Note for Publications Using ALLBUS / GGSS Data

Research work using this ALLBUS / GGSS data supplied by GESIS should contain the following detailed source reference:

The data used in this analysis is from "Allgemeine Bevölkerungsumfrage der Sozialwissenschaften (ALLBUS) – German General Social Survey 2006." From 1980 to 1986 and in 1991, the ALLBUS program was funded by the DFG (German Research Foundation). For all other surveys, state and federal funding has been made available through GESIS – Leibniz-Institute for the Social Sciences. ALLBUS / GGSS is realized as a joint project of the Cologne and Mannheim branches of GESIS and the ALLBUS scientific council. The aforesaid institutions and persons bear no responsibility for the use or interpretation of the data in this analysis.

Otherwise, all ALLBUS / GGSS data and other documentary materials should be quoted according to the rules of scientific citation.

To gather information about the use of ALLBUS data and to facilitate the exchange of information within the scientific community, authors using ALLBUS are requested to send in bibliographic citations and, if possible, copies of completed texts. Among other things, the information you provide will be made available in the GESIS-library catalogue, which is also searchable online as part of the GESIS web presence (please direct any questions concerning ALLBUS in the GESIS-library holdings and catalogues to Heidi Dorn (phone: +49 221 47694-13; email: heidi.dorn@gesis.org)).

Information about all known publications and research projects based on ALLBUS data is collected in the ALLBUS bibliography. This bibliography is available for online search as well as for download on the ALLBUS pages of the GESIS website.

German General Social Survey: A National Data Generation Program

Michael Terwey

In the mid 1970s, the "German General Social Survey (GGSS)" (original title: "Allgemeine Bevölkerungsumfrage der Sozialwissenschaften (ALLBUS)") was initiated as a joint project of the Centre for Survey Research and Methodology (ZUMA – Zentrum für Umfragen, Methoden und Analysen, Mannheim) and the Central Archive for Empirical Social Research (ZA – Zentralarchiv für Empirische Sozialforschung, Cologne).¹ Its mission is to collect and disseminate high quality data for research and teaching in the social sciences. The core of its concept are repeated cross-sectional surveys comprising a partly constant and partly varying program of questions which covers key areas of the social sciences.

The first four surveys of the years 1980, 1982, 1984 and 1986 were funded through individual grants of the German Research Foundation (Deutsche Forschungsgemeinschaft (DFG)).² DFG funding was also made available for an additional survey in 1991. The aim of this so-called "Basisumfrage" (Baseline Study) was to provide ALLBUS data covering the special situation immediately after the German unification.³

With the foundation of GESIS in 1986, ALLBUS was established as a section of ZUMA (Mannheim) and as a workgroup within ZA (Cologne). In this way, ALLBUS was henceforth included in the state-federal funding of the institutes united within GESIS. Simultaneously,

¹ Later on, these institutes have merged into **GESIS – Leibniz-Institute for the Social Sciences**, which is a part of **WGL** (Wissenschaftsgemeinschaft Gottfried Wilhelm Leibniz, <http://www.leibniz-gemeinschaft.de/>).

² For the ALLBUS surveys 1980 to 1986, the following persons acted as applicants for funding by the DFG:

- **M. Rainer Lepsius** (1980-82; University of Heidelberg)
- **Karl Ulrich Mayer** (1984-86; Max-Planck-Institute for Human Development, Berlin)
- **Walter Müller** (1984-86; University of Mannheim)
- **Franz Urban Pappi** (1984-86; University of Kiel)
- **Erwin K. Scheuch** (1980-86; University of Cologne)
- **Rolf Ziegler** (1980-86; University of Munich).

³ Primary applicants with the DFG for the ALLBUS-Baseline-Study were:

- **Peter Ph. Mohler** (ZUMA, Mannheim)
- **Michael Braun** (ZUMA, Mannheim)
- **Erwin K. Scheuch** (University of Cologne)
- **Michael Häder** (ZUMA, Mannheim)

Further members of the ALLBUS scientific council participated in the application in an advisory role.

the group of former DFG-applicants was reorganized into a scientific council (ALLBUS-Ausschuß). In August of 2006 this scientific council consisted of:

- **Hans-Jürgen Andreß** (University of Cologne, chair)
- **Andreas Diekmann** (ETH Zurich)
- **Hubert Feger** (Free University of Berlin)
- **Johannes Huinink** (University of Bremen)
- **Heiner Meulemann** (University of Cologne)
- **Rüdiger Schmitt-Beck** (University of Duisburg)
- **Heike Solga** (University of Göttingen)⁴

Working in close coordination with this scientific council, the ALLBUS Team in Mannheim is responsible for design and supervision of survey processes. To get further information on survey contents und sampling procedures of ALLBUS, please contact **Michael Blohm** (phone: +49-(0)621-1246-276; fax: +49-(0)621-1246-100; email: michael.blohm@gesis.org).

Archiving, documentation, distribution, and integrative cumulation of ALLBUS data are done in Cologne. For inquiries about available study documentation and access to data please contact **Michael Terwey** (phone: +49-(0)221-47694-22; fax: +49-(0)221-47694-44; email: michael.terwey@gesis.org).

Since 1980, commercial polling institutes acting on behalf of ALLBUS have been entrusted with the fieldwork of the nationwide surveys (see further comments on technical details of the surveys in the ALLBUS/GGSS survey description following below and in the methodological reports).

Finally, it should be emphasized that, in addition to the institutional ALLBUS contributors, many other social scientists have contributed significantly to ALLBUS by proposing questions and offering valuable advice.

⁴ Previous members of the ALLBUS-council:

- **Klaus Allerbeck** (University of Frankfurt)
- **Jutta Allmendinger** (University of Munich)
- **Wilhelm Bürklin** (University of Potsdam)
- **Marie Luise Kiefer** (University of Vienna)
- **Karl Ulrich Mayer** (Max-Planck-Institute for Human Development, Berlin)
- **Walter Müller** (University of Mannheim)
- **Karl Dieter Opp** (University of Leipzig)
- **Franz Urban Pappi** (University of Mannheim)
- **Erwin K. Scheuch** (University of Cologne)
- **Rolf Ziegler** (University of Munich).

See also the lists of primary investigators and council members in the survey descriptions for the individual ALLBUS surveys and for the cumulations.

The collection and preparation of ALLBUS data for the social sciences in general has three main goals:

- to investigate current social structures, attitudes, values and behavior in Germany
- to monitor social change over long time periods
- to supply those persons who have no immediate personal access to empirical materials with easily accessible, high quality data.

Today, ALLBUS is an easily available and well documented source of data for research and teaching in the social sciences. A large part of the items have been tested in various previous surveys. If earlier research did not show adequate questions for specific subjects areas of investigation, modified or new items have been developed specifically for ALLBUS.

Acceptance of ALLBUS within the scientific community is widespread and reaches beyond national boundaries. Ever since the first ALLBUS survey in 1980, this series has been among the most requested data held in the GESIS archives. Figure 1 reveals an overview of the development of the number of registered requests for data and documentation in the first 12 years of the program.

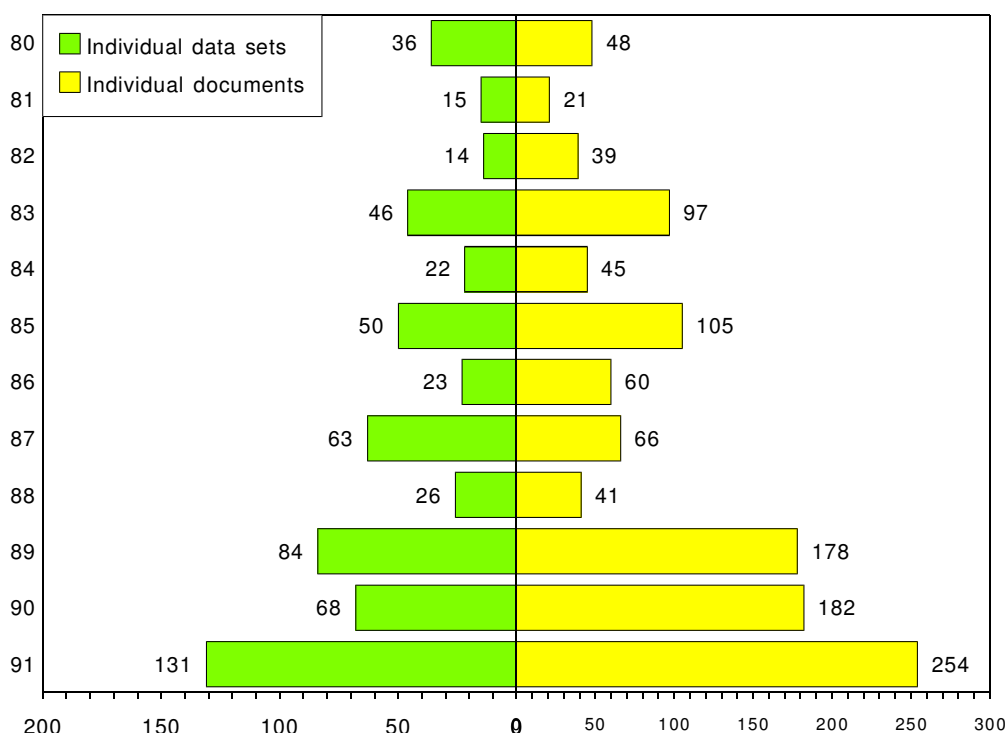

Figure 1: Counts of ALLBUS/GGSS usage from 1980 to 1991 registered by the Central Archive for Empirical Social Research (Source: Own calculations as of 2006-12-15)

Since 1980, the numbers illustrated in Figure 1 show a general trend towards an increasing usage. The consistently higher distribution numbers for codebooks as compared to data sets is due to a number of reasons. Firstly, many research questions can be worked on using the extensive documentation of the data in the codebooks alone. Secondly, in the 1980s not all users had the technical means or the expertise to utilize the data in computerized data analysis. Finally, no thorough analysis of ALLBUS data can be done without reference to the full documentation as available in the codebooks. From 1983 on, we notice higher demands in the individual years following each survey. The main cause for this observation is that after preparation and documentation data service usually started distribution of the latest ALLBUS surveys in these years.

The first releases of ALLBUS in cumulation files only played a minor role, because until then there was only a relatively low number of replicated ALLBUS variables to be cumulated. Moreover, these early versions did not yet have some of the value-additions which could be put into service later on (cf. *Terwey* 1990, 2006; *Terwey* and *Baumann* 2008).

The distribution numbers in Figure 1 may not seem very high. However, one has to bear in mind that in the 1980s the use of survey data was generally restricted to a fairly narrow circle of individual researchers and institutions (e.g. university institutes, research projects, etc.). As a rule, codebooks were then mostly distributed as bound volumes, which were expensive to produce. Therefore a relatively high fee became necessary. The data sets themselves were mostly transferred to comparatively unwieldy magnetic tapes. These tapes were thereupon used on traditional main frame computers in local computing centers allowing researchers with proper access to analyze their data in a time-sharing system. Accordingly, the majority of data sets distributed till 1990 (1990: 43 of 68) were copied to magnetic tape. Afterwards together with a notable increase in registered users the role of magnetic tape as distribution medium started to decline while the institutional demand for ALLBUS data (e.g. from procurement entities of universities) gradually decreased in favor of direct orders by individuals (cf. also *Terwey* 1998). Before turning to more recent distribution numbers, however, it seems appropriate to add that already in the period from 1980 to 1991 and under the circumstances outlined above ALLBUS has been the most requested survey in the archival service at Cologne. Moreover, considering all measuring points between 1980 and 1991 a clear augmentation is discernible, which is slightly more noticeable after the release of ALLBUS 1988 in 1989.

Then again, changes in the dissemination procedures, growing demand, and an increasing diversity of ALLBUS-materials distributed after 1991 make the variation shown in Figure 1 look tiny after integrating this first period into Figure 2.

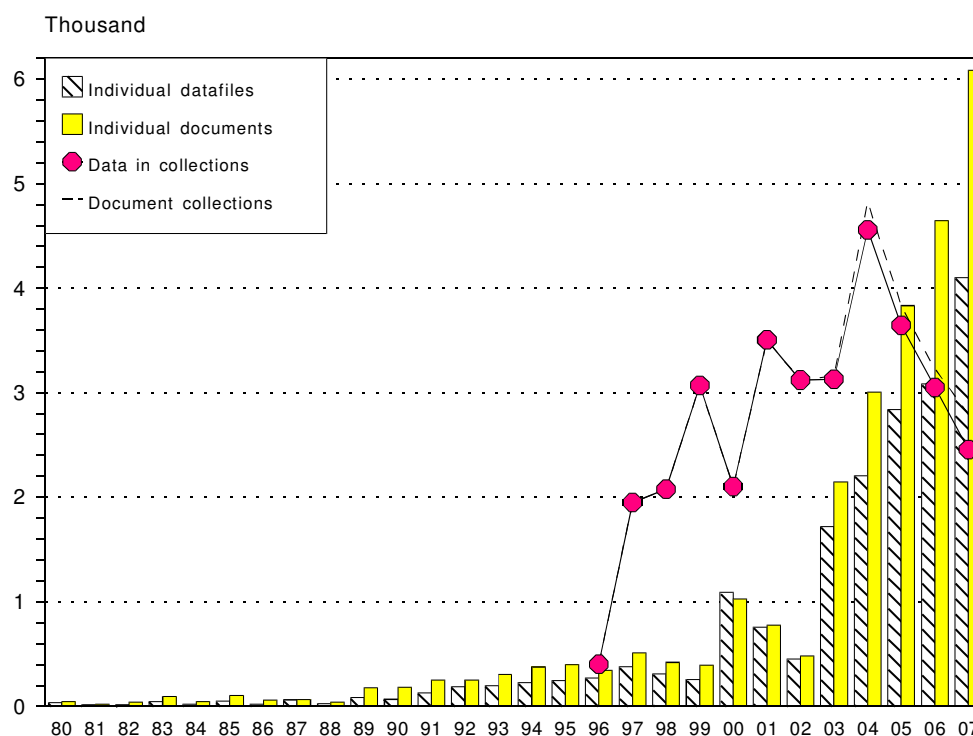

Figure 2: Registered usages of ALLBUS since 1980: Individual deliveries, individual downloads and Collections on CD-ROM (Source: Own calculations as of 2007-12-29)

Between 1992 and 1997 a growing dissemination of individual materials was going along with the introduction of floppy-discs. CD-ROMs as a new medium from 1996 on started another, major change in the distribution of ALLBUS-materials. As a rule, ALLBUS CD-ROMS offer a comprehensive collection of all ALLBUS materials available at the date of their release. Of course, these CD-ROM collections are regularly updated, which also means that the number of surveys and files per collection release has been steadily growing over time. So far, distribution numbers for CD-ROMS first peaked in 2001 at 250 CD-ROMS spreading a total of about 3000 data and documentation files (cf. *Terwey* 2002). Besides, the pilot introduction of a free download for two ALLBUS surveys (ALLBUS 1994 and 1996) in 2000 started a development on the internet, which later on surpassed even registered diffusion via CD-ROM collections. In the first year of this pilot project the registered distribution of individual data sets and of other materials more than doubled the previously highest figures reaching more than 1000 downloads of data and documentation. Although these figures dropped during the two following years, because the available materials lost some attractiveness as time went by, the counts of distributed files stayed well above the figures for the 1980s and early 1990s showing the future potential of this novel form of distribution for gaining a widening reservoir of ALLBUS users. While the subsequent implementation of free-of-charge download platforms for the ALLBUS full version and the

additional series ALLBUScompact in 2003 may have contributed to diminished quantities of files distributed via CD-ROM, the total delivery of ALLBUS materials nevertheless led to a previously unimagined growth of supply and demand.

