## Acknowledgements

---

The fieldwork of the 2008 European Values Study (EVS) was financially supported by universities and research institutes, national science foundations, charitable trusts and foundations, companies and church organizations in the EVS member countries.

A major sponsor of the surveys in several Central and Eastern European countries was Renovabis.

Renovabis - Solidarity initiative of the German Catholics with the people in Central and Eastern Europe: Project No. MOE016847 <http://www.renovabis.de/>.

An overview of all national sponsors of the 2008 survey is provided in the "EVS 2008 Guidelines and Recommendations", the "EVS 2008 Method Report", and on the website of the European Values Study <http://www.europeanvaluesstudy.eu/evs/sponsoring.html>.

The project would not have been possible without the National Program Directors in the EVS member countries and their local teams.

Gallup Europe developed a special questionnaire translation system WebTrans, which appeared to be very valuable and enhanced the quality of the project.

Special thanks also go to the teams at Tilburg University, CEPS/INSTEAD Luxembourg, and GESIS Data Archive for the Social Sciences Cologne.

## Introduction and preliminary remarks

The variable documentation provided for every national dataset of the 2008 wave of the European Values Study consists of two main parts. The English Variable Report offers a description of the data on study and variable level and contains frequency counts for almost all variables. The supplementary bilingual variable documentation (English/original language) supports direct comparisons of English master questions with original questions as used in the field questionnaires.

### English Variable Report

The Variable Report at hand is structured into six sections

- Section 1 provides brief information on the European Values Study.
- Section 2 gives an overview of all data and documentation available and information on how to access.
- Section 3 contains methodological information on origin and content of the data.
- Section 4 refers to the structure of the dataset and standardization efforts made.
- Section 5 provides information on variable documentation and notes added.
- The last section contains the Variable Documentation. It describes variables in the data file in terms of relevant metadata and frequency distribution.

### Bilingual variable documentation

The figure below gives an overview of all languages fielded in the EVS 2008 member countries. For each language, a bilingual variable documentation is provided including the original question wording.

#### Data access

Primary data for statistical analysis and related documentation (English Master Questionnaire, national field questionnaires, variable reports, and method reports) are made available online by the [GESIS Data Catalogue](#).

#### Anonymized data

According to data regulations in participating countries, only anonymized data are made available to users. Each national team was responsible for checking their data confidentiality before depositing data.

#### Citation requirements

Publications based on EVS data should acknowledge this by means of bibliographic citations as listed in the Study Description under item "Citation". To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

#### Usage requirement

To provide funding agencies with essential information about the use of EVS data and to facilitate the exchange of information about the EVS, users of EVS data are required to send bibliographic citations and/or electronic copies of each completed report, article, conference paper or thesis abstract using EVS data to the EVS team. Then, these will be included in the EVS repository. For more information, see <http://www.europeanvaluesstudy.eu/evs/publications/>.

#### Disclaimer

EVS, GESIS, and the producers bear no responsibility for the use of EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

## 1 European Values Study 1981-2008

The European Values Study is the most comprehensive research project on human values in Europe. It is a large-scale, cross-national, and longitudinal survey research program on how Europeans think about family, work, religion, politics and society. Repeated every nine years in an increasing number of countries, the survey provides insights into the ideas, beliefs, preferences, attitudes, values, and opinions of citizens all over Europe.

The research program was initiated by the European Value System Study Group (EVSSG) in the late 1970s and has emerged as a well-established network of social and political scientists aiming at high standards in data creation and processing. From 1981 to 2008 four waves of survey were conducted in European and other countries. These surveys explore value differences, similarities, and value changes among citizens of the EVS member countries.

### Survey 2008

The fourth wave has a persistent focus on a broad range of values. Questions with respect to family, work, religious, political and societal values are highly comparable with those in earlier waves (1981, 1990 and 1999). This longitudinal scope of the study makes it possible to study trends in time. The EVS has an increasing international and regional coverage. In 2008 it covers 47 countries/regions of Europe. Table 1 gives an overview of countries participating in EVS waves and year of fieldwork.

