ISSP 2010 – Environment III
Study Description

ISSP Study Description Form***Please use this form for reporting on Module 2006 and later!****Study title:* Environment ISSP2010*Fieldwork dates:* 2011-05-20 – 2011-06-20*Principal investigators:* Dinka Marinović Jerolimov, Institute for Social Research, Zagreb Croatia

Sample type: Sampling frame: list of settlements derived from Census 2011. Stratified random multi-staged sample: level of settlements, level of household, level of individual.

Two-way stratification: by 6 regions (defined as the traditional groups of counties) and 4 settlement sizes (defined by the number of residents). The size of each stratum is based on the proportion of the number of 18+ residents within the stratum in the total 18+ population.

Multistage sampling procedure:

1. Selection of primary sampling units (settlements) was conducted by the “probability proportionate to size” method. Each settlement had a probability of being in the sample proportionate to its population size. The selection of settlements was based on a random sampling procedure. All settlements in a stratum were alphabetically ordered and their respective populations were cumulated. Assignment of random numbers from cumulative population of all settlement was conducted. Those settlements under which randomly assigned numbers fell into were chosen. Within each primary sampling unit, the “random starting points method” was used to select starting points. There were 102 starting points in total. On average allocation of 10 respondents was assigned to each starting point.
2. Selection of households within the starting points was conducted by the “random walk method”. Interviewers were instructed to follow a specified route from the starting point, conducting an interview at every 6th dwelling/housing unit (systematic sampling). Non-contacts were re-visited 5 times before being declared as non-response.
3. Selection of the respondent within a household was conducted by random selection by last birthday key.

Fieldwork institute: Hendl market research*Fieldwork methods:* Face to face interview*N. of respondents:* 1210*Details about issued sample:*

1. Total number of starting or issued names/addresses (gross sample size) *	2576
2. Interviews (1.0)	1210
3. Eligible, Non-Interview	2553

A. Refusal/Break-off (2.10)	985
B. Non-Contact (2.20)	315
C. Other	25
i. Language Problems (2.33)	3
ii. Miscellaneous Other (2.31, 2.32, 2.35)	15
3. Unknown Eligibility, Non-Interview (3.0)	0
4. Not Eligible	23
A. Not a Residence (4.50)	0
B. Vacant Residence (4.60)	23
C. No Eligible Respondent (4.70)	0
D. Other (4.10,4.90)	0

Language(s): Croatian language