With the institution of ALLBUS, an instrument of social monitoring comparable to the U.S. "General Social Survey (GSS)" (*Davis* et al. 2005; GSS 2006) has been successfully established in Germany. Similar programs today also exist in a number of other countries – notably in the United Kingdom with the "British Social Attitudes (BSA)" (*Brook* et al. 1992; BSA 2006), in Poland with the "Polish General Social Survey (PGSS)" (*Cichomski* et al. 2003; PGSS 2006) and in Japan with the "Japanese General Social Survey (JGSS)" (cf. also: Scottish Social Attitudes Survey (SSA 2006); The Australian Survey of Social Attitudes (AuSSA 2006)).

Basic Sample Designs and Weighting

Michael Terwey

Working with ALLBUS data, we should be aware of the fact that since 1991 the ALLBUS-sample contains a disproportionate number of respondents from the formerly communist eastern part of Germany. Numerous analyses have shown that there are still substantial differences between these new federal states and the region of the old Bundesrepublik (FRG). Therefore separate analyses for these two areas of unified Germany often appear to be appropriate. In order to enable more reliable analyses of subgroups in the eastern sample, ALLBUS uses a disproportionate design oversampling respondents from the area of the new federal states (i.e. more people are interviewed in East Germany than would be appropriate given its actual proportion of the total population).

Most variable documentations in this ALLBUS data handbook already include cross tabulations showing separate percentage counts for East and West as a supplement to the total frequency counts. These cross tabulations can be analyzed without adjusting for the East German oversample. If, however, your investigation aims at making a statement about total Germany, the data have to be weighted first. For this purpose an ***East-West weight*** is provided with the data set (V735). Moreover, as an enhancement over the previous ALLBUS documentation, the new data handbook introduces properly weighted frequency counts for total Germany as a regular feature of most variable descriptions. Because the data has been adjusted for the oversample, these marginal distributions can be interpreted as representative of total Germany.⁵

A little more complicated task lies in the use of transformation weights to transfer household samples into samples of individuals and vice versa.

From **1980** to **1992** and again in **1998**, the ALLBUS interviewers used a sampling method based on the ADM-design. In the first stage of this three-stage sampling procedure, a sample of electoral districts was selected. In the second stage the interviewers selected a target household in the electoral district, starting at a randomly chosen address and then proceeding through the area following specified rules. In the third stage, random digits (Kish-Selection-Grid) were finally used to determine the household member to be interviewed (cf. ***Kirschner*** 1984; ADM and AG.MA 1999).

⁵ An overview of unweighted marginal distributions can be found in a separate document, a supplement to the data set of ALLBUS 2006, obtainable via download (comes together with the data handbook) or on the ALLBUS CD-ROM.

Thus, in the case of the ADM-sampling-design it is the **households** within the universe sampled which have the same probability of selection. For the **individual persons** living at a specific address, the probability of selection also depends on the respective number of household members belonging to the universe sampled.

Persons living in large households are less likely to be interviewed, as only one interview is to be done at each selected household. The larger the number of household members which are eligible to be interviewed, the smaller the chance for a particular person in the household to be finally chosen for the interview. The simplest way to compensate for this is to weight each given interview proportionally to the number of eligible respondents in the household where the interview was conducted. *Accordingly, all individual-level analyses of data from ALLBUS surveys using a household sample, i.e. ALLBUS 1980 to ALLBUS 1992 and ALLBUS 1998, therefore have to be weighted proportionally to the number of household members belonging to the universe sampled (transformation weight).*

In the daily practice of research transformation weights are nevertheless rarely used. Usually, this is unproblematic because for the most part weighted and unweighted results differ only slightly or not at all. Generally speaking, the strength of the weighting effect depends on the strength of the correlation between the object of interest in the analysis and the size of the household. If the correlation is weak, using the transformation weight will only slightly affect the analysis. If the correlation is strong, however, weighting will lead to a more substantial difference between weighted and unweighted results. Thus, the safest procedure when performing individual-level analyses with data from household samples (1980-1992, 1998) is to perform both weighted and unweighted analyses. Results should then be checked carefully to determine the influence of weighting.

In contrast to earlier mentioned ALLBUS samples, the surveys in 1994, 1996 and from 2000 on have all been produced in a two stage random sampling design yielding as sampled units individual persons rather than households. In the first stage, a random sample of municipalities was selected. In the second stage, addresses of individuals were selected at random from the municipal registers of residents. Compared to the ADM-method of sampling, this procedure promises some advantages regarding not only the sample design and the fieldwork but also the accuracy of some results (cf. ADM and AG.MA 1999, **Blohm** 2006, **Holst** 2006, **Koch** 1997, **Koch** et al. 1994, and Table 1). As this more sophisticated and more costly sampling method would have exceeded the budget for the 1998 survey, ALLBUS 1998 was again conducted using the ADM-design (with interviewers working through lists of contact addresses which were pre-selected by random route (cf. ADM and AG.MA 1999 and **Holst** 2006)).

Both the ADM-design and the design using municipal registers of residents theoretically provide representative samples of the target population. The two methods differ, however, in the selection probability of the sampled units. If the targeted sampling unit is a known individual, respondents have an a priori identical probability of selection. *Therefore, the*

sample of individuals drawn from the municipal registers of residence **needs no weighting** for analyses targeting the individual level (cf. **Bens** 2006; **Blohm** 2006: 40).

On the other hand, it has to be added that weighted data can in some cases deviate more from official census data than unweighted data. The reason for this is that in surveys using the ADM-design the observed size of households can itself be biased because of the sampling procedures. One pertinent example is the representation of one-person households. In theory, respondents living in one-person households should be overrepresented in samples using the ADM-design because of the a priori higher selection probability of individuals living in smaller households. In reality, however, difficulties in contacting respondents, who are living alone, outdo their theoretical advantage in the selection process, leading de facto more or less to an underrepresentation (cf. **Hartmann** and **Schimpl-Neimanns** 1992).

Table 1 shows some examples of various possible weighting effects. ALLBUS data from 1992 (household sample) are compared to data from the 1991 Microcensus and from ALLBUS 1994 (sample of individuals). Transformation weighting has little effect on all of the listed attitudinal items in the table: Assessment of personal economic situation, political interest, Inglehart-Index, and assessment of socialism. A different result occurs among some of the demographic variables. Weighting has only little effect on the estimated proportions of men, of respondents with less than 10 years schooling, and of workers in the ALLBUS/GGSS-samples. In contrast, the percentages for older age groups (70 and older), for married respondents, for persons living in their own house, and especially for respondents living alone show a stronger effect of weighting. This supports the assumption that all of these characteristics are in some way statistically connected with the various household sizes. As further comparison shows, at least some of the results which change after transformation weighting also display a larger deviation from the Microcensus data. The accuracy of the sample of individuals is proven, by a larger part of the 1994 results deviating little from the respective references in Microcensus.

Table 1: Comparison of selected data from Microcensus 1991 (MZ 91), ALLBUS 1992 (A92) and ALLBUS 1994 (A94) - calculation by *Achim Koch*, GESIS

	West Germany %			East Germany %

Lives in own house	--	46.9 <i>41.2</i>	47.2	--	36.0 <i>32.5</i>	34.8
Lives alone	18.9	12.4 <i>24.3</i>	18.1	14.9	8.1 <i>16.0</i>	13.6

MZ 91: Anonymized 70% subsample of the 1991 Microcensus (GESIS-File); adult population living in private households

A92: Figures are weighted using the transformation weight (unweighted figures are in italics).

A94: Unweighted figures

* Based on the number of respondents currently full- or part-time employed.

Finally, while household samples are not necessarily straightforwardly representative on the individual-level, it is, on the other hand, mostly inappropriate to draw statements about households from a sample of individuals without applying an appropriate transformation weight. However, transformation of one sample type to another is usually required less frequently. Nevertheless, whenever attributes of households – like number of residents, household income, family typology or household classification – are concerned, it is *strongly* recommended to apply the proper transformation weights (cf. **Bens** 2006). Both types of transformation weights are currently available for all surveys in the ALLBUS-cumulation.

Table 2 contains an exemplary comparison of categorized household income data from ALLBUS 2004 and Microcensus 2004. Comparing columns 1 and 2 with 3 and 4 it becomes apparent that a customary analysis of household income would be misleading without weighting. For instance, about 25% of the households in Mikrocensus 2004 and ALLBUS 2004 have an income of 2600 Euro or more. The same household income category applies more often to persons (over 30%). On the other hand, a comparison of the columns 1 and 3 with 2 and 4 shows an agreeable degree of similarity between Microcensus and ALLBUS/GSS. Consequently, analyzing a sample of individuals on the household level without weighting will often show misleading results.

Table 2: Comparison of categorized net household incomes in Microcensus 2004 and ALLBUS 2004. Income data from ALLBUS as household sample weighted with transformation and East-West weight – income data from ALLBUS as sample of individuals weighted with East-West weight only (calculations for ALLBUS: **Bens** (2006); calculations for Microcensus (70% subsample of Microcensus 2005 (GESIS file) were kindly provided by **Michael Blohm**).

	Household Sample		Sample of Individuals	
	MZ04	ALLBUS	MZ04	ALLBUS
Net household income	%	%	%	%
Under 900 Euro	15.6	14.6	10.2	9.6
900 to 1499 Euro	25.9	25.1	20.8	21.1
1500 to 2599 Euro	33.3	35.6	35.7	37.8
2600 Euro or more	25.2	24.7	33.4	31.5
	100.0	100.0	100.0	100.0

Survey Description

ALLBUS / GGSS 2006 (ZA No. 4502)

The following survey description provides a short summary of the contents of ALLBUS / GGSS 2006. The majority of the topical questions in 2006 replicate questions from previous ALLBUS surveys. A special focus was on the replication of the 1996 topical modules.

Data Collection Period:

March 2006 to August 2006

Scientific Council:

Hans-Jürgen Andreß (University of Cologne, chair)

Andreas Diekmann (ETH Zurich)

Hubert Feger (Free University of Berlin)

Johannes Huinink (University of Bremen)

Heiner Meulemann (University of Cologne)

Rüdiger Schmitt-Beck (University of Duisburg)

Heike Solga (University of Göttingen).

Data Collector:

TNS Infratest Sozialforschung, Munich

Contents:

Sociological monitoring of trends in attitudes, behavior, and societal change in the Federal Republic of Germany.

The main topics in 2006 are:

- 1.) Attitudes towards abortion
- 2.) Acceptance of immigration, of ethnic minorities, and of Jews in Germany
- 3.) Citizenships and country of origin
- 4.) Self-assessment of personal characteristics
- 5.) Political attitudes
- 6.) Attitudes relating to the process of German unification
- 7.) Other Topics
- 8.) ALLBUS-Demography
- 9.) Data on the interview
- 10.) Work Orientations III (ISSP)
- 11.) Role of Government IV (ISSP)
- 12.) Derived Indices

Topics:

- 1.) *Attitudes towards abortion*: abortion because of health risks for mother or child; abortion because married woman does not want more children; abortion after rape, due to social straits or by single women not wanting to marry; permitting abortion without restriction.
- 2.) *Acceptance of immigration, of ethnic minorities, and of Jews in Germany*: attitude towards the influx of various groups of immigrants; attitudinal scale; contacts with foreigners within the family, at work, in the neighborhood, or among friends; perceived consequences of presence of foreigners in Germany; perception and evaluation of discriminatory behavior towards foreigners; assumed social evaluation statements on foreigners; ranking in terms of importance of different citizenship requirements; opinion on dual citizenship and on equality before the law for foreigners; support for the teaching of Islam in public schools; attitude towards ethnically mixed neighborhoods; estimation of proportion of foreigners in East and West Germany; living in neighborhoods with high percentage of foreigners; percentage of foreigners in local county (Kreis); local relationship between foreigners and Germans; perceived differences in lifestyle; indicators for social distance to ethnic minorities and foreigners; items on anti-Semitism; opinion of peers on foreigners.
- 3.) *Citizenships and country of origin*: first, second, and third citizenship of respondent and of spouse or partner; number of citizenships of respondent and of spouse or partner; original citizenship of respondent and of spouse or partner; country of origin of respondent and of respondent's parents and grandparents; country respondent lived in when young; length of residence in Germany.
- 4.) *Self-assessment of personal characteristics*: respondent investigates the qualifications of candidates in elections, sometimes feels resentful, is a good listener, sometimes "plays sick", takes advantage of others, is willing to admit mistakes, practices what s/he preaches, is always courteous, is irritated by people asking favors, has never deliberately hurt others (Marlowe-Crowne Social Desirability Scale).
- 5.) *Political attitudes*: political interest; postmaterialism (importance of law and order, fighting rising prices, free expression of opinions, and influence on governmental decisions); self-placement on left-right continuum.
- 6.) *Attitudes relating to the process of German unification*: attitude towards demand for increased willingness to make sacrifices in the West and more patience in the East; unification is advantageous, for East and West respectively; the future in the East depends on the willingness of eastern Germans to make an effort; strangeness of citizens in the other part of Germany; pressures to work harder in the East; attitudes towards the Stasi-past of individuals (former state security service); evaluation of socialism as an idea.
- 7.) *Other topics*: family as a prerequisite for happiness; marriage in case of steady partnership; desire to have children; social pessimism and orientation towards the future (anomia); self-assessment of social class; fair share in standard of living; pride in being a German; treatment of national socialist past; authoritarianism; assessment of the present

and future economic situation in Germany and of present and future personal economic situation; telephone; possession of mobile phone; internet use.