Large efforts were taken to guarantee high scientific standards in developing and translating the Master Questionnaire and the field questionnaires, in high quality fieldwork, and standardized data processing and documentation.

A set of guidelines and recommendations was set up and the whole process of data creation and processing was guided and monitored by the EVS advisory groups. Data processing and documentation was implemented in a close cooperation with the EVS member countries. Further information and documentation is given at <http://www.europeanvaluesstudy.eu/evs/surveys/survey-2008.html>.

## 2 Access to data and documentation

The data and documentation of the four EVS waves is publicly available on the EVS and GESIS websites.

The documentation created for the fourth EVS wave includes both the guidelines and standards developed to produce comparable data and detailed information on peculiarities of the national datasets at study as well as at variable level.

**Data:** Beside the Integrated Dataset the national datasets, including additional country-specific variables, are provided for national rather than multinational use.

**Study Description:** Study description offers methodological information on origin and content of the data and overviews on dataset versions and errata.

**Reports:** Standards and recommendations designed by the EVS advisory groups for all countries are compiled in the report "EVS 2008 Guidelines and Recommendations". The "EVS 2008 Method Report" includes both summarized information on the Integrated Dataset and country reports with country-specific information on the origin of the national datasets. It is based on the methodological questionnaires submitted by all EVS member countries. The report "EVS 2008 Project and Data Management" provides insights into the origin of the data and documentation, the project workflow, and the tools used.

**Variable documentation:** Variable reports cover the documentation of the national dataset with question texts of the English Master Questionnaire as well as frequency counts for almost all variables. The report is supplemented by bilingual (English/original language) variable documentation for each language fielded in a country.

**Questionnaires:** Field questionnaires in all languages fielded are downloadable as well.

### Access to EVS data and documentation

#### General study information

The EVS website ([www.europeanvaluesstudy.eu](http://www.europeanvaluesstudy.eu)) covers comprehensive information on the origin of the project and provides access to all data and documentation available for EVS surveys.

#### Data and documentation download

Data and documentation can be obtained at the GESIS Data Archive for the Social Sciences in Cologne through their online download facilities GESIS Data Catalogue (<http://gesis.org/data-catalogue/>) and ZACAT-Online Study Catalogue (<http://zcat.gesis.org/>).

**GESIS Data Catalogue** contains study descriptions for all datasets providing information on the origin of data, version history, and errata. It supports direct access to data and documentation for download.

**ZACAT** provides data and documentation for retrieval purposes and data exploration. It assists users in identifying trend variables of all EVS waves. Furthermore, it enables comparisons of original questions in survey languages of the third and fourth wave.<sup>1</sup>

ZACAT: <http://zcat.gesis.org/webview/index.jsp?object=http://zcat.gesis.org/obj/fCatalog/Catalog5>

Data analyses and data downloads are possible after registration.

#### Online variable information

Extended Study Description (<http://info1.gesis.org/EVS/Studies>): The extended Study Description for the EVS 2008 provides country-specific information on the origin and outcomes of the national surveys.

Online Variable Overview (<http://info1.gesis.org/EVS/Variables>): The variable overview allows for comparisons of trend variables of the four EVS waves 1981, 1990, 1999, and 2008. In addition, comparisons of original question texts across the waves 1999 and 2008 are supported.

#### Full-text retrieval

[Question text retrieval](#) is a facility for word/phrase searches in EVS text documents. It supports full-text searches in the master questionnaire and variable reports on the EVS integrated datasets and national datasets.<sup>2</sup>

#### Publication

EVS Repository ([www.europeanvaluesstudy.eu/evs/publications/](http://www.europeanvaluesstudy.eu/evs/publications/)) contains direct links to publications based on the data of the European Values Study. A subset of the publications is enhanced by additional information on the data, interview questions, and descriptions of variable construction.

