 and 100 was then created.

In general, respondents were assigned prestige scores according to the three digit ISCO-68 code of their occupation. When an appropriate ISCO code could not be determined, prestige scores were assigned according to the occupational minor group. When no appropriate occupational minor group could be determined, the mean prestige score of the occupational major group was assigned.

For further information on the prestige scale, compare:

v1301 MOTHER: MAGNITUDEPRESTIGE ISCO 1968

Description of variable:

Classification of mother's occupation (ISCO 1968) according to the Magnitudeprestige Scale (MPS)

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); 2000: no participation in ISSP 'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1303 MOTHER: ISEI ISCO 1968

Description of variable:

Classification of mother's occupation (ISCO 1968) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); ISCO cannot be coded (code 1004 in V1296), no ISEI value for ISCO code; 2000: no participation in ISSP 'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

98 Don't know

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-68)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-68.

Cases for which there was no valid ISCO-68 code, could not be assigned an ISEI score. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Harry B. G. Ganzeboom, Paul M. De Graaf, Donald J. Treiman und J. De Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21(1): 1-56.

v1305 MOTHER: GOLDTHORPE CLASSES ISCO 1968

Description of variable:

Classification of occupation according to the Goldthorpe class scheme:

Derived from information on the occupation of the mother

0 Mother not working or no longer alive at the time (code 93, 94 in V1295), not applicable or insufficient information for classification in class scheme; not available 1980-2002, 2012, 2014

1 Higher and middle grades of the service class (higher grade professionals, administrators, officials and managers, large proprietors)

2 Lower grades of the service class

3 Non-manual employees with routine tasks (mainly clerical occupations, also sales occupations)

4 Proprietors, artisans etc. with 2-49 employees

5 Small proprietors, artisans etc. with one or no employees

6 Farmers (self-employed)

7 Technicians, supervisors of manual workers (foremen, master craftsmen)

8 Skilled workers

9 Unskilled and semi-skilled workers

10 Agricultural workers

11 Subdivision of class 3: Occupations without attachment to an organisational hierarchy and infrastructure. (This category was added when the class scheme was adapted to include women.)

12 Farmer on a cooperative farm

Derivation of data:

This classification was constructed using the information in V1295 and V1296.

Note:

The Goldthorpe Class Scheme

The class scheme by Goldthorpe groups individuals on the basis of their occupation (ISCO-68) their occupational position (reference number). By combining these two variables, 12 different class categories are constituted.

For further information, compare:

Petra Beckmann und Reiner Trometer 1991: Neue Dienstleistungen des ALLBUS : Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA Nachrichten 15(28): 7-17.

v1306 MOTHER: OCCUPATION THEN, ISCO 1988

Description of variable:

Classification of mother's occupation according to ISCO 1988

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); 2000: no participation in ISSP
'Social Inequality'; not available 1980-1998, 2002

10004 Workers with unclassifiable or inadequately described occupation

10006 <2012:> Mother is housewife

10008 Don't know

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO 1988)

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva:
International Labour Office.

Until 2010, the answers to the open question on occupations were coded by GESIS based on the official
German translation of the source cited above, which was provided by the 'Federal Statistical Office'
(Statistisches Bundesamt).

As of 2012, ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH,
Friedrich-Wilhelm-Str. 18, 53113 Bonn).

Please refer to 'Appendix B' of the variable report for a comprehensive list of codes used in the data.

v1307 MOTHER: SIOPS ISCO 1988

Description of variable:

Classification of mother's occupation (ISCO 1988) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Mother not working or no longer alive at the time (code 93, 93 in V1295); ISCO cannot be coded (code 10004 in V1306), no SIOPS value for ISCO code; 2000: no participation in ISSP 'Social Inequality'; not available 1980-1998, 2002

98 Don't know

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-88

The "Standard International Occupational Prestige Scale" is based on ISCO-88. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale, which is based on ISCO-68.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

For further information, compare:

Ganzeboom, Harry B. G. und Donald J. Treiman 1996: Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25(3): 201-239.

v1309 MOTHER: MAGNITUDEPRESTIGE ISCO 1988

Description of variable:

Classification of mother's occupation (ISCO 1988) according to the Magnitudeprestige Scale (MPS)

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); ISCO cannot be coded (code 10004 in V1306), no MPS value for ISCO code; 2000: no participation in ISSP 'Social Inequality'; not available 1980-1998, 2002, 2012, 2014

998 Don't know

999 No answer

Derivation of data:

Magnitudeprestige Scale (MPS) for ISCO-68 and ISCO-88

The Magnitudeprestige Scale was designed by Bernd Wegener specifically for the context of the Federal Republic of Germany. In contrast to Treiman's scale, which is based on verbal evaluations of relative social prestige, Wegener's scale is based on a psycho-physical method of measurement. Wegener asked respondents to give implicit ratio estimations of the relative magnitude of social prestige for a sample set of occupations. From these ratio estimations, Wegener then calculated a general scale of ordinal prestige scores. This MPS-scale describes a gradual mapping of social closure.

For further information, compare:

Bernd Wegener 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Bernd Wegener 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209-235.

v1311 MOTHER: ISEI ISCO 1988

Description of variable:

Classification of mother's occupation (ISCO 1988) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); ISCO cannot be coded (code 10004 in V1306), no ISEI value for ISCO code; 2000: no participation in ISSP 'Social Inequality'; not available 1980-1998, 2002

98 Don't know

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-88)

In contrast to social prestige scales based on subjective evaluations of the relative social esteem of occupations, this index of socio-economic status was constructed using empirical data on the level of education and income related to a given occupation. The index scores were calculated for occupations coded according to ISCO-88.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v1313 MOTHER: OCCUPATION THEN, ISCO 2008

Description of variable:

Classification of mother's occupation according to ISCO 2008

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); not available 1980-2010

10004 Workers with unclassifiable or inadequately described occupation

10006 <2012:> Mother is housewife

10009 No answer

Derivation of data:

International Standard Classification of Occupations (ISCO-08)

Source:

Kommission der Europäischen Gemeinschaften 2009: Empfehlung der Kommission vom 29. Oktober 2009 über die Verwendung der Internationalen Standardklassifikation der Berufe (ISCO-08), <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:0047:DE:PDF>, retrieved 19.05.2015.

ISCO coding was performed by infas (infas Institut für angewandte Sozialwissenschaft GmbH, Friedrich-Wilhelm-Str. 18, 53113 Bonn) based on the source cited above. A German translation of occupational titles was provided by the 'Federal Statistical Office' (Statistisches Bundesamt).

Please refer to 'Appendix C' of the variable report for a comprehensive list of codes used in the data.

v1314 MOTHER: SIOPS ISCO 08

Description of variable:

Classification of mother's occupation (ISCO-08) according to the Standard International Occupational Prestige Scale (SIOPS)

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); ISCO cannot be coded (code 10004 in V1313), no SIOPS value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

Standard International Occupational Prestige Scale (SIOPS) for ISCO-08

In order to generalize the "Standard International Occupational Prestige Scale" for ISCO-08, the original classification based on ISCO-88 was converted to ISCO-08 (Ganzeboom 2010). In contrast to ISEI, the construction of SIOPS is not based on a reference data set. Instead, the update to ISCO-08 is first and foremost an analytic operation. However, to generate SIOPS scores for aggregate ISCO-levels, weighting factors were needed. These weighting factors were constructed using the original set of data as described in Ganzeboom et al. (1992).

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO-08. These cases were coded as 'not classifiable' (code 0).

v1316 MOTHER: ISEI ISCO 08

Description of variable:

Classification of mother's occupation (ISCO-08) according to the International Socio-Economic Index of Occupational Status (ISEI), Ganzeboom

0 Mother not working or no longer alive at the time (code 93, 94 in V1295); ISCO cannot be coded (code 10004 in V1313), no ISEI value for ISCO code; not available 1980-2012

99 No answer

Derivation of data:

International Socio-Economic Index of Occupational Status (ISCO-08)

With the introduction of ISCO-08, Harry B.G. Ganzeboom updated the derivation of ISEI-Scores. The procedure used to calculate ISEI scores for ISCO-08 generally followed the practice described for ISCO-68 and ISCO-88 in Ganzeboom et al. (1992, 1996, 2003). However, the ISEI scores for ISCO-88 are based on an updated and extended set of data. This set of data is a cumulation of all ISSP-modules surveyed between 2002 and 2007. It contains information for 42 countries and a total of 198.500 respondents. Whereas the data base for previous ISEI versions contained only information for male respondents, the updated database has information for respondents of both sexes. Additionally, Ganzeboom modified the way income data entered into the calculation. To account for the gender specific distribution of part-time work, income per hour was used instead of total income (Ganzeboom 2010a).

Please be advised that there are as yet no ISEI scores for the incomplete codes and the general categories of ISCO-88. These cases were coded as 'not classifiable' (code 0).

v1318 RELIGIOUS DENOMINATION: MOTHER

1991 (ISSP), 2008 (ISSP):

When you were a child, what religion did your mother belong to at that time?

(Int.: Only one choice possible.)

2002, 2012:

(Int.: Please present card.)

When you were 11 or 12 years old, what religion did your mother belong to at that time?

0 1991, 2008 no participation in ISSP 'Religion'; not available 1980-1990, 1992-2000, 2004-2006, 2010, 2014

1 B The German Protestant church (excluding free churches)

2 C A Protestant free church

3 A The Roman Catholic Church

4 D Another Christian denomination

5 E Another non-Christian religion

6 F No religion

91 Mother was no longer alive at the time

92 Mother unknown

93 <1991 (ISSP):> Mother no longer alive/unknown

<2008 (ISSP):> Mother no longer alive/did not live with respondent

98 Do not know

99 No answer

Comment:

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

In 1991 and 2008, this question was part of the ISSP-modules surveyed together with ALLBUS. As a rule ISSP-questions are not included in this cumulative data set. However, because the question documented here has also been part of the ALLBUS-interview several times, the ISSP-data was included in this data set. Please note that, in contrast to the ALLBUS interview, the ISSP-modules are surveyed as self-completion questionnaires.

Derivation of data:

Citizenships of respondent

The data on citizenships in V1325-V1327 was coded according to the 'Staats- und Gebietssystematik' of the 'Federal Statistical Office' (Statistisches Bundesamt). This coding scheme was introduced into the ALLBUS program in 2012.

For a comprehensive list of country codes and further information, compare:

Statistisches Bundesamt 2015: Staats- und Gebietssystematik,

v1327 RESP.:CITIZENSHIP, RESPONSE 3<STAGEBSYS>

Description of variable:

Respondent's citizenships, response 3

What citizenship do you have?

If you have several citizenships, please name all of them.

(Int.: Multiple responses possible.)

0 Not available 1980-2010

996 No third citizenship or stateless

999 No answer

Derivation of data:

Citizenships of respondent

The data on citizenships in V1325-V1327 was coded according to the 'Staats- und Gebietssystematik' of the 'Federal Statistical Office' (Statistisches Bundesamt). This coding scheme was introduced into the ALLBUS program in 2012.

For a comprehensive list of country codes and further information, compare:

Statistisches Bundesamt 2015: Staats- und Gebietssystematik,

v1333 BORN IN EAST-WEST;INTERVIEW IN EAST-WEST

<If respondent was born within the current borders of Germany>

1991-1994:

(Int.: Please classify according to question V1331 and V1332.)

0 Not born within the current borders of Germany (code 2 in V1330), not available 1980-1990, 1996, 1998, 2006-2014

1 Born in East Germany, interview taking place in East Germany

2 Born in East Germany, interview taking place in West Germany

3 Born in West Germany, interview taking place in East Germany

4 Born in West Germany, interview taking place in West Germany

9 No answer

Derivation of data:

For 2002 and 2004 the data in this variable was constructed with the help of V1331 RESP.: BORN IN WHICH FEDERAL STATE? and V1332 INTERVIEW: IN WHICH FEDERAL STATE?.

v1343 SINCE WHEN IN THIS FEDERAL STATE, CATEG.

Description of variable:

<If respondent was born within the current borders of Germany>

Lived in state since, categorized

0 Not born within the current borders of Germany (code 2 in V1330); not available 1980-1990, 1996, 1998, 2006-2014

1 Before 1933

2 1933 - 1945

3 1946 - 1953

4 1954 - 1968

5 1969 - 1988

6 1989 - 1998

7 After 1998

99 No answer

Derivation of data:

This variable groups the data in V1341.

v1351 IMMIGRANT: HOW MANY YEARS IN GERMANY?

Description of variable:

<If respondent was not born within the current borders of Germany>

Number of years in Germany

0 Less than one year

96 Born within the current borders of Germany (code 1 in V1330); not available 1980-1990

98 Don't know

99 No answer

Derivation of data:

The data in this variable was calculated from the data in V1348 IMMIGRANT: SINCE WHEN IN GERMANY, YEAR and the year of the survey (year).

$$V1351 = \text{year} - V1348$$

When there was no valid data in V1348, the number of years could not be calculated. These cases were assigned the same missing value category as in V1348.

The calculation of the data for ALLBUS 1991 additionally used the information in V1349 IMMIGRANT: SINCE WHEN IN GERMANY, MONTH: The number of years calculated on the basis of V1348 and year was reduced by 1 when the month of arrival recorded in V1349 was between July and December.

Comment:

N-Valid: 6096

N-Missing: 55098

Minimum: 0

Maximum: 93

Median: 28.,00

Mean: 31.69

v1357 **RESPONDENT: HOW MANY YEARS IN THE FRG?**

Description of variable:

<1990: If respondent was not born in the Federal Republic or in West Berlin>

Number of years in the Federal Republic

0 less than one year

96 1990: Born in the Federal Republic or in West-Berlin; not available 1980, 1984-1988, 1991-2014

97 Refused

98 Don't know

99 No answer

Derivation of data:

The data in this variable was calculated from the data in V1356 RESP.: SINCE WHAT YEAR IN THE FRG? and the year of the survey (year).

$$V1357 = \text{year} - V1356$$

When there was no valid data in V1356, the number of years could not be calculated. These cases were assigned the same missing value category as in V1356.

The calculation of the data for ALLBUS 1990 additionally used information on the month of arrival in Germany (comp. V371 in ZA1800, this data is not included in the cumulative data set):

The number of years calculated on the basis of V1356 and year was reduced by 1 when the value for the month of arrival (V371 in ZA1800) was greater than the value for the month of the interview (V467 in ZA1800).

Data on the month of arrival was not surveyed in 1982.

Derivation of data:

The data in V1362 was coded according to the 'Staats- und Gebietssystematik' of the 'Federal Statistical Office'

(Statistisches Bundesamt). This coding scheme was introduced into the ALLBUS program in 2012.

For a comprehensive list of country codes and further information, compare:

Statistisches Bundesamt 2015: Staats- und Gebietssystematik,

v1363 DISTANCE TO LAST PLACE OF RESIDENCE

<If respondent has changed his/her place of residence at least one time>

Approximately how many kilometers away from your previous place of residence do you live?

(Int.: If respondent asks, please explain: Well, the place where you lived before you moved here.)

0 Lives in this place since birth (code 9000 in V1364); not available 1982-1998, 2002-2008, 2012, 2014

1 Less than 25 km

2 Between 26 and 50 km

3 Between 51 and 100 km

4 Between 101 and 200 km

5 More than 200 km

7 Refused

8 Don't know

9 No answer

Derivation of data:

The surveys in 2000 and 2010 used a more differentiated answer scale than the original 1980 survey. To make the data comparable over time, the categories "between 200 and 500km" and "more than 500km" used in the later surveys were recoded into the original category "more than 200km" for this cumulative data set. Please refer to ALLBUS 2000 (ZA3450) and ALLBUS 2010 (ZA4610) for the more detailed data.

v1364 **RESP.: HOW LONG HAVE YOU LIVED HERE?**

How long have you lived in this town/city?

(Int.: Brief interruptions of residence in current place of residence (military service, higher education, training etc.) do not count as interruption of length of residence.)

(Int.: Record year.)

0 Not available 1984-1991, 1994-1998, 2002-2008, 2012, 2014

9000 Since birth

9998 Don't know

9999 No answer

Comment:

N-Valid: 15772

N-Missing: 45422

To avoid skewing the results, code 9000 'Since birth' was treated as a missing value for the calculation of the measures below:

Minimum: 1891

Maximum: 2010

Median: 1969.00

Mean: 1967.39

Standard deviation: 22.346

v1365 **LENGTH OF RESIDENCE IN YEARS**

Description of variable:

Length of residence - number of years

0 Less than one year

96 Not available 1984-1991, 1994-1998, 2002-2008, 2012, 2014

98 Don't know

99 No answer

Derivation of data:

The data in this variable was calculated from the data in V1364 RESP.: HOW LONG HAVE YOU LIVED HERE?
and the year of the survey (year):

$$V1365 = \text{year} - V1364$$

When the code in V1364 was 'Since birth', V1365 was assigned the respondent's age (V729). In ALLBUS 1992 there was no answer category 'Since birth' in V1364. Instead, age was assigned to V1365 when the year in V1364 equaled the year of birth in V727. In both cases V1365 was coded as 'no answer' when there was no valid data in V729.

When there was no valid data in V1364, the number of years could not be calculated. These cases were assigned the same missing value category as in V1364.

Comment:

N-Valid: 15769

N-Missing: 45425

Minimum: 0

Maximum: 95

Median: 26.00

Mean: 29.26

Standard deviation: 20.556

v1366 LENGTH OF RESIDENCE IN YEARS, CATEGOR.

Description of variable:

Length of residence: number of years, categorized

- 1 Less than 5 years
- 2 5 - 9 years
- 3 10 - 14 years
- 4 15 - 19 years
- 5 20 - 24 years
- 6 25 - 29 years
- 7 30 - 34 years
- 8 35 - 39 years
- 9 40 - 44 years
- 10 45 - 49 years
- 11 50 - 59 years
- 12 60 - 69 years
- 13 More than 69 years
- 96 Not available 1984-1991, 1994-1998, 2002-2008, 2012, 2014
- 98 Don't know
- 99 No answer

Derivation of data:

This variable groups the data in V1365.

v1367 RESPONDENT: TYPE OF DWELLING

The next question deals with the accomodation you/your family live(s) in. Please tell me which category on this card applies to you/your family.

(Int.: Please present card. Only one choice possible.)

- 1 A - Sublet
- 2 B - In an official/company flat
- 3 C - In subsidized municipal housing
- 4 D - In a rented flat (not subsidized housing)
- 5 E - In a rented house (detached/semi-detached)
- 6 F - In a flat owned by you or your family
- 7 G - In a house owned by you or your family
- 8 Other type of accomodation (Please enter:)
- 97 Refused
- 99 No answer

v1373 AREA OF RESIDENCE: AIR POLLUTION

And what about odour nuisance caused by factory and exhaust fumes or the like in the area where you live?

How strongly do you feel disturbed or bothered by those?

(Int.: Please read out the categories.)

0 Not available 1980-2002, 2006-2012

1 Very strongly

2 Strongly

3 Middling

4 Little

5 Not at all

v1376 POLITICAL SIZE OF MUNICIPALITY

Description of variable:

Size of municipality

- 0 Not available 1991 (West)
- 1 Up to 1,999 residents
- 2 2,000 - 4,999 residents
- 3 5,000 - 19,999 residents
- 4 20,000 - 49,999 residents
- 5 50,000 - 99,999 residents
- 6 100,000 - 499,999 residents
- 7 500,000 residents and more
- 9 No answer

Note:

Political Size of Municipality

Size of Municipality categorizes the respondents' places of residence according to their number of inhabitants. For reasons of data protection uncategorized data of this kind cannot be published. Categorization of respondents' place of residence is based on information about the place's size as political/administrative units. Because political or administrative units are in many cases unsuitable to accurately describe the type of community in which respondents actually live, ALLBUS also provides more sophisticated geographical classifications (compare V1377-V1380).

v1377 BOUSTEDT-TYPE OF MUNICIPALITY <7 CATEG.>

Description of variable:

Boustedt - Gemeindetyp - 7 Kategorien

0 Not available 1991 (East), 1996-2014

1 Up to 1,999 residents

2 2,000 - 4,999 residents

3 5,000 - 19,999 residents

4 20,000 - 49,999 residents

5 50,000 - 99,999 residents

6 100,000 - 499,999 residents

7 500,000 residents and more

Note:

Boustedt-Type of Municipality

Political or administrative units are in many cases unsuitable to accurately describe the type of community in which respondents actually live. A case in point are, for example, small suburban communities. Although often politically and administratively independent, they are nevertheless socio-economically tied to the metropolis. ALLBUS therefore provides the 'Boustedt-type of Municipality' (V1377, V1378) as an additional regional categorization which addresses these ecological factors in regional statistics. V1377 is a 7-category version, V1378 a 10-category version. The 'Boustedt-type of municipality' is based, as far as possible, not on political or administrative criteria, but on the actual regional character of the place of residence.