8.) *ALLBUS-Demography*: Details about the respondent: month and year of birth, age, gender, citizenship (nationality), number of citizenships, place of residence (federal state, administrative district, size of municipality, BIK-type of region), geographical origin, religious denomination, frequency of church attendance, school education, vocational training, employment status, details about current and former occupation respectively, fear of unemployment, affiliation to public service, supervisory functions, date of termination of full- or part-time employment, working hours per week (primary and secondary job), status of non-employment, length of unemployment, respondent's income, type of dwelling, self-description of place of residence, overall health, marital status, voting intention (Sonntagsfrage) and electoral participation.

Details about respondent's current spouse: age, month and year of birth, citizenship (nationality), number of citizenships, school education, vocational training, employment status, details about current occupation, affiliation to public service, status of non-employment.

Details about respondent's steady extra-marital partner: age, month and year of birth, citizenship (nationality), number of citizenships, school education, vocational training, employment status, details about current occupation, affiliation to public service, status of non-employment.

Details about respondent's parents: school education of mother and father, vocational training of mother and father, details about both parents' occupation.

Description of household: size of household, household income, number of persons older than 17 in household (reduced size of household).

Details about household members: family relation to respondent, gender, month and year of birth, age, marital status.

Details about children not living in the household: number of children not living in the household, gender, year of birth, age.

Respondent's current memberships: current and previous membership in a trade union, membership in a political party.

9.) *Data on the interview*: date of interview; beginning and end of interview; length of interview; reachability of respondent; willingness to participate; presence of other persons during interview; presence of spouse, partner or children during interview; presence of other relatives during interview; interference of other persons in the course of the interview; willingness to cooperate and reliability of information from respondent; respondent followed interview on screen; details about respondent's residential building and its neighborhood; evaluation of CASI-survey in ISSP-part; problems with CASI reported by interviewer; willingness to participate in on-line surveys.

Details about the interviewer: gender; age; school education; identification number; length of experience as an interviewer.

10.) *Work orientations III (ISSP)*: desired distribution of time for work and leisure activities; money and motivation for work; relevance of job characteristics (secure job, high income, good career opportunities, interesting work, work autonomy, chance to help other people, social usefulness); preferences regarding employment (self-employment, in private

business, size of company, in public service); assessment of job security; impact of work on family life; better job security and working conditions because of trade unions; preference for full- or part-time work; respondent on parental leave; preference for less or more work (and pay); characteristics of own job (secure job, high income, good career opportunities, interesting work, work autonomy, chance to help other people, social usefulness, allows development of personal skills); stressful, unhealthy or dangerous working conditions; autonomy regarding organization of own work; impact of work on family life and vice versa; usefulness of work experience in current job and in looking for new job; participation in further training over past 12 months; quality of relationship between superiors and employees and between colleagues; job satisfaction; willingness to work harder; pride in employer; willingness to turn down better paid job; chance of finding equivalent job; replaceability in current job; likelihood of looking for a new job in the near future; fear of unemployment; what respondent is prepared to do to avoid unemployment; secondary job; respondent has previously been in work for at least 1 year; date of termination of full- or part-time employment; main reason for terminating employment; desire for work; likelihood of success in job search; currently looking for work; means used in looking for work; unemployed respondent further training during last 12 months; main source of personal income while unemployed; preferred solution for retirement insurance system; willingness to work past the age of 65; self-classification on a top-bottom-scale; self-assessment of character traits (abridged Big Five Inventory measuring extraversion, agreeableness, conscientiousness, emotional stability, openness to experience); assessment of CASI-method in ISSP part.

11.) *Role of government IV (ISSP)*: attitudes towards the observance of laws; attitudes towards different forms of protest against the government; opinions on freedom of speech for extremists; attitude towards a miscarriage of justice; attitudes towards economically oriented government measures; attitudes towards an increase of expenditures of the government for environmental protection, health service, police, the educational system, defense, pensions, unemployment benefit, culture; assessment of state responsibility for socio-political tasks (social support for the elderly, students, housing provision, job creation; economic growth through assistance to industry, price stability, etc.); assessment of government success in national security, fighting crime, fighting unemployment, protecting the environment; attitude towards the curtailing of freedoms in the name of fighting terrorism; political interest; overall attitude towards politics and the political system (subjective assessment of political influence (political efficacy), level of political awareness, politicians and election promises); assessment of fairness of tax levels for different income groups; trust in fellow men; magnitude of personal influence in public life; personal acquaintance with influential figures; fair treatment by civil servants; personal relation to civil servants is beneficial; assessment of the extent of corruption (politicians, civil servants); personal experience with corruption during the last 5 years; mean number of social contacts; self-classification on a top-bottom-scale; self-assessment of character traits (abridged Big Five Inventory measuring extraversion, agreeableness, conscientiousness, emotional stability, openness to experience); assessment of CASI-method in ISSP part. Questions on the conduct of the ISSP-interviews; use of fixed-line telephone, of mobile phone, and of the internet.

12.) *Derived indices*: Inglehart-Index; family typology, classification of private households (according to Porst and Funk); International Standard Classification of Occupations (ISCO 1968, 1988); occupational prestige (according to Treiman); Standard International Occupational Prestige Scale (SIOPS, according to Ganzeboom), International Socio-economic Index of Occupational Status (ISEI, according to Ganzeboom); magnitude prestige (according to Wegener); occupational metaclassification (according to Terwey); class position (according to Goldthorpe); transformation weight for analyses on household-level; east-west design weight.

Total Population and Sample:

Universe sampled: Federal Republic of Germany

Sample of individuals: Two stage disproportionate random sample in western Germany (incl. West Berlin) and eastern Germany (incl. East Berlin) of all German speaking persons who resided in private households on the day of the interview and were born before 1 January 1988. In the first sample stage municipalities (Gemeinden) were selected with a probability proportional to the number of adult residents; in the second sample stage individuals were then randomly selected from the municipal registers of residents.

Method of Data Collection:

Personal interview with standardized questionnaire (CAPI - Computer Assisted Personal Interviewing); 4 question surveyed in split-half using CASI (Computer Assisted Self-Interviewing)). Two additional CASI-questionnaires for ISSP (split-half).

Primary Sample Units:

West: 111
East: 51

Response Rate:

West: 40.2 %
East: 42.8 %
Total: 41.0 %

Data Set:

Number of respondents: 3421
Number of variables: 743

Publications:

Terwey, Michael and **Angelika Scheuer** 2007:

Etwas mehr Anpassung gewünscht. Einstellungen zur Integration von Ausländern in Deutschland, in: Informationsdienst Sozialer Indikatoren (ISI) 38: 12 - 14.

Further Notes:

Respondents from the area of the new federal states are oversampled.

A second version of this data set (386 variables) with a shortened demography module is additionally available as ALLBUS / GGSScompact 2006 (ZA No. 4503).

The original German data sets are available as ZA No. 4500 (ALLBUS 2006) and ZA No. 4501 (ALLBUScompact 2006).

Additional information on ALLBUS is available at:

<http://www.gesis.org/en/services/data/survey-data/allbus/>

The ALLBUS-web pages also feature a list of ALLBUS-projects. The list contains user names (e-mail) and stated purpose of ALLBUS-application:

<http://www.gesis.org/en/services/data/survey-data/allbus/registered-allbusggss-applications/>

How to Use the Codeplan

The following example of a variable in the codebook was constructed to display as large a spectrum of information as possible. The frequencies shown therefore do not correspond to any real data.

The numbers in angle brackets "<>" refer to the explanations at the end of this example. They are not present in the following data handbook.

<1>

V125 PROFITS NECESSARY FOR HEALTHY ECONOMY

<2>
 Location: 208 <3>
 Format: F1 Missing: 7 thru highest

<4>
 <Opinions on state and economy:>

F051B The economy can run only if the businessmen make good profits. That benefits everyone in the end.

<5>
 <Complete question text D051>

		W-E-Weighted		
		n	%	val.%
<6>	<7>	<8>	<9>	<10>
1.	Completely agree	2534	74.1	74.1
2.	Tend to agree	589	17.2	17.2
3.	Tend to disagree	68	2.0	2.0
4.	Completely disagree	226	6.6	6.6
9.	No answer	4	0.1	.
		3421	100.0	100.0

<11>	West	East
1	73.0	79.4
2	18.3	12.4
3	2.1	1.4
4	6.6	6.8
9	2M	2M
<12>	2297	1120

Explanation:

- <1> A unique variable number is assigned to each question unit.
- <2> "Location" specifies the position of the variable in the SPSS data set.
"Format" states the number of digits of the corresponding variable in the data set (according to SPSS conventions).
- <3> Missing values are identified according to SPSS conventions.
- <4> Here, the complete question text - including the question number used in the questionnaire, interviewer instructions and other comments - can be found. The exact notation is retained as far as possible. Individual questions from item batteries are introduced by a short heading in angle brackets. In individual cases the codeplan may have been restructured along with corresponding changes in textual sequence; this serves to make it easier to handle the data for purposes of analysis.
- <5> Archival comments - additional information not appearing in the original questionnaires - appear in angle brackets < >.
- <6> Here, the code values of the individual answer categories as they are stored in the dataset can be found.
- <7> The answer texts were translated from the original questionnaires. If it was necessary to restructure the codeplan, answer texts were sometimes extended or new texts were added. Any substantial changes are documented in notes or archival comments.
- <8> The absolute frequencies shown here are weighted to adjust for the oversample of respondents from East Germany. These frequencies can thus be interpreted as directly representative for total Germany. A corresponding East-West weight for use in your own calculations is part of the data set (V735).
(Please also comp. note 24 concerning the analysis of attributes of households with data from a sample of individuals.)
An overview of unweighted marginals can be found in a separate document ("Supplement to the ALLBUS Data Handbook 2006").
- <9> The percentage counts shown here are also weighted to adjust for the oversample of respondents from East Germany. They can thus be interpreted as directly representative for total Germany. A corresponding East-West weight for use in your own calculations is part of the data set (V735).
(Please also comp. note 24 concerning the analysis of attributes of households with data from a sample of individuals.)
An overview of unweighted marginals can be found in a separate document ("Supplement to the ALLBUS Data Handbook 2006").
- <10> The percentage counts shown here are again based on the weighted number of cases but missing values were excluded from the calculation.
A corresponding East-West weight for use in your own calculations is part of the data set (V735).
(Please also comp. note 24 concerning the analysis of attributes of households with data from a sample of individuals.)
An overview of unweighted marginals can be found in a separate document ("Supplement to the ALLBUS Data Handbook 2006").
- <11> The following table contains separate percentage distributions for East Germany (incl. East Berlin) and West Germany (incl. West Berlin). Missing values have been excluded from the calculation of percentages but are listed in absolute numbers and marked "M" for "missing" in the table.
The data in this table is not adjusted for the oversample of respondents from East-Germany, as this is not necessary when looking at the two parts of Germany separately.
- <12> The bottom row of the table shows the unweighted number of valid responses from East and West Germany. The absolute numbers thus correspond to the actual number of valid responses in the data set.

V43 FOREIGN:MORE ADAPTION-GERMAN WAY OF LIFE

Location: 43
 Format: F2 Missing: 97 thru highest; 0

<If respondent has German citizenship>

<This question is subject to the CAPI-CASI-split, comp. V3. The data collected in the two splitversions has been integrated in the following variables to make the data more easily analysable (items: _A, _B, _C, _D).>

F017A ***** CAPI *****

(Int.: Please display card 17.)

This question is about the foreigners who live in Germany. On this card, there are some statements we have all heard at some time or other. Please tell me for each statement to what extent you agree with it.

1 on the scale means you "completely disagree,"
 7 on the scale means you "completely agree."
 You can use the numbers in between to differentiate your answer.

F017B ***** CASI *****

(Int.: Please hand over your pen to the respondent and turn the laptop so that the respondent can fill in the answers to the next question on his/her own.)

(Int.: Should there be questions concerning the use of the laptop, please feel free to explain. However, don't interfere with the respondent answering the survey questions.)

Please answer the next question on your own. Touch the screen with the pen to mark the answer you think best fits your opinion.

This question is about the foreigners who live in Germany. You will be presented with a number of statements we have all heard at some time or other. Please indicate for each statement to what extent you agree with it.

1 on the scale means you "completely disagree,"
 7 on the scale means you "completely agree."
 You can use the numbers in between to differentiate your answer.

To mark your answer, please touch the screen at the dot below the number of the answer category that best fits your opinion.

F017A+F017B_A Foreigners living in Germany should adapt their way of life a little more closely to the German way of life.

V84 MAJ.ASS.:FOREIGNERS SHLD ADAPT LIFESTYLE

Location: 84
 Format: F2 Missing: 97 thru highest

F028 In every society there are unwritten rules about what one can say in public and what not. Some opinions are viewed negatively and will probably meet with disapproving reactions. Other opinions, however, are viewed positively and will probably meet with approval. Please tell me for each of the following statements how you think society would judge if one were to express such an opinion.

If you choose -3, this means that society would judge it very negatively to express such an opinion; if you choose +3, this means that it is judged very positively to express such an opinion. You can use the values in between to differentiate your assessment.

(Int.: Please display card 28.)

<Society's judgment on opinions:>

F028A Foreigners living in Germany should adapt their way of life a little more closely to the German way of life.

V530 SPENDING TIME: TIME IN A PAID JOB

Location: 530
 Format: F1 Missing: 6 thru highest

ISSPArbeit

Finally, I would like to ask you to complete this short questionnaire on the topic of "work" by yourself. These questions are part of an international survey including 38 participant countries.

(Int.: Please hand over the pen and turn the laptop so that the respondent can answer the next question on the screen without your help.)