#### Atlas of European Values "Trends and Traditions at the turn of the Century"

The Atlas of European Values ([www.atlasofeuropeanvalues.eu](http://www.atlasofeuropeanvalues.eu)) unlocks the results of the European Values Study project for the general public. It presents values, beliefs, attitudes, and opinions through graphs, charts, and maps.

#### Secondary education

For secondary education, an interactive website offers courses and modules in different languages to provide a better understanding of European values in the classroom (<http://www.europeanvaluesstudy.eu/evs/education.html>).

### 3.2 Study scope

#### Abstract

Moral, religious, societal, political, work, and family values of Europeans.

#### Topics

1. **Perceptions of life:** importance of work, family, friends and acquaintances, leisure time, politics and religion; frequency of political discussions with friends; happiness; self-assessment of own health; memberships and unpaid work (volunteering) in: social welfare services, religious or church organisa-

tions, education, or cultural activities, labour unions, political parties, local political actions, human rights, environmental or peace movement, professional associations, youth work, sports clubs, women's groups, voluntary associations concerned with health or other groups; tolerance towards minorities (people with a criminal record, of a different race, left/right wing extremists, alcohol addicts, large families, emotionally unstable people, Muslims, immigrants, AIDS sufferers, drug addicts, homosexuals, Jews, gypsies and Christians - social distance); trust in people; estimation of people's fair and helpful behaviour; internal or external control; satisfaction with life.

2. **Work:** reasons for people to live in need; importance of selected aspects of occupational work; employment status; general work satisfaction; freedom of decision-taking in the job; importance of work (work ethics, scale); important aspects of leisure time; attitude towards following instructions at work without criticism (obedience work); give priority to nationals over foreigners as well as men over women in jobs.

3. **Religion:** Individual or general clear guidelines for good and evil; religious denomination; current and former religious denomination; current frequency of church attendance and at the age of 12; importance of religious celebration at birth, marriage, and funeral; self-assessment of religiousness; churches give adequate answers to moral questions, problems of family life, spiritual needs and social problems of the country; belief in God, life after death, hell, heaven, sin and re-incarnation; personal God versus spirit or life force; own way of connecting with the divine; interest in the sacred or the supernatural; attitude towards the existence of one true religion; importance of God in one's life (10-point-scale); experience of comfort and strength from religion and belief; moments of prayer and meditation; frequency of prayers; belief in lucky charms or a talisman (10-point-scale); attitude towards the separation of church and state.

4. **Family and marriage:** most important criteria for a successful marriage (scale); attitude towards childcare (a child needs a home with father and mother, a woman has to have children to be fulfilled, marriage is an out-dated institution, woman as a single-parent); attitude towards marriage, children, and traditional family structure (scale); attitude towards traditional understanding of one's role of man and woman in occupation and family (scale); attitude towards: respect and love for parents, parent's responsibilities for their children and the responsibility of adult children for their parents when they are in need of long-term care; importance of educational goals; attitude towards abortion.

5. **Politics and society:** political interest; political participation; preference for individual freedom or social equality; self-assessment on a left-right continuum (10-point-scale); self-responsibility or governmental provision; free decision of job-taking of the unemployed or no permission to refuse a job; advantage or harmfulness of competition; liberty of firms or governmental control; equal incomes or incentives for individual efforts; attitude concerning capitalism versus government ownership; post-materialism (scale); expectation of future development (less emphasis on money and material possessions, greater respect for authority); trust in institutions; satisfaction with democracy; assessment of the political system of the country as good or bad (10-point-scale); preferred type of political system (strong leader, expert decisions, army should rule the country, or democracy); attitude towards democracy (scale).