For more information, please compare:

v1378 BOUSTEDT-TYPE OF MUNICIPALITY<10 CATEG.>

Description of variable:

Boustedt - Gemeindetyp - 10 Kategorien

0 Not available 1980-1984, 1988, 1991 (East), 1992 (East), 1996-2014

1 Up to 1,999

2 2,000 - 4,999

3 5,000 - 19,999

4 20,000 - 49,999

5 50,000 - 99,999 (peripheral area)

6 50,000 - 99,999 (core area)

7 100,000 - 499,999 (peripheral area)

8 100,000 - 499,999 (core area)

9 500,000 and more (peripheral area)

10 500,000 and more (core area)

Note:

Boustedt-Type of Municipality

Political or administrative units are in many cases unsuitable to accurately describe the type of community in which respondents actually live. A case in point are, for example, small suburban communities. Although often politically and administratively independent, they are nevertheless socio-economically tied to the metropolis. ALLBUS therefore provides the 'Boustedt-type of Municipality' (V1377, V1378) as an additional regional categorization which addresses these ecological factors in regional statistics. V1377 is a 7-category version, V1378 a 10-category version. The 'Boustedt-type of municipality' is based, as far as possible, not on political or administrative criteria, but on the actual regional character of the place of residence.

v1379 BIK-TYPE OF MUNICIPALITY

Description of variable:

Categorization of respondent's place of residence according to the "BIK"-index of municipalities and regions

Zone 1 - core of a metropolitan area <"Kernbereich">

Zone 2 - Conurbation area of increased density <"Verdichtungsgebiet">

Zone 3 - Transitional area <"Übergangsbereich">

0 Not available 1980-1992, 2002-2014

1 Up to 1,999

2 2,000 to 4,999

3 5,000 to 19,999

4 20,000 to 49,999

5 50,000 to 99,999 (zone 2, 3)

6 50,000 to 99,999 (zone 1)

7 100,000 to 499,999 (zone 2, 3)

8 100,000 to 499,999 (zone 1)

9 500,000 and more (zone 2, 3)

10 500,000 and more (zone 1)

Note:

BIK-Type of municipality and BIK-Regions

In the early 1990s, a revision of the concept of Boustedt-municipalities (V1377, V1378) seemed in order, because this categorization was based on the census data of 1970. Moreover, an equivalent taxonomy for the area of the new federal states in East Germany was not available. Based on data from the 1987 census, the BIK-Institute Ashpurwis + Behrens therefore developed a revised taxonomy of urban regions for the area of the old federal states (West Germany) – the BIK-type of municipalities and regions (V1379) – which takes into account the changes in residential patterns between the 1970ies and the late 1980ies. For this updated taxonomy, the indicators used to delimit classes have been revised extensively compared to the older Boustedt-system. For the area of the new federal states in East Germany, classification into BIK types of municipalities and regions followed the same principles as for West Germany. However, due to a lack of comparable data, classification proceeded from a different and partly reduced database. Similar to the Boustedt classification, categorization into BIK-regions is based on the number of residents in urban regions (zones 1-3). Outside these urban regions, classification was based on the respective municipality's number of residents (categories 1-4).

As of 2002, ALLBUS uses the updated BIK-Regions (V1380) by 'BIK-Institut Ashpurwis + Behrens', which, for the first time, provide a taxonomy of regions based on a uniform set of data for both East and West Germany. Similar to the 'Boustedt-type of Municipality', classification is first based on the number of residents of a given urban region. Furthermore, this classification distinguishes four different types of region: core areas, conurbation areas, transitional areas and peripheral areas. Outside these urban regions, classification was based on the 'political size of municipality'.

v1384 MORE THAN 8 PEOPLE IN HOUSEHOLD?

<If respondent does not live alone>

I would like some information about the other people living in this household, that is not counting yourself.

Please include toddlers, or people who normally live here but are currently away, e.g. in hospital or on holiday.

Please name the persons in order of their age (starting with the oldest person).

Note about each individual (e.g. "father", "child", "aunt" or an abbreviation of their first name).

From 2004:

Do any other persons live in your household?

0 Respondent lives alone (code 2 in V1383); fewer than seven persons on list of household members

1 Yes

2 No

6 Not available 1980-2002

9 No answer

Comment:

The exact wording of this question and its technical administration can vary slightly from survey to survey.

Please compare the original documentation for details.

The introductory text documented above is used to record shorthands for up to seven household members, to be used in the following part of the interview. It has been part of all ALLBUS surveys since 1980. ALLBUS 2004 introduced the question about further household members, which is triggered only when the maximum number of seven shorthands is recorded.

v1389 2.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than one person in household>

Age of second person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 One-person household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1387) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1388) has been surveyed in addition to year of birth (V1387) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1387) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1388) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1390 2.PERSON IN HOUSEHOLD: AGE, CAT.

Description of variable:

<If more than one person in household>

Age of second person in household, categorized

0 One-person household

1 Under 18 years

2 18 - 29 years

3 30 - 44 years

4 45 - 59 years

5 60 - 74 years

6 75 years and older

7 Refused

8 Don't know

9 No answer

Derivation of data:

This variable groups the data in V1389.

v1391 2.PERSON IN HOUSEHOLD: MARITAL STATUS

<If more than one person in household>

Could you also tell me, please, what marital status {name} has?

(Int.: Please present card. Record for each household member.)

Marital status of second person in household

- 0 One-person household
- 1 Married and living with spouse
- 2 Married and living apart
- 3 Widowed
- 4 Divorced
- 5 Never married
- 7 Refused
- 9 No answer

Comment:

The exact wording of this question and its technical administration can vary slightly from survey to survey.

Please compare the original documentation for details.

In 2002 categories 1-4 were suppressed by the interview software for household members under 14 years of age.

v1404 3.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than two persons in household>

Age of third person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 Fewer than 3 persons in household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1402) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1403) has been surveyed in addition to year of birth (V1402) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1402) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1403) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1419 4.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than three persons in household>

Age of fourth person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 Fewer than 4 persons in household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1417) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1418) has been surveyed in addition to year of birth (V1417) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1417) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1418) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1434 5.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than four persons in household>

Age of fifth person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 Fewer than 5 persons in household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1432) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1433) has been surveyed in addition to year of birth (V1432) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1432) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1433) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1449 6.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than five persons in household>

Age of sixth person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 Fewer than 6 persons in household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1447) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1448) has been surveyed in addition to year of birth (V1447) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1447) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1448) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1464 7.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than six persons in household>

Age of seventh person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 Fewer than 7 persons in household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1462) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1463) has been surveyed in addition to year of birth (V1462) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1462) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1463) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1479 8.PERSON IN HOUSEHOLD: AGE

Description of variable:

<If more than seven persons in household>

Age of eighth person in household

0 <From 1986:> Less than one year

1 1 year; <1980-1984:> 1 year or younger

996 Fewer than 8 persons in household

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1984:

Age was calculated by subtracting the year of birth (V1477) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

From 1986:

As of the 1986 survey, month of birth (V1478) has been surveyed in addition to year of birth (V1477) and the additional information has been included in the calculation of age:

First, age was calculated by subtracting the year of birth (V1477) from the year of survey (year). Next, month of the interview (V1874) and month of birth (V1478) were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Additional heuristics

For the 1986 and 1990 data, the following heuristic was additionally applied when there was no valid information on the month of the interview: When the person's month of birth came after the last month of fieldwork, it could be assumed that the person had not yet turned one year older and the age calculated from year of birth and year of survey was reduced by 1.

In 1991 no information on the date of the interview was available. Therefore, the following heuristic was applied to calculate age: The middle of the fieldwork phase, i.e. the month of June, was set as the default value for the month of the interview. Age was then calculated using the basic rules outlined above.

For the 1998-2004 data, the following heuristic was additionally applied when the month of the interview was the same as the person's month of birth: If the interview had taken place between the first and the fifteenth day of the month, it was assumed that the interviewed had taken place before the person's birthday and the age

calculated from year of birth and year of survey was reduced by 1.

v1490 NUMBER OF OTHER PERSONS IN HOUSEHOLD

Until 2000:

(Int.: If more than seven people excluding the subject have to be listed: Please enter the number of additional people.)

From 2004:

How many additional persons, apart from those you have already mentioned and not including you, live in your household?

0 Fewer than nine persons in household, not available 1984

1 One additional person

2 Two additional persons

3 Three additional persons

4 Four additional persons

6 Six additional persons

10 Ten additional persons

97 Refused

98 Don't know

99 No answer

Derivation of data:

In 2002 the data in this variable was derived from V1491 and the list of household members:

V1490 = V1491 NUMBER OF PEOPLE LIVING IN HOUSEHOLD – number of people on the list of household members.

v1491 NUMBER OF PEOPLE LIVING IN HOUSEHOLD

1980:

Total number of people living in this household

(Int.: Attention, record number as a control measure.)

1982:

And what is the total number of people living in this household, including yourself, any children and also any people who might not have German citizenship?

(Int.: Record total number of people living in this household.)

1988-2002:

What is the total number of people living in your household, including children and yourself?

(Int.: Record number of persons.)

Number of household members:

97 Refused

99 No answer

Derivation of data:

For 1984, the data was derived from the list of household members.

In 1986 and from 2004 the data in this variable was derived by combining the information from the list of household members and the data in V1490 NUMBER OF OTHER PERSONS IN HOUSEHOLD.

v1492 HOUSEHOLD CLASSIFICATION, DETAILED

Description of variable:

Household classification (Porst), detailed

0 Not applicable, not classifiable in classification scheme

999 No answer

Note:

Household Classification, Detailed; Household Classification, Condensed; Family Typology

Variables V1492, V1493 and V1494 contain classifications of household and family structures. These classifications are based on the systematics introduced by Porst (1984), which was subsequently operationalized in an SPSS script by Funk (1989). It should be noted that Porst's systematics differs from the logic of other widely used classifications, e.g. the classification of life forms used by the Federal Statistical Office. Porst, for example, only classifies two-generation households as families if the parents are married or one of the parents has previously been married (comp. V1494). Thus, unmarried parents and their children or same sex couples with children are not classified as families. For a comparison of Porst's definition of 'family' and 'household' and the definitions used by the Federal Statistical Office compare Porst (1984). For an up-to-date definition of relevant terms please refer to Statistisches Bundesamt (2013).

Please also note that Porst's systematics is based on the data available in ALLBUS 1982. Since 1982, there have been a number of changes in the range of answer options available in the ALLBUS program for both the kinship relations within the household and the respondent's marital status. Two cases are relevant for Porst's classifications. Firstly, as of ALLBUS 1990 household members can be explicitly identified as step parents. In this case, Porst's classification rules have been amended such that step parents are treated in the same way as the category 'mother or father'. Secondly, answer options for same sex couples are included in the question on marital status since ALLBUS 2010. For Porst's classifications, these categories are treated analogous to the corresponding categories for heterosexual couples.

V1492 contains a taxonomy of households based on the type of kinship relations between household members and the number of generations living together. It differentiates 32 different household constellations (e.g. unmarried singles living alone, married couples living with their unmarried children or complete three-generation households). Household types are furthermore differentiated by the respondents generational position within the household - i.e. whether the respondent is, for example, parent or child - so that the classification comprises a total of 42 valid categories.

V1493 groups the detailed data from V1492 into 9 general categories. The condensed classification differentiates between one-person households, one- to four-generation households, households of relatives with and without a family core and cohabiting groups with and without a family core.

V1494 contains Porst's typology of families, which derives its categories from the detailed household classification in V1492. Please note that this typology uses a very narrow definition of family. Only three types of groups are considered families: a) married couples living with children or grand-children, b) three- and four-generation households (irrelevant of marital status within the generations) and c) married couples living with at least one other person (related or unrelated). The typology consists of 10 valid family-types differentiated by the number of generations living together, the completeness or incompleteness of the generational line and the presence of persons outside of the generational line within the household (e.g. cousins, nieces or unrelated persons).

For a comprehensive description of household- and family-types and a definition of terms like 'completeness' and 'incompleteness' please refer to Porst (1984).
'Appendix F' in the Variable Report provides a mapping of the categories in the detailed household classification to the categories of the family-typology.

Household classification (Porst), condensed

- 0 Not applicable, not classifiable
- 1 One-person households
- 2 One-generation-households
- 3 Two-generation-households
- 4 Three-generation-households
- 5 Four-generation-households
- 6 Households of relatives with family core
- 7 Households of relatives without family core
- 8 People sharing a flat with family core
- 9 People sharing a flat without family core
- 99 No answer

Note:

Household Classification, Detailed; Household Classification, Condensed; Family Typology

Variables V1492, V1493 and V1494 contain classifications of household and family structures. These classifications are based on the systematics introduced by Porst (1984), which was subsequently operationalized in an SPSS script by Funk (1989). It should be noted that Porst's systematics differs from the logic of other widely used classifications, e.g. the classification of life forms used by the Federal Statistical Office. Porst, for example, only classifies two-generation households as families if the parents are married or one of the parents has previously been married (comp. V1494). Thus, unmarried parents and their children or same sex couples with children are not classified as families. For a comparison of Porst's definition of 'family' and 'household' and the definitions used by the Federal Statistical Office compare Porst (1984). For an up-to date definition of relevant terms please refer to Statistisches Bundesamt (2013).

Please also note that Porst's systematics is based on the data available in ALLBUS 1982. Since 1982, there have been a number of changes in the range of answer options available in the ALLBUS program for both the kinship relations within the household and the respondent's marital status. Two cases are relevant for Porst's classifications. Firstly, as of ALLBUS 1990 household members can be explicitly identified as step parents. In this case, Porst's classification rules have been amended such that step parents are treated in the same way as the category 'mother or father'. Secondly, answer options for same sex couples are included in the question on marital status since ALLBUS 2010. For Porst's classifications, these categories are treated analogous to the corresponding categories for heterosexual couples.

V1492 contains a taxonomy of households based on the type of kinship relations between household members and the number of generations living together. It differentiates 32 different household constellations (e.g. unmarried singles living alone, married couples living with their unmarried children or complete three-generation households). Household types are furthermore differentiated by the respondents generational position within the household - i.e. whether the respondent is, for example, parent or child - so that the classification comprises a total of 42 valid categories.

V1493 groups the detailed data from V1492 into 9 general categories. The condensed classification differentiates between one-person households, one- to four-generation households, households of relatives

with and without a family core and cohabiting groups with and without a family core.

V1494 contains Porst's typology of families, which derives its categories from the detailed household classification in V1492. Please note that this typology uses a very narrow definition of family. Only three types of groups are considered families: a) married couples living with children or grand-children, b) three- and four-generation households (irrelevant of marital status within the generations) and c) married couples living with at least one other person (related or unrelated). The typology consists of 10 valid family-types differentiated by the number of generations living together, the completeness or incompleteness of the generational line and the presence of persons outside of the generational line within the household (e.g. cousins, nieces or unrelated persons).

For a comprehensive description of household- and family-types and a definition of terms like 'completeness' and 'incompleteness' please refer to Porst (1984).

'Appendix F' in the Variable Report provides a mapping of the categories in the detailed household classification to the categories of the family-typology.

v1494 FAMILY TYPOLOGY

Description of variable:

Family typology (Porst), detailed

- 0 Not applicable, not classifiable
- 11 Complete nuclear family
- 12 Incomplete nuclear family
- 21 Complete two-generation-family
- 22 Incomplete two-generation-family
- 31 Complete three-generation-family
- 32 Incomplete three-generation-family
- 41 Complete four-generation-family
- 42 Incomplete four-generation-family
- 50 Extended family
- 60 Composite family <"Haushaltsfamilie">
- 99 No answer

Note:

Household Classification, Detailed; Household Classification, Condensed; Family Typology

Variables V1492, V1493 and V1494 contain classifications of household and family structures. These classifications are based on the systematics introduced by Porst (1984), which was subsequently operationalized in an SPSS script by Funk (1989). It should be noted that Porst's systematics differs from the logic of other widely used classifications, e.g. the classification of life forms used by the Federal Statistical Office. Porst, for example, only classifies two-generation households as families if the parents are married or one of the parents has previously been married (comp. V1494). Thus, unmarried parents and their children or same sex couples with children are not classified as families. For a comparison of Porst's definition of 'family' and 'household' and the definitions used by the Federal Statistical Office compare Porst (1984). For an up-to-date definition of relevant terms please refer to Statistisches Bundesamt (2013).

Please also note that Porst's systematics is based on the data available in ALLBUS 1982. Since 1982, there have been a number of changes in the range of answer options available in the ALLBUS program for both the kinship relations within the household and the respondent's marital status. Two cases are relevant for Porst's classifications. Firstly, as of ALLBUS 1990 household members can be explicitly identified as step parents. In this case, Porst's classification rules have been amended such that step parents are treated in the same way as the category 'mother or father'. Secondly, answer options for same sex couples are included in the question on marital status since ALLBUS 2010. For Porst's classifications, these categories are treated analogous to the corresponding categories for heterosexual couples.

V1492 contains a taxonomy of households based on the type of kinship relations between household members and the number of generations living together. It differentiates 32 different household constellations (e.g. unmarried singles living alone, married couples living with their unmarried children or complete three-generation households). Household types are furthermore differentiated by the respondents generational position within the household - i.e. whether the respondent is, for example, parent or child - so that the classification comprises a total of 42 valid categories.

V1493 groups the detailed data from V1492 into 9 general categories. The condensed classification

differentiates between one-person households, one- to four-generation households, households of relatives with and without a family core and cohabiting groups with and without a family core.

V1494 contains Porst's typology of families, which derives its categories from the detailed household classification in V1492. Please note that this typology uses a very narrow definition of family. Only three types of groups are considered families: a) married couples living with children or grand-children, b) three- and four-generation households (irrelevant of marital status within the generations) and c) married couples living with at least one other person (related or unrelated). The typology consists of 10 valid family-types differentiated by the number of generations living together, the completeness or incompleteness of the generational line and the presence of persons outside of the generational line within the household (e.g. cousins, nieces or unrelated persons).

For a comprehensive description of household- and family-types and a definition of terms like 'completeness' and 'incompleteness' please refer to Porst (1984).

'Appendix F' in the Variable Report provides a mapping of the categories in the detailed household classification to the categories of the family-typology.

v1495 ALL PEOPLE IN HOUSEHOLD GERMAN CITIZENS?

1980, 1982:

Do all persons living in this household have German citizenship?

0 Not available 1988-2014

1 Yes

2 No

9 No answer

Derivation of data:

The data for 1984 and 1986 was derived from the information on household members' citizenships in V1496-V1502.

v1503 REDUCED SIZE OF HOUSEHOLD

Description of variable:

Until 1990:

Number of adult Germans in the household (18 years and older)

From 1991:

Number of adult Germans and foreigners in the household (18 years and older)

- 1 1 person
- 2 2 persons
- 3 3 persons
- 4 4 persons
- 5 5 persons
- 6 6 persons
- 7 7 persons
- 8 8 persons
- 9 9 persons
- 97 Refused
- 99 No answer

Derivation of data:

This variable contains information about the number of household members belonging to the ALLBUS population in the year of the survey. Until 1990, ALLBUS targeted all adult German citizens living in private households. As of 1991, adult foreign residents were also included in the target population. Due to differences in the sampling procedures, household samples and samples of individuals use different rules for who counts as an adult in the total population. With household samples, the person to be interviewed is only chosen at the time of the actual interview. Therefore, the ALLBUS household samples (1980-1992 and 1998) comprise all members of a given household who were at least 18 years old at the time of the interview.

With samples of individuals (1994, 1996 and 2000-2014), on the other hand, the targeted respondents are chosen ahead of the actual interview. Consequently, ALLBUS samples of individuals use 1 January of the survey year as the deadline to determine whether an individual is to be regarded as an adult for the purpose of the sample.

Using slightly varying formulations, this data was surveyed directly in 1980, 1982, 1988 and 1990. In 1984, 1986 and as of 1991 the data was derived from the information provided in the list of household members. The difference in sampling procedures was taken into account.

v1505 NUMBER OF BIOLOGICAL CHILDREN

Description of variable:

Number of respondent's biological children

0 No children

96 Not available 1980-1998

99 No answer

Derivation of data:

The data in this variable was derived from the information on kinship relations in the list of household members and the data in V1510 NUMBER OF CHILDREN NOT IN THE HOUSEHOLD.

v1506 NUMBER OF BIOLOGICAL CHILDREN UNDER 18

Description of variable:

Number of respondent's biological children under age 18

0 No children

96 Not available 1980-1998

99 No answer

Derivation of data:

The data in this variable was derived from the information on kinship relations in the list of household members, the data in V1510 NUMBER OF CHILDREN NOT IN THE HOUSEHOLD as well as the age data in the list of household members and the list of children not living in the household.

v1507 NUMBER OF BIOLOGICAL+OTHER CHILDREN

Description of variable:

Number of respondent's children (including step-children and adopted children)

0 No children

96 Not available 1980-1998

99 No answer

Derivation of data:

The data in this variable was derived from the information on kinship relations in the list of household members and the data in V1510 NUMBER OF CHILDREN NOT IN THE HOUSEHOLD. Information on children not living in the household was only collected for biological children. Therefore, any step children or adoptive children no longer living in the respondent's household are not included in the number of children in V1507.

v1508 NUMBER OF BIOLOGICAL+OTHER CHILDREN <18

Description of variable:

Number of respondent's children under age 18 (including step-children and adopted children)

0 No children

96 Not available 1980-1998

99 No answer

Derivation of data:

The data in this variable was derived from the information on kinship relations in the list of household members, the data in V1510 NUMBER OF CHILDREN NOT IN THE HOUSEHOLD as well as the age data in the list of household members and the list of children not living in the household. Information on children not living in the household was only collected for biological children. Therefore, any step children or adoptive children no longer living in the respondent's household are not included in the number of children in V1508.

v1513 AGE, CHILD 1, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of first child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), not available 1984-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1512) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

v1522 AGE, CHILD 2, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of second child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 2nd child not living in the household; not available 1984-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1521) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Comment:

The exact wording of this question and its technical administration can vary slightly from survey to survey.