Citizens of 38 countries have their say on the topic of "work"

International Social Survey 2005

(How does it work?)

Please use the pen to tick off the answer you think best fits your opinion. Answers marked by mistake can be changed. Simply tick off another answer category.

...

0 <-- tick off

OR

Enter number, e.g.: _____

Once you have answered a question and want to proceed to the next one, simply press NEXT "-->." "<<--" BACK takes you to the preceding screen.

Please press NEXT now.)

I001 Suppose you could change the way you spend your time, spending more time on some things and less time on others.

Which of the things on the following list would you like to spend MORE time on, which would you like to spend LESS time on and which would you like to spend the SAME amount of time on as now?

(Please tick one box on EACH line.)

I001A What about time in a paid job?

V605 SOLUTIONS FOR PENSION SYSTEM

Location: 605
 Format: F1 Missing: 6 thru highest

I037 At the moment there is a lot of discussion in Germany about pensions, how they can be financed and at what age people should retire.

Below, you will find three different measures designed to solve the problems of the pension system.

If you had to decide on one of the measures, which one would you choose?

In order to solve the problems of the statutory pension system...

(Please tick ONE box only.)

	W-E-Weighted		
	n	%	val.%
1. ...the statutory retirement age should be raised	369	10.8	28.6
2. ...the rate of contributions should be increased	704	20.6	54.6
3. ...the level of state pensions should be lowered	216	6.3	16.8
6. Did not participate in ISSP "Work Orientations" (code 2, 0 in V529)	1739	50.8	.
9. No answer	393	11.5	.

V681 HOW MANY PEOPLE CONTACT

Location: 681
 Format: F1 Missing: 6 thru highest

J020 IN CONCLUSION, WE WILL NOW COME TO SOME QUESTION ABOUT YOU PERSONALLY.

On average, about how many people <split 1: "Menschen; split 2: "Leute"> do you have contact with in a typical week day.

We are interested in contact on a one-to-one basis, including everyone with whom you chat, talk, or discuss matters. This can be face-to-face, by telephone, by mail, or on the internet. Please include only people <split 1: "Menschen"; split 2: "Leute"> you know and don't forget the people <split 1: "Menschen"; split 2: "Leute"> you live with.

Please indicate which of the following categories best matches your estimate.

(Please tick ONE box only.)

V701 WILLING TO PARTICIPATE IN ONLINE SURVEY?

Location: 701
 Format: F1 Missing: 7 thru highest; 0

<If respondent does use the internet for private purposes>

INTER03 Finally, we would like to ask you a favour. The survey you have just participated in is part of a scientific project by ZUMA (Zentrum für Umfragen, Methoden und Analysen). We are planning a follow-up survey. We would therefore like to do another interview with you a few months from now. This would take the form of an online survey. For your participation it is necessary to store your email address. As you can see from this paper, this is subject to data protection rules.

(Int.: Hand over data protection paper. Check address in address log.)

Would you agree to support our scientific project by taking part in an online survey?

	W-E-Weighted		
	n	%	val.%
1. Yes, I agree	605	17.7	37.7
2. No, I do not agree	999	29.2	62.3
0. Respondent does not use the internet (code 2 in INTER01)	1817	53.1	.

Note 0001**Split Questionnaire (CAPI/CASI)**

This note concerns variable V3.

Since 2000, the ALLBUS-surveys have been conducted using the method of computer assisted interviewing (CAPI), i.e. the interviewer uses a laptop computer to read out the questions and to record the answers. With one notable exception, this was also the case for ALLBUS 2006. To survey the four items on on ethnocentrism in F017, a split questionnaire was used such that one half of the respondents answered the question in the usual CAPI-mode while the other half used the laptop computer to read and answer the questions on their own (CASI - computer assisted self-interviewing). By thus varying the degree of anonymity of the interview situation, the data can be used to test for social desirability effects in the respondents' answers on the topic of ethnocentrism.

Before proceeding with the rest of the interview, interviewers were asked to indicate whether respondents in the CASI-split really answered the questions on their own or if they required help from the interviewer. This information is provided in V47.

Note 0002**Fair Share in Standard of Living?**

This note concerns variable V20.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

1. Fair share
2. More than fair share
3. Somewhat less
4. Very much less

Note 0003

Inglehart-Index

This note concerns variable V144.

This index has been designed by Robert Inglehart to measure 'materialist' and 'postmaterialist' value orientations. It is based on the respondents' statements about their political priorities as given in V140 to V143.

Respondents who rank the items 'maintaining law and order in this country' and 'fighting rising prices' as the two most important issues are classified as 'materialists' while respondents who consider 'giving citizens more influence on government decisions' and 'protecting the right of free speech' as the two most important goals are categorized as 'postmaterialists'.

All other respondents show ambiguous priorities in terms of this index and are therefore classified as 'mixed types'. The number of categories for these 'mixed types' can vary. In V144 two such 'mixed types' are differentiated. Respondents who rank a 'postmaterialist' item first and a 'materialist' item second are grouped into the category 'postmaterialist mixed type' while the reverse order of preferences is classified as 'materialist mixed type'.

Finally, if a missing value occurs in one of the two political preferences relevant for index construction, the index is set to the corresponding missing value, as, in this case, it is impossible to construct the index according to its own logic.

For further information see:

Inglehart, Ronald 1971: The Silent Revolution in Europe. Intergenerational Change in Post-Industrial Societies, in: American Political Science Review 65: 991 - 1017.

Note 0004

General School Leaving Certificate

This note concerns variables V175, V253 and V297.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

01. A Still at school
02. B Finished school without school leaving certificate
03. C Lowest formal qualification of Germany's tripartite secondary school system, after 8 or 9 years of schooling
<"Volks-/Hauptschulabschluss bzw. Polytechnische Oberschule mit Abschluss 8. oder 9. Klasse">
04. D Intermediary secondary qualification, after 10 years of schooling
<"Mittlere Reife, Realschulabschluss bzw. Polytechnische Oberschule mit Abschluss 10. Klasse">
05. E Certificate fulfilling entrance requirements to study at a University of Applied Sciences
<"Fachhochschulreife (Abschluss einer Fachoberschule etc.)">
06. F Higher qualification, entitling holders to study at a university
<"Abitur bzw. Erweiterte Oberschule mit Abschluss 12. Klasse (Hochschulreife)">
07. G Other school leaving certificate
(Int.: Please enter)

Statistisches Bundesamt (ed.) 1971: Internationale Standardklassifikation der Berufe. Übersetzung der "International Standard Classification of Occupations" des internationalen Arbeitsamtes. Geneva 1968. Deutsche Übersetzung 1968, Stuttgart and Mainz: Kohlhammer)

Professional, technical and related workers

0011	Chemists
0012	Physicists
0013	Physical scientists not elsewhere classified
0014	Physical science technicians
0021	Architects and town planners
0022	Civil engineers
0023	Electrical and electronics engineers
0024	Mechanical engineers
0025	Chemical engineers
0026	Metallurgists
0027	Mining engineers
0028	Industrial engineers
0029	Architects and engineers, n.e.c.
0031	Surveyors
0032	Draughtsmen
0033	Civil engineering technicians
0034	Electrical and electronics engineering technicians
0035	Mechanical engineering technicians
0036	Chemical engineering technicians
0037	Metallurgical technicians
0038	Mining technicians
0039	Engineering technicians, n.e.c.
0040	Aircraft pilots, ship officers
0041	Aircraft pilots, navigators and flight engineers
0042	Ships' deck officers and pilots
0043	Ships' engineers
0050	Life scientists and related technicians
0051	Biologists, zoologists and related scientists
0052	Bacteriologists, pharmacologists and related scientists
0053	Agronomists and related scientists
0054	Life sciences technicians
0060	Medical, dental and veterinary professions
0061	Medical doctors
0062	Medical assistants
0063	Dentists
0064	Dental assistants
0065	Veterinarians
0066	Veterinary assistants
0067	Pharmacists
0068	Pharmaceutical assistants
0069	Dietitians and public health nutritionists
0071	Professional nurses
0072	Nursing personnel, n.e.c.
0073	Professional midwives
0074	Midwifery personnel, n.e.c.
0075	Optometrists and opticians
0076	Physiotherapists and occupational therapists
0077	Medical X-ray technicians
0079	Medical, dental, veterinary and related workers, n.e.c. (Herbalist, sanitary officer, osteopath)
0081	Statisticians
0082	Mathematicians and actuaries
0083	Systems analysts
0084	Statistical and mathematical technicians

Note 0005

(continued)

0090 Economists
 0110 Accountants (general)
 0121 Lawyers
 0122 Judges
 0129 Jurists, n.e.c.
 0131 University and higher education teachers and related
 0132 Secondary education teachers and related
 0133 Primary education teachers and related
 0134 Pre-primary education teachers
 0135 Special education teachers
 0139 Teachers, n.e.c.
 0141 Ministers of religion and related members of
 religious orders
 0149 Workers in religion, n.e.c.
 0151 Authors and critics
 0159 Authors, journalists and related writers, n.e.c.
 0161 Sculptors, painters and related artists
 0162 Commercial artists and designers
 0163 Photographers and cameramen
 0171 Composers, musicians and singers
 0172 Choreographers and dancers
 0173 Actors and stage directors
 0174 Producers, performing arts (theater, movie, radio, TV)
 0175 Circus performers
 0179 Performing artists, n.e.c.
 0191 Librarians, archivists and curators
 0192 Sociologists, anthropologists and related scientists
 0193 Social workers
 0194 Personnel and occupational specialists
 0195 Philologists, translators and interpreters
 0199 Other scientists, technical and related professions,
 n.e.c.

Administrative and managerial workers

0201 Heads of government jurisdiction, legislative officials
 0202 Members of legislative bodies, government officials
 0211 General managers and businessmen, manager in enterprise
 0212 Production managers (except farm)
 0219 Managers in private enterprises, industry,
 business, n.e.c.

Clerical and related workers

0300 Clerical supervisors
 0310 Government executive officials
 0321 Stenographers, typists and teletypists
 0322 Card- and tapepunching machine operators
 0331 Bookkeepers and cashiers
 0339 Bookkeepers, cashiers and related workers, n.e.c.
 0341 Bookkeeping and calculating machine operators
 0342 Automatic data-processing machine operators
 0351 Railway station masters
 0352 Postmasters
 0359 Transport and communications supervisors, n.e.c.
 0360 Transport conductors
 0370 Mail distribution clerks
 0380 Telephone and telegraph operators
 0390 Clerical and related workers
 0391 Stock clerks
 0392 Material and production planning clerks
 0393 Correspondence and reporting clerks
 0394 Receptionists and travel agency clerks
 0395 Library and filing clerks
 0399 Clerks n.e.c.

Sales workers

0400 Managers (wholesale and retail trade)
 0410 Working proprietors (wholesale and retail trade)
 0421 Sales supervisors
 0422 Buyers
 0431 Technical salesmen and service advisers
 0432 Commercial travellers and manufacturers' agents

Note 0005

(continued)

0441 Insurance, real estate and securities salesmen
 0442 Business services salesmen
 0443 Auctioneers
 0451 Salesmen, shop assistants and demonstrators
 0452 Street vendors, canvassers and newsvendors
 0490 Sales workers, n.e.c.

Service workers

0500 Managers (catering and lodging services)
 0510 Working proprietors (catering and lodging services)
 0520 Housekeeping and related service workers
 0531 Cooks
 0532 Waiters, bartenders and related workers
 0540 Maids and related housekeeping service workers, n.e.c.
 0551 Building caretakers (general)
 0552 Charworkers, cleaners and related workers
 0560 Launderers, dry cleaners and pressers
 0570 Hairdressers, barbers, beauticians and related workers
 0581 Fire fighters
 0582 Policemen and detectives
 0589 Protective service workers, n.e.c.
 0591 Guides
 0592 Undertakers and embalmers
 0599 Other service workers. n.e.c.

Agricultural, animal husbandry and forestry workers,
fishermen and hunters

0600 Farm managers and supervisors
 0610 Farm manager or director
 0611 General farmers
 0612 Specialised farmers
 0621 General farm workers (including cooperative farmers)
 0622 Field crop and vegetable farm workers
 0623 Orchard, vineyard and related tree and shrub crop
 workers
 0624 Livestock workers
 0625 Dairy farm workers
 0626 Poultry farm workers
 0627 Nursery workers and gardeners
 0628 Farm machinery operators
 0629 Agricultural and animal husbandry workers, n.e.c.
 0631 Loggers
 0632 Forestry workers (except logging)
 0641 Fishermen
 0649 Fishermen, hunters and related workers, n.e.c.

Production and related workers, transport equipment operators
and labourers

0700 Production supervisors and general foremen
 0711 Miners and quarrymen
 0712 Mineral and stone treaters
 0713 Well drillers, borers and related workers
 0721 Metal smelting, converting and refining furnacemen
 0722 Metal rolling-mill workers
 0723 Metal melters and reheaters
 0724 Metal casters
 0725 Metal moulders and coremakers
 0726 Metal annealers, temperers and case-hardeners
 0727 Metal drawers and extruders
 0728 Metal platers and coaters
 0729 Metal processors, n.e.c.
 0731 Wood treaters
 0732 Sawyers, plywood makers and related wood-processing
 workers
 0733 Paper pulp preparers
 0734 Paper makers
 0741 Crushers, grinders and mixers
 0742 Cookers, roasters and related heat-treaters
 0743 Filter and separator operators
 0744 Still and reactor operators
 0745 Petroleum-refining workers

Note 0005

(continued)

0749 Chemical processors and related workers, n.e.c.
0751 Fibre preparers
0752 Spinners and winders
0753 Weaving- and knitting-machine setters and
pattern-card preparers
0754 Weavers and related workers
0755 Knitters
0756 Bleachers, dyers and textile product finishers
0759 Spinners, weavers, knitters, dyers and related
workers, n.e.c.
0761 Tanners and fellmongers
0762 Pelt dressers
0771 Grain millers and related workers
0772 Sugar processors and refiners
0773 Butchers and meat preparers
0774 Food preservers
0775 Dairy product processors
0776 Bakers, pastrycooks and confectionery makers
0777 Tea, coffee and cocoa preparers
0778 Brewers, wine and beverage makers
0779 Food and beverage processors, n.e.c.
0781 Tobacco preparers
0782 Cigar makers
0783 Cigarette makers
0789 Tobacco preparers and tobacco product makers, n.e.c.
0791 Tailors and dressmakers
0792 Fur tailors and related workers
0793 Milliners and hatmakers
0794 Patternmakers and cutters
0795 Sewers and embroiderers
0796 Upholsterers and related workers
0799 Tailors, dressmakers, sewers, upholsterers and
related workers, n.e.c.