6. **Moral attitudes** (scale: claiming state benefits without entitlement, cheating on taxes, joyriding, taking soft drugs, lying, adultery, bribe money, homosexuality, abortion, divorce, euthanasia, suicide, corruption, paying cash, casual sex, avoiding fare on public transport, prostitution, experiments with human embryos, genetic manipulation of food, insemination or in-vitro fertilization and death penalty).

7. **National identity:** geographical group the respondent feels belonging to (town, region of country, country, Europe, the world); citizenship; national pride; fears associated with the European Union (the loss of social security and national identity, growing expenditure of the own country, the loss of power in the world for one's own country and the loss of jobs); attitude towards the enlargement of the European Union (10-point-scale); voting intentions in the next election and party preference; party that appeals most; preferred immigrant policy; opinion on terrorism; attitude towards immigrants and

their customs and traditions (take jobs away, undermine a country's cultural life, make crime problems worse, strain on country's welfare system, threat to society, maintain distinct customs and traditions); feeling like a stranger in one's own country; too many immigrants; important aspects of national identity (being born in the country, to respect country's political institutions and laws, to have country's ancestry, to speak the national language, to have lived for a long time in the country); interest in politics in the media; give authorities information to help justice versus stick to own affairs; closeness to family, neighbourhood, the people in the region, countrymen, Europeans and mankind; concerned about the living conditions of elderly people, unemployed, immigrants and sick or disabled people.

8. Environment: attitude towards the environment (scale: readiness to give part of own income for the environment, overpopulation, disastrous consequences from human interference with nature, human ingenuity remains earth fit to live in, the balance of nature is strong enough to cope with the impacts of modern industrial nations, humans were meant to rule over the rest of nature, an ecological catastrophe is inevitable).

**Demography:** sex; age (year of birth); born in the country of interview; country of birth; year of immigration into the country; father and mother born in the country; country of birth of father and mother; current legal marital status; living together with the partner before marriage or before the registration of partnership; living together with a partner and living with a partner before; steady relationship; married to previous partner; living together with previous partner before marriage; end of relationship; number of children; year of birth of the first child; size and composition of household; experienced events: the death of a child, of father or mother, the divorce of a child, of the parents or of another relative; age of respondent when these events took place; age at completion of education; highest educational level attained; employment status; employed or self-employed in the last job; profession (ISCO-88) and occupational position; supervising function and span of control; size of company.

**Social origin and partner:** respondent's partner or spouse: partner was born in the country and partner's country of birth; highest educational level; employment status of the partner; employment or self-employment of the partner in his/her last job; partner's profession (ISCO-88) and occupational position; supervising function of the partner and span of control; unemployment and dependence on social-security of the respondent and his partner longer than three months in the last five years; scale of household income; living together with parents when the respondent was 14 years old; highest educational level of father/mother; employment status of father/mother when the respondent was 14 years old; profession of father/mother (ISCO-88) and kind of work; number of employees (size of business); supervising function and span of control of father and mother; characterization of the parents when respondent was 14 years old (scale: liked to read books, discussed politics at home with their child, liked to follow the news, had problems making ends meet, had problems replacing broken things); region the respondent lived at the age of 14, present place of residence (postal code); size of town; region.

**Interviewer rating:** respondent's interest in the interview.

**Additionally encoded:** interviewer number; date of the interview; total length of the interview; time of the interview (start hour and start minute, end hour and end minute); language in which the interview was conducted.

Additional country specific variables are included in this national dataset.

## Universe

Persons 18 years or older who are resident within private households, regardless of nationality and citizenship or language.

## 3.3 Methodology and processing

### Selection method

A representative multi-stage or stratified random sample was used in EVS member countries.

For more country-specific information about the sampling procedure, please go to the EVS website <http://www.europeanvaluesstudy.eu/evs/surveys/survey-2008/participatingcountries/> and see the method reports provided for all participating countries.