Please compare the original documentation for details.

v1531 AGE, CHILD 3, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of third child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 3rd child not living in the household; not available 1984-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1530) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Comment:

N-Valid: 2831

v1533 CHILD 3 NOT IN HH: SCHOOL LEAVING CERT.

<If respondent has children not living in his/her household and child is older than 14.>

(Int.: Please display card.)

What general school leaving certificate does {name} have?

(Int.: Only one response possible.

Please request highest school leaving certificate only.)

0 All children living in own household or no own children (code 2, 3 in V1509), no 3rd child not living in household, 3rd child is under 15 years old (according to year of birth in V1530); not available 1980-2002, 2006-2012

1 B Finished school without school leaving certificate

2 C Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling <"Volks-/Hauptschulabschluss bzw. Polytechnische Oberschule mit Abschluss 8. oder 9. Klasse">

3 D Intermediary secondary qualification, after 10 years of schooling <"Mittlere Reife, Realschulabschluss bzw. Polytechnische Oberschule mit Abschluss 10. Klasse">

4 E Certificate fulfilling entrance requirements to study at a university of applied sciences <"Fachhochschulreife (Abschluss einer Fachoberschule etc.)">

5 F Higher qualification, entitling holders to study at a university <"Abitur bzw. Erweiterte Oberschule mit Abschluss 12. Klasse (Hochschulreife)">

6 G Other school leaving certificate, please enter: _____

7 A Still at school

v1540 AGE, CHILD 4, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of fourth child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 4th child not living in the household; not available 1984-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1539) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Comment:

N-Valid: 931

v1542 CHILD 4 NOT IN HH: SCHOOL LEAVING CERT.

<If respondent has children not living in his/her household and child is older than 14.>

(Int.: Please display card.)

What general school leaving certificate does {name} have?

(Int.: Only one response possible.

Please request highest school leaving certificate only.)

0 All children living in own household or no own children (code 2, 3 in V1509), no 4th child not living in household, 4th child is under 15 years old (according to year of birth in V1539); not available 1980-2002, 2006-2012

1 B Finished school without school leaving certificate

2 C Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling <"Volks-/Hauptschulabschluss bzw. Polytechnische Oberschule mit Abschluss 8. oder 9. Klasse">

3 D Intermediary secondary qualification, after 10 years of schooling <"Mittlere Reife, Realschulabschluss bzw. Polytechnische Oberschule mit Abschluss 10. Klasse">

4 E Certificate fulfilling entrance requirements to study at a university of applied sciences <"Fachhochschulreife (Abschluss einer Fachoberschule etc.)">

5 F Higher qualification, entitling holders to study at a university <"Abitur bzw. Erweiterte Oberschule mit Abschluss 12. Klasse (Hochschulreife)">

6 G Other school leaving certificate, please enter: _____

7 A Still at school

v1549 AGE, CHILD 5, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of fifth child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 5th child not living in the household; not available 1984-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1548) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Comment:

v1558 AGE, CHILD 6, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of sixth child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 6th child not living in the household; not available 1984-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1557) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Comment:

N-Valid: 127

v1567 AGE, CHILD 7, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of seventh child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 7th child not living in the household; not available 1980-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1566) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

v1576 AGE, CHILD 8, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of eighth child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 8th child not living in the household; not available 1980-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1575) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

Comment:

N-Valid: 23

v1584 YEAR OF BIRTH, CHILD 9, NOT IN THE HH

<If respondent has children not living in his/her household>

Would you please tell me the year of birth and sex of your children who are not living with you here in your household?

Please begin with the oldest child.

(Int.: Then make a note of the years of birth and sex of the respondent's children who do NOT live in the respondent's household - ordered according to age!)

Year of birth of ninth child

0 All children living in own household or no own children (code 2, 3 in V1509), no 9th child not living in household; not available 1980-1998

9997 Refused

9998 Don't know

9999 No answer

Comment:

v1585 AGE, CHILD 9, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of ninth child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 9th child not living in the household; not available 1980-1998

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1584) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

v1594 AGE, CHILD 10, NOT IN THE HOUSEHOLD

Description of variable:

<If respondent has children not living in his/her household>

Age of tenth child

0 Less than 1 year

996 All children living in own household or no own children (code 2, 3 in V1509), no 10th child not living in the household; not available 1980-2000, 2010, 2012

997 Refused

998 Don't know

999 No answer

Derivation of data:

1980-1982:

Age was calculated by subtracting the year of birth (V1594) from the year of survey (year).

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2000, 2002 und 2006-2014:

Age was calculated by subtracting the year of birth from the year of survey (year).

Additionally, the following heuristic was used: When the interview had taken place in the first half of the year, it was assumed that the interview had been conducted before the person's birthday and the age calculated from year of birth and year of survey was reduced by 1.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

2004:

In the 2004 survey, month of birth (not included in this data set) was surveyed in addition to year of birth and the additional information was included in the calculation of age:

First, age was calculated by subtracting the year of birth from the year of survey (year). Next, month of the interview (V1874) and month of birth were compared. If the month of the interview preceded the month of the person's birthday, the previously calculated age was reduced by 1.

When there was no valid information on either the month of birth or the month of the interview, no further adjustment of the previously calculated age was made.

When there was no valid information on the year of birth, age was assigned the same missing value category as year of birth.

What general school leaving certificate does {name} have?

(Int.: Only one response possible.

Please request highest school leaving certificate only.)

0 All children living in own household or no own children (code 2, 3 in V1509), no 10th child not living in household, 10th child is under 15 years old (according to year of birth in V1593); not available 1980-2002, 2006-2012

1 B Finished school without school leaving certificate

2 C Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling <"Volks-/Hauptschulabschluss bzw. Polytechnische Oberschule mit Abschluss 8. oder 9. Klasse">

3 D Intermediary secondary qualification, after 10 years of schooling <"Mittlere Reife, Realschulabschluss bzw. Polytechnische Oberschule mit Abschluss 10. Klasse">

4 E Certificate fulfilling entrance requirements to study at a university of applied sciences <"Fachhochschulreife (Abschluss einer Fachoberschule etc.)">

5 F Higher qualification, entitling holders to study at a university <"Abitur bzw. Erweiterte Oberschule mit Abschluss 12. Klasse (Hochschulreife)">

6 G Other school leaving certificate, please enter: _____

7 A Still at school

99 No answer

Derivation of data:

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation may therefore deviate from that actually used in the field.

v1603 NUMBER OF FRIENDS IN NETWORK <SPLIT 1>

Description of variable:

Number of persons in respondent's network, 2010 split 1

(Int.: Attention! This is version A (split 1) of this question. Please read the exact text, word for word.)

We now have some questions about the people you spend a lot of time with socially.

Please think of the three people you are most often with socially.

They can be either relatives or friends and acquaintances you are not related to, but not people who live in your household.

Please tell me the first names and, if necessary to tell people apart, the first letter of the last names of these people.

(Int.: Make a note of first names (and if necessary the first letter of last names).)

1. _____

2. _____

3. _____

(Int.: Now please check again how many names have been given!)

0 Don't spend a lot of time socially with anyone

1 One person

2 Two persons

3 Three persons

v1604 FRIEND A: SEX

1980 (split 1), 1990, 2000:

We now have some questions about the people you spend a lot of time with socially.

They can be either relatives or friends and acquaintances you are not related to, but not people who live in your household.

To make it simple, let's call the three people A, B and C.

To avoid mixing them up, please write down on this piece of paper their first names or a special codeword to identify them.

For the next few questions, please think of person A first.

(Int.: Please hand over pen and paper - first ask questions V1425 to V1442 for 'A', then for 'B' and then for 'C' and enter answers in the adjoining table under the appropriate letter.

If no people have been named as friends or acquaintances, continue with next question.)

1980 (split 2):

We now have some questions about your circle of friends: Please think of the three people you think of as closer friends and whom you meet most frequently.

They can be either relatives or people you are not related to, but not people who live in your household.

I would just like to know some statistics about each of them, e.g. their occupation, their age etc. To make this more simple, could you give me their first names, please:

(Int.: Write first names under A/B/C respectively and circle 'male' or 'female'. Please use the first names in the next questions to indicate which person the questions refer to.

If no person has been named as friend or acquaintance, proceed with the next question. First ask questions V1425 to V1442 for 'A', then for 'B' and then for 'C'. Enter answers under the respective letter.)

2010:

For the next few questions, please always think of A.

0 No friends named; not available 1982-1988, 1991-1998, 2002-2008, 2010 (code 2 in spl10), 2012, 2014

v1682 NUMBER OF FRIENDS IN NETWORK <SPLIT 2>

Description of variable:

Number of persons in respondent's network, 2010 split 2

(Int.: Attention! This is version B (split 2) of this question. Please read the exact text, word for word.)

Now and again most people talk about important matters with other people. If you think back over the last six months, who have you talked to about things that were important to you? Please tell me the first names and, if necessary to tell people apart, the first letter of the last names of these people.

(Int.: If fewer than 5 people have been named:)

Anyone else? Can you think of anyone?

(Int.: Note down the first 5 names and, if necessary, the first letter of the last name to distinguish between persons.)

1. _____

2. _____

3. _____

4. _____

5. _____

(Int.: Now please check again how many names have been given.)

0 Haven't talked about important matters with anyone

1 On person

2 Two persons

3 Three persons

4 Four persons

5 Five persons

6 Not available 1980-2008, 2010 (code 1 in spl10), 2012, 2014

9 No answer

Comment:

In 2010 this variable was surveyed as part of a split questionnaire (comp. spl10).

v1750 CONTACT C: POL. PARTY USUALLY VOTED FOR

<If person C is older than 15 years>

Can you tell me what party C usually votes for?

(Int.: If 'other party', ask which one.)

0 Fewer than three contacts named, person C not older than 15 (code 1-15 in V1734); not available 1980-2008, 2010 (code 1 in spl10), 2012, 2014

1 The Christian Democratic/Christian Social Union <CDU / CSU>

2 The Social Democratic Party <SPD>

3 The Free Democratic Party <FDP>

4 The Greens <Bündnis 90 / Die Grünen>

6 The Left <Die Linke>

20 National Democratic Party of Germany <NPD>

90 Other party: ...

96 Not eligible to vote

97 Refused

98 Don't know

99 No answer

Derivation of data:

This variable has been recoded so as to conform with the standardized ALLBUS coding. The sequence of answer categories shown in this documentation therefore deviates from that actually used in the field.

Comment:

In 2010 this variable was surveyed as part of a split questionnaire (comp. spl10).

Comment:

The answers to this open-ended question are documented in V1835-V1837.

Note:

Until ALLBUS 1984 membership data was surveyed using a single list of items (V1820ff.).

From ALLBUS 1986 to ALLBUS 1992 and again in ALLBUS 1998 two separate lists of items were used (V1820ff. and V1831ff.).

In ALLBUS 1994 and ALLBUS 1996 only membership in a trade union (V1820-V1822) and membership in a political party (V1831) was surveyed.

For an overview of the different list used, their contents and the order of the items on the lists, please refer to 'Appendix E' of the Variable Report.

v1835 MEMBER OF WHICH RELIGIOUS ORGANIZATION?

Description of variable:

Member of which religious organisation, response 1

0 No membership in religious organisation (code 0 in V1834), not available 1984, 1991, 1994-2014

10 An organisation for women

<Mütterkreis, Frauenkreis, kath. Frauengemeinschaft, Frauenverein, Frauenbund, (from 1986): ev. Frauenhilfe>

11 A youth organisation

<Jugendgruppe, Jungschar, evang. Jugendkreis, christl. Jugendarbeit, (from 1990): Spielkurs>

12 Choirs, orchestras, etc.

<Kirchenchor, Cäcilienverein, Posaunenchor, (from 1986): kath. Chorvereinigung, Musikgruppe, (from 1990): Flötengruppe, Gesangverein, Orchester>

13 Christian or Catholic workers movement

<Christliche Arbeiterbewegung, kath. Arbeiterbewegung (KAB)>

14 One of the Evangelical Lutheran regional churches

<Evangelische Landeskirche allg., (from 1986): Landeskirchliche Gemeinschaft, evangelisch-lutherisch>

15 A catholic youth organisation

<Kath. Landjugendbund, Bund dt. kath. Jugend, kath. Jugendgruppen>

16 Parochial church council

<Kirchenrat, Kirchenvorstand, Pfarrgemeinderat, (from 1986): Pfarrverein>

17 A relief, development or social welfare organisation

<Caritas, Diakonie>

18 A religious order (also of laypersons) or an organisation of clerics

<Ordenszugehörigkeit, Elisabethorden, Matthias-Bruderschaft, Klerusverband, (from 1988): Elisabethenverein, (from 1990): Dienstbruderschaft>

19 Organisation involved in welfare work, nursing etc.

<Krankenpflege, (from 1986): christlicher Blindendienst, Sozialstation>

20 Young Men's Christian Association, etc.

<Christl. Verein Junger Menschen (ehem. Männer), Kolping, (from 1990): Männerverein>

21 50th anniversary of confirmation

<Goldene Konfirmation>

22 An association of pilgrims

<Pilgerverein, (from 1990): Wallfahrtsverein>

23 An organisation working with immigrants

<Aussiedler-, Ausländerbetreuung>

24 Christian Science

<Christliche Wissenschaft (Christian Science)>

25 An organisation devoted to building or restoring churches

<Kirchenbauverein, (from 1990): Kirchenförderverein>

26 Jehova's Witnesses

<Zeugen Jehovas>

27 A senior citizens associations

<Altenclub, Altenbetreuung, Altenwerk, (from 1986): Seniorenverein>

28 The Catholic Church

<Katholische Kirche allg.>

- 29 New Apostolic Church
<Neuapostolische Kirche>
- 30 An Adventist church
<Adventisten>
- 31 1982: Russian Orthodox Church
<Russisch Orthodoxe Kirche>
- 32 1982: A Baptist church
<Baptisten>
- 33 1982: Christian Congregation
<Christengemeinde>
- 34 1982: Independent church or religion
<Freie kirchliche Religionsgemeinschaft>
- 90 Other religious or church organisation
- 95 Illegible
- 97 Refused
- 98 Don't know
- 99 No answer

Derivation of data:

This variable groups the answers to the open-ended question in V1834.

Note:

Until ALLBUS 1984 membership data was surveyed using a single list of items (V1820ff.).

From ALLBUS 1986 to ALLBUS 1992 and again in ALLBUS 1998 two separate lists of items were used (V1820ff. and V1831ff.).

In ALLBUS 1994 and ALLBUS 1996 only membership in a trade union (V1820-V1822) and membership in a political party (V1831) was surveyed.

For an overview of the different list used, their contents and the order of the items on the lists, please refer to 'Appendix E' of the Variable Report.

v1848 MEMBER OF OTHER ORGANIZATION 1

Description of variable:

Other organisations or associations, response 1

0 No membership in other organisation (code 0 in V1847), not available 1984, 1991, 1994-2014

10 Fire department, life guards, etc.

<Feuerwehr, Technisches Hilfswerk, Wasserwacht, Rettungsflugwacht, Seenotrettungsdienst, Grubenwehr, Deutsche Lebensrettungsgesellschaft, (from 1986): Rettungsverein, (from 1990): Bergwacht>

11 German Red Cross and similar organisations

<Deutsches Rotes Kreuz, Bayerisches Rotes Kreuz, Arbeiterwohlfahrt, Sozialstation, Krankenhilfe, (from 1986): Sozialstationförderverein, Lebenshilfe, Krankenpflegeverein, (from 1992): Volkssolidarität>

12 Other organisations offering first aid, rescue and social services

<Arbeiter-Samariter-Bund (ASB), Malteser, Johanniter>

13 Other sports club, especially health related

<Sport, Gymnastik, Gesundheit, Kneipp-Verein, Sauna-Verein, Tanzgruppe, Ballett, Tennis, Reitsport, Taucherverein, Jazzgymnastik, Windsurfing, Turnverein, (from 1990): Versehrtensportverein, Herzsportgruppe>

14 Association of miners, teachers or other occupations

<Arbeiterverein, Berg- und Hüttenarbeiterverein, Lehrerverein, Handwerkerverein, Berufsvereine allg.>

15 Community clubs, neighborhood associations

<Nachbarschaftsverein, Bürgerverein, Bürgerring, Ortsverein, Ortsinteressengemeinschaft, Siedlerbund, Selbsthilfegruppen, (from 1986): Stadtteilverein>

16 Veterans association

<Soldatenverein, Marinebund, Verein Deutscher Soldaten, Kriegerverein, Stahlhelm, (from 1986): Reservisten, Soldaten der Kriegerkameradschaft, Kameraden, Kyffhäuserbund>

17 Human rights organisations

<Amnesty International, Menschenrechtsgruppe, Humanistische Union, Friedensgruppen, Terres des hommes, Vereinigung der Verfolgten des Naziregimes / Bund der Antifaschisten, (from 1986): Greenpeace>

18 Association of senior citizens

<Rentner- und Altenvereine, Seniorenclub, 50er Verein, Sozialrentnerverein, Ruhestandsbeamtenbund (from 1986): Graue Panther>

19 Company (sports) clubs

<Firmenvereine, Firmensportvereine, Postwanderverein, Firmenjubiläarverein, Betriebssportverband>

20 Other organisations for women

<Frauenvereine, Frauengemeinschaft, Frauenhilfe, Mütterverein, Tagesmütterverein, Hausfrauenverein, Hausfrauenbund, Landfrauenverein, Frauenunion>

21 Music, art, theater or history clubs

<Kultur, Kunst, Musik, Musikverein, Spielmannszug, Fanfarenzug, Musikschulpflege, Gesellschaft der organisierten Künstler, Pfeifferl-Club, Blasorchester, Eisenbahnerkapelle, Kunstverein, Museumsverein, Theaterverein, Film- / Kinoverein, Malerverein, Buchclub, Volkshochschule, Geschichtsverein, Altertumsverein, Bildung allg.>

22 Organisation devoted to animals, gardening or conservation

<Tier, Garten, Obst, Kleintierverein, Imkerverband, Tierschutzverein, Fischereiverein, Brieftaubenverein, Landesjagdverband, Jagdschutzverein, Hasenzüchter, Vogelschutzverein, Obst- und Gartenbauverein, Anglerverein, Katzenverein, Hundeverein, Geflügelzuchtverein, Naturschutz allg., World Wildlife Fund,

Kakteenverein, Aquariumverein, Deutsche Zoologische Gesellschaft, Jagdschutzverein, Bund für Vogel und Umwelt, B.U.N.D., Pferdezuchtvereinigung>

23 Motorist associations, tourist boards, etc.

<Auto und Reisen, Allgemeiner Deutscher Automobilclub, Camping, Deutsche Verkehrswacht, Touristikverein, Fremdenverkehrsverein, Buggyclub, Autoverein, Fahrgemeinschaft, ADFC, Mofa-Sport-Club, Motorradclub, Oldtimer-Automobilclub, (from 1992): VCD (Verkehrsclub Deutschland)>

24 Associations of foreign nationals, immigrants

<Ausländervereine, Zwasiek polakow, Griechischer Club, Spanisches Zentrum, Französisches Institut>

25 Political associations or clubs

<Politische Gremien, politische Vereine, Vereinigung für Parlamentsfragen>

26 Carnival clubs

<Karneval- und Faschingsclubs, Narrenzunft>

27 Miscellaneous leisure activity clubs

<Freizeitclub, Schachclub, Kegelvein, Skatverein, Schützenverein, Genealogieverein, Radio-Amateurclub, gesellige Vereine allg., Fotofreunde, Doppelkopfverein, KERBEgesellschaft, Bowlingverein>

<Psychisch Kranke, Komm-rum-Verein, Verein für Sozialpsychiatrie>

46 (from 1988): AIDS-prevention, support for AIDS-patients

47 Association for improvement or beautification

<Verschönerungsverein>

48 Cultural salons, philanthropists, alumni organisation

<Kulturelle Freundeskreise, Förderer, Freunde der UNI Dortmund>

90 Other organisations or associations

95 Illegible, cannot be coded

97 Refused

99 No answer

Derivation of data:

This variable groups the answers to the open-ended question in V1847.