0801 Shoemakers and shoe repairers
0802 Shoe cutters, lasters, sewers and related workers
0803 Leather goods makers
0811 Cabinetmakers
0812 Woodworking-machine operators
0819 Cabinetmakers and related woodworkers, n.e.c.
0820 Stone cutters and carvers
0831 Blacksmiths, hammersmiths and forging-press operators
0832 Toolmakers, metal patternmakers and metal markers
0833 Machine-tool setter-operators
0834 Machine-tool operators
0835 Metal grinders, polishers and tool sharpeners
0839 Blacksmiths, toolmakers and machine-tool
operators, n.e.c.
0841 Machinery fitters and machine assemblers
0842 Watch, clock and precision instrument makers
0843 Motor vehicle mechanics
0844 Aircraft engine mechanics
0849 Machinery fitters, machine assemblers and precision
instrument makers (except electrical), n.e.c.
0851 Electrical fitters
0852 Electronics fitters
0853 Electrical and electronic equipment assemblers
0854 Radio and television repairmen
0855 Electrical wiremen
0856 Telephone and telegraph installers
0857 Electric linemen and cable jointers
0859 Electrical fitters and related electrical and
electronics workers, n.e.c.
0861 Broadcasting station operators
0862 Sound equipment operators and cinema projectionists
0871 Plumbers and pipe fitters
0872 Welders and flame cutters
0873 Sheet metal workers
0874 Structural metal preparers and erectors
0880 Jewellery and precious metal workers
0891 Glass formers, cutters, grinders and finishers
0892 Potters and related clay and abrasive formers
0893 Glass and ceramics kilnmen
0894 Glass engravers and etchers
0895 Glass and ceramics painters and decorators

Note 0005

(continued)

0899 Glass formers, potters and related workers, n.e.c.
0901 Rubber and plastics product makers (except tire makers and tire vulcanisers)
0902 Tire makers and vulcanisers
0910 Paper and paperboard products makers
0921 Compositors and typesetters
0922 Printing pressmen
0923 Stereotypers and electrotypers
0924 Printing engravers (except photo-engravers)
0925 Photo-engravers
0926 Bookbinders and related workers
0927 Photographic darkroom workers
0929 Printers and related workers, n.e.c.
0931 Painters, construction
0939 Painters, n.e.c.
0941 Musical instrument makers and tuners
0942 Basketry weavers and brush makers
0943 Non-metallic mineral product makers
0949 Other production and related workers
0951 Bricklayers, stonemasons and tile setters
0952 Reinforced-concreters, cement finishers and terrazzo workers
0953 Roofers
0954 Carpenters, joiners and parquetry workers
0955 Plasterers
0956 Insulators
0957 Glaziers
0959 Construction workers, n.e.c.
0961 Power-generating machinery operators
0969 Stationary engine and related equipment operators, n.e.c.
0971 Dockers and freight handlers
0972 Riggers and cable splicers
0973 Crane and hoist operators
0974 Earth-moving and related machinery operators
0979 Material-handling equipment operators, n.e.c.
0981 Ships' deck ratings, barge crews and boatmen
0982 Ships' engine-room ratings
0983 Railway engine drivers and firemen
0984 Railway brakemen, signalmen and shunters
0985 Motor vehicle drivers
0986 Animal and animal-drawn vehicle drivers
0989 Transport equipment operators, n.e.c.
0999 Labourers, factory workers, unskilled workers not elsewhere classified

0001 Soldier (armed forces)
0002 Officer (armed forces)

1004 Workers with inadequately described or undefinable (not classifiable) job

1007 Refused
1008 Don't know
1009 No answer
0000 Not applicable

Note 0006

International Standard Classification of Occupations
(ISCO 1988)

This note concerns variables V192, V223, V270, V314, V340, V357 and V718.

Source:

International Labour Office (ed.) 1990: International Standard Classification of Occupations. ISCO-88, Geneva.

The categories of the open question on occupations were coded by ZUMA based on the official German translation of the source cited above, which was provided by the 'Statistisches Bundesamt'. Some new Codes, marked '*' in this documentation, were added. All codes in the data file are in a four digit format; where necessary, 0 has been added by default.

1 Legislators, senior officials and managers in private industry, enterprise and business

- 11 Legislators and senior officials
 - 111 Legislators
 - 1110 Legislators
 - 112 Senior government officials
 - 1120 Senior government officials
 - 113 Traditional chiefs and heads of villages
 - 1130 Traditional chiefs and heads of villages
 - 114 Senior officials of special-interest organisations
 - 1141 Senior officials of political-party organisations
 - 1142 Senior officials of employers', workers' and other economic-interest organisations
 - 1143 Senior officials of humanitarian and other special-interest organisations
- 12 Corporate managers in big enterprises (1)
 - 121 Directors and chief executives
 - 1210 Directors and chief executives
 - 122 Production and operations department managers
 - 1221 Production and operations department managers in agriculture, hunting, forestry and fishing
 - 1222 Production and operations department managers in manufacturing
 - 1223 Production and operations department managers in construction
 - 1224 Production and operations department managers on wholesale and retail trade
 - 1225 Production and operations department managers in restaurants and hotels
 - 1226 Production and operations department managers in transport, storage and communications
 - 1227 Production and operations department managers in business services
 - 1228 Production and operations department managers in personal care, cleaning and related services
 - 1229 Production and operations department managers not elsewhere classified
 - 123 Other department managers
 - 1231 Finance and administration department managers
 - 1232 Personnel and industrial relations department managers
 - 1233 Sales and marketing department managers
 - 1234 Advertising and public relations department managers
 - 1235 Supply and distribution department managers
 - 1236 Computing services department managers

Note 0006

(continued)

- 1237 Research and development department managers
- 1239 Other department managers, not elsewhere classified
- 13 General managers small enterprises (2)
 - 131 General managers
 - 1311 General managers in agriculture, hunting, forestry and fishing
 - 1312 General managers in manufacturing
 - 1313 General managers in construction
 - 1314 General managers in wholesale and retail trade
 - 1315 General managers of restaurants and hotels
 - 1316 General managers in transport, storage and communications
 - 1317 General managers of business services
 - 1318 General managers in personal care, cleaning and related services
 - 1319 General managers not elsewhere classified
- 2 Scientists, professionals
 - 21 Physical, mathematical and engineering science professionals
 - 211 Physicists, chemists and related professionals
 - 2111 Physicists and astronomers
 - 2112 Meteorologists
 - 2113 Chemists
 - 2114 Geologists and geophysicists
 - 212 Mathematicians, statisticians and related professionals
 - 2121 Mathematicians and related professionals
 - 2122 Statisticians
 - 213 Computing professionals
 - 2131 Computer systems designers and analysts
 - 2132 Computer programmers
 - 2139 Computing professionals not elsewhere classified
 - 214 Architects, engineers and related professionals
 - 2141 Architects, town and traffic planners
 - 2142 Civil engineers
 - 2143 Electrical engineers
 - 2144 Electronics and telecommunications engineers
 - 2145 Mechanical engineers
 - 2146 Chemical engineers
 - 2147 Mining engineers, metallurgists and related professionals
 - 2148 Cartographers and surveyors
 - 2149 Architects, engineers and related professionals not elsewhere classified
 - 22 Life science and health professionals
 - 221 Life science professionals
 - 2211 Biologists, botanists, zoologists and related professionals
 - 2212 Pharmacologists, pathologists and related professionals (not medicines)
 - 2213 Agronomists and related professionals
 - 222 Health professionals (except nursing)
 - 2221 Medical doctors
 - 2222 Dentists
 - 2223 Veterinarians
 - 2224 Pharmacists
 - 2229 Health professionals (except nursing) not elsewhere classified
 - 223 Nursing and midwifery professionals
 - 2230 Nursing and midwifery professionals
 - 23 Teaching professionals
 - 231 College, university and higher education teaching professionals
 - 2310 College, university and higher education teaching professionals
 - 232 Secondary education teaching professionals
 - 2320 Secondary education teaching professionals

Note 0006

(continued)

- 233 Primary and pre-primary education teaching professionals
 - 2331 Primary education teaching professionals
 - 2332 Pre-primary education teaching professionals
- 234 Special education teaching professionals
 - 2340 Special education teaching professionals
- 235 Other teaching professionals
 - 2351 Education methods specialists
 - 2352 School inspectors
 - 2359 Other teaching professionals not elsewhere classified
- 24 Other professionals and related professions
 - 241 Business professionals
 - 2411 Accountants
 - 2412 Personnel and careers professionals
 - 2419 Business professionals not elsewhere classified
 - 242 Legal professionals
 - 2421 Lawyers
 - 2422 Judges
 - 2429 Legal professionals not elsewhere classified
 - 243 Archivists, librarians and related information professionals
 - 2431 Archivists and curators
 - 2432 Librarians and related information professionals
 - 244 Social science and related professionals
 - 2441 Economists
 - 2442 Sociologists, anthropologists and related professionals
 - 2443 Philosophers, historians and political scientists
 - 2444 Philologists, translators and interpreters
 - 2445 Psychologists
 - 2446 Social work professionals
 - 245 Writers and creative or performing artists
 - 2451 Authors, journalists and other writers
 - 2452 Sculptors, painters and related artists
 - 2453 Composers, musicians and singers
 - 2454 Choreographers and dancers
 - 2455 Film, stage and related actors and directors
 - 246 Religious professionals
 - 2460 Religious professionals
 - 247 Public service administrative professionals (3)
 - 2470 Public service administrative professionals
- 25 Education professionals n.e.c. *
(mostly nursery school teachers or social workers)
- 3 Technicians and associate professionals
 - 31 Physical and engineering science associate professional
 - 311 Physical and engineering science technicians
 - 3111 Chemical and physical science technicians
 - 3112 Civil engineering technicians
 - 3113 Electrical engineering technicians
 - 3114 Electronics and telecommunications engineering technicians
 - 3115 Mechanical engineering technicians
 - 3116 Chemical engineering technicians
 - 3117 Mining and metallurgical technicians
 - 3118 Draughtspersons
 - 3119 Physical and engineering science technicians not elsewhere classified
 - 312 Computer associate professionals
 - 3121 Computer assistants
 - 3122 Computer equipment operators
 - 3123 Industrial robot controllers
 - 313 Optical and electronic equipment operators
 - 3131 Photographers and image and sound recording equipment operators
 - 3132 Broadcasting and telecommunications equipment operators
 - 3133 Medical equipment operators
 - 3139 Optical and electronic equipment operators not elsewhere classified

Note 0006

(continued)

- 314 Ship and aircraft controllers and technicians
 - 3141 Ships' engineers
 - 3142 Ships' deck officers and pilots
 - 3143 Aircraft pilots and related associate professionals
 - 3144 Air traffic controllers
 - 3145 Air traffic safety technicians
- 315 Safety and quality inspectors
 - 3151 Building and fire inspectors
 - 3152 Safety, health and quality inspectors
- 32 Life science and health associate professionals
 - 321 Life science technicians and related associate professionals
 - 3211 Life science technicians
 - 3212 Agronomy and forestry technicians
 - 3213 Farming and forestry advisers
 - 322 Modern health associate professionals (except nursing)
 - 3221 Medical assistants
 - 3222 Sanitarians
 - 3223 Dieticians and nutritionists
 - 3224 Optometrists and opticians
 - 3225 Dental assistants
 - 3226 Physiotherapists and related associate professionals
 - 3227 Veterinary assistants
 - 3228 Pharmaceutical assistants
 - 3229 Modern health associate professionals (except nursing) not elsewhere classified
 - 323 Nursing and midwifery associate professionals
 - 3231 Nursing associate professionals
 - 3232 Midwifery associate professionals
 - 324 Traditional medicine practitioners and faith healers
 - 3241 Traditional medicine practitioners
 - 3242 Faith healers
- 33 Teaching associate professionals
 - 331 Primary education teaching associate professionals
 - 3310 Primary education teaching associate professionals
 - 332 Pre-primary education teaching associate professionals
 - 3320 Pre-primary education teaching associate professionals
 - 333 Special education teaching associate professionals
 - 3330 Special education teaching associate professionals
 - 334 Other teaching associate professionals
 - 3340 Other teaching associate professionals
- 34 Other associate professionals
 - 341 Finance and sales associate professionals
 - 3411 Securities and finance dealers and brokers
 - 3412 Insurance representatives
 - 3413 Estate agents
 - 3414 Travel consultants and organisers
 - 3415 Technical and commercial sales representative
 - 3416 Buyers
 - 3417 Appraisers, valuers and auctioneers
 - 3419 Finance and sales associate professionals not elsewhere classified
 - 342 Business services agents and trade brokers
 - 3421 Trade brokers
 - 3422 Clearing and forwarding agents
 - 3423 Employment agents and labour contractors
 - 3429 Other business services agents and trade brokers not elsewhere classified

Note 0006

(continued)

- 343 Administrative associate professionals
 - 3431 Administrative secretaries and related associate professionals
 - 3432 Legal and related business associate professionals
 - 3433 Bookkeepers
 - 3434 Statistical, mathematical and related associate professionals
 - 3439 Administrative associate professionals not elsewhere classified
- 344 Customs, tax and related government associate professionals
 - 3441 Customs and border inspectors
 - 3442 Government tax and excise officials
 - 3443 Government social benefits officials
 - 3444 Government licensing officials
 - 3449 Customs, tax and related government associate professionals not elsewhere classified
- 345 Police inspectors and detectives
 - 3450 Police inspectors and detectives
- 346 Social work associate professionals
 - 3460 Social work associate professionals
- 347 Artistic, entertainment and sports associate professionals
 - 3471 Decorators and commercial designers
 - 3472 Radio, television and other announcers
 - 3473 Street, night-club and related musicians, singers and dancers
 - 3474 Clowns, magicians, acrobats and related associate professionals
 - 3475 Athletes, sportspersons and related associate professionals
- 348 Religious associate professionals
 - 3480 Religious associate professionals