### Mode of data collection

Face-to-face interviews with standardized questionnaire – PAPI (Paper)

Fieldwork was conducted on the basis of detailed and uniform instructions prepared by the EVS advisory groups. The English basic questionnaire was translated into other languages by means of the questionnaire translation system WebTrans, a web-based translation platform designed by Gallup Europe. The whole translation process was closely monitored and quasi-automated documented.

Number of units: 1366

Number of variables: 441

## 4 Dataset structure and variable definition

The structure of the national datasets and the Integrated Dataset are guided by all-over harmonization and standardization based on the Master Questionnaire, EVS 2008 Guidelines and Recommendations<sup>3</sup>, set up syntax files for general variables and contact forms, respectively.

### 4.1 Standards of dataset structure

#### - Distinctions between Integrated Dataset and national datasets

The Integrated Dataset differs from the national datasets in a number of aspects (see table 2).

*Table 2: Distinctions between Integrated Dataset and national datasets*

Aspect	Integrated Dataset	National datasets
N of variables	468	at least 441
Country-specific variables	-	in AT HR CY NCY CZ DK FI FR DE GB GR HU IS IT KOS ME PL PT RO SK ES SE CH TR UA
StudyNo	GESIS Study Number	GESIS Study Number
StudyNoC	GESIS Study Number (national datasets)	-

weight	General weight	General weight
weight_c	Weight for country-specific characteristics DE and BE	weight for country-specific characteristics DE and BE in AT HR KOS RO SK SE CH
country-specific weight	-	

#### - Naming conventions

The naming of variables follows several standards differentiated by type of variables.

##### Standard variables

In the national datasets and the Integrated Dataset all standard variables are build in the scheme "vNNN" (e.g. v301), except for harmonized variables with respective suffixes and administrative variables (see below "3.3 Administrative variables"). The harmonized variables are compiled in the Integrated Dataset and generally have an intuitive suffix (e.g. v339SIOPS for "occupational status respondent" measured in "Standard International Occupational Prestige Scale"). For an overview of harmonized/standardized variables see table 4.

##### Country-specific variables

In 25 national datasets country-specific variables are included. For 24 countries (see table 2 above) additional questions/items were included in the field questionnaires. These questions/items were in-

<sup>3</sup> EVS (2010): EVS 2008 Guidelines and Recommendations. GESIS-Technical Reports 2010/16. Retrieved from [http://dbk.gesis.org/dbksearch/file.asp?file=ZA4800\\_standards.pdf](http://dbk.gesis.org/dbksearch/file.asp?file=ZA4800_standards.pdf)

cluded as additional country-specific variables which are named by the alpha-numerical country code (ISO 3166-1 alpha-2) plus a continuous two (/three)-digit number (e.g. AT01). Their positions in the datasets mirror their positions in the field questionnaires. In addition, for eight countries country-specific weights were provided by the Program Directors (see table 2). These variables are named by the same scheme as the other country-specific variables and positioned at the end of the national datasets.

#### - Missing value codes

For all variables a set of missing value codes with negative values was defined and applies throughout.

- 1 "dk" (i.e. "don't know")
- 2 "na" (i.e. "no answer")
- 3 "nap" (i.e. "not applicable")
- 4 "question not asked" (i.e. question not included in country's field questionnaire or not provided for by Program Director)
- 5 "other missing" (includes: system missing, wild codes, illogic answer-patterns in e.g. filters)

#### - Dummy variables

For questions that allow for multiple responses a dummy variable is created for each answer category. E.g., a question with four answer categories in an item battery has four dummy variables as final data. In general, a value "1" means that the respondent chose the particular category as an answer (mentioned, yes, ...). In case of a value "0" the respondent did not choose the particular category as answer (not mentioned, no, ...). Dummy variables are also created for "None of these", "Don't know" or other residual responses. Inconsistencies between category 'none of these' and other mentioned items of a battery are flagged by flag variables. (see section 4.3: Flag variables indicating inconsistencies).