Note:

Until ALLBUS 1984 membership data was surveyed using a single list of items (V1820ff.).

From ALLBUS 1986 to ALLBUS 1992 and again in ALLBUS 1998 two separate lists of items were used (V1820ff. and V1831ff.).

In ALLBUS 1994 and ALLBUS 1996 only membership in a trade union (V1820-V1822) and membership in a political party (V1831) was surveyed.

For an overview of the different list used, their contents and the order of the items on the lists, please refer to 'Appendix E' of the Variable Report.

v1849 MEMBER OF OTHER ORGANIZATION 2

Description of variable:

Other organisations or associations, response 2

0 No membership in other organisation (code 0 in V1847), no second response, not available 1984, 1991, 1994-2014

10 Fire department, life guards, etc.

<Feuerwehr, Technisches Hilfswerk, Wasserwacht, Rettungsflugwacht, Seenotrettungsdienst, Grubenwehr, Deutsche Lebensrettungsgesellschaft, (from 1986): Rettungsverein, (from 1990): Bergwacht>

11 German Red Cross and similar organisations

<Deutsches Rotes Kreuz, Bayerisches Rotes Kreuz, Arbeiterwohlfahrt, Sozialstation, Krankenhilfe, (from 1986): Sozialstationförderverein, Lebenshilfe, Krankenpflegeverein, (from 1992): Volkssolidarität>

12 Other organisations offering first aid, rescue and social services

<Arbeiter-Samariter-Bund (ASB), Malteser, Johanniter>

13 Other sports club, especially health related

<Sport, Gymnastik, Gesundheit, Kneipp-Verein, Sauna-Verein, Tanzgruppe, Ballett, Tennis, Reitsport, Taucherverein, Jazzgymnastik, Windsurfing, Turnverein, (from 1990): Versehrtensportverein, Herzsportgruppe>

14 Association of miners, teachers or other occupations

<Arbeiterverein, Berg- und Hüttenarbeiterverein, Lehrerverein, Handwerkerverein, Berufsvereine allg.>

15 Community clubs, neighborhood associations

<Nachbarschaftsverein, Bürgerverein, Bürgerring, Ortsverein, Ortsinteressengemeinschaft, Siedlerbund, Selbsthilfegruppen, (from 1986): Stadtteilverein>

16 Veterans association

<Soldatenverein, Marinebund, Verein Deutscher Soldaten, Kriegerverein, Stahlhelm, (from 1986): Reservisten, Soldaten der Kriegerkameradschaft, Kameraden, Kyffhäuserbund>

17 Human rights organisations

<Amnesty International, Menschenrechtsgruppe, Humanistische Union, Friedensgruppen, Terres des hommes, Vereinigung der Verfolgten des Naziregimes / Bund der Antifaschisten, (from 1986): Greenpeace>

<Kulturelle Freundeskreise, Förderer, Freunde der UNI Dortmund>

90 Other organisations or associations

97 Refused

99 No answer

Derivation of data:

This variable groups the answers to the open-ended question in V1847.

Note:

Until ALLBUS 1984 membership data was surveyed using a single list of items (V1820ff.).

From ALLBUS 1986 to ALLBUS 1992 and again in ALLBUS 1998 two separate lists of items were used (V1820ff. and V1831ff.).

In ALLBUS 1994 and ALLBUS 1996 only membership in a trade union (V1820-V1822) and membership in a political party (V1831) was surveyed.

For an overview of the different list used, their contents and the order of the items on the lists, please refer to 'Appendix E' of the Variable Report.

v1850 MEMBER OF OTHER ORGANIZATION 3

Description of variable:

Other organisations or associations, response 3

0 No membership in other organisation (code 0 in V1847), no third response, not available 1984, 1991, 1994-2014

10 Fire department, life guards, etc.

<Feuerwehr, Technisches Hilfswerk, Wasserwacht, Rettungsflugwacht, Seenotrettungsdienst, Grubenwehr, Deutsche Lebensrettungsgesellschaft, (from 1986): Rettungsverein, (from 1990): Bergwacht>

11 German Red Cross and similar organisations

<Deutsches Rotes Kreuz, Bayerisches Rotes Kreuz, Arbeiterwohlfahrt, Sozialstation, Krankenhilfe, (from 1986): Sozialstationförderverein, Lebenshilfe, Krankenpflegeverein, (from 1992): Volkssolidarität>

12 Other organisations offering first aid, rescue and social services

<Arbeiter-Samariter-Bund (ASB), Malteser, Johanniter>

13 Other sports club, especially health related

<Sport, Gymnastik, Gesundheit, Kneipp-Verein, Sauna-Verein, Tanzgruppe, Ballett, Tennis, Reitsport, Taucherverein, Jazzgymnastik, Windsurfing, Turnverein, (from 1990): Versehrtensportverein, Herzsportgruppe>

14 Association of miners, teachers or other occupations

<Arbeiterverein, Berg- und Hüttenarbeiterverein, Lehrerverein, Handwerkerverein, Berufsvereine allg.>

15 Community clubs, neighborhood associations

<Nachbarschaftsverein, Bürgerverein, Bürgerring, Ortsverein, Ortsinteressengemeinschaft, Siedlerbund, Selbsthilfegruppen, (from 1986): Stadtteilverein>

16 Veterans association

<Soldatenverein, Marinebund, Verein Deutscher Soldaten, Kriegerverein, Stahlhelm, (from 1986): Reservisten, Soldaten der Kriegerkameradschaft, Kameraden, Kyffhäuserbund>

17 Human rights organisations

<Amnesty International, Menschenrechtsgruppe, Humanistische Union, Friedensgruppen, Terres des hommes, Vereinigung der Verfolgten des Naziregimes / Bund der Antifaschisten, (from 1986): Greenpeace>

18 Association of senior citizens

<Rentner- und Altenvereine, Seniorenclub, 50er Verein, Sozialrentnerverein, Ruhestandsbeamtenbund (from 1986): Graue Panther>

19 Company (sports) clubs

<Firmenvereine, Firmensportvereine, Postwanderverein, Firmenjubiläarverein, Betriebssportverband>

20 Other organisations for women

<Frauenvereine, Frauengemeinschaft, Frauenhilfe, Mütterverein, Tagesmütterverein, Hausfrauenverein, Hausfrauenbund, Landfrauenverein, Frauenunion>

21 Music, art, theater or history clubs

<Kultur, Kunst, Musik, Musikverein, Spielmannszug, Fanfarenzug, Musikschulpflege, Gesellschaft der organisierten Künstler, Pfeifferl-Club, Blasorchester, Eisenbahnerkapelle, Kunstverein, Museumsverein, Theaterverein, Film- / Kinoverein, Malerverein, Buchclub, Volkshochschule, Geschichtsverein, Altertumsverein, Bildung allg.>

22 Organisation devoted to animals, gardening or conservation

<Tier, Garten, Obst, Kleintierverein, Imkerverband, Tierschutzverein, Fischereiverein, Brieftaubenverein, Landesjagdverband, Jagdschutzverein, Hasenzüchter, Vogelschutzverein, Obst- und Gartenbauverein,

- Anglerverein, Katzenverein, Hundeverein, Geflügelzuchtverein, Naturschutz allg., World Wildlife Fund, Kakteenverein, Aquariumverein, Deutsche Zoologische Gesellschaft, Jagdschutzverein, Bund für Vogel und Umwelt, B.U.N.D., Pferdezuchtvereinigung>
- 23 Motorist associations, tourist boards, etc.
<Auto und Reisen, Allgemeiner Deutscher Automobilclub, Camping, Deutsche Verkehrswacht, Touristikverein, Fremdenverkehrsverein, Buggyclub, Autoverein, Fahrgemeinschaft, ADFC, Mofa-Sport-Club, Motorradclub, Oldtimer-Automobilclub, (from 1992): VCD (Verkehrsclub Deutschland)>
- 24 Associations of foreign nationals, immigrants
<Ausländervereine, Zwasiak polakow, Griechischer Club, Spanisches Zentrum, Französisches Institut>
- 25 Political associations or clubs
<Politische Gremien, politische Vereine, Vereinigung für Parlamentsfragen>
- 26 Carnival clubs
<Karneval- und Faschingsclubs, Narrenzunft>
- 27 Miscellaneous leisure activity clubs
<Freizeitclub, Schachclub, Kegelverein, Skatverein, Schützenverein, Genealogieverein, Radio-Amateurclub, gesellige Vereine allg., Fotofreunde, Doppelkopfverein, KERBEgesellschaft, Bowlingverein>
- 28 Organisations of ethnic minorities, Danish club
- 29 Associations of disabled persons
<Reichsbund, Behindertenverband, Verband der Kriegs- und Wehrdienststopfer, Behinderten und Sozialrentner Deutschlands, Spastikerhilfe, Kriegsgräberfürsorge, Blindenverein 803>
- 30 Alpine or hiking associations, naturists
<Alpenverein, Albverein, Schwarzwaldclub, Naturfreunde, Wanderverein, Gebirgsverein, Pfälzer Waldverein, FKK Naturisten>
- 31 Other youth organisations, scouts, etc.
<Jugendverbände, Verein für internationale Jugendarbeit, Landjugend, Deutsches Jugendherbergswerk, youth for understanding, Pfadfinder>
- 32 Parenting, child care or protection, schooling
<Elternkreis, Erziehung, Kindergarten, Elternbeirat, Familienarbeitskreis, Kleinkinderspielkreis, Deutscher Kinderschutzbund, Abenteuerspielplatz, Schulverein, Freie Waldorfschule, Fehlstundenverein>
- 33 Charities providing shelter for children
<SOS-Kinderdorf, Kinderdorf>
- 34 Jehovah's witnesses
- 35 Club of divorcees, single fathers or mothers
<Club der Geschiedenen, alleinstehende Väter und Mütter>
- 36 Self-help organisations for addicts
<Blaues Kreuz>
- 37 Trade union
- 38 Church or Religious organisation
<Kirchliche Organisation, christlich-jüdische Zusammenarbeit, katholische Männerbruderschaft, Landeskirchliche Gemeinschaft, Wallfahrerverein>
- 39 Organisation of students
<Verbindungen, Allgemeiner Studenten Ausschuß, Unitas, Universitätsbund, Studentenbund>
- 40 Organisation promoting international or bi-national friendship
<Internationale Beziehungen, Völkerverständigung, Europa-Union, Deutsch-französische Gesellschaft, Deutsch-japanische Gesellschaft, Deutsch-Türkischer Partnerschaftskreis>
- 41 Yacht club, yachting association

42 Ethnic or regional association

<Heimatverein, Ostfriesenverein, (from 1992): Sudetendeutsche und andere Landsmannschaften>

43 Organisation of a trade, craft or profession

<Berufsverbände, -vereinigungen, Handwerksinnung, Gastronomenverband, Verband der Köche, Bund deutscher Baumeister, Industriemeisterverein, Berufsverein für Versicherungskaufleute, Ärzteverband, Hartmannbund, Refa-Verband, Philologenverband, Gesellenausschuß, Biologenverband, Wirtschaftsvereinigung, Verein Deutscher Elektroingenieure, Deutsche Gesellschaft für Galvanotechnik, Landesinnung, Kaufmannsvereinigung, Verband der deutschen Bibliothekare>

44 Organisation devoted to the rights of consumers, tenants, landlords or taxpayers, an association promoting the creation of affordable housing

<Verbraucher, Mieter, Haus- und Grundbesitzer, Lohnsteuerverein, Wohnungsuchverein, gemeinnütziger Wohnungsbauverein, Wohnungsbauverein, Wohnungsgenossenschaft>

45 An organisation devoted to the mentally ill

<Psychisch Kranke, Komm-rum-Verein, Verein für Sozialpsychiatrie>

46 (from 1988): AIDS-prevention, support for AIDS-patients

47 Association for improvement or beautification

<Verschönerungsverein>

48 Cultural salons, philanthropists, alumni organisation

<Kulturelle Freundeskreise, Förderer, Freunde der UNI Dortmund>

90 Other organisations or associations

97 Refused

99 No answer

Derivation of data:

This variable groups the answers to the open-ended question in V1847.

Note:

Until ALLBUS 1984 membership data was surveyed using a single list of items (V1820ff.).

From ALLBUS 1986 to ALLBUS 1992 and again in ALLBUS 1998 two separate lists of items were used (V1820ff. and V1831ff.).

In ALLBUS 1994 and ALLBUS 1996 only membership in a trade union (V1820-V1822) and membership in a political party (V1831) was surveyed.

For an overview of the different list used, their contents and the order of the items on the lists, please refer to 'Appendix E' of the Variable Report.

v1862 MEMBERSHIP: INFORMAL GROUP

Apart from the organisations and clubs we have just talked about, do you belong to any group which meets or has contact on a regular basis but which is not organised along club or association lines?

(Int.: It is important that this group meets or has contact on a regular basis and that the group is privately organised/is informal in character. Examples: Group of regulars at a pub, hiking group, discussion or reading groups.)

0 Not available 1980-2006, 2010-2012

v1863 INTERVIEWER-NUMBER

Interviewer number

9999999 No answer

Comment:

The width of interviewer numbers from the different surveys varies between four and seven digits.

v1864 SEQUENTIAL NUMBER OF SAMPLE NET

Sequential number of sample net

0 Not available 1986, 1990-1996, 2000-2014

Comment:

The first four digits encode the year of the survey, the fifth digit is the sequential number of the sample net. See the ALLBUS methodological reports for further information about sampling procedures.

v1865 SEQUENTIAL NUMBER OF SAMPLE POINT

Sequential number of sample-point

0 Not available 1986, 1991-1996, 2000

Comment:

Sample points represent geographical units that were chosen from the total of geographical units making up the universe sampled. While the codes have been anonymized for this data set, the data can still be used in statistical analyses. The first four digits encode the year of the survey, the last three digits encode the sequential number of the sample-point. See the ALLBUS methodological reports for further information about the sampling method. For the period from 1980 to 2000, sample points are only available for the surveys in 1980, 1982, 1984, 1988, 1990 and 1998.

v1866 SEQUENTIAL NUMBER IN SAMPLE POINT

Sequential number in sample-point

0 Not available 1980-1986, 1990-1996, 2000-2014

v1867 INTERVIEWER: SEX

Description of variable:

Sex of the interviewer

v1875 **DATE OF THE INTERVIEW**

Description of variable:

Date of the interview (as 8-digit number: YYYYMMDD)

Example:

20.06.2012 -> 20120620

0 Not available 1991

99999999 No answer

Derivation of data:

The data in this variable was computed based on the data in V1873 DATE OF INTERVIEW: DAY, V1874 DATE OF INTERVIEW: MONTH and the year of the survey (year):

$$V1875 = \text{year} * 10000 + V1874 * 100 + V1873$$

When there was no valid data for V1873 and/or V1874, no complete date code could be computed. These cases were assigned code 99999999 'No answer'.

For the 1991 survey no data is available for V1873 and V1874. These cases are assigned code 0 'Not available'.

v1888 RESP.: WILLING TO PARTICIPATE AGAIN?

2002:

(Int.: Please read question word for word.)

And finally, a completely different question. We plan to continue our research project with a further survey. Your participation would be very valuable for us. This is why we would like to ask you whether you would be willing to take part in a possible future interview.

For a further interview, we will have to store your address. The data protection act quite rightly requires your consent to do this. Your address will be stored separately from the questionnaire, solely for the purpose of a further interview. There is no way it can ever be linked to the answers you provide. Your data will remain absolutely anonymous.

Once the research project has been completed, your address will be permanently deleted from our records. Your consent is naturally voluntary.

You may withdraw it at any time.

We would be very grateful if you would agree to take further part in our research project.

(Int.: If respondent is willing to be interviewed again, please transfer respondent-ID number to sheet.

Hand over the sheet and ask respondent to fill it in.)

2004:

And finally, a completely different question. We plan to continue our research project with a further survey. Your participation would be very valuable to us. This is why we would like to ask you whether you would be willing to take part in a potential future survey.

For a further interview, we will have to store your address. The Data Protection Act quite rightly requires your consent to do this. Your address will be stored separately from the questionnaire, solely for the purpose of a further interview. There is no way it can ever be linked to the answers you provide. Your data will remain absolutely confidential.

Once the research project has been completed, your address will be permanently deleted from our records. It goes without saying that your consent is voluntary.

You may withdraw it at any time.

We would be very grateful if you would agree to continue to take part in our research project.

(Int.: In case it hasn't been handed over yet, please hand over data protection sheet now, otherwise point to its contents.)

v1900 INTERVIEW CONDUCTED ALONE WITH RESP.?

(Int.: Was the interview conducted alone with the respondent, or were other persons present during the interview? If so, who?)

from 2002 additionally:

(Int.: Multiple responses possible.)

Interview conducted alone with respondent

- 0 No
- 1 Yes
- 6 Not available 1991, 1992
- 9 No answer

Comment:

When the answer to the question whether the interview was conducted alone with the respondent was no (code 0 in V1900), a multiple response follow-up question was triggered asking what other people were present. The answers to this question were encoded in four dichotomous variables (V1901-V1904).

v1901 SPOUSE OR PARTNER PRESENT AT INTERVIEW?

(Int.: Was the interview conducted alone with the respondent, or were other persons present during the interview? If so, who?)

from 2002 additionally:

(Int.: Multiple responses possible.)

Spouse/partner present?

- 0 No
- 1 Yes
- 6 Not available 1991, 1992
- 9 No answer

Comment:

When the answer to the question whether the interview was conducted alone with the respondent was no (code 0 in V1900), a multiple response follow-up question was triggered asking what other people were present. The answers to this question were encoded in four dichotomous variables (V1901-V1904).

v1911 WILLING TO PARTICIPATE IN ONLINE SURVEY?

<If respondent uses the internet for private purposes>

2006:

Finally, there is one last thing we would like to ask you. The survey you have just taken part in is part of a research project by the Center for Survey Research and Methodology (ZUMA).

It is intended that the study will continue.

Which means we would like to interview you again in a few months time in the form of an internet survey.

For this purpose we need to store your email address.

This is subject to the data privacy regulations you can read on this sheet.

(Int.: Hand over data protection sheet. Check the address in the address record.)

2008:

Finally, there is one last thing we would like to ask you.

The survey you have just taken part in is part of a research project by GESIS.

It is intended that the study will continue.

Which means we would like to interview you again in a few months time in the form of an internet survey.

Of course your participation in the internet survey is voluntary and does not entail any further obligations. All pertaining data protections will be observed and GESIS will not provide your e-mail address to any third parties.

Would you be willing to continue supporting our research project by participating in our internet survey?

0 Respondent does not use the internet for private purposes (code 2 in V1909); not available 1980-2004, 2010-2014

1 Yes, I would

2 No, I wouldn't

capipapi INTERVIEW: CAPI OR PAPI?

Description of variable:

Interviewing method used for the ALLBUS-survey

- 1 PAPI (Paper and Pencil Interviewing)
- 2 CAPI (Computer Assisted Personal Interviewing)

Comment:

While ALLBUS 2006 is classified as a CAPI-Survey here, part of the respondents were asked to fill in their responses to a number of items themselves (CASI - Computer Assisted Self-Interviewing). For information as to which variables are concerned please refer to spl06.

splt80 SPLIT 1980: STIMULUS EXPERIMENT

Description of variable:

Split-Ballot: Stimulus Experiment

ALLBUS 1980 used a two group split-ballot design to test for the effect of stimulus variations on the responses to a number of questions. At three points during the interview, the wording of the questions each split-half received was varied. The following questions were part of the split experiment:

V150 - Fair share of standard of living: split 1 'your fair share of the good things in live' / split 2 'your fair share'

V159-V169 - Societal conflicts: split 1 'conflicts of interest' / split 2 'oppositions of interest'

V1604-V1606, V1616, V1618, V1619, V1621, V1629-V1631, V1641, V1643, V1644, V1646, V1654-V1656, V1666, V1668, V1669, V1671, V1679-V1681 - ego-centred networks, only the network generator was varied: in split 1 respondents were asked to name three "people you spend a lot of time with socially", while in split 2 respondents were asked to name "three people you think of as closer friends and whom you meet most frequently".

The variables listed above contain the data for both split-halves. The exact question wording used for the split versions is documented with each variable.

splt82 SPLIT 1982: STIMULUS EXPERIMENT

Description of variable:

Split-Ballot: Stimulus Experiment and Sequence Effects

ALLBUS 1982 used a two-group split-ballot design to test for sequence effects and the effect of stimulus variations. The two split versions of the questionnaire differed a) with regard to the position of the question on self-assessed religiousness within the module "Religion and World View" and b) with regard to the wording of the question texts and/or response scales used for a number of questions.