4 Clerks

- 41 Office clerks
 - 411 Secretaries, keyboard-operating clerks and related clerks
 - 4111 Stenographers and typists
 - 4112 Word-processor and related operators
 - 4113 Data entry operators
 - 4114 Calculating machine operators
 - 4115 Secretaries
 - 412 Numerical clerks
 - 4121 Accounting and bookkeeping clerks
 - 4122 Statistical and finance clerks
 - 413 Material-recording and transport clerks
 - 4131 Stock clerks
 - 4132 Production clerks
 - 4133 Transport clerks
 - 414 Library, mail and related clerks
 - 4141 Library and filing clerks
 - 4142 Mail carriers and sorting clerks
 - 4143 Coding, proof-reading and related clerks
 - 4144 Scribes and related workers
 - 419 Other office clerks
 - 4190 Other office clerks
- 42 Customer services clerks
 - 421 Cashiers, tellers and related clerks
 - 4211 Cashiers and ticket clerks
 - 4212 Tellers and other counter clerks
 - 4213 Bookmakers and croupiers
 - 4214 Pawnbrokers and money-lenders
 - 4215 Debt-collectors and related workers
 - 422 Client information clerks
 - 4221 Travel agency and related clerks
 - 4222 Receptionists and information clerks
 - 4223 Telephone switchboard operators
- 43 Office helping workers *
- 44 Post office *
- 45 Railway official, higher civil service *

Note 0006

(continued)

5 Personal service, service workers and shop and market sales workers

- 51 Personal and protective services workers
 - 511 Travel attendants and related workers
 - 5111 Travel attendants and travel stewards
 - 5112 Transport conductors
 - 5113 Travel guides
 - 512 Housekeeping and restaurant services workers
 - 5121 Housekeepers and related workers
 - 5122 Cooks
 - 5123 Waiters, waitresses and bartenders
 - 513 Personal care and related workers
 - 5131 Child care workers
 - 5132 Institution-based personal care workers
 - 5133 Home-based personal care workers
 - 5139 Personal care and related workers not elsewhere classified
 - 514 Other personal services workers
 - 5141 Hairdressers, barbers, beauticians and related workers
 - 5142 Companions and valets
 - 5143 Undertakers and embalmers
 - 5149 Other personal services workers not elsewhere classified
 - 515 Astrologers, fortune-tellers and related workers
 - 5151 Astrologers and related workers
 - 5152 Fortune-tellers, palmists and related workers
 - 516 Protective services workers
 - 5161 Fire-fighters
 - 5162 Police officers
 - 5163 Prison guards
 - 5169 Protective services workers not elsewhere classified
- 52 Models, salespersons and demonstrators
 - 521 Fashion and other models
 - 5210 Fashion and other models
 - 522 Shop salespersons and demonstrators
 - 5220 Shop salespersons and demonstrators
 - 523 Stall and market salespersons
 - 5230 Stall and market salespersons

6 Skilled agricultural and fishery workers

- 61 Market-oriented skilled agricultural and fishery workers
 - 611 Market gardeners and crop growers
 - 6111 Field crop and vegetable growers
 - 6112 Tree and shrub crop growers
 - 6113 Gardeners, horticultural and nursery growers
 - 6114 Mixed-crop growers
 - 612 Market-oriented animal producers and related workers
 - 6121 Dairy and livestock producers
 - 6122 Poultry producers
 - 6123 Apiarists and sericulturists
 - 6124 Mixed animal producers
 - 6129 Market-oriented animal producers and related workers not elsewhere classified
 - 613 Market-oriented crop animal producers
 - 6130 Market-oriented crop animal producers
 - 614 Forestry and related workers
 - 6141 Forestry workers and loggers
 - 6142 Charcoal burners and related workers
 - 615 Fishery workers, hunters and trappers
 - 6151 Aquatic-life cultivation workers
 - 6152 Inland and coastal waters fishery workers
 - 6153 Deep-sea fishery workers
 - 6154 Hunters and trappers
- 62 Subsistence agricultural and fishery workers
 - 621 Subsistence agricultural and fishery workers
 - 6210 Subsistence agricultural and fishery workers

7 Craft and related trades workers

- 71 Extraction and building trades workers
 - 711 Miners, shotfirers, stone cutters and carvers
 - 7111 Miners and quarry workers
 - 7112 Shotfirers and blasters
 - 7113 Stone splitters, cutters and carvers
 - 712 Building frame and related trades workers
 - 7121 Builders, traditional materials
 - 7122 Bricklayers and stonemasons
 - 7123 Concrete placers, concrete finishers and related workers
 - 7124 Carpenters and joiners
 - 7129 Building frame and related trades workers not elsewhere classified
 - 713 Building finishers and related trades workers
 - 7131 Roofers
 - 7132 Floor layers and tile setters
 - 7133 Plasterers
 - 7134 Insulation workers
 - 7135 Glaziers
 - 7136 Plumbers and pipe fitters
 - 7137 Building and related electricians
 - 714 Painters, building structure cleaners and related trades workers
 - 7141 Painters and related workers
 - 7142 Varnishers and related painters
 - 7143 Building structure cleaners
- 72 Metal, machinery and related trades workers
 - 721 Metal moulders, welders, sheetmetal workers, structural-metal preparers, and related trades workers
 - 7211 Metal moulders and coremakers
 - 7212 Welders and flamecutters
 - 7213 Sheet-metal workers
 - 7214 Structural-metal preparers and erectors
 - 7215 Riggers and cable splicers
 - 7216 Underwater workers
 - 722 Blacksmiths, tool-makers and related trades workers
 - 7221 Blacksmiths, hammer-smiths and forging-press workers
 - 7222 Tool-makers and related workers
 - 7223 Machine-tool setters and setter-operators
 - 7224 Metal wheel-grinders, polishers and tool sharpeners
 - 723 Machinery mechanics and fitters
 - 7231 Motor vehicle mechanics and fitters
 - 7232 Aircraft engine mechanics and fitters
 - 7233 Agricultural- or industrial-machinery mechanics and fitters
 - 724 Electrical and electronic equipment mechanics and fitters
 - 7241 Electrical mechanics and fitters
 - 7242 Electronics fitters
 - 7243 Electronics mechanics and servicers
 - 7244 Telegraph and telephone installers and servicers
 - 7245 Electrical line installers, repairers and cable jointers
- 73 Precision, handicraft, printing and related trades workers
 - 731 Precision workers in metal and related materials
 - 7311 Precision-instrument makers and repairers
 - 7312 Musical-instrument makers and tuners
 - 7313 Jewellery and precious-metal workers
 - 732 Potters, glass-makers and related trades workers
 - 7321 Abrasive wheel formers, potters and related workers
 - 7322 Glass-makers, cutters, grinders and finishers
 - 7323 Glass engravers and etchers
 - 7324 Glass, ceramics and related decorative painters

Note 0006

- 733 Handicraft workers in wood, textile, leather and related materials
 - 7331 Handicraft workers in wood and related materials
 - 7332 Handicraft workers in textile, leather and related materials
- 734 Printing and related trades workers
 - 7341 Compositors, typesetters and related workers
 - 7342 Stereotypers, and electrotypers
 - 7343 Printing engravers and etchers
 - 7344 Photographic and related workers
 - 7345 Bookbinders and related workers
 - 7346 Silk-screen, block and textile printers
- 74 Other craft and related trades workers
 - 741 Food processing and related trades workers
 - 7411 Butchers, fishmongers and related food preparers
 - 7412 Bakers, pastry-cooks and confectionary maker
 - 7413 Dairy-products makers
 - 7414 Fruit, vegetable and related preservers
 - 7415 Food and beverage tasters and graders
 - 7416 Tobacco preparers and tobacco products maker
 - 742 Wood treaters, cabinet-makers and related trades workers
 - 7421 Wood treaters
 - 7422 Cabinet-makers and related workers
 - 7423 Woodworking-machine setters and setter-operators
 - 7424 Basketry weavers, brush makers and related workers
 - 743 Textile, garment and related trades workers
 - 7431 Fibre preparers
 - 7432 Weavers, knitters and related workers
 - 7433 Tailors, dressmakers and hatters
 - 7434 Furriers and related workers
 - 7435 Textile, leather and related pattern-makers and cutters
 - 7436 Sewers, embroiderers and related workers
 - 7437 Upholsterers and related workers
 - 744 Pelt, leather and shoemaking trades workers
 - 7441 Pelt dressers, tanners and fellmongers
 - 7442 Shoe-makers and related workers
 - 751 Metal workers n.e.c. *
(skilled workers, semi-skilled workers, foremen, masters)
 - 752 Electronics engineers n.e.c. *
(skilled workers, semi-skilled workers, foremen, masters)
- 79 Master craftsman as supervisor *
- 8 Plant and machine operators and assemblers
 - 81 Stationary-plant and related operators
 - 811 Mining- and mineral-processing-plant operators
 - 8111 Mining-plant operators
 - 8112 Mineral-ore and stone-processing-plant operators
 - 8113 Well drillers and borers and related workers
 - 812 Metal-processing-plant operators
 - 8121 Ore and metal furnace operators
 - 8122 Metal melters, casters and rolling-mill operators
 - 8123 Metal-heat-treating-plant operators
 - 8124 Metal drawers and extruders
 - 813 Glass, ceramics and related plant operators
 - 8131 Glass and ceramics kiln and related machine operators
 - 8139 Glass, ceramics and related plant operators not elsewhere classified
 - 814 Wood-processing- and papermaking-plant operators
 - 8141 Wood-processing-plant operators
 - 8142 Paper-pulp plant operators
 - 8143 Papermaking-plant operators

Note 0006

(continued)

- 815 Chemical-processing-plant operators
 - 8151 Crushing-, grinding- and chemical-mixing-machinery-operators
 - 8152 Chemical-heat-treating-plant operators
 - 8153 Chemical-filtering- and separating-equipment operators
 - 8154 Chemical-still and reactor operators (except petroleum and natural gas)
 - 8155 Petroleum- and natural-gas-refining-plant operators
 - 8159 Chemical-processing-plant operators not elsewhere classified
- 816 Power-production and related plant operators
 - 8161 Power-production plant operators
 - 8162 Steam-engine and boiler operators
 - 8163 Incinerator, water-treatment and related plant operators
- 817 Automated-assembly-line and industrial-robot operators
 - 8171 Automated-assembly-line operators
 - 8172 Industrial-robot operators
- 82 Machine operators and assemblers
 - 821 Metal- and mineral-products machine operators
 - 8211 Machine-tool operators
 - 8212 Cement and other mineral products machine operators
 - 822 Chemical-products machine operators
 - 8221 Pharmaceutical- and toiletry products machine operators
 - 8222 Ammunition- and explosive-products machine operators
 - 8223 Metal finishing-, plating- and coating-machine operators
 - 8224 Photographic-products machine operators operators
 - 8229 Chemical-products machine operators not elsewhere classified
 - 823 Rubber- and plastic-products machine operators
 - 8231 Rubber-products machine operators
 - 8232 Plastic-products machine operators
 - 824 Wood-products machine operators
 - 8240 Wood-products machine operators
 - 825 Printing-, binding- and paper-products machine operators
 - 8251 Printing-machine operators
 - 8252 Bookbinding-machine operators
 - 8253 Paper-products machine operators
 - 826 Textile-, fur- and leather-products machine operators
 - 8261 Fibre-preparing-, spinning- and winding-machine operators
 - 8262 Weaving- and knitting-machine operators
 - 8263 Sewing-machine operators
 - 8264 Bleaching-, dyeing- and cleaning-machine operators
 - 8265 Fur- and leather-preparing-machine operators
 - 8266 Shoemaking- and related machine operators
 - 8269 Textile-, fur- and leather-products machine operators not elsewhere classified
 - 827 Food and related products machine operators
 - 8271 Meat- and fish-processing-machine operators
 - 8272 Dairy-products machine operators
 - 8273 Grain- and spice-milling-machine operators
 - 8274 Baked-goods, cereal and chocolate-products machine operators
 - 8275 Fruit-, vegetable- and nut-processing-machine operators
 - 8276 Sugar production machine operators
 - 8277 Tea-, coffee-, and cocoa-processing-machine operators
 - 8278 Brewers-, wine and other beverage machine operators
 - 8279 Tobacco production machine operators

Note 0006

(continued)

- 828 Assemblers
 - 8281 Mechanical-machinery assemblers
 - 8282 Electrical-equipment assemblers
 - 8283 Electronic-equipment assemblers
 - 8284 Metal-, rubber- and plastic-products assemblers
 - 8285 Wood and related products assemblers
 - 8286 Paperboard, textile and related products assemblers
- 829 Other machine operators and assemblers
 - 8290 Other machine operators and assemblers
- 83 Drivers and mobile-plant operators
 - 831 Locomotive-engine drivers and related workers
 - 8311 Locomotive-engine drivers
 - 8312 Railway breakers, signallers and shunters
 - 832 Motor-vehicle drivers
 - 8321 Motor-cycle drivers
 - 8322 Car, taxi and van drivers
 - 8323 Bus and tram drivers
 - 8324 Heavy truck and lorry drivers
 - 833 Agricultural and other mobile-plant operators
 - 8331 Motorised farm and forestry plant operators
 - 8332 Earth-moving- and related plant operators
 - 8333 Crane, hoist and related plant operators
 - 8334 Lifting-truck operators
 - 834 Ship's deck crews and related workers
 - 8340 Ship's deck crews and related workers
- 9 Elementary occupations, unskilled workers
 - 91 Sales and services elementary occupations
 - 911 Street vendors and related workers
 - 9111 Street food vendors
 - 9112 Street vendors, non-food products
 - 9113 Door-to-door and telephone salespersons
 - 912 Shoe cleaning and other street services elementary occupations
 - 9120 Shoe cleaning and other street services elementary occupations
 - 913 Domestic and related helpers, cleaners and launderers
 - 9131 Domestic helpers and cleaners
 - 9132 Helpers and cleaners in offices, hotels and other establishments
 - 9133 Hand-launderers and pressers
 - 914 Building caretakers, window and related cleaners
 - 9141 Building caretakers
 - 9142 Vehicle, window and related cleaners
 - 915 Messengers, porters, doorkeepers and related workers
 - 9151 Messengers, package, and luggage porters and deliverers
 - 9152 Doorkeepers, watchpersons, and related workers
 - 9153 Vending-machine money collectors, meter readers and related workers

- 10004 Workers with unidentifiable (not classifiable) or inadequately described job
- 10007 Refused
- 10008 Don't know
- 10009 No answer

Remarks:

(1) This occupational group is intended to cover persons who, as directors, chief executives or department managers, manage enterprises, organizations or departments, requiring a total of three or more managers.