## 4.2 Administrative and ID variables

Administrative variables are used mainly for identifying datasets and respondents (see table 3 below). They include different kinds of variables:

- Technical variables for identifying the dataset or cases
- Weighting variables to help adjust samples to the universe

*Table 3: Overview of administrative variables*

#### - Version of dataset

In order to uniquely identify a dataset, each dataset is assigned a GESIS Study No., a GESIS archive version no., and a Digital Object Identifier (DOI). The DOI name points to the Study Description in the GESIS Data Catalogue including an overview of errata and dataset versions.

Variable "version" includes the GESIS archive version number of a dataset and the corresponding release date. It is composed of a sequence of three numbers (alphanumeric string).

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

#### - Country variables with split ups

Country variables **country**, **c\_abrv** and **entry\_y** each have a pendant of a country variable "with split ups". In the country variables **country1**, **c\_abrv1** and **entry1\_y** Germany is represented by two different codes (ISO 3166-1) for East and West Germany (for further description of country variables see below "4.4 International standards and EVS coding frames" - sub-bullet "Nationality: ISO 3166-1").

*Variables:* country; country1; c\_abrv; c\_abrv1; cntry\_y; cntry1\_y

#### - Identification variables

Each record in the dataset contains two identification variables:

- Caseno: 'Original respondent number'
- Id\_cocas: 'Unified respondent number' structured as a 12 digit code: YYYY (year of wave), CCCC (country ISO 3166-1), NNNN (new continuous case number)

#### - Weight: gender by age

The variable "weight" was computed by the EVS for all national datasets on the basis of information and population statistics provided by the EVS countries. The weight is constructed on the basis of gender and age categories (-24; 25-34; ...; 65-74; 75 and over). Value '0' implies that year of birth information was missing in the data.

The weight adjusts the socio-structural characteristic in the samples to the distribution of gender and age of the universe-population. The current weight variable should be used with caution. Especially when the weights are "big", say outside the 0.50-2.00 range.

*Variable:* weight

For some national datasets country specific original weight variables are provided additionally as delivered by countries (Austria, Croatia, France, Kosovo, Romania, Slovak Republic, Sweden, and Switzerland).

### 4.3 Data quality checks

The data of the EVS 2008 national datasets was checked for wild codes, system missing, filter inconsistency, and contradictions between variables of item batteries.

#### - Flag variables indicating inconsistencies

For the most common non-conformed interviewer instructions and illogic answer-patterns across national datasets flag variables were created which mark such non-conformities and leave correction-decisions up to the researcher. Information about both flag and flagged variables is provided by notes in the Variable Documentation.

Example:

**Flagged variable: v67 'why do people live in need-most important (Q12)'**

Note added: Please see flag variable f67 which indicates inconsistencies for variables v67/v68

**Flag variable f67 'flag variable: why do people live in need - most/second important (Q12/Q13)'**

Indicates inconsistencies for the variables v67/v68.

If most important reason is identical with next most important reason.

if v67 = v68 then f67=1

(0 consistent; 1 inconsistent)

There are three types of non-conformities which were flagged.

1. "first/second choice"-variables which were flagged in case the value of the variable for the first choice equaled to the value of the variable for the second choice (see Appendix 1).

*Variables:* v67/v68 – f67; v201/v202 – f201; v253/v254 – f253

2. "multiple response question"-variables which were flagged in case respondents chose more than the 5 maximally permitted items (see Appendix 1).

*Variables:* v170 to v180 – f180

3. "'none'-item battery"-variables which were flagged in case the answer-pattern of the "none"-item variable and the other variables of the item battery of a question was illogic. As several illogic answer-patterns are possible the flag variables have nine categories (see Appendix 1).

In the national datasets some countries included additional items within these item batteries which had to be taken into account as base for the flagging of answer-patterns as well. As these country-specific variables are not included in the Integrated Dataset the bases for flagging changed minimally, i.e. the sum of flagged cases in the national datasets does not equal to the total of flagged cases in the Integrated Dataset (see Appendix 1).