The following questions were part of the split experiment:

V21 (split 1) / V22 (split 2): political interest – different response scales

V151 (split 1 and split 2): self-assessment of social class – different response scales

V347 – V355 (split 1) / V364 – V376 (split 2): educational goals – different question wordings and response scale

V424 – V436 (split 1): work orientation (split 2 with different question wordings and response scale not included in this data set)

V569, V571, V573-V576, V578, V580: "Religion and World View"

Split 1:

A – item battery 'cosmologies' (V569, V571, V573) -> B – self-assessment of religiousness (V580) -> C – item battery 'meaning of life' (V574-V576, V578)

Split 2:

B – self-assessment of religiousness (V580) -> A – item battery 'cosmologies' (V569, V571, V573) -> C – item battery 'meaning of life' (V574-V576, V578)

The exact wording of the question texts and response scales used in the split versions is documented with each variable.

splt90 SPLIT 1990: ALTERNATE QUESTIONS

Description of variable:

Split-Ballot : Alternate Questions

ALLBUS 1990 used a two-group split-ballot design to increase the total number of questions surveyed, i.e. each split-version of the questionnaire contained a number of alternate questions only surveyed in one split-half.

Questions only included in split 1:

V379-V385: abortion

V416-V422: importance of spheres of life

V660-V669: attitudes towards the administration

V684-V687: anomia

V691-V694, V704-V707: deviant behavior

Questions only included in split 2:

V10, V12, V13, V15: economic situation

V27, V29, V30, V32-V34: electoral participation

V112-V115: views on political problems

V150: fair share in standard of living

V159-V169, V174, V176: societal conflicts

V270-V277: attitude towards and contacts with guest workers

V698, V699, V701-V703, V708-V710: deviant behavior

splt94 SPLIT 1994: GUESTWORKERS-FOREIGNERS

Description of variable:

Split-Ballot: "Guest workers"

ALLBUS 1994 used a two-group split-ballot design to test for the effect of stimulus variation with regard to the questions on attitudes towards and contacts with guest-workers. Split 1 used the established question wording, which refers to "guest workers". In Split 2 this designation was replaced by the phrase "the foreigners living in Germany".

The following questions were part of the split experiment:

V270 – V277: attitudes towards and contact to foreigners

The variables listed above contain the data for both split-halves. The exact question wording used for the split versions is documented with each variable.

For further information, compare:

splt00 SPLIT 2000: ALTERNATE QUESTIONS

Description of variable:

Split-Ballot: Alternate Questions

ALLBUS 2000 used a two-group split-ballot design to increase the total number of questions surveyed, i.e. each split-version of the questionnaire contained a number of alternate questions only surveyed in one split-half.

Please note that the split-ballot design was only used for the CAPI-survey. The PAPI-survey contained the questions fielded with CAPI-Split 1 as well as those fielded with CAPI-Split 2.

Questions only included in CAPI-split 1:

V23-V24: party preference
 V53-V56: political participation
 V379-V385: abortion
 V691-V703: evaluation of deviant behavior
 V705-V710: prohibition of deviant behavior
 V711-V718: self-reported deviant behavior
 V719-V722: assessed likelihood of discovery of deviant behavior
 V723: importance of punishment
 V724: personal victimization
 V725: compliance with laws
 V726: deterrence by punishment

Questions only included in CAPI-split 2:

V141-V149: attitudes towards German reunification
 V186: personal ambitions in life realized?
 V187: assessment of access to education
 V188-V199: perceived prerequisites for success in society
 V216-V229, 231-V233: trust in public institutions and organisations
 V234-V236: trust in European institutions
 V237-V246: things one can be proud of as a German
 V247: pride in being a German
 V248-V251: attitude towards immigration of foreigners
 V270-V277: attitude towards and contacts with foreigners
 V321-V326: identification with municipality, federal state, Germany, European Union

splt06 SPLIT 2006: CAPI-CASI

Description of variable:

Split-Ballot: Survey Mode

ALLBUS 2006 used a two-group split-ballot design to test for survey mode effects with regard to four questions on respondents' attitudes towards foreigners. In split 1 the four questions were read out by the interviewer (CAPI – computer assisted personal interviewing). In split 2 the respondents were asked to read and answer the questions themselves on the interviewers' laptop computer (CASI – computer assisted self-interviewing).

Split1: CAPI for V270-V273

Split2: CASI for V270-V273

Variables V270-V273 contain the data for both split-halves. The exact question wording used for the split versions is documented with each variable.

splt10 SPLIT 2010: NETWORKS

Description of variable:

Split-Ballot: Network Generator

A major part of ALLBUS 2010 was devoted to collecting ego-centred network data. A two-group split-ballot design was used to test two different network generators. Split 1 received the network generator that had previously been used in the ALLBUS program in 1980, 1990 and 2000. Respondents were asked to name the three people they spend the most time with socially. The wording of the network generator used in split 2 was based on a question used in the General Social Survey (GSS). In split 2, respondents were asked to name five people with whom they had talked about important matters over the last six months.

The data of the two splits are stored in separate variables:

V1604-V1681: network-related questions in split 1 (ALLBUS-generator)

V1682-V1817: network-related questions in split 2 (GSS-generator)

For further information, compare:

splt12_1 SPLIT 2012: ABORTION

Description of variable:

Split-Ballot: Abortion

ALLBUS 2012 used a two-group split-ballot design to test an updated item battery on attitudes towards abortion. The respondents in split 1 received the established item battery asking whether abortion should be legally permitted under various circumstances or not. In split 2, respondents were similarly asked if abortion should be legal under a number of circumstances. However, the updated question used a more differentiated response scale giving respondents the option to qualify their support for abortion taking into account how far into the pregnancy the supposed abortion would take place.

The data of the two splits are stored in separate variables:

Split 1: V379-V385

Split 2: V386-V393

splt12_2 SPLIT 2012: ROLE OF WOMEN

Description of variable:

Split-Ballot: Gender Roles

ALLBUS 2012 used a two-group split-ballot design to test an updated item battery on gender roles. Respondents in split 1 received the established set of questions consisting of three items asking about attitudes towards women's participation in the workforce and three items focusing more specifically on the perceived impact of working mothers on their children. All six items were phrased so that respondents were asked for their support of traditional, conservative positions. Respondents in split 2 received an updated and extended item battery, which consisted of ten questions. For the new item battery, the wording of the established items was modified so as to reflect the increased and commonplace participation of women in the workforce. Moreover, four new items were added. These new items were designed to represent non-traditional gender roles and explicitly addressed the role of men in the family.

The data of the two splits are stored in separate variables:

Split 1 V331-V336

Split 2: V337-V346

splt12_3 SPLIT 2012: CHURCH ATTENDANCE

Description of variable:

Split-Ballot: 'Frequency of Church Attendance'

ALLBUS 2012 used a two-group split-ballot design to test an alternative wording for the question on frequency of church attendance during childhood. Split 1 replicated a wording also used in other questions on church attendance in the ALLBUS-program. Respondents were asked how often they 'went to church' when they were a child. In split 2 respondents were instead asked how often they 'attended a church service' when they were a child.

The data of the two splits are stored in separate variables. The exact wording of the question texts used in the split versions is documented with each variable:

Split 1: V737

Split 2: V738

splt14_1 SPLIT 2014: OCCUPATIONAL SUCCESS

Description of variable:

Split-Ballot: Comparison of Occupational Success

ALLBUS 2014 used a two-group split-ballot design to test for the effect of different response scales with regard to the question on relative occupational status compared to the respondent's mother and father. Respondents in both split-halves were asked to evaluate their own occupational status in comparison to that of their mother and their father. Respondents in split 1 received the four-point scale previously used in the ALLBUS-program. The response options were: "much higher", "somewhat higher", "roughly the same" and "lower". Respondents in split 2 received a five-point scale which substituted the two categories "somewhat lower" and "much lower" for the single category "lower" in split 1.

The split-ballot experiment showed that the different response scales did not have a statistically significant effect on response behavior. For this cumulated data set, the data from both split-halves was therefore merged in a single variable. To this end, the categories "somewhat lower" and "much lower" from split 2 were recoded to "lower".

Please note that only the comparison to the occupational status of the respondent's father is included in this data set, because the question referring to the mother's occupational status has not been replicated yet.

splt14_3 SPLIT 2014: HEALTH OF RESPONDENT

Description of variable:

Split-Ballot: Health of Respondent

ALLBUS 2014 used a two-group split-ballot design to test for the effect of different response scales with regard to the question on the respondents' health. Respondents in both split-halves were asked to evaluate their general state of health. Respondents in split 1 received the five-point scale previously used in the ALLBUS-program. The response options were: "very good", "good", "satisfactory", "not that good" and "bad". Respondents in split 2 received a six-point scale which extended the positive end of the scale to include the option "excellent".

As the split-ballot experiment showed that the two response scales produce statistically significant differences, the data of the two splits was stored in separate variables. The exact wording of the question texts used in the split versions is documented with each variable:

V495: split 1 – state of health (five-point response scale)

V496: split 2 – state of health (six-point response scale)

0 Not available 1980-2012

1 Split 1

2 Split 2

wghtpt WEIGHT: TRANSFORM TO PERSON-LEVEL

Description of variable:

Transformation weight for person-related analyses:

Transforms household samples to person-level.

0 Cannot be calculated

1 Respondents from a sample of individuals (1994, 1996, 2000-2014: code 2 in samptype) - transformation weight not applicable

Note:

Transformation of Household Sample Data to Person-Level Data

From 1980 to 1992 and in 1998, the ALLBUS data was surveyed based on a sample of households. Therefore, analyses of this data involving the characteristics of individuals (attitudes, demographic attributes, etc.) should in principle be weighted using a transformation weight that adjusts for the effect of household size on the probability of selection for each respondent. A transformation weight suitable for analyses treating East and West Germany separately is provided in wghtpt.

Person-level analyses of data from household samples that target Germany as a whole must additionally address the oversampling of East German respondents from 1991 onwards. The appropriate weighting factors are calculated as the product of the transformation weight in wghtpt and the person-level East-West-weight in wghtpow. The combined weight is wghtptow.

Because the effects of household size on the composition of the sample are often minimized by conditions in the field - the higher selection probability of one-person households, for example, is often offset by the fact that these households are harder to contact - transformation weighting can often be neglected. However, it is always good advice to compare the results of unweighted and weighted analyses to check for any major deviations.

Application of weights:

Analysis of person-related data:

- separate for East and West Germany: wghtpt
- Germany as a whole: wghtptow

Analysis of household-related data:

- separate for East and West Germany: wghtht
- Germany as a whole: wghthtow

wghtpow EAST-WEST-WEIGHT, PERSONS

Description of variable:

Weight for East German oversample, person-related:

Adjusts for the oversample of East German respondents, for person-related analyses of the German population as a whole; use with data from person samples (1994, 1996, from 2000)

1 No East German oversample (1980-1990) - weighting not necessary

Note:

Weights Adjusting for the Oversample of Respondents from East Germany

Applying the East-West-weight in wghtpow adjusts for the overrepresentation of respondents from East Germany in the ALLBUS surveys using person samples (1994, 1996, 2000 and following), i.e. it obviates the need to perform separate analyses for the Western and Eastern subsample. Please note that data from samples of households (1980-1992, 1998) is not transformed to person-level data.

Please also refer to the notes for wghtpt, wghtptow and wghtht, wghthtow.

wghtptow WEIGHT: E-W+TRANSF. TO PERSON-LEVEL

Description of variable:

Combined weight for person-related analyses of the German population as a whole:

- transforms household samples to person-level
- adjusts for the East German oversample

0 Cannot be calculated

Note:

Transformation of Household Sample Data to Person-Level Data

From 1980 to 1992 and in 1998, the ALLBUS data was surveyed based on a sample of households. Therefore, analyses of this data involving the characteristics of individuals (attitudes, demographic attributes, etc.) should in principle be weighted using a transformation weight that adjusts for the effect of household size on the probability of selection for each respondent. A transformation weight suitable for analyses treating East and West Germany separately is provided in *wghtpt*.

Person-level analyses of data from household samples that target Germany as a whole must additionally address the oversampling of East German respondents from 1991 onwards. The appropriate weighting factors are calculated as the product of the transformation weight in *wghtpt* and the person-level East-West-weight in *wghtpow*. The combined weight is *wghtptow*.

Because the effects of household size on the composition of the sample are often minimized by conditions in the field - the higher selection probability of one-person households, for example, is often offset by the fact that these households are harder to contact - transformation weighting can often be neglected. However, it is always good advice to compare the results of unweighted and weighted analyses to check for any major deviations.

Application of weights:

Analysis of person-related data:

- separate for East and West Germany: *wghtpt*
- Germany as a whole: *wghtptow*

Analysis of household-related data:

- separate for East and West Germany: *wghtht*
- Germany as a whole: *wghthtow*

wghtht WEIGHT: TRANSFORM TO HOUSEHOLD-LEVEL

Description of variable:

Transformation weight for analyses on household-level:

Transforms data from person samples to household-level

Only separate analyses for East and West Germany permissible.

0 Cannot be calculated

1 Respondents from a sample of households (1980-1992, 1998: code 1 in samptype) - transformation weight not applicable

Note:

Transformation of Person Sample Data to Household-Level Data

The ALLBUS surveys in 1994 and 1996 and those in 2000 and following years were conducted on the basis of a person sample. These samples show a design bias favouring larger households and must consequently be weighted when performing analyses targeting household-level attributes like household income, etc. For separate analyses of the East and West German subsamples please use wghtht. Household-level analyses of the sample as a whole should be weighted by wghthtow, which also adjusts for the overrepresentation of East German respondents. The weighting factors in wghthtow are calculated as the product of wghtht (transformation weight) and wghthow (household-level East-West-weight).

The household-level East-West-weight wghthow can also be used if only data from samples of households is concerned (ALLBUS 1980 to 1992 and ALLBUS 1998). The weighting factors will adjust for the overrepresentation of East German households so that the data can be treated as representative of total Germany.

Application of weights:

Analysis of person-related data:

- separate for East and West Germany: wghtpt
- Germany as a whole: wghtptow

Analysis of household-related data:

- separate for East and West Germany: wghtht
- Germany as a whole: wghthtow

wghthow EAST-WEST-WEIGHT, HOUSEHOLDS

Description of variable:

Weight for East German oversample, household level:

0 Cannot be calculated

1 No oversample because survey covered West Germany only (1980-1990), east-west weight not applicable

Comment:

This variable is primarily used to compute the weighting factors in wghthtow (comp. note to wghthtow).

wghthtow WEIGHT: E-W+TRANSF. TO HOUSEHOLD-LEVEL

Description of variable:

Combined weight for analyses of German population as a whole on household-level:

- transforms data from person samples to household-level
- adjusts for the East German oversample

0 Cannot be calculated

1 Survey was based on household sample and covered West Germany only (1980-1990)

Note:

Transformation of Person Sample Data to Household-Level Data

The ALLBUS surveys in 1994 and 1996 and those in 2000 and following years were conducted on the basis of a person sample. These samples show a design bias favouring larger households and must consequently be weighted when performing analyses targeting household-level attributes like household income, etc. For separate analyses of the East and West German subsamples please use wghtht. Household-level analyses of the sample as a whole should be weighted by wghthtow, which also adjusts for the overrepresentation of East German respondents. The weighting factors in wghthtow are calculated as the product of wghtht (transformation weight) and wghthow (household-level East-West-weight).

The household-level East-West-weight wghthow can also be used if only data from samples of households is concerned (ALLBUS 1980 to 1992 and ALLBUS 1998). The weighting factors will adjust for the overrepresentation of East German households so that the data can be treated as representative of total Germany.

Application of weights:

Analysis of person-related data:

- separate for East and West Germany: wghtht
- Germany as a whole: wghthtow

Analysis of household-related data:

- separate for East and West Germany: wghtht
- Germany as a whole: wghthtow

Appendix A – ISCO-68

International Standard Classification of Occupations (ISCO 1968).

Source:

International Labour Office (ed.) 1986: International Standard Classification of Occupations. Revised Edition 1968, Geneva: International Labour Office. (The German codes used in the original ALLBUS data handbook were taken from: Statistisches Bundesamt (ed.) 1971: Internationale Standardklassifikation der Berufe. Übersetzung der "International Standard Classification of Occupations" des internationalen Arbeitsamtes, Genf 1968, Deutsche Übersetzung 1968, Stuttgart and Mainz: Kohlhammer.)

Professional, technical and related workers

- 0011 Chemists
- 0012 Physicists
- 0013 Physical scientists not elsewhere classified
- 0014 Physical science technicians
- 0021 Architects and town planners
- 0022 Civil engineers
- 0023 Electrical and electronics engineers
- 0024 Mechanical engineers
- 0025 Chemical engineers
- 0026 Metallurgists
- 0027 Mining engineers
- 0028 Industrial engineers
- 0029 Architects and engineers, n.e.c.
- 0031 Surveyors
- 0032 Draughtsmen
- 0033 Civil engineering technicians
- 0034 Electrical and electronics engineering technicians
- 0035 Mechanical engineering technicians
- 0036 Chemical engineering technicians
- 0037 Metallurgical technicians
- 0038 Mining technicians
- 0039 Engineering technicians, n.e.c.

-
- 0040 Aircraft pilots, ship officers
 - 0041 Aircraft pilots, navigators and flight engineers
 - 0042 Ships' deck officers and pilots
 - 0043 Ships' engineers
 - 0050 Life scientists and related technicians
 - 0051 Biologists, zoologists and related scientists
 - 0052 Bacteriologists, pharmacologists and related scientists
 - 0053 Agronomists and related scientists
 - 0054 Life sciences technicians
 - 0060 Medical, dental and veterinary professions
 - 0061 Medical doctors
 - 0062 Medical assistants
 - 0063 Dentists
 - 0064 Dental assistants
 - 0065 Veterinarians
 - 0066 Veterinary assistants
 - 0067 Pharmacists
 - 0068 Pharmaceutical assistants
 - 0069 Dietitians and public health nutritionists
 - 0071 Professional nurses
 - 0072 Nursing personnel, n.e.c.
 - 0073 Professional midwives
 - 0074 Midwifery personnel, n.e.c.
 - 0075 Optometrists and opticians
 - 0076 Physiotherapists and occupational therapists
 - 0077 Medical X-ray technicians
 - 0079 Medical, dental, veterinary and related workers, n.e.c. (Herbalist, sanitary officer, osteopath)
 - 0081 Statisticians
 - 0082 Mathematicians and actuaries
 - 0083 Systems analysts
 - 0084 Statistical and mathematical technicians
 - 0090 Economists
 - 0110 Accountants (general)
 - 0121 Lawyers

0122 Judges
0129 Jurists, n.e.c.
0131 University and higher education teachers and related
0132 Secondary education teachers and related
0133 Primary education teachers and related
0134 Pre-primary education teachers
0135 Special education teachers
0139 Teachers, n.e.c.
0141 Ministers of religion and related members of religious orders
0149 Workers in religion, n.e.c.
0151 Authors and critics
0159 Authors, journalists and related writers, n.e.c.
0161 Sculptors, painters and related artists
0162 Commercial artists and designers
0163 Photographers and cameramen
0171 Composers, musicians and singers
0172 Choreographers and dancers
0173 Actors and stage directors
0174 Producers, performing arts (theater, movie, radio, TV)
0175 Circus performers
0179 Performing artists, n.e.c.
0191 Librarians, archivists and curators
0192 Sociologists, anthropologists and related scientists
0193 Social workers
0194 Personnel and occupational specialists
0195 Philologists, translators and interpreters
0199 Other scientists, technical and related professions, n.e.c.

Administrative and managerial workers

0201 Heads of government jurisdiction, legislative officials
0202 Members of legislative bodies, government officials
0211 General managers and businessmen, manager in enterprise
0212 Production managers (except farm)
0219 Managers in private enterprises, industry, business, n.e.c.

Clerical and related workers

- 0300 Clerical supervisors
- 0310 Government executive officials
- 0321 Stenographers, typists and teletypists
- 0322 Card- and tapepunching machine operators
- 0331 Bookkeepers and cashiers
- 0339 Bookkeepers, cashiers and related workers, n.e.c.
- 0341 Bookkeeping and calculating machine operators
- 0342 Automatic data-processing machine operators
- 0351 Railway station masters
- 0352 Postmasters
- 0359 Transport and communications supervisors, n.e.c.
- 0360 Transport conductors
- 0370 Mail distribution clerks
- 0380 Telephone and telegraph operators
- 0390 Clerical and related workers
- 0391 Stock clerks
- 0392 Material and production planning clerks
- 0393 Correspondence and reporting clerks
- 0394 Receptionists and travel agency clerks
- 0395 Library and filing clerks
- 0399 Clerks n.e.c.