(2) This occupational group is intended to include persons who, either on their own behalf or on behalf of a proprietor, manage enterprises or in some cases organizations with the help of non-managerial staff and no more than one other senior staff member, who should also be classified in this sub-major group, because this person's responsibilities will usually be more varied than those of a department manager in a larger enterprise or organization. Non-managerial staff should be classified according to their specific tasks.

(3) This is an additional code supplementing the ISCO-classification used by ALLBUS. It was taken from ISCO 88 (COM), the European Variant of ISCO.

Note 0007

Occupational Prestige Scale

This note concerns variables V193, V194, V224, V225, V271, V272, V315, V316, V341, V342, V358, V359, V719 and V720.

The occupational prestige scale is based on the ISCO classification of 1968 (comp. note 5).

The scores on this prestige scale are based on empirical data from social research in diverse countries. In each case respondents were asked to classify occupations according to their prestige or social esteem. These classifications were then used to construct a standardized scale of scores ranging between the hypothetical extreme values of 0 and 100.

As a rule, respondents are assigned prestige values according to their three-digit ISCO occupational categories. Whenever possible, undefinable and not classifiable cases (Code 1004) receive prestige values according to their occupational minor group. Cases which cannot be classified according to their occupational minor group receive the average prestige value of their occupational major group. Only the following categories from the occupational major group rest defined as 'missing':

One-digit	Prestige scale	
0	0	Not applicable
97	99.7	Refused
98	99.8	Don't know
99	99.9	No answer

For further explanation see:

Treiman, Donald J. 1977: Occupational Prestige in Comparative Perspective, New York: Academic Press.
(Compare in particular: Appendix A: Standard International Occupational Prestige)

Treiman, Donald J. 1979: Begriff und Messung des Berufsprestiges in der international vergleichenden Mobilitätsforschung, in: Franz Urban Pappi (ed.), Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum: 124 - 168.

Wolf, Christof 1995: Sozio-ökonomischer Status und berufliches Prestige. Ein kleines Kompendium sozialwissenschaftlicher Skalen auf Basis der beruflichen Stellung und Tätigkeit, in: ZUMA-Nachrichten 37: 102 - 136.

Note 0008**Standard International Occupational Prestige Scale (SIOPS)**

This note concerns variables V195, V196, V226, V227, V273, V274, V317, V318, V343, V344, V360, V361, V721 and V722.

The "Standard International Occupational Prestige Scale" is based on the ISCO classification of 1988. It was conceived as an alternative prestige measure to Treiman's occupational prestige scale (comp. Note 7), which is based on ISCO 1968.

Please be advised that there are as yet no SIOPS-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

Ganzeboom, Harry B. G. and Donald J. Treiman 1996:
Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations, in: Social Science Research 25: 124 - 168.

Note 0009

Magnitudeprestige Scale (MPS)

This note concerns variables V197, V198, V228, V229, V275, V276, V319, V320, V345, V346, V362, V363, V723 and V724.

The Magnitudeprestige Scale is based on an alternative measurement of social prestige created by Bernd Wegener. It is specifically modeled on the social context of the Federal Republic of Germany. While the Treiman scores are based on verbal judgments, the Magnitudeprestige Scale was constructed using a psychophysical measuring method. Unlike Treiman, who used prestige assessments based on a list of pre-quoted categories, Wegener relied on implicit ratio estimations of the relative magnitude of prestige. In two representative surveys (ZUMA-Bus 1979 and 1980), respondents were asked to consider 50 different occupations and to indicate their respective magnitude of social esteem by drawing lines of varying lengths. Using arithmetic transformations Wegener then constructed a standardized scale which describes a gradual mapping of social closure.

For further explanation see:

Wegener, Bernd 1984: Gibt es Sozialprestige? Konstruktion und Validität der Magnitude-Prestigeskala, ZUMA Arbeitsbericht 84/02.

Wegener, Bernd 1985: Gibt es Sozialprestige?, in: Zeitschrift für Soziologie 14: 209 - 235.

Note 0010

Ganzeboom's ISEI (for ISCO 1968 and ISCO 1988)

This note concerns variables V199-V202, V230-V233, V277-V280, V321-V324, V347-V350, V364-V367 and V725-V728.

In contrast to social prestige scales, this index of socio-economic status is constructed so as to include information on the educational level and the income connected to an occupational position. For ALLBUS, two versions of the index, based on ISCO 1968 and ISCO 1988 respectively, were constructed.

Please be advised that there are as yet no ISEI-scores for the incomplete codes and the general categories of ISCO.

For further explanation see:

Ganzeboom, Harry B. G., Paul M. De Graaf, Donald J. Treiman and Jan de Leeuw 1992: A Standard International Socio-Economic Index of Occupational Status, in: Social Science Research 21: 1 - 56.

Wolf, Christof 1997: The ISCO-88 International Standard Classification in Cross-National Survey Research, in: Bulletin de Methodologie Sociologique 54: 23 - 40.

Note 0011

Occupational Minor Groups

This note concerns variables V203, V234, V281, V325, V351, V368 and V729.

Categories 01 to 99 correspond to the minor groups of ISCO 1968 while categories 101 to 109 were created by ZUMA:

001	Chemists, physicists and related professions
002	Architects, engineers and related technicians
003	Architects, engineers and related technicians
004	Aircraft and ships' officers
005	Life scientists and related life science technicians
006	Medical, dental, veterinary and related professions
007	Medical, dental, veterinary and related professions
008	Statisticians, mathematicians, system analysts and related technicians
009	Economists
011	Accountants
012	Jurists
013	Teachers
014	Workers in religion
015	Authors, journalists, and related writers
016	Sculptors, painters, photographers and related creative artists
017	Musicians, composers, dancers and performing artists
018	Athletes, sportsmen and related workers
019	Professionals, scientists, technical and related workers not elsewhere classified
020	Legislative officials and government administrators
021	Managers
030	Clerical supervisors
031	Government executive officials
032	Stenographers, typists, and card- and tape-punching machine operators
033	Bookkeepers, cashiers and related workers
034	Computing machine operators
035	Transport and communication supervisors
036	Transport conductors
037	Mail distribution clerks
038	Telephone and telegraph operators
039	Clerical and related workers not elsewhere classified
040	Managers (wholesale and retail trade)
041	Working proprietors (wholesale and retail trade)
042	Sales supervisors and buyers
043	Technical salesman, commercial travellers and manufacturers' agents
044	Insurance, real estate, securities and business services salesman, and auctioneers
045	Salesmen, shop assistants and related workers
049	Sales workers not elsewhere classified
050	Managers (catering and lodging services)
051	Working proprietors (catering and lodging services)
052	Housekeeping and related service supervisors
053	Cooks, waiters, bartenders and related workers
054	Maids and related housekeeping service workers not elsewhere classified
055	Building caretakers, charworkers, cleaners and related workers
056	Launderers, dry-cleaners and pressers
057	Hairdressers, barbers, beauticians and related workers
058	Protective service workers not elsewhere classified
059	Service workers not elsewhere classified
060	Farm managers and supervisors
061	Farmers (including specialized farmers)
062	Agricultural and animal husbandry workers
063	Forestry workers
064	Fishermen, hunters and related workers
070	Production supervisors and general foremen
071	Miners, quarrymen, well drillers and related workers
072	Metal processors
073	Wood preparation workers and paper makers

Note 0011

(continued)

074 Chemical processors and related workers
075 Spinners, weavers, knitters, dyers and related workers
076 Tanners, fellmongers and pelt dressers
077 Food and beverage processors
078 Tobacco preparers and tobacco product managers
079 Tailors, dressmakers, sewers, upholsterers and related workers
080 Shoemakers and leather goods makers
081 Cabinetmakers and related woodworkers
082 Stone cutters and carvers
083 Blacksmiths, toolmakers and machine-tool operators
084 Machinery fitters, machine assemblers and precision instrument makers (except electrical)
085 Electrical fitters and related electrical and electronics workers
086 Broadcasting station and sound equipment operators and cinema projectionists
087 Plumbers, welders, sheet metal and structural metal preparers and erectors
088 Jewellery and precious metal workers
089 Glass formers, potters and related workers
090 Rubber and plastics product makers
091 Paper and paperboard products makers
092 Printers and related workers
093 Painters
094 Production and related workers not elsewhere classified
095 Bricklayers, carpenters and other construction workers
096 Stationary engine and related equipment operators
097 Material-handling and related equipment operators, dockers and freight handlers
098 Transport equipment operators
099 Labourers not elsewhere classified

101 Soldiers (Armed forces)
102 Officers (Armed forces)

104 Workers with undefinable (not classifiable) and inadequately described job

107 Refused
108 Don't know
109 No answer
000 Not applicable

Note 0012

The Goldthorpe Class Scheme

This note concerns variables V205, V236, V283, V327, V353, V370 and V731.

The class scheme by Goldthorpe groups individuals on the basis of their occupational position (reference number) and their occupational function (using ISCO 1968). By combining these two variables, 12 different class categories are then constituted.

Please note that in contrast to earlier practice 'farmers on a cooperative farm' have been classified in a special category (12) since 1996. To make data from earlier ALBUS surveys compatible with this practice, simply recode all respondents who classify as 'farmer on a cooperative farm' in the occupational position variable (reference number 65) to code 12 in the corresponding Goldthorpe variable.

In contrast to an 'hierarchical' scale of social prestige or status, the Goldthorpe index reflects a concept of class structure based on employment relations. This makes the index especially useful in analyzing, for example, the development of industrial societies into service societies, because the categories of the Goldthorpe class scheme allow a more precise analysis and description of the growth or decline of different parts of the middle classes or of various groups of dependent employees and civil servants than scales which consist of horizontally differentiated ordinal status or prestige measures.

Moreover, the Goldthorpe class scheme in its present form was conceived with a view to internationally comparative analyses. Today, it is therefore widely used in comparative analyses of social mobility.

For further information see:

Beckmann, Petra and Reiner Trometer 1991: Neue Dienstleistungen des ALLBUS: Haushalts- und Familientypologien, Klassenschema nach Goldthorpe, in: ZUMA-Nachrichten 28: 7 - 17.

Goldthorpe, John H. 1980: Social Mobility and Class Structure in Modern Britain, Oxford: Clarendon Press. (As an explanation of the theoretical background.)

Note 0013**Income Variables**

This note concerns variables V379 to V382 and V437 to V442.

Respondent's income

Variable V381 contains a summary of the responses to V379 (open question) and V380 (pre-quoted categories). For each of the listed categories in V380 the mid-point of class entered into the summary. The lowest income category 'Under 200 EURO' received the value 150 EURO, while the highest open category of '7500 EURO' was coded as 8750 EURO.

Variable V382 contains a categorization of the data in V381.

Household income

V439 (open question) and V440 (pre-quoted categories) are based on the information about the income of multiple-person households in V437 and V438. For one-person households, income data from V379 and V380 (respondent's income) was added, as the income of these households is identical with the respondent's income.

V441 is a proposal for the summary of the diverse information on household income. This variable integrates all the data gathered using open questions as well as lists of pre-quoted categories. For each of the listed categories the mid-point of class entered into the summary. The open categories at the beginning ('under 200 EURO') and the end ('7500 EURO and more') of the list were coded as 150 EURO and 8750 EURO respectively.

Variable V442 contains a categorization of the data in V441.

Note 0014**Religious Denomination**

This note concerns variable V500.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

1. A The Roman Catholic church
2. B The German Protestant church
(excluding free churches)
3. C A Protestant free church
4. D Another Christian denomination
5. E Another non-Christian religion
6. F No religious affiliation

Note 0015

Voting Intention: Federal Election

This note concerns variable V506.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

01. The Christian Democratic/Christian Social Union
<"CDU bzw. CSU">
02. The Social Democratic Party <"SPD">
03. The Free Democratic Party <"FDP">
04. The Greens <"Bündnis 90 / Die Grünen">
05. National Democratic Party of Germany <"NPD">
06. The Republicans <"Die Republikaner">
07. The Left Party. Party of Democratic Socialism
<"Die Linkspartei. PDS">
08. Other party, please specify:...
09. Wouldn't vote <was not read out>

Note 0016**Interruption During Interview?**

This note concerns variable V524.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

1. Yes, sometimes
2. Yes, often
3. No

Note 0017**Reliability of Respondent's Answers**

This note concerns variable V526.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

1. On the whole reliable
2. On the whole less reliable
3. On some questions less reliable
(Int.: Please specify questions:)

Note 0018**Split Questionnaire ISSP**

This note concerns variables V529 and V621 as well as the questions of the ISSP-modules they serve to introduce.

The 2005 and 2006 modules of the "International Social Survey Programme" were fielded as part of the ALLBUS 2006 survey. Data collection for both modules therefore falls into 2006. By surveying ALLBUS and ISSP together, overall survey costs could be reduced and the ISSP modules were able to profit from the qualitatively superior sample of individuals regularly used for ALLBUS.

During the interviews, a split variable randomly assigned ALLBUS respondents to one of the two ISSP-modules so that each ISSP-questionnaire was completed by one half of the respondents participating in the ALLBUS interviews.

ISSP 2005 "Work Orientations" - V528-V619 in ALLBUS 2006
ISSP 2006 "Role of Government" - V620-V694 in ALLBUS 2006

Note 0019**Top-Bottom-Scale**

This note concerns variables V607 and V682.

This variable has been recoded so as to conform with the standard ALLBUS coding. The sequence of answer categories shown in the data handbook therefore deviates from that actually used in the field.

Actual sequence of answer categories used in the field:

01. Top
- 02.
- 03.
- 04.
- 05.
- 06.
- 07.
- 08.
- 09.
10. Bottom

Note 0020

10-Item Short Version of the Five-Factor Model of Personality ("Big Five Inventory")

This note concerns variables V608 to V617 and V683 to V692.

A 10-item short version of the Big Five Inventory measuring personality dimensions was surveyed as part of the two ISSP-questionnaires.