*Variables:* v10 to v25 – f25; v28 to v43 – f43; v69 to v86 – f86; v170 to v181 – f181

#### - Notes on deviating filtering

In case filtering in countries' field questionnaires deviated from filtering in the Master Questionnaire (either by lacking filter or by adding country specific filter) the Master Questionnaire's filtering was restored by recoding. Only systematic filter deviations in national datasets were remarked by variable notes, not by flag variables. The data in general was cleaned according to the skip pattern of the Master Questionnaire.

#### 4.4 International standards and EVS coding frames

International standards and EVS coding frames are used for harmonization/standardization of EVS datasets concerning variables on religion, political party preference, occupation, education, income, region, nationality, and language. Harmonization of these variables enables comparison between different countries.

*Table 4: Overview of harmonized variables*

Variable name	Variable label
v106	which religious denomination do you belong to (Q23a) (standardized)
v106_cs	which religious denomination do you belong to (Q23a)
v108	did you belong to a religious denomination (Q24a) (standardized)
v108_cs	did you belong to a religious denomination (Q24a)
v264	which political party would you vote for (Q75a)
v264_LR	which political party would you vote for - left/right scale (Q75a)
v265	which political party appeals to you most (Q75b)
v265_LR	which political party appeals to you most - left/right scale (Q75b)
v336	Educational level respondent: ISCED-code one digit (Q110)

v353M_cs	Country-specific: Monthly household income (Q125)
v353Y_cs	Country-specific: Annual household income (Q125)
v355	Educational level father [mother]: ISCED-code one digit (Q127)
v355_2	Educational level father [mother]: ISCED-code two digits (Q127)
v355_3	Educational level father [mother]: ISCED-code three digits (Q127)
v355_cs	Country-specific: ISCED code education father (Q127)
v357ISCO	kind of job father/mother - ISCO88 code (Q129a)
v357SIOPS	occupational status father/mother - SIOPS (Q129a)
v357ISEI	occupational status father/mother - ISEI (Q129a)
v357ESeC	occupational status father/mother - European ESeC (Q129a)
v357egp	occupational status father/mother - egp11 (Q129a)
v368b_CC	Region at age 14: country (Q133)
v368b_N3	Region at age 14: NUTS-3 code (Q133)
v368b_N2	Region at age 14: NUTS-2 code (Q133)

v368b_N1	Region at age 14: NUTS-1 code (Q133)
v371b_N3	Region: NUTS-3 code (Q136)
v371b_N2	Region: NUTS-2 code (Q136)
v371b_N1	Region: NUTS-1 code (Q136)

#### - Religion: EVS-categories

The categories of the compiled variables v106\_cs and v108\_cs consist of all religious denominations included in the field questionnaires. The values are a combination of the country identifier (ISO 3166-1) and the given order of religious denominations in the field questionnaires.

A harmonized version of the religious denominations can be found in the variables v106 and v108. All categories of religious denominations used in the field questionnaires were assigned (based on the assignments made for EVS 1999 and/or given by Program Directors) to these variables harmonized categories.

The categories for religion are:

- 1 "Roman Catholic"
- 2 "Protestant"
- 3 "Free church/ non-conformist/ evangelical"
- 4 "Jew"
- 5 "Muslim"
- 6 "Hindu"
- 7 "Buddhist"
- 8 "Orthodox"
- 9 "Other"

Variables: v106; v106\_cs; v108; v108\_cs

#### - Party preference: EVS-categories

The categories of the compiled variables v264 and v265 consist of all political parties included in the field questionnaires. The values are a combination of the country identifier (ISO 3166-1) and the given order of political parties in the field questionnaires.

Variables v264\_LR and v265\_LR are based on the positioning of political parties on a left/right scale given in the methodological reports.