Sales workers

- 0400 Managers (wholesale and retail trade)
- 0410 Working proprietors (wholesale and retail trade)
- 0421 Sales supervisors
- 0422 Buyers
- 0431 Technical salesmen and service advisers
- 0432 Commercial travellers and manufacturers' agents
- 0441 Insurance, real estate and securities salesmen
- 0442 Business services salesmen
- 0443 Auctioneers
- 0451 Salesmen, shop assistants and demonstrators

0452 Street vendors, canvassers and newsvendors

0490 Sales workers, n.e.c.

Service workers

0500 Managers (catering and lodging services)

0510 Working proprietors (catering and lodging services)

0520 Housekeeping and related service workers

0531 Cooks

0532 Waiters, bartenders and related workers

0540 Maids and related housekeeping service workers, n.e.c.

0551 Building caretakers (general)

0552 Charworkers, cleaners and related workers

0560 Launderers, dry cleaners and pressers

0570 Hairdressers, barbers, beauticians and related workers

0581 Fire fighters

0582 Policemen and detectives

0589 Protective service workers, n.e.c.

0591 Guides

0592 Undertakers and embalmers

0599 Other service workers, n.e.c.

Agricultural, animal husbandry and forestry workers, fishermen and hunters

0600 Farm managers and supervisors

0610 Farm manager or director

0611 General farmers

0612 Specialised farmers

0621 General farm workers (including cooperative farmers)

0622 Field crop and vegetable farm workers

0623 Orchard, vineyard and related tree and shrub crop workers

0624 Livestock workers

0625 Dairy farm workers

0626 Poultry farm workers

0627 Nursery workers and gardeners

0628 Farm machinery operators

0629 Agricultural and animal husbandry workers, n.e.c.

- 0631 Loggers
- 0632 Forestry workers (except logging)
- 0641 Fishermen
- 0649 Fishermen, hunters and related workers, n.e.c.

Production and related workers, transport equipment operators and labourers

- 0700 Production supervisors and general foremen
- 0711 Miners and quarrymen
- 0712 Mineral and stone treaters
- 0713 Well drillers, borers and related workers
- 0721 Metal smelting, converting and refining furnacemen
- 0722 Metal rolling-mill workers
- 0723 Metal melters and reheaters
- 0724 Metal casters
- 0725 Metal moulders and coremakers
- 0726 Metal annealers, temperers and case-hardeners
- 0727 Metal drawers and extruders
- 0728 Metal platers and coaters
- 0729 Metal processors, n.e.c.
- 0731 Wood treaters
- 0732 Sawyers, plywood makers and related wood-processing workers
- 0733 Paper pulp preparers
- 0734 Paper makers
- 0741 Crushers, grinders and mixers
- 0742 Cookers, roasters and related heat-treaters
- 0743 Filter and separator operators
- 0744 Still and reactor operators
- 0745 Petroleum-refining workers
- 0749 Chemical processors and related workers, n.e.c.
- 0751 Fibre preparers
- 0752 Spinners and winders
- 0753 Weaving- and knitting-machine setters and pattern-card preparers
- 0754 Weavers and related workers
- 0755 Knitters

0756 Bleachers, dyers and textile product finishers
0759 Spinners, weavers, knitters, dyers and related workers, n.e.c.
0761 Tanners and fellmongers
0762 Pelt dressers
0771 Grain millers and related workers
0772 Sugar processors and refiners
0773 Butchers and meat preparers
0774 Food preservers
0775 Dairy product processors
0776 Bakers, pastrycooks and confectionery makers
0777 Tea, coffee and cocoa preparers
0778 Brewers, wine and beverage makers
0779 Food and beverage processors, n.e.c.
0781 Tobacco preparers
0782 Cigar makers
0783 Cigarette makers
0789 Tobacco preparers and tobacco product makers, n.e.c.
0791 Tailors and dressmakers
0792 Fur tailors and related workers
0793 Milliners and hatmakers
0794 Patternmakers and cutters
0795 Sewers and embroiderers
0796 Upholsterers and related workers
0799 Tailors, dressmakers, sewers, upholsterers and related workers, n.e.c.
0801 Shoemakers and shoe repairers
0802 Shoe cutters, lasters, sewers and related workers
0803 Leather goods makers
0811 Cabinetmakers
0812 Woodworking-machine operators
0819 Cabinetmakers and related woodworkers, n.e.c.
0820 Stone cutters and carvers
0831 Blacksmiths, hammersmiths and forging-press operators
0832 Toolmakers, metal patternmakers and metal markers
0833 Machine-tool setter-operators

-
- 0834 Machine-tool operators
 - 0835 Metal grinders, polishers and tool sharpeners
 - 0839 Blacksmiths, toolmakers and machine-tool operators, n.e.c.
 - 0841 Machinery fitters and machine assemblers
 - 0842 Watch, clock and precision instrument makers
 - 0843 Motor vehicle mechanics
 - 0844 Aircraft engine mechanics
 - 0849 Machinery fitters, machine assemblers and precision instrument makers (except electrical), n.e.c.
 - 0851 Electrical fitters
 - 0852 Electronics fitters
 - 0853 Electrical and electronic equipment assemblers
 - 0854 Radio and television repairmen
 - 0855 Electrical wiremen
 - 0856 Telephone and telegraph installers
 - 0857 Electric linemen and cable jointers
 - 0859 Electrical fitters and related electrical and electronics workers, n.e.c.
 - 0861 Broadcasting station operators
 - 0862 Sound equipment operators and cinema projectionists
 - 0871 Plumbers and pipe fitters
 - 0872 Welders and flame cutters
 - 0873 Sheet metal workers
 - 0874 Structural metal preparers and erectors
 - 0880 Jewellery and precious metal workers
 - 0891 Glass formers, cutters, grinders and finishers
 - 0892 Potters and related clay and abrasive formers
 - 0893 Glass and ceramics kilnmen
 - 0894 Glass engravers and etchers
 - 0895 Glass and ceramics painters and decorators
 - 0899 Glass formers, potters and related workers, n.e.c.
 - 0901 Rubber and plastics product makers (except tire makers and tire vulcanisers)
 - 0902 Tire makers and vulcanisers
 - 0910 Paper and paperboard products makers
 - 0921 Compositors and typesetters
 - 0922 Printing pressmen

-
- 0923 Stereotypers and electrotypers
 - 0924 Printing engravers (except photo-engravers)
 - 0925 Photo-engravers
 - 0926 Bookbinders and related workers
 - 0927 Photographic darkroom workers
 - 0929 Printers and related workers, n.e.c.
 - 0931 Painters, construction
 - 0939 Painters, n.e.c.
 - 0941 Musical instrument makers and tuners
 - 0942 Basketry weavers and brush makers
 - 0943 Non-metallic mineral product makers
 - 0949 Other production and related workers
 - 0951 Bricklayers, stonemasons and tile setters
 - 0952 Reinforced-concreters, cement finishers and terrazzo workers
 - 0953 Roofers
 - 0954 Carpenters, joiners and parquetry workers
 - 0955 Plasterers
 - 0956 Insulators
 - 0957 Glaziers
 - 0959 Construction workers, n.e.c.
 - 0961 Power-generating machinery operators
 - 0969 Stationary engine and related equipment operators, n.e.c.
 - 0971 Dockers and freight handlers
 - 0972 Riggers and cable splicers
 - 0973 Crane and hoist operators
 - 0974 Earth-moving and related machinery operators
 - 0979 Material-handling equipment operators, n.e.c.
 - 0981 Ships' deck ratings, barge crews and boatmen
 - 0982 Ships' engine-room ratings
 - 0983 Railway engine drivers and firemen
 - 0984 Railway brakemen, signalmen and shunters
 - 0985 Motor vehicle drivers
 - 0986 Animal and animal-drawn vehicle drivers
 - 0989 Transport equipment operators, n.e.c.

0999 Labourers, factory workers, unskilled workers not elsewhere classified

0001 Soldier (armed forces)

0002 Officer (armed forces)

1004 Workers with inadequately described or undefinable (not classifiable) job

1007 Refused

1008 Don't know

1009 No answer

0000 Not applicable

Appendix B - ISCO-88

Appendix B – ISCO-88

International Standard Classification of Occupations (ISCO 1988).

Source:

International Labour Office (ed.) 1990: International standard classification of occupations: ISCO-88, Geneva.

All regular ISCO-codes in the data file are in a four digit format. Where necessary, trailing zeros were added.

1 Legislators, senior officials and managers in private
industry, enterprise and business

11 Legislators and senior officials

111 Legislators

1110 Legislators

112 Senior government officials

1120 Senior government officials

113 Traditional chiefs and heads of villages

1130 Traditional chiefs and heads of villages

114 Senior officials of special-interest organisations

1141 Senior officials of political-party organisations

1142 Senior officials of employers', workers' and other economic-interest organisations

1143 Senior officials of humanitarian and other special-interest organisations

12 Corporate managers in big enterprises (1)

121 Directors and chief executives

1210 Directors and chief executives

122 Production and operations department managers

1221 Production and operations department managers in agriculture, hunting, forestry and
fishing

1222 Production and operations department managers in manufacturing

1223 Production and operations department managers in construction

1224 Production and operations department managers on wholesale and retail trade

1225 Production and operations department managers in restaurants and hotels

- 1226 Production and operations department managers in transport, storage and communications
- 1227 Production and operations department managers in business services
- 1228 Production and operations department managers in personal care, cleaning and related services
- 1229 Production and operations department managers not elsewhere classified
- 123 Other department managers
 - 1231 Finance and administration department managers
 - 1232 Personnel and industrial relations department managers
 - 1233 Sales and marketing department managers
 - 1234 Advertising and public relations department managers
 - 1235 Supply and distribution department managers
 - 1236 Computing services department managers
 - 1237 Research and development department managers
 - 1239 Other department managers, not elsewhere classified
- 13 General managers small enterprises (2)
 - 131 General managers
 - 1311 General managers in agriculture, hunting, forestry and fishing
 - 1312 General managers in manufacturing
 - 1313 General managers in construction
 - 1314 General managers in wholesale and retail trade
 - 1315 General managers of restaurants and hotels
 - 1316 General managers in transport, storage and communications
 - 1317 General managers of business services
 - 1318 General managers in personal care, cleaning and related services
 - 1319 General managers not elsewhere classified
- 2 Scientists, professionals
 - 21 Physical, mathematical and engineering science professionals
 - 211 Physicists, chemists and related professionals
 - 2111 Physicists and astronomers
 - 2112 Meteorologists
 - 2113 Chemists
 - 2114 Geologists and geophysicists
 - 212 Mathematicians, statisticians and related professionals

-
- 2121 Mathematicians and related professionals
 - 2122 Statisticians
 - 213 Computing professionals
 - 2131 Computer systems designers and analysts
 - 2132 Computer programmers
 - 2139 Computing professionals not elsewhere classified
 - 214 Architects, engineers and related professionals
 - 2141 Architects, town and traffic planners
 - 2142 Civil engineers
 - 2143 Electrical engineers
 - 2144 Electronics and telecommunications engineers
 - 2145 Mechanical engineers
 - 2146 Chemical engineers
 - 2147 Mining engineers, metallurgists and related professionals
 - 2148 Cartographers and surveyors
 - 2149 Architects, engineers and related professionals not elsewhere classified
 - 22 Life science and health professionals
 - 221 Life science professionals
 - 2211 Biologists, botanists, zoologists and related professionals
 - 2212 Pharmacologists, pathologists and related professionals (not medicines)
 - 2213 Agronomists and related professionals
 - 222 Health professionals (except nursing)
 - 2221 Medical doctors
 - 2222 Dentists
 - 2223 Veterinarians
 - 2224 Pharmacists
 - 2229 Health professionals (except nursing) not elsewhere classified
 - 223 Nursing and midwifery professionals
 - 2230 Nursing and midwifery professionals
 - 23 Teaching professionals
 - 231 College, university and higher education teaching professionals
 - 2310 College, university and higher education teaching professionals
 - 232 Secondary education teaching professionals
 - 2320 Secondary education teaching professionals
 - 233 Primary and pre-primary education teaching professionals

- 2331 Primary education teaching professionals
- 2332 Pre-primary education teaching professionals
- 234 Special education teaching professionals
 - 2340 Special education teaching professionals
- 235 Other teaching professionals
 - 2351 Education methods specialists
 - 2352 School inspectors
 - 2359 Other teaching professionals not elsewhere classified
- 24 Other professionals and related professions
 - 241 Business professionals
 - 2411 Accountants
 - 2412 Personnel and careers professionals
 - 2419 Business professionals not elsewhere classified
 - 242 Legal professionals
 - 2421 Lawyers
 - 2422 Judges
 - 2429 Legal professionals not elsewhere classified
 - 243 Archivists, librarians and related information professionals
 - 2431 Archivists and curators
 - 2432 Librarians and related information professionals
 - 244 Social science and related professionals
 - 2441 Economists
 - 2442 Sociologists, anthropologists and related professionals
 - 2443 Philosophers, historians and political scientists
 - 2444 Philologists, translators and interpreters
 - 2445 Psychologists
 - 2446 Social work professionals
 - 245 Writers and creative or performing artists
 - 2451 Authors, journalists and other writers
 - 2452 Sculptors, painters and related artists
 - 2453 Composers, musicians and singers
 - 2454 Choreographers and dancers
 - 2455 Film, stage and related actors and directors
 - 246 Religious professionals
 - 2460 Religious professionals
- 25 Education professionals n.e.c. * (mostly nursery school teachers or social workers)

3 Technicians and associate professionals

31 Physical and engineering science associate professional

311 Physical and engineering science technicians

- 3111 Chemical and physical science technicians
- 3112 Civil engineering technicians
- 3113 Electrical engineering technicians
- 3114 Electronics and telecommunications engineering technicians
- 3115 Mechanical engineering technicians
- 3116 Chemical engineering technicians
- 3117 Mining and metallurgical technicians
- 3118 Draughtspersons
- 3119 Physical and engineering science technicians not elsewhere classified

312 Computer associate professionals

- 3121 Computer assistants
- 3122 Computer equipment operators
- 3123 Industrial robot controllers

313 Optical and electronic equipment operators

- 3131 Photographers and image and sound recording equipment operators
- 3132 Broadcasting and telecommunications equipment operators
- 3133 Medical equipment operators
- 3139 Optical and electronic equipment operators not elsewhere classified

314 Ship and aircraft controllers and technicians

- 3141 Ships' engineers
- 3142 Ships' deck officers and pilots
- 3143 Aircraft pilots and related associate professionals
- 3144 Air traffic controllers
- 3145 Air traffic safety technicians

315 Safety and quality inspectors

- 3151 Building and fire inspectors
- 3152 Safety, health and quality inspectors

32 Life science and health associate professionals

321 Life science technicians and related associate professionals

- 3211 Life science technicians
- 3212 Agronomy and forestry technicians
- 3213 Farming and forestry advisers

- 322 Modern health associate professionals (except nursing)
 - 3221 Medical assistants
 - 3222 Sanitarians
 - 3223 Dieticians and nutritionists
 - 3224 Optometrists and opticians
 - 3225 Dental assistants
 - 3226 Physiotherapists and related associate professionals
 - 3227 Veterinary assistants
 - 3228 Pharmaceutical assistants
 - 3229 Modern health associate professionals (except nursing) not elsewhere classified
- 323 Nursing and midwifery associate professionals
 - 3231 Nursing associate professionals
 - 3232 Midwifery associate professionals
- 324 Traditional medicine practitioners and faith healers
 - 3241 Traditional medicine practitioners
 - 3242 Faith healers
- 33 Teaching associate professionals
 - 331 Primary education teaching associate professionals
 - 3310 Primary education teaching associate professionals
 - 332 Pre-primary education teaching associate professionals
 - 3320 Pre-primary education teaching associate professionals
 - 333 Special education teaching associate professionals
 - 3330 Special education teaching associate professionals
 - 334 Other teaching associate professionals
 - 3340 Other teaching associate professionals
- 34 Other associate professionals
 - 341 Finance and sales associate professionals
 - 3411 Securities and finance dealers and brokers
 - 3412 Insurance representatives
 - 3413 Estate agents
 - 3414 Travel consultants and organisers
 - 3415 Technical and commercial sales representative
 - 3416 Buyers
 - 3417 Appraisers, valuers and auctioneers
 - 3419 Finance and sales associate professionals not elsewhere classified

-
- 342 Business services agents and trade brokers
 - 3421 Trade brokers
 - 3422 Clearing and forwarding agents
 - 3423 Employment agents and labour contractors
 - 3429 Other business services agents and trade brokers not elsewhere classified
 - 343 Administrative associate professionals
 - 3431 Administrative secretaries and related associate professionals
 - 3432 Legal and related business associate professionals
 - 3433 Bookkeepers
 - 3434 Statistical, mathematical and related associate professionals
 - 3439 Administrative associate professionals not elsewhere classified
 - 344 Customs, tax and related government associate professionals
 - 3441 Customs and border inspectors
 - 3442 Government tax and excise officials
 - 3443 Government social benefits officials
 - 3444 Government licensing officials
 - 3449 Customs, tax and related government associate professionals not elsewhere classified
 - 345 Police inspectors and detectives
 - 3450 Police inspectors and detectives
 - 346 Social work associate professionals
 - 3460 Social work associate professionals
 - 347 Artistic, entertainment and sports associate professionals
 - 3471 Decorators and commercial designers
 - 3472 Radio, television and other announcers
 - 3473 Street, night-club and related musicians, singers and dancers
 - 3474 Clowns, magicians, acrobats and related associate professionals
 - 3475 Athletes, sportspersons and related associate professionals
 - 348 Religious associate professionals
 - 3480 Religious associate professionals
- 4 Clerks
- 41 Office clerks
 - 411 Secretaries, keyboard-operating clerks and related clerks
 - 4111 Stenographers and typists
 - 4112 Word-processor and related operators
 - 4113 Data entry operators
 - 4114 Calculating machine operators

- 4115 Secretaries
- 412 Numerical clerks
 - 4121 Accounting and bookkeeping clerks
 - 4122 Statistical and finance clerks
- 413 Material-recording and transport clerks
 - 4131 Stock clerks
 - 4132 Production clerks
 - 4133 Transport clerks
- 414 Library, mail and related clerks
 - 4141 Library and filing clerks
 - 4142 Mail carriers and sorting clerks
 - 4143 Coding, proof-reading and related clerks
 - 4144 Scribes and related workers
- 419 Other office clerks
 - 4190 Other office clerks
- 42 Customer services clerks
 - 421 Cashiers, tellers and related clerks
 - 4211 Cashiers and ticket clerks
 - 4212 Tellers and other counter clerks
 - 4213 Bookmakers and croupiers
 - 4214 Pawnbrokers and money-lenders
 - 4215 Debt-collectors and related workers
 - 422 Client information clerks
 - 4221 Travel agency and related clerks
 - 4222 Receptionists and information clerks
 - 4223 Telephone switchboard operators
- 43 Auxiliary office workers *
- 44 Administrative officer postal service, higher civil service ('Inspektor'-level and higher) *
- 45 Administrative officer railways, higher civil service ('Inspektor'-level and higher) *
- 5 Personal service, service workers and shop and market sales workers
- 51 Personal and protective services workers
 - 511 Travel attendants and related workers

-
- 5111 Travel attendants and travel stewards
 - 5112 Transport conductors
 - 5113 Travel guides
 - 512 Housekeeping and restaurant services workers
 - 5121 Housekeepers and related workers
 - 5122 Cooks
 - 5123 Waiters, waitresses and bartenders
 - 513 Personal care and related workers
 - 5131 Child care workers
 - 5132 Institution-based personal care workers
 - 5133 Home-based personal care workers
 - 5139 Personal care and related workers not elsewhere classified
 - 514 Other personal services workers
 - 5141 Hairdressers, barbers, beauticians and related workers
 - 5142 Companions and valets
 - 5143 Undertakers and embalmers
 - 5149 Other personal services workers not elsewhere classified
 - 515 Astrologers, fortune-tellers and related workers
 - 5151 Astrologers and related workers
 - 5152 Fortune-tellers, palmists and related workers
 - 516 Protective services workers
 - 5161 Fire-fighters
 - 5162 Police officers
 - 5163 Prison guards
 - 5169 Protective services workers not elsewhere classified
 - 52 Models, salespersons and demonstrators
 - 521 Fashion and other models
 - 5210 Fashion and other models
 - 522 Shop salespersons and demonstrators
 - 5220 Shop salespersons and demonstrators
 - 523 Stall and market salespersons
 - 5230 Stall and market salespersons
 - 6 Skilled agricultural and fishery workers
 - 61 Market-oriented skilled agricultural and fishery workers
 - 611 Market gardeners and crop growers
 - 6111 Field crop and vegetable growers
 - 6112 Tree and shrub crop growers