Extraversion:

V608/V683 BIG FIVE: R IS RESERVED
V613/V688 BIG FIVE: R IS OUTGOING, SOCIABLE

Agreeableness:

V609/V684 BIG FIVE: R IS GENERALLY TRUSTING
V614/V689 BIG FIVE: R FINDS FAULT W OTHERS

Conscientiousness:

V610/V685 BIG FIVE: R DOES A THOROUGH JOB
V615/V690 BIG FIVE: R TENDS TO BE LAZY

Neuroticism:

V611/V686 BIG FIVE: R IS RELAXED
V616/V691 BIG FIVE: R GETS NERVOUS EASILY

Openness to experience:

V612/V687 BIG FIVE:R HAS ACTIVE IMAGINATION
V617/V692 BIG FIVE:R HAS FEW ARTISTIC INTERESTS

Note 0021

Metaclassification of Occupations

This note concerns variables V715 to V731.

For those respondents who are not in the labor force, the metaclassification of occupations allows an indirect occupational classification, e.g. according to the profession or occupation of the respondent's spouse or father. Thus, the purpose of the metaclassification is to arrive at a description of the social circumstance and social positions of otherwise unclassifiable respondents by (indirectly) linking them to positions in the occupational system in a principled way.

For further explanation see:

Pappi, Franz Urban 1979: Sozialstrukturanalysen mit Umfragedaten. Probleme der standardisierten Erfassung von Hintergrundmerkmalen in allgemeinen Bevölkerungsumfragen, Königstein/Ts.: Athenäum.

Pappi points out that there is probably more than one way of constructing a metaclassification of occupations (Pappi 1979: 297). As an alternative to Pappi's rather male-centered operationalization (e.g. married women are classified according to their husbands' occupation), Michael Terwey has developed a modified metaclassification scheme that gives more weight to women's direct social position (V582-V598). This more recent classification thus takes into account that in contemporary society it is more and more the individual's personal circumstance rather than his or her family's social capital that determines social position.

The construction of Terwey's metaclassification proceeds in the following steps:

- 1) All respondents who are employed full-time or part-time are classified according to their own current occupation.
- 2) All respondents who were formerly employed full-time or part-time are categorized according to their last occupational status.
- 3) Only those married women and men who themselves have never been employed before are classified according to their spouses' occupation. If the spouse is a pupil/student, a housewife/househusband or doing compulsory military/alternative community service, classification is based on the father's occupation. For former ALLBUS-surveys the spouse's last occupation was used for categorization if the spouse was retired, unemployed or out of work for other reasons. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 4) In previous ALLBUS-surveys, respondents who were widowed, divorced or living in separation and who had never been employed themselves were categorized according to their previous spouse's occupation. As this information is not available since ALLBUS 1994, these cases are coded as not classifiable.
- 5) All unmarried respondents who have never been employed themselves are categorized using their father's occupation.
- 6) Insofar as they cannot be considered full-time or part-time employed in the sense of this metaclassification, respondents in compulsory military or alternative community service and those in vocational training represent a general exception. For these and for all other respondents who have no identifiable main occupation, the nearest possible occupational position is used. Married respondents in this group are, for example, categorized according to their spouses' current occupation or, if this is impossible, according to their fathers' occupation.

Note 0021

(continued)

If a missing value ('Refused', 'Don't know' or 'No answer') appears within an occupation code relevant for metaclassification or if, for any other reason, occupational information does not permit a metaclassification according to a main occupation, the case is also coded as not classifiable.

Unfortunately, it was impossible to implement Pappi's metaclassification of occupations with the data available in ALLBUS 2006 due to cuts in the ALLBUS-demography module (for more information on the cuts, please consult the Methodological Report for ALLBUS 1994).

Note 0022

Household Classification, Detailed;
Household Classification, Condensed;
Family Typology According to Porst (1984)

This note concerns variables V732 to V734.

Household and family structures are relevant subjects of empirical sociological research for political, sociological and methodological reasons (cf. Porst 1984). Using an SPSS-program, suitable data has been extracted from the ALLBUS-household-demographics to form two household classifications, one detailed and one condensed, as well as a family typology (cf. Funk 1989). Together, these three typologies map the variety of family types and household compositions, thus forming a basis for further structural analysis.

The condensed household classification differentiates between one-person households, one- to four-generation-households, households of relatives with and without a family core - i.e. households with at least one member related to the others by kinship yet outside the line of descent - and between cohabiting communities with and without a family core. As relevant microstructures within these nine basic types of household, the detailed household classification distinguishes various combinations of kinship relations and the respondent's position within the context of the household (e.g. the detailed classification of households differentiates between married and cohabiting couples in one-generation-households and between two-generation-households in which the respondent takes the role of child and those in which the respondent takes the role of parent).

As an extension of the household-classifications, the family typology identifies nuclear families, two- to four-generation-families (in all cases differentiating complete and incomplete families), extended families (i.e. households of relatives with a family core) and composite families (i.e. cohabiting communities with a family core).

Household-classification according to Porst, detailed

010	H1A	Singles living alone
020	H1B	Singles living alone, separated, divorced, widowed
030	H2A	Cohabiting couples
040	H2B	Married couples
051	H3A	Single adults with at least one child, respondent is single parent
052	H3A	Single adults with at least one child, respondent is child of a single parent
061	H3B	Cohabiting couples with single children, respondent is parent of the single child. The case 'respondent is partner of the single child's parent' can only be coded, if the respondent calls the child 'step-child'
064	H3B	Cohabiting couples with single children, respondent is single and the child of both partners
081	H3D	Cohabiting couples with grandchildren, respondent is grandchild's grandparent
091	H3E	Married couples, all children are single; complete nuclear family, respondent is parent
092	H3E	Married couples all children are single; complete nuclear family, respondent is child
093	H3E	Separated, divorced, widowed adults, all children are single; incomplete nuclear family, respondent is parent
094	H3E	Separated, divorced, widowed adults, all children are single; incomplete nuclear family, respondent is child
101	H3F	Married couples with at least one non-single child; possibly other single children, complete two-generation-family, respondent is parent

Note 0022

(continued)

- 102 H3F Separated, divorced, widowed adults with at least one non-single child; possibly other single children, incomplete two-generation-family, respondent is parent
- 103 H3F Married couples with at least one non-single child; possibly other single children, complete two-generation-family, respondent is child and single
- 107 H3F Married couples with at least one non-single child; possibly other single children; two-generation-families with two persons of the parent-generation, respondent is non-single child or this child's spouse
- 108 H3F Married couples with at least one non-single child; possibly other single children; two-generation-families with one parent/parent-in-law, respondent is non-single child or this child's spouse
- 111 H3G Married couples with grandchildren, older generation complete, respondent is grandparent
- 112 H3G Married couples with grandchildren, older generation incomplete, respondent is grandparent
- 115 H3G Married couples with grandchildren, two persons of the older generation, respondent is grandchild
- 116 H3G Married couples with grandchildren, one person of the older generation, respondent is grandchild
- 121 H4 Members of three generations in linear succession, at least one person of each generation regardless of the marital status must actually live in the household; respondent is grandparent, i.e., apart from the respondent, one child or child-in-law and one grandchild have to live in the household
- 122 H4 Members of three generations in linear succession, at least one person of each generation regardless of the marital status must actually live in the household; respondent is parent, i.e., apart from the respondent, at least one parent or parent-in-law and one child must live in the household
- 123 H4 Members of three generations in linear succession, at least one person of each generation regardless of the marital status must actually live in the household; respondent is child, i.e., apart from the respondent at least one grand-parent and one parent or parent-in-law must live in the household
- 132 H5 Four-generation-households; members of four successive generations, at least one person each of three generations must actually live in the household, of which at least one person belongs to the first and one person to the last generation; respondent is parent, i.e., apart from the respondent, at least one parent and on grandchild must live in the household
- 133 H5 Four-generation-households; Members of four successive generations, at least one person each of three generations must actually live in the household, of which at least one person belongs to the first and one person to the last generation; respondent is child, i.e., apart from the respondent, at least one grandparent and one of his/her own children must live in the household
- 140 H6 Households of relatives with family core; all households of types H2B and H3E to H5 with additionally at least one person related to household members, but not in the linear succession of generations.
- 150 H7A Households of relatives without family core; households of types H2A, H3A-H3D with at least one additional relative outside of the linear succession of generations

Note 0022

(continued)

170	H7C	Only relatives not in the linear succession of generations
180	H8	People sharing a flat with family core; households of types H2B and H3E to H6 with at least one person not related with the household members
190	H9	People sharing a flat; households of persons without kinship relations, excluding households made up of a cohabiting couple and its children (i.e. excluding H2A and H3B to H3D).
000		Not classifiable
999		No answer

Note 0023**Personal Weight for Eastern Oversample**

This note concerns variable V735.

This weight adjusts the ALLBUS 2006 data for the oversample of respondents from East Germany. While analyses of unweighted data have to consider the two parts of Germany separately due to the oversample, weighted data can be treated as representative of total Germany.

For detailed information see:

Haarmann, Alexander, Evi Scholz, Martina Wasmer, Michael Blohm and Janet Harkness 2006: Konzeption und Durchführung der "Allgemeinen Bevölkerungsumfrage der Sozialwissenschaften" (ALLBUS) 2004, Mannheim: ZUMA-Methodenbericht Nr. 2006/06.

Bens, Arno 2006: Zur Auswertung haushaltsbezogener Merkmale mit dem ALLBUS 2004, in: ZA-Information 59: 143 - 156.

Note 0024**Weights for Analyses on Household Level**

This note concerns variables V736 to V738.

As the ALLBUS-survey 2006 is based on a sample of individuals rather than households, the data has to be weighted for analyses concerning attributes of households in order to adjust for the over-representation of large households due to the survey design. For analyses treating East and West Germany separately, the appropriate transformation weight is V736. Analyses of data on total Germany should be performed using the transformation weight in V738, which additionally adjusts for the oversample of East German respondents. (The weight in V738 is calculated as the product of the transformation weight in V736 and the household-level design weight in V737, which adjusts for the oversample of East German respondents.)

Missing values in V736 and V738 result from insufficient data on the number and age of persons living in the same household as the respondent.

For detailed information see:

Bens, Arno 2006: Zur Auswertung haushaltsbezogener Merkmale mit dem ALLBUS 2004, in: ZA-Information 59: 143 - 156.

Note 0025

Political Size of Municipality and BIK-Type of Municipality

This note concerns variables V740 and V741.

Size of Municipality (V740) categorizes the respondent's place of residence according to its number of inhabitants. For reasons of data protection uncategorized data of this kind cannot be published. Categorization of the respondent's place of residence is based on information about its size as a political or administrative unit.

Because political or administrative units in many cases do not provide an accurate description of the type of community in which a respondent actually lives (allowing no differentiation between small rural and suburban communities, for example), supplementary regional variables were introduced into the ALLBUS program.

As of 2002, ALLBUS uses the updated BIK-Regions (V741) by 'BIK-Institut Aschpurwis + Behrens', which, for the first time, provide a taxonomy of regions based on a uniform set of data for both East and West Germany. Similar to the 'Boustedt-type of Municipality', classification is primarily based on the number of residents of a given urban region. The BIK-Regions classification, however, additionally takes into account the catchment area of an urban core by factoring in information about the quota of commuters from the surrounding area. All in all four different types of region are distinguished: core areas, conurbation areas, transitional areas and peripheral areas. Thus, catchment areas of large cities are identifiable down to community level. Only communities that do not belong to any of the four types of region are classified according to the 'political size of municipality'.

For further explanation see:

Behrens, Kurt 1994: Schichtung und Gewichtung - Verbesserung der regionalen Repräsentanz, in: Siegfried Gabler, Jürgen H.P. Hoffmeyer-Zlotnik and Dagmar Krebs (eds.), Gewichtung in der Umfragepraxis, Opladen: Westdeutscher Verlag: 24 - 41.

Appendix

Notes on the Additional ALLBUS / GGSScompact 2006 (ZA No. 4503)

As an alternative to ALLBUS / GGSS 2006 with its relatively complex demography module, ZA also offers an additional compact version with a reduced number of demographic variables. Providing an easily manageable selection of basic demographic descriptors, this ALLBUS / GGSScompact addresses, amongst others, the needs of newcomers to data analysis. Moreover, access conditions for ALLBUS / GGSScompact are less strict than for the more extensive ALLBUS / GGSS data, because data protection issues become less salient.

Nevertheless, remaining data protection issues required changes in certain sensitive variables. When part of the ALLBUS / GGSS survey in question, detailed data concerning the respondents' citizenship was dichotomized ("German citizenship" vs. "No German citizenship"). The information on the respondents' occupational position was recoded into more inclusive categories. Finally, the two largest categories of the variable 'Political Size of Municipality' were combined. (A detailed account of recodings follows on page A3.)

Apart from demography, all other questions have been retained completely in the compact version. Moreover, variable labels and variable numbers in ALLBUS / GGSScompact are the same as in the unabridged ALLBUS / GGSS data set. In this way, users may easily move between both versions of the ALLBUS / GGSS data if necessary.

Demographic Variables in ALLBUS / GGSScompact 2006

V4	REGION OF INTERVIEW: WEST - EAST
V5	GERMAN CITIZENSHIP? (recoded)
V27	RESPONDENT: AGE
V28	RESPONDENT: AGE, CATEGORIZED

V506	VOTING INTENTION: FEDERAL ELECTION
V715	OCCUPATION, METAClassification <TERWEY>
V740	POLITICAL SIZE OF MUNICIPALITY (recoded)

Overview of Recoded Variables in ALLBUS / GGSScompact 2006

V5 GERMAN CITIZENSHIP?

1. Yes, I have German citizenship

(Codes 1, 2 in the unabridged version of ALLBUS / GGSS 2006)

2. No, I don't have German citizenship

(Codes 0, 3 in the unabridged version of ALLBUS / GGSS 2006)

V740 POLITICAL SIZE OF MUNICIPALITY

01. Up to 1,999 inhabitants

02. 2,000 - 4,999 inhabitants

03. 5,000 - 19,999 inhabitants

04. 10,000 - 49,999 inhabitants

05. 50,000 - 99,999 inhabitants

06. 100,000 inhabitants and more

(Codes 6 and 7 in the unabridged version of ALLBUS / GGSS 2006)