Variables: v264; v264\_LR; v265; v265\_LR

## 5 Variable documentation and types of notes added

The variable documentation is set up by means of the Dataset Documentation Manager (DSDM) based on DDI/XML v.2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) and show cards from a questionnaire with the variable description (variable name, values, and labels) of a dataset.

For the national datasets, two types of variable documentation are available. Beside the present English documentation, bilingual (English/original languages) variable documentation facilitates a comparison of the English master and original question wording as in field questionnaire.

General remarks and comments referring to a certain variable are defined as variable notes. Notes could be references to trend/comparability information, international standards applied or EVS coding frames, problems in questionnaire translation, but also references to data problems or specific characteristics. A distinction between two types of variable notes can be made:

- Notes referring to the English documentation of national datasets,
- Notes that refer to original language documentation set up for on basis of the field questionnaires.

### 5.1 Notes in English variable documentation according to Master Questionnaire

- Harmonized variables (religion, left/right political preference, education, income, region coded NUTS 2 and NUTS 1): reference to international standards or EVS coding frames used for harmonization; mention of the respective standardized country-specific variable ("\_cs" variables).
- Standardized country-specific variables (religion, political party preference, education, income) containing country identifier (ISO 3166-1) and the given order of country-specific categories in the field questionnaires; reference to respective harmonized variable.
- Standardized variables with reference to international standards (nationality - ISO 3166-1 alpha-2 code, language – ISO 639-2 code, region – NUTS 3 code, and occupation – ISCO88 4 digits code).
- Information on coding of open-ended questions and multiple response questions.
- Notes referring deviations between the master and the field questionnaire.
- Notes documenting translation problems.
- Information on data processing.

### 5.2 Notes in the original language documentation of the dataset

- Standard note added to the original language documentation referring to the recoding and documentation of missing values.
- Notes on harmonized variables with reference to the original country-specific variables.
- Notes on errors in field questionnaires (e.g. typing error).

## 6 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. It is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with the international metadata specification for the social and behavioral sciences, established by the Data Documentation Initiative (DDI-Codebook/XML).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire.

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. In the case of variables with long lists of coded "real values" (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative, or other generated variables is described as appropriate.

If an adequate weight is provided in the dataset, the frequencies are calculated on the base of weighted data, as indicated with each table. Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English Master Questionnaire as provided by the European Values Study.

Digital Object Identifier (doi):  
Header with doi linked to the Study Description in the GESIS Data Catalogue.

**VARIABLE NAME** (serial number from questionnaire or assigned by the archive) and **VARIABLE LABEL** as defined in the dataset, including question number from questionnaire. The numbers or letters that may appear together with the variable name reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R), harmonized, or if asked only in a single country (country abbreviation).

**QUESTION NUMBER** and full **QUESTION TEXT** from the questionnaire, including interviewer instructions.

**CODE VALUES** occurring in the data for this variable and complete **ANSWER TEXT** from the questionnaire. Code values may differ from the questionnaire specification due to standardization and harmonization.

**NOTES** delineate additional explanatory text subsuming archive remarks on data processing, deviations between released data in dataset, and other issues relevant for the understanding and application of the variable. Further information refers to the construction principle of indices or other derived variables (not in the example).

**FREQUENCY COUNTS:** The absolute frequencies of the occurrence of values (count) refer to the number of cases in the dataset, which is not weighted in some countries, in this example weighted by weight. Relative frequencies are calculated including (percent) and excluding (valid percent) missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on the basis of the valid cases.

Remarks on original question in the field questionnaire:

Additional interviewer instruction (description on main duties, qualification required, materials working on, provided goods or services) .

Additional country-specific question (Q112s) - no data available.

Note:

Standardized variable on the basis of two open-ended questions on occupation and kind of activity (Q112 and Q112a) post-coded according to 4-digit ISCO88.

Data for original string variable is not available in this dataset.

Derivation:

Despite correct filter in v338, 25 respondents who 'never had a paid job' (code 3) have valid ISCO codes instead of -3 'not applicable'.