- 6113 Gardeners, horticultural and nursery growers
- 6114 Mixed-crop growers
- 612 Market-oriented animal producers and related workers
 - 6121 Dairy and livestock producers
 - 6122 Poultry producers
 - 6123 Apiarists and sericulturists
 - 6124 Mixed animal producers
 - 6129 Market-oriented animal producers and related workers not elsewhere classified
- 613 Market-oriented crop animal producers
 - 6130 Market-oriented crop animal producers
- 614 Forestry and related workers
 - 6141 Forestry workers and loggers
 - 6142 Charcoal burners and related workers
- 615 Fishery workers, hunters and trappers
 - 6151 Aquatic-life cultivation workers
 - 6152 Inland and coastal waters fishery workers
 - 6153 Deep-sea fishery workers
 - 6154 Hunters and trappers
- 62 Subsistence agricultural and fishery workers
 - 621 Subsistence agricultural and fishery workers
 - 6210 Subsistence agricultural and fishery workers
- 7 Craft and related trades workers
 - 71 Extraction and building trades workers
 - 711 Miners, shotfirers, stone cutters and carvers
 - 7111 Miners and quarry workers
 - 7112 Shotfirers and blasters
 - 7113 Stone splitters, cutters and carvers
 - 712 Building frame and related trades workers
 - 7121 Builders, traditional materials
 - 7122 Bricklayers and stonemasons
 - 7123 Concrete placers, concrete finishers and related workers
 - 7124 Carpenters and joiners
 - 7129 Building frame and related trades workers not elsewhere classified
 - 713 Building finishers and related trades workers
 - 7131 Roofers

- 7132 Floor layers and tile setters
- 7133 Plasterers
- 7134 Insulation workers
- 7135 Glaziers
- 7136 Plumbers and pipe fitters
- 7137 Building and related electricians
- 714 Painters, building structure cleaners and related trades workers
 - 7141 Painters and related workers
 - 7142 Varnishers and related painters
 - 7143 Building structure cleaners
- 72 Metal, machinery and related trades workers
 - 721 Metal moulders, welders, sheetmetal workers, structural-metal preparers, and related trades workers
 - 7211 Metal moulders and coremakers
 - 7212 Welders and flamecutters
 - 7213 Sheet-metal workers
 - 7214 Structural-metal preparers and erectors
 - 7215 Riggers and cable splicers
 - 7216 Underwater workers
 - 722 Blacksmiths, tool-makers and related trades workers
 - 7221 Blacksmiths, hammer-smiths and forging-press workers
 - 7222 Tool-makers and related workers
 - 7223 Machine-tool setters and setter-operators
 - 7224 Metal wheel-grinders, polishers and tool sharpeners
 - 723 Machinery mechanics and fitters
 - 7231 Motor vehicle mechanics and fitters
 - 7232 Aircraft engine mechanics and fitters
 - 7233 Agricultural- or industrial-machinery mechanics and fitters
 - 724 Electrical and electronic equipment mechanics and fitters
 - 7241 Electrical mechanics and fitters
 - 7242 Electronics fitters
 - 7243 Electronics mechanics and servicers
 - 7244 Telegraph and telephone installers and servicers
 - 7245 Electrical line installers, repairers and cable jointers
- 73 Precision, handicraft, printing and related trades workers

731 Precision workers in metal and related materials

7311 Precision-instrument makers and repairers

7312 Musical-instrument makers and tuners

7313 Jewellery and precious-metal workers

732 Potters, glass-makers and related trades workers

7321 Abrasive wheel formers, potters and related workers

7322 Glass-makers, cutters, grinders and finishers

7323 Glass engravers and etchers

7324 Glass, ceramics and related decorative painters

733 Handicraft workers in wood, textile, leather and related materials

7331 Handicraft workers in wood and related materials

7332 Handicraft workers in textile, leather and related materials

734 Printing and related trades workers

7341 Compositors, typesetters and related workers

7342 Stereotypers, and electrotypers

7343 Printing engravers and etchers

7344 Photographic and related workers

7345 Bookbinders and related workers

7346 Silk-screen, block and textile printers

74 Other craft and related trades workers

741 Food processing and related trades workers

7411 Butchers, fishmongers and related food preparers

7412 Bakers, pastry-cooks and confectionary maker

7413 Dairy-products makers

7414 Fruit, vegetable and related preservers

7415 Food and beverage tasters and graders

7416 Tobacco preparers and tobacco products maker

742 Wood treaters, cabinet-makers and related trades workers

7421 Wood treaters

7422 Cabinet-makers and related workers

7423 Woodworking-machine setters and setter-operators

7424 Basketry weavers, brush makers and related workers

743 Textile, garment and related trades workers

7431 Fibre preparers

7432 Weavers, knitters and related workers

7433 Tailors, dressmakers and hatters

- 7434 Furriers and related workers
- 7435 Textile, leather and related pattern-makers and cutters
- 7436 Sewers, embroiderers and related workers
- 7437 Upholsterers and related workers
- 744 Pelt, leather and shoemaking trades workers
 - 7441 Pelt dressers, tanners and fellmongers
 - 7442 Shoe-makers and related workers
- 751 Metal workers n.e.c. * (skilled workers, semi-skilled workers, foremen, masters)
- 752 Electronics technician n.e.c. * (skilled workers, semi-skilled workers, foremen, masters)

- 79 Master craftsman with supervisory responsibilities *

- 8 Plant and machine operators and assemblers
 - 81 Stationary-plant and related operators
 - 811 Mining- and mineral-processing-plant operators
 - 8111 Mining-plant operators
 - 8112 Mineral-ore and stone-processing-plant operators
 - 8113 Well drillers and borers and related workers
 - 812 Metal-processing-plant operators
 - 8121 Ore and metal furnace operators
 - 8122 Metal melters, casters and rolling-mill operators
 - 8123 Metal-heat-treating-plant operators
 - 8124 Metal drawers and extruders
 - 813 Glass, ceramics and related plant operators
 - 8131 Glass and ceramics kiln and related machine operators
 - 8139 Glass, ceramics and related plant operators not elsewhere classified
 - 814 Wood-processing- and papermaking-plant operators
 - 8141 Wood-processing-plant operators
 - 8142 Paper-pulp plant operators
 - 8143 Papermaking-plant operators
 - 815 Chemical-processing-plant operators
 - 8151 Crushing-, grinding- and chemical-mixing-machinery-operators
 - 8152 Chemical-heat-treating-plant operators
 - 8153 Chemical-filtering- and separating-equipment operators
 - 8154 Chemical-still and reactor operators (except petroleum and natural gas)
 - 8155 Petroleum- and natural-gas-refining-plant operators

- 8159 Chemical-processing-plant operators not elsewhere classified
- 816 Power-production and related plant operators
 - 8161 Power-production plant operators
 - 8162 Steam-engine and boiler operators
 - 8163 Incinerator, water-treatment and related plant operators
- 817 Automated-assembly-line and industrial-robot operators
 - 8171 Automated-assembly-line operators
 - 8172 Industrial-robot operators
- 82 Machine operators and assemblers
 - 821 Metal- and mineral-products machine operators
 - 8211 Machine-tool operators
 - 8212 Cement and other mineral products machine operators
 - 822 Chemical-products machine operators
 - 8221 Pharmaceutical- and toiletry products machine operators
 - 8222 Ammunition- and explosive-products machine operators
 - 8223 Metal finishing-, plating- and coating-machine operators
 - 8224 Photographic-products machine operators
 - 8229 Chemical-products machine operators not elsewhere classified
 - 823 Rubber- and plastic-products machine operators
 - 8231 Rubber-products machine operators
 - 8232 Plastic-products machine operators
 - 824 Wood-products machine operators
 - 8240 Wood-products machine operators
 - 825 Printing-, binding- and paper-products machine operators
 - 8251 Printing-machine operators
 - 8252 Bookbinding-machine operators
 - 8253 Paper-products machine operators
 - 826 Textile-, fur- and leather-products machine operators
 - 8261 Fibre-preparing-, spinning- and winding-machine operators
 - 8262 Weaving- and knitting-machine operators
 - 8263 Sewing-machine operators
 - 8264 Bleaching-, dyeing- and cleaning-machine operators
 - 8265 Fur- and leather-preparing-machine operators
 - 8266 Shoemaking- and related machine operators
 - 8269 Textile-, fur- and leather-products machine operators not elsewhere classified
 - 827 Food and related products machine operators
 - 8271 Meat- and fish-processing-machine operators

- 8272 Dairy-products machine operators
- 8273 Grain- and spice-milling-machine operators
- 8274 Baked-goods, cereal and chocolate-products machine operators
- 8275 Fruit-, vegetable- and nut-processing- machine operators
- 8276 Sugar production machine operators
- 8277 Tea-, coffee-, and cocoa-processing-machine operators
- 8278 Brewers-, wine and other beverage machine operators
- 8279 Tobacco production machine operators
- 828 Assemblers
 - 8281 Mechanical-machinery assemblers
 - 8282 Electrical-equipment assemblers
 - 8283 Electronic-equipment assemblers
 - 8284 Metal-, rubber- and plastic-products assemblers
 - 8285 Wood and related products assemblers
 - 8286 Paperboard, textile and related products assemblers
- 829 Other machine operators and assemblers
 - 8290 Other machine operators and assemblers
- 83 Drivers and mobile-plant operators
 - 831 Locomotive-engine drivers and related workers
 - 8311 Locomotive-engine drivers
 - 8312 Railway breakers, signallers and shunters
 - 832 Motor-vehicle drivers
 - 8321 Motor-cycle drivers
 - 8322 Car, taxi and van drivers
 - 8323 Bus and tram drivers
 - 8324 Heavy truck and lorry drivers
 - 833 Agricultural and other mobile-plant operators
 - 8331 Motorised farm and forestry plant operators
 - 8332 Earth-moving- and related plant operators
 - 8333 Crane, hoist and related plant operators
 - 8334 Lifting-truck operators
 - 834 Ship's deck crews and related workers
 - 8340 Ship's deck crews and related workers
- 9 Elementary occupations, unskilled workers
 - 91 Sales and services elementary occupations

- 911 Street vendors and related workers

0002 Officers (armed forces)

10004 Workers with unidentifiable (not classifiable) or inadequately described job

10007 Refused

10008 Don't know

10009 No answer

Notes:

(*) custom codes added by ZUMA

(1) This occupational group is intended to cover persons who, as directors, chief executives or department managers, manage enterprises, organizations or departments, requiring a total of three or more managers.

(2) This occupational group is intended to include persons who, either on their own behalf or on behalf of the proprietor, manage enterprises or in some cases organizations with the help of non-managerial staff and no more than one other senior staff, who should also be classified in this sub-major group, because this person's responsibilities will usually be more varied than those of a department manager in a larger enterprise or organization. Non-managerial staff should be classified according to their specific tasks.

(3) This code was introduced to supplement the existing ISCO-classification. It was taken from the European Community variant of the classification called ISCO 88 (COM) (Source: Elias, Peter and Margaret Birch 1994: Establishment of Community-Wide Occupational Statistics. ISCO 88 (COM): A Guide for Users, Coventry: University of Warwick, Institute for Employment Research).

For further information compare also:

Wolf, Christoph 1997:

The ISCO-88 International Standard Classification of Occupations in Cross-National Survey Research, in: Bulletin de Methodologie Sociologique 54: 23 - 40.

Appendix C - ISCO-08

Appendix C – ISCO-08

International Standard Classification of Occupations (ISCO 2008).

Source:

Commission Recommendation of 29 October 2009 on the use of the International Standard Classification of Occupations (ISCO-08) (Text with EEA relevance), OJ L 292, 10.11.2009, p. 31-47, <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2009:292:0031:01:EN:HTML> (accessed 17 December 2013)

ISCO 2008 coding in ALLBUS uses a number of custom codes. These are marked * in the following documentation. All regular ISCO-codes in the data file are in a four digit format. Where necessary, trailing zeros were added.

1 Managers

11 Chief executives, senior officials and legislators

111 Legislators and senior officials

1111 Legislators

1112 Senior government officials

1113 Traditional chiefs and heads of village

1114 Senior officials of special-interest organisations

112 Managing directors and chief executives

1120 Managing directors and chief executives

12 Administrative and commercial managers

121 Business services and administration managers

1211 Finance managers

1212 Human resource managers

1213 Policy and planning managers

1219 Business services and administration managers not elsewhere classified

122 Sales, marketing and development managers

1221 Sales and marketing managers

1222 Advertising and public relations managers

1223 Research and development managers

13 Production and specialised services managers

131 Production managers in agriculture, forestry and fisheries

1311 Agricultural and forestry production managers

1312 Aquaculture and fisheries production managers
132 Manufacturing, mining, construction, and distribution managers
1321 Manufacturing managers
1322 Mining managers
1323 Construction managers
1324 Supply, distribution and related managers
133 Information and communications technology service managers
1330 Information and communications technology service managers
134 Professional services managers
1341 Child care services managers
1342 Health services managers
1343 Aged care services managers
1344 Social welfare managers
1345 Education managers
1346 Financial and insurance services branch managers
1349 Professional services managers not elsewhere classified
14 Hospitality, retail and other services managers
141 Hotel and restaurant managers
1411 Hotel managers
1412 Restaurant managers
142 Retail and wholesale trade managers
1420 Retail and wholesale trade managers
143 Other services managers
1431 Sports, recreation and cultural centre managers
1439 Services managers not elsewhere classified

2221 Nursing professionals
2222 Midwifery professionals
223 Traditional and complementary medicine professionals
2230 Traditional and complementary medicine professionals
224 Paramedical practitioners
2240 Paramedical practitioners
225 Veterinarians
2250 Veterinarians
226 Other health professionals
2261 Dentists
2262 Pharmacists
2263 Environmental and occupational health and hygiene professionals

2264 Physiotherapists
2265 Dieticians and nutritionists
2266 Audiologists and speech therapists
2267 Optometrists and ophthalmic opticians
2269 Health professionals not elsewhere classified
23 Teaching professionals
231 University and higher education teachers
2310 University and higher education teachers
232 Vocational education teachers
2320 Vocational education teachers
233 Secondary education teachers
2330 Secondary education teachers
234 Primary school and early childhood teachers
2341 Primary school teachers
2342 Early childhood educators
235 Other teaching professionals
2351 Education methods specialists
2352 Special needs teachers
2353 Other language teachers
2354 Other music teachers
2355 Other arts teachers
2356 Information technology trainers
2359 Teaching professionals not elsewhere classified
24 Business and administration professionals
241 Finance professionals
2411 Accountants
2412 Financial and investment advisers
2413 Financial analysts
242 Administration professionals
2421 Management and organisation analysts
2422 Policy administration professionals
2423 Personnel and careers professionals
2424 Training and staff development professionals
243 Sales, marketing and public relations professionals
2431 Advertising and marketing professionals
2432 Public relations professionals
2433 Technical and medical sales professionals (excluding ICT)

2434 Information and communications technology sales professionals
25 Information and communications technology professionals
251 Software and applications developers and analysts
2511 Systems analysts
2512 Software developers
2513 Web and multimedia developers
2514 Applications programmers
2519 Software and applications developers and analysts not elsewhere classified
252 Database and network professionals
2521 Database designers and administrators
2522 Systems administrators
2523 Computer network professionals
2529 Database and network professionals not elsewhere classified
26 Legal, social and cultural professionals
261 Legal professionals
2611 Lawyers
2612 Judges
2619 Legal professionals not elsewhere classified
262 Librarians, archivists and curators
2621 Archivists and curators
2622 Librarians and related information professionals
263 Social and religious professionals
2631 Economists
2632 Sociologists, anthropologists and related professionals
2633 Philosophers, historians and political scientists
2634 Psychologists
2635 Social work and counselling professionals
2636 Religious professionals
264 Authors, journalists and linguists
2641 Authors and related writers
2642 Journalists
2643 Translators, interpreters and other linguists
265 Creative and performing artists
2651 Visual artists
2652 Musicians, singers and composers
2653 Dancers and choreographers
2654 Film, stage and related directors and producers

2655 Actors

2656 Announcers on radio, television and other media

2659 Creative and performing artists not elsewhere classified

3 Technicians and associate professionals

31 Science and engineering associate professionals

311 Physical and engineering science technicians

3111 Chemical and physical science technicians

3112 Civil engineering technicians

3113 Electrical engineering technicians

3114 Electronics engineering technicians

3115 Mechanical engineering technicians

3116 Chemical engineering technicians

3117 Mining and metallurgical technicians

3118 Draughtspersons

3119 Physical and engineering science technicians not elsewhere classified

312 Mining, manufacturing and construction supervisors

3121 Mining supervisors

3122 Manufacturing supervisors

3123 Construction supervisors

313 Process control technicians

3131 Power production plant operators

3132 Incinerator and water treatment plant operators

3133 Chemical processing plant controllers

3134 Petroleum and natural gas refining plant operators

3135 Metal production process controllers

3139 Process control technicians not elsewhere classified

314 Life science technicians and related associate professionals

3141 Life science technicians (excluding medical)

3142 Agricultural technicians

3143 Forestry technicians

315 Ship and aircraft controllers and technicians

3151 Ships' engineers

3152 Ships' deck officers and pilots

3153 Aircraft pilots and related associate professionals

3154 Air traffic controllers

3155 Air traffic safety electronics technicians

32 Health associate professionals

321 Medical and pharmaceutical technicians
3211 Medical imaging and therapeutic equipment technicians
3212 Medical and pathology laboratory technicians
3213 Pharmaceutical technicians and assistants
3214 Medical and dental prosthetic technicians
322 Nursing and midwifery associate professionals
3221 Nursing associate professionals
3222 Midwifery associate professionals
323 Traditional and complementary medicine associate professionals
3230 Traditional and complementary medicine associate professionals
324 Veterinary technicians and assistants
3240 Veterinary technicians and assistants
325 Other health associate professionals
3251 Dental assistants and therapists
3252 Medical records and health information technicians
3253 Community health workers
3254 Dispensing opticians
3255 Physiotherapy technicians and assistants
3256 Medical assistants
3257 Environmental and occupational health inspectors and associates
3258 Ambulance workers
3259 Health associate professionals not elsewhere classified
33 Business and administration associate professionals
331 Financial and mathematical associate professionals
3311 Securities and finance dealers and brokers
3312 Credit and loans officers
3313 Accounting associate professionals
3314 Statistical, mathematical and related associate professionals
3315 Valuers and loss assessors
3319 Other non-academic financial and mathematical professionals *
332 Sales and purchasing agents and brokers
3321 Insurance representatives
3322 Commercial sales representatives
3323 Buyers
3324 Trade brokers
333 Business services agents
3331 Clearing and forwarding agents

3332 Conference and event planners
3333 Employment agents and contractors
3334 Real estate agents and property managers
3339 Business services agents not elsewhere classified
334 Administrative and specialised secretaries
3341 Office supervisors
3342 Legal secretaries
3343 Administrative and executive secretaries
3344 Medical secretaries
335 Regulatory government associate professionals
3351 Customs and border inspectors
3352 Government tax and excise officials
3353 Government social benefits officials
3354 Government licensing officials
3355 Police inspectors and detectives
3359 Regulatory government associate professionals not elsewhere classified
34 Legal, social, cultural and related associate professionals
341 Legal, social and religious associate professionals
3411 Legal and related associate professionals
3412 Social work associate professionals
3413 Religious associate professionals
342 Sports and fitness workers
3421 Athletes and sports players
3422 Sports coaches, instructors and officials
3423 Fitness and recreation instructors and program leaders
343 Artistic, cultural and culinary associate professionals
3431 Photographers
3432 Interior designers and decorators
3433 Gallery, museum and library technicians
3434 Chefs
3435 Other artistic and cultural associate professionals
35 Information and communications technicians
351 Information and communications technology operations and user support technicians
3511 Information and communications technology operations technicians
3512 Information and communications technology user support technicians
3513 Computer network and systems technicians
3514 Web technicians

352 Telecommunications and broadcasting technicians
3521 Broadcasting and audiovisual technicians
3522 Telecommunications engineering technicians
4 Clerical support workers
41 General and keyboard clerks
411 General office clerks
4110 General office clerks
412 Secretaries (general)
4120 Secretaries (general)
413 Keyboard operators
4131 Typists and word processing operators
4132 Data entry clerks
42 Customer services clerks
421 Tellers, money collectors and related clerks
4211 Bank tellers and related clerks
4212 Bookmakers, croupiers and related gaming workers
4213 Pawnbrokers and money-lenders
4214 Debt-collectors and related workers
422 Client information workers
4221 Travel consultants and clerks
4222 Contact centre information clerks
4223 Telephone switchboard operators
4224 Hotel receptionists
4225 Enquiry clerks
4226 Receptionists (general)
4227 Survey and market research interviewers
4229 Client information workers not elsewhere classified
43 Numerical and material recording clerks
431 Numerical clerks
4311 Accounting and bookkeeping clerks
4312 Statistical, finance and insurance clerks
4313 Payroll clerks
432 Material-recording and transport clerks
4321 Stock clerks
4322 Production clerks
4323 Transport clerks
44 Other clerical support workers

