	14. EGB/Polimodal completo (Nivel Secundario) => A P.39b	14. Complete High School => Go to Q39b
<i>Translation Note</i>		
<i>Note</i>	<p>For each “incomplete” educational level, interviewees were asked about the last year they have completed. This allowed to code the variable “years of schooling”. Complete levels were assigned the number of formal years required for that level. Codes 11-14 were a variant of a short-lived educational system.</p> <p>The professional (tertiary) level is never clear, either for interviewees or authorities in the education area.. So, as a control, those who chose these categories were asked about the name of their high school diploma (Q39b), how many years of schooling required their tertiary-professional studies (Q39c), and what was the name of the Tertiary-Professional Institution (Q39c1).</p>

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No <input type="checkbox"/> Yes <input checked="" type="checkbox"/>
<i>Weight to adjust for non-response bias</i>	No <input checked="" type="checkbox"/> Yes <input type="checkbox"/> → please specify variables used for calculation of weight
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No <input type="checkbox"/> → please specify target population represented by sum of all case weights Yes <input checked="" type="checkbox"/>
<i>Note</i>	

MODE – Administrative mode of data-collection (OR Data collection method)

<i>Note</i>	We used 10. paper and pencil, R reading questionnaire. A blank copy of the questionnaire was offered to the interviewees, so they could follow the interviewer when he/she was reading the questions.

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

☐ Already included in field questionnaire provided with the country data file.

☒ Attached file: XXXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** *source* variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: ☒ YYYYYYY.YYY.

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

☒ ISCO88 is used to code responses directly.

☐ Conversion of national coding scheme to ISCO88. Attached file: ZZZZZZ.ZZZ.
