# **Supplement to Data Handbook ALLBUS / GGSS 1980-2008**

**Cologne and Mannheim: GESIS 2010**

Release number: 01/00/00

Release date: 10.08

## Preliminary remarks on this supplement to the ALLBUS / GGSS 1980-2008 Data Handbook:

In the data handbook for ALLBUS / GGSS 1980-2008 all crosstables containing data for *total Germany* have been weighted using the East-West design weight (V1324). This weight adjusts for the *oversample* of respondents from the new federal states (East Germany) so that the crosstables in the data handbook are readily interpretable for total Germany.

As a consequence of weighting, the marginals documented in the data handbook differ from the *factual distribution of responses in the unweighted data file*. To complement the documentation of weighted crosstables in the data handbook, this supplement therefore contains crosstables of the unweighted data. The purpose of the following tables is to document the factual distribution of responses in the data file. Please be aware that the data has not been adjusted for the *oversample* and thus cannot be directly interpreted as representative of total Germany.
