Note on the 2014 ISSP Module Survey Conduct in South Korea

The 2014 ISSP module survey was conducted, as usual, as an integral part of the Korean General Social Survey (KGSS). The KGSS is a nationally represented annual social survey, which usually incorporates at least two topical modules in addition to its replicating core questionnaires. Included in the 2014 KGSS, besides ISSP, are the special topical modules <Inequality and Justice in Korea> and < Risk Society in Korea >. The ISSP standard background variables are incorporated into the replicating core questionnaires section of the KGSS. In the 2014 KGSS, all ISSP variables(both topical and background) have been included.

Please name the **ISSP module** which the documentation refers to:

CITIZENSHIP II

Please name your **country**:

South Korea

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

Already included in field questionnaire provided with the country data file.

Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** source variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: YYYYYY.YYY.

6. Correspondence list ISCO08<->national occupation codes

If your country derives ISCO08 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO08 codes. (MS Word or simple ASCII file preferred.)

ISCO08 is used to code responses directly.

Conversion of national coding scheme to ISCO08. Attached file: ZZZZZZ.ZZZ.