- 441 Other clerical support workers
 - 4411 Library clerks
 - 4412 Mail carriers and sorting clerks
 - 4413 Coding, proof-reading and related clerks
 - 4414 Scribes and related workers
 - 4415 Filing and copying clerks
 - 4416 Personnel clerks
 - 4419 Clerical support workers not elsewhere classified
- 5 Service and sales workers
 - 51 Personal service workers
 - 511 Travel attendants, conductors and guides
 - 5111 Travel attendants and travel stewards
 - 5112 Transport conductors
 - 5113 Travel guides
 - 512 Cooks
 - 5120 Cooks
 - 513 Waiters and bartenders
 - 5131 Waiters
 - 5132 Bartenders
 - 514 Hairdressers, beauticians and related workers
 - 5141 Hairdressers
 - 5142 Beauticians and related workers
 - 515 Building and housekeeping supervisors
 - 5151 Cleaning and housekeeping supervisors in offices, hotels and other establishments
 - 5152 Domestic housekeepers
 - 5153 Building caretakers
 - 516 Other personal services workers
 - 5161 Astrologers, fortune-tellers and related workers
 - 5162 Companions and valets
 - 5163 Undertakers and embalmers
 - 5164 Pet groomers and animal care workers

 - 52 Sales workers
 - 521 Street and market salespersons
 - 5211 Stall and market salespersons
 - 5212 Street food salespersons

522 Shop salespersons
5221 Shop keepers
5222 Shop supervisors
5223 Shop sales assistants
523 Cashiers and ticket clerks
5230 Cashiers and ticket clerks
524 Other sales workers
5241 Fashion and other models
5242 Sales demonstrators
5243 Door to door salespersons
5244 Contact centre salespersons
5245 Service station attendants
5246 Food service counter attendants
5249 Sales workers not elsewhere classified
53 Personal care workers
531 Child care workers and teachers' aides
5311 Child care workers
5312 Teachers' aides
532 Personal care workers in health services
5321 Health care assistants
5322 Home-based personal care workers
5329 Personal care workers in health services not elsewhere classified
54 Protective services workers
541 Protective services workers
5411 Fire-fighters
5412 Police officers
5413 Prison guards
5414 Security guards
5419 Protective services workers not elsewhere classified
6 Skilled agricultural, forestry and fishery workers
61 Market-oriented skilled agricultural workers
611 Market gardeners and crop growers
6111 Field crop and vegetable growers
6112 Tree and shrub crop growers
6113 Gardeners, horticultural and nursery growers
6114 Mixed crop growers
612 Animal producers

6121 Livestock and dairy producers
6122 Poultry producers
6123 Apiarists and sericulturists
6129 Animal producers not elsewhere classified
613 Mixed crop and animal producers
6130 Mixed crop and animal producers
62 Market-oriented skilled forestry, fishery and hunting workers
621 Forestry and related workers
6210 Forestry and related workers
622 Fishery workers, hunters and trappers
6221 Aquaculture workers
6222 Inland and coastal waters fishery workers
6223 Deep-sea fishery workers
6224 Hunters and trappers
63 Subsistence farmers, fishers, hunters and gatherers
631 Subsistence crop farmers
6310 Subsistence crop farmers
632 Subsistence livestock farmers
6320 Subsistence livestock farmers
633 Subsistence mixed crop and livestock farmers
6330 Subsistence mixed crop and livestock farmers
634 Subsistence fishers, hunters, trappers and gatherers
6340 Subsistence fishers, hunters, trappers and gatherers
7 Craft and related trades workers
71 Building and related trades workers, excluding electricians
711 Building frame and related trades workers
7111 House builders
7112 Bricklayers and related workers
7113 Stonemasons, stone cutters, splitters and carvers
7114 Concrete placers, concrete finishers and related workers
7115 Carpenters and joiners
7119 Building frame and related trades workers not elsewhere classified
712 Building finishers and related trades workers
7121 Roofers
7122 Floor layers and tile setters
7123 Plasterers
7124 Insulation workers

7125 Glaziers
7126 Plumbers and pipe fitters
7127 Air conditioning and refrigeration mechanics
713 Painters, building structure cleaners and related trades workers
7131 Painters and related workers
7132 Spray painters and varnishers
7133 Building structure cleaners
72 Metal, machinery and related trades workers
721 Sheet and structural metal workers, moulders and welders, and related workers
7211 Metal moulders and coremakers
7212 Welders and flamecutters
7213 Sheet-metal workers
7214 Structural-metal preparers and erectors
7215 Riggers and cable splicers
722 Blacksmiths, toolmakers and related trades workers
7221 Blacksmiths, hammersmiths and forging press workers
7222 Toolmakers and related workers
7223 Metal working machine tool setters and operators
7224 Metal polishers, wheel grinders and tool sharpeners
723 Machinery mechanics and repairers
7231 Motor vehicle mechanics and repairers
7232 Aircraft engine mechanics and repairers
7233 Agricultural and industrial machinery mechanics and repairers
7234 Bicycle and related repairers
725 Metal workers *
7250 Metal workers *
73 Handicraft and printing workers
731 Handicraft workers
7311 Precision-instrument makers and repairers
7312 Musical instrument makers and tuners
7313 Jewellery and precious-metal workers
7314 Potters and related workers
7315 Glass makers, cutters, grinders and finishers
7316 Sign writers, decorative painters, engravers and etchers
7317 Handicraft workers in wood, basketry and related materials
7318 Handicraft workers in textile, leather and related materials
7319 Handicraft workers not elsewhere classified

732 Printing trades workers
7321 Pre-press technicians
7322 Printers
7323 Print finishing and binding workers
74 Electrical and electronic trades workers
741 Electrical equipment installers and repairers
7411 Building and related electricians
7412 Electrical mechanics and fitters
7413 Electrical line installers and repairers
742 Electronics and telecommunications installers and repairers
7421 Electronics mechanics and servicers
7422 Information and communications technology installers and servicers
75 Food processing, wood working, garment and other craft and related trades workers
751 Food processing and related trades workers
7511 Butchers, fishmongers and related food preparers
7512 Bakers, pastry-cooks and confectionery makers
7513 Dairy-products makers
7514 Fruit, vegetable and related preservers
7515 Food and beverage tasters and graders
7516 Tobacco preparers and tobacco products makers
752 Wood treaters, cabinet-makers and related trades workers
7521 Wood treaters
7522 Cabinet-makers and related workers
7523 Woodworking-machine tool setters and operators
753 Garment and related trades workers
7531 Tailors, dressmakers, furriers and hatters
7532 Garment and related pattern-makers and cutters
7533 Sewing, embroidery and related workers
7534 Upholsterers and related workers
7535 Pelt dressers, tanners and fellmongers
7536 Shoemakers and related workers
754 Other craft and related workers
7541 Underwater divers
7542 Shotfirers and blasters
7543 Product graders and testers (excluding foods and beverages)
7544 Fumigators and other pest and weed controllers
7549 Craft and related workers not elsewhere classified

8 Plant and machine operators and assemblers

81 Stationary plant and machine operators

811 Mining and mineral processing plant operators

8111 Miners and quarriers

8112 Mineral and stone processing plant operators

8113 Well drillers and borers and related workers

8114 Cement, stone and other mineral products machine operators

812 Metal processing and finishing plant operators

8121 Metal processing plant operators

8122 Metal finishing, plating and coating machine operators

813 Chemical and photographic products plant and machine operators

8131 Chemical products plant and machine operators

8132 Photographic products machine operators

814 Rubber, plastic and paper products machine operators

8141 Rubber products machine operators

8142 Plastic products machine operators

8143 Paper products machine operators

815 Textile, fur and leather products machine operators

8151 Fibre preparing, spinning and winding machine operators

8152 Weaving and knitting machine operators

8153 Sewing machine operators

8154 Bleaching, dyeing and fabric cleaning machine operators

8155 Fur and leather preparing machine operators

8156 Shoemaking and related machine operators

8157 Laundry machine operators

8159 Textile, fur and leather products machine operators not elsewhere classified

816 Food and related products machine operators

8160 Food and related products machine operators

817 Wood processing and papermaking plant operators

8171 Pulp and papermaking plant operators

8172 Wood processing plant operators

818 Other stationary plant and machine operators

8181 Glass and ceramics plant operators

8182 Steam engine and boiler operators

8183 Packing, bottling and labelling machine operators

8189 Stationary plant and machine operators not elsewhere classified

82 Assemblers

- 821 Assemblers
 - 8211 Mechanical machinery assemblers
 - 8212 Electrical and electronic equipment assemblers
 - 8219 Assemblers not elsewhere classified
- 83 Drivers and mobile plant operators
 - 831 Locomotive engine drivers and related workers
 - 8311 Locomotive engine drivers
 - 8312 Railway brake, signal and switch operators
 - 832 Car, van and motorcycle drivers
 - 8321 Motorcycle drivers
 - 8322 Car, taxi and van drivers
 - 833 Heavy truck and bus drivers
 - 8331 Bus and tram drivers
 - 8332 Heavy truck and lorry drivers
 - 834 Mobile plant operators
 - 8341 Mobile farm and forestry plant operators
 - 8342 Earthmoving and related plant operators
 - 8343 Crane, hoist and related plant operators
 - 8344 Lifting truck operators
 - 835 Ships' deck crews and related workers
 - 8350 Ships' deck crews and related workers
- 9 Elementary occupations
 - 91 Cleaners and helpers
 - 911 Domestic, hotel and office cleaners and helpers
 - 9111 Domestic cleaners and helpers
 - 9112 Cleaners and helpers in offices, hotels and other establishments
 - 912 Vehicle, window, laundry and other hand cleaning workers
 - 9121 Hand launderers and pressers
 - 9122 Vehicle cleaners

Appendix D – Occupational Minor Group

Appendix D – Occupational Minor Group

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA.

001	Chemists, physicists and related professions
002	Architects, engineers and related technicians
003	Architects, engineers and related technicians
004	Aircraft and ships' officers
005	Life scientists and related life science technicians
006	Medical, dental, veterinary and related professions
007	Medical, dental, veterinary and related professions
008	Statisticians, mathematicians, system analysts and related technicians
009	Economists
011	Accountants
012	Jurists
013	Teachers
014	Workers in religion
015	Authors, journalists, and related writers
016	Sculptors, painters, photographers and related creative artists
017	Musicians, composers, dancers and performing artists
018	Athletes, sportsmen and related workers
019	Professionals, scientists, technical and related workers not elsewhere classified
020	Legislative officials and government administrators
021	Managers
030	Clerical supervisors
031	Government executive officials
032	Stenographers, typists, and card- and tape-punching machine operators
033	Bookkeepers, cashiers and related workers
034	Computing machine operators
035	Transport and communication supervisors
036	Transport conductors
037	Mail distribution clerks
038	Telephone and telegraph operators

039	Clerical and related workers not elsewhere classified
040	Managers (wholesale and retail trade)
041	Working proprietors (wholesale and retail trade)
042	Sales supervisors and buyers
043	Technical salesman, commercial travellers and manufacturers' agents
044	Insurance, real estate, securities and business services salesman, and auctioneers
045	Salesmen, shop assistants and related workers
049	Sales workers not elsewhere classified
050	Managers (catering and lodging services)
051	Working proprietors (catering and lodging services)
052	Housekeeping and related service supervisors
053	Cooks, waiters, bartenders and related workers
054	Maids and related housekeeping service workers not elsewhere classified
055	Building caretakers, charworkers, cleaners and related workers
056	Launderers, dry-cleaners and pressers
057	Hairdressers, barbers, beauticians and related workers
058	Protective service workers not elsewhere classified
059	Service workers not elsewhere classified
060	Farm managers and supervisors
061	Farmers (including specialized farmers)
062	Agricultural and animal husbandry workers
063	Forestry workers
064	Fishermen, hunters and related workers
070	Production supervisors and general foremen
071	Miners, quarrymen, well drillers and related workers
072	Metal processors
073	Wood preparation workers and paper makers
074	Chemical processors and related workers
075	Spinners, weavers, knitters, dyers and related workers
076	Tanners, fellmongers and pelt dressers
077	Food and beverage processors
078	Tobacco preparers and tobacco product managers
079	Tailors, dressmakers, sewers, upholsterers and related workers
080	Shoemakers and leather goods makers

Appendix E – Memberships

Appendix E – Memberships

The following table contains an overview of the information on memberships in organisations and associations collected between 1980 and 1998.

The cells in the year columns contain the item identification on the list used in the survey.

Different colors indicate the different question texts used over the years.

"Are you personally a current member of an organisation or club?"												
"Are you currently a member of a trade union, a professional organisation or an employer's association?"												
Are you currently a member of an organisation or a club?												
Are you currently a member of a trade union? (Yes/No)												
Please tell me what you are a member of.												
Are you currently a member of a political party?												
Variable	Item	1980	1982	1984	1986	1988	1990	1991	1992	1994	1996	1998

Appendix F – Household Classification and Family Fypology according to Porst (1984)

Appendix F – Household Classification and Family Typology according to Porst (1984)

Household classification (v1492)			Family typology (v1494)	
Code	Description	Respondent's position in the household	Description	Code
10	H1ASingles living alone		Not applicable	0
20	H1BSingles living alone, separated, divorced, widowed		Not applicable	0
30	H2ACohabiting couples		Not applicable	0
40	H2BMarried couples		Not applicable	0
51	H3ASingle adults with at least one child	Respondent is single parent	Not applicable	0
52	H3ASingle adults with at least one child	Respondent is child of a single parent	Not applicable	0
61	H3BCohabiting couples with single children	Respondent is parent of the single child. The case 'respondent is partner of the single child's parent' can only be coded, if the respondent calls the child 'step-child'	Not applicable	0
64	H3BCohabiting couples with single children	Respondent is single and the child of both partners	Not applicable	0
71	H3CCohabiting couples with at least one non-single child, possibly other single children	Respondent is one of the cohabiting couple	Not applicable	0
72	H3CCohabiting couples with at least one non-single child, possibly other single children	The non-single child is the respondent	Not applicable	0
75	H3CCohabiting couples with at least one non-single child, possibly other single children	One of the single children is the respondent	Not applicable	0
81	H3DCohabiting couples with grandchildren	Respondent is grandchild's grandparent	Not applicable	0
83	H3DCohabiting couples with grandchildren	Respondent is one of the grandchildren	Not applicable	0
91	H3EMarried couples, all children are single	Respondent is parent	F1: Nuclear family - a) complete	11
92	H3EMarried couples all children are single	Respondent is child	F1: Nuclear family - a) complete	11
93	H3ESeparated, divorced, widowed adults, all children are single	Respondent is parent	F1: Nuclear family - b) incomplete	12
94	H3ESeparated, divorced, widowed adults, all children are single	Respondent is child	F1: Nuclear family - b) incomplete	12
101	H3FMarried couples with at least one non-single child; possibly other single children	Respondent is parent	F2: Two-generation-family - a) complete	21

Household classification (v1492)			Family typology (v1494)	
Code	Description	Respondent's position in the household	Description	Code
102	H3FSeparated, divorced, widowed adults with at least one non-single child; possibly other single children	Respondent is parent	F2: Two-generation-family - b) incomplete	22
103	H3FMarried couples with at least one non-single child; possibly other single children, complete two-generation-family	Respondent is child and single	F2: Two-generation-family - a) complete	21
104	H3FMarried couples with at least one non-single child; possibly other single children, incomplete two-generation-family	Respondent is child and single	F2: Two-generation-family - b) incomplete	22
105	H3FMarried couples with at least one non-single child; possibly other single children, two-generation-family with two sets of parents	Respondent is child and non-single	F2: Two-generation-family - a) complete or b) incomplete	21, 22
106	H3FMarried couples with at least one non-single child; possibly other single children, two-generation-family with 3 persons of the parent-generation	Respondent is child and single	F2: Two-generation-family - a) complete or b) incomplete	21, 22
107	H3FMarried couples with at least one non-single child; possibly other single children; two-generation-families with two persons of the parent-generation	Respondent is non-single child or this child's spouse	F2: Two-generation-family - a) complete or b) incomplete	21, 22
108	H3FMarried couples with at least one non-single child; possibly other single children; two-generation-families with one parent/parent-in-law	Respondent is non-single child or this child's spouse	F2: Two-generation-family - a) complete or b) incomplete	21, 22
111	H3GMarried couples with grandchildren, older generation complete	Respondent is grandparent	F2: Two-generation-family - a) complete	21
112	H3GMarried couples with grandchildren, older generation incomplete	Respondent is grandparent	F2: Two-generation-family - b) incomplete	22
113	H3GMarried couples with grandchildren, four grandparents	Respondent is grandchild	F2: Two-generation-family - a) complete or b) incomplete	21, 22
114	H3GMarried couples with grandchildren, three grandparents	Respondent is grandchild	F2: Two-generation-family - a) complete or b) incomplete	21, 22
115	H3GMarried couples with grandchildren, two grandparents	Respondent is grandchild	F2: Two-generation-family - a) complete or b) incomplete	21, 22
116	H3GMarried couples with grandchildren, one grandparent	Respondent is grandchild	F2: Two-generation-family - a) complete or b) incomplete	21, 22

Household classification (v1492)			Family typology (v1494)	
Code	Description	Respondent's position in the household	Description	Code
121	H4 Members of three generations in linear succession, at least one person of each generation regardless of the marital status must actually live in the household	Respondent is grandparent, i.e., apart from the respondent, one child or child-in-law and one grandchild have to live in the household	F3: Three-generation-family - a) complete or b) incomplete	31, 32
122	H4 Members of three generations in linear succession, at least one person of each generation regardless of the marital status must actually live in the household	Respondent is parent, i.e., apart from the respondent, at least one parent or parent-in-law and one child must live in the household	F3: Three-generation-family - a) complete or b) incomplete	31, 32
123	H4 Members of three generations in linear succession, at least one person of each generation regardless of the marital status must actually live in the household	Respondent is child, i.e., apart from the respondent at least one grandparent and one parent or parent-in-law must live in the household	F3: Three-generation-family - a) complete or b) incomplete	31, 32
132	H5 Four-generation-households; members of four successive generations, at least one person each of three generations must actually live in the household, of which at least one person belongs to the first and one person to the last generation	Respondent is parent, i.e., apart from the respondent, at least one parent and one grandchild must live in the household	F4: Four-generation-family - a) complete or b) incomplete	41, 42
133	H5 Four-generation-households; members of four successive generations, at least one person each of three generations must actually live in the household, of which at least one person belongs to the first and one person to the last generation	Respondent is child, i.e., apart from the respondent, at least one grandparent and one of his/her own children must live in the household	F4: Four-generation-family - a) complete or b) incomplete	41, 42
140	H6 Households of relatives with family core; all households of types H2B and H3E to H5 with additionally at least one person related to household members, but not in the linear succession of generations		F5: Extended family	50
150	H7A Households of relatives without family core; households of types H2A, H3A-H3D with at least one additional relative outside of the linear succession of generations		Not applicable	0
160	H7B Households of relatives without family core; relatives not in linear succession plus unrelated persons		Not applicable	0
170	H7C Only relatives not in linear succession of generations		Not applicable	0

Appendix G – Variables by Year

Appendix G – Variables by Year: A List of Correspondences between the Cumulated Data File and the Original Survey Files

This list of correspondences provides an overview of those variables from the original surveys that are represented in this ALLBUS/GGSS cumulation.

The first column of the following table contains a variable label indicating the content of the variable. Under the heading 'CUM', column two then lists the variable name used in this cumulated data file, while the following columns, headed '80' to '14', list the corresponding variable numbers in the original surveys.

Variables based on integrated data from several original variables are marked in column one with the label 'INTEGRATED: ...' followed by the years concerned, e.g. 'INTEGRATED: 1980-1986'. Columns '80' to '14' then list the variable numbers of the original data that entered into the integrated variable.

A dash ('-') in columns '80' to '14' indicates that this variable was not part of the ALLBUS/GGSS survey in this particular year.

Finally, data that has been newly generated for this cumulated data file is marked 'NEW' in columns '80' to '14'.

Appendix H – Notes on the Additional ALLBUS/GGSScompact 1980-2014 (Study No. 4585)

Appendix H – Notes on the Additional ALLBUS/GGSScompact 1980-2014 (Study No. 4585)

As an alternative to ALLBUS 1980-2014 with its relatively complex demography module, GESIS also offers an additional compact version with a reduced number of demographic variables. Providing an easily manageable selection of basic demographic descriptors, this ALLBUS/GGSScompact addresses, amongst others, the needs of newcomers to data analysis. Moreover, access conditions for ALLBUS/GGSScompact are less strict than for the more extensive ALLBUS/GGSS data, because data protection issues are less salient.

Apart from demography, all questions have been retained in full in the compact version. Moreover, variable labels and variable names in ALLBUS/GGSScompact are the same as in the unabridged ALLBUS/GGSS data set. In this way, users may easily move between both versions of the ALLBUS/GGSS data if necessary.

However, for reasons of data protection some of the remaining demographic data still had to be simplified. When part of the ALLBUS/GGSS survey in question, detailed data concerning the respondents' citizenship has been dichotomized ("German citizenship" vs. "No German citizenship"), information on the federal state where the respondent lived in his youth has been recoded to four values (old federal states, new federal states, former Eastern German territories, other country). Finally, the two largest categories of the variable 'Political Size of Municipality' have been combined. (A detailed account of recodes can be found below.)

Demographic Variables in ALLBUS/GGSScompact 1980-2014

german	GERMAN CITIZENSHIP?	(recoded*)
