Notes on the Additional ALLBUS/GGSScompact 1980-2014 (Study No. 4585)

As an alternative to ALLBUS 1980-2014 with its relatively complex demography module, GESIS also offers an additional compact version with a reduced number of demographic variables. Providing an easily manageable selection of basic demographic descriptors, this ALLBUS/GGSScompact addresses, amongst others, the needs of newcomers to data analysis. Moreover, access conditions for ALLBUS/GGSScompact are less strict than for the more extensive ALLBUS/GGSS data, because data protection issues are less salient.

Apart from demography, all questions have been retained in full in the compact version. Moreover, variable labels and variable names in ALLBUS/GGSScompact are the same as in the unabridged ALLBUS/GGSS data set. In this way, users may easily move between both versions of the ALLBUS/GGSS data if necessary.

However, for reasons of data protection some of the remaining demographic data still had to be simplified. When part of the ALLBUS/GGSS survey in question, detailed data concerning the respondents' citizenship has been dichotomized ("German citizenship" vs. "No German citizenship"), information on the federal state where the respondent lived in his youth has been recoded to four values (old federal states, new federal states, former Eastern German territories, other country). Finally, the two largest categories of the variable 'Political Size of Municipality' have been combined. (A detailed account of recodes can be found below.)

Data Citation:

Usage and analysis of research data as well as any publication of research results based on such data should be connected with information on the data generator, the data source and an identification of the dataset. GESIS Data Archive for the Social Sciences therefore suggests the following minimum standard for the scientific citation of its data sets. Example for release 1.0.0:
