ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	Q28. По какой профессии и в какой должности вы работаете (работали на последнем месте работы)? В чем именно заключается (заключалась) ваша работа?	What is (was) your current occupation? What kind of activities do/did you do most of the time?
<i>Codes/ Categories deviating from ISCO88 / ISCO88-COM</i>		
<i>Interviewer Instruction</i>	Запишите подробно. Для тех, кто не работает, но когда-либо работал: расскажите о последнем месте работы	Write in word for word of R's answer. If R has no current job ask his/her occupation at the most recent work place.
<i>Translation Note</i>		
<i>Note</i>		
<i>Use of ISCO</i>	ISCO88 (ILO)	<input checked="" type="checkbox"/>
	ISCO88-COM (EU variant)	<input type="checkbox"/>
	Other ISCO88 variant	<input type="checkbox"/> → please specify

If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

[X] Already included in field questionnaire provided with the country data file.

[] Attached file: **ISSP2010_questionnaire_Rus.doc**

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all source** variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: **Freq_ISSP2010_Rus.doc**

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

[X] ISCO88 is used to code responses directly.

[] Conversion of national coding scheme to ISCO88. Attached file: **ZZZZZZ.ZZZ**.

7. Brief description of the ethnicity notion

Ethnicity is understood as self-identification of the respondent with any ethnic group. Ethnic group in our understanding - it is a community of people who have special, but common to all cultural (lifestyle, values and attitudes), linguistic and religious features. They are also united by a full or a partial common origin and their involvement in the group.

Thus, the language, culture, religion and origin constitute the ethnic differences, mastered and assimilated by individuals. In Russia, the additional feature of an ethnic group, as a rule, is the presence of common territory to live. For large ethnic groups, the territory sets up as an administrative unit as a Republic, National District, a National Autonomous Region within the Russian Federation. Small ethnic groups also share a common territory for living, but without its registration as an administrative unit. From this viewpoint ethnic groups in Russia can be divided into 3 types. The first type is formed by those ethnic groups that make up the essence of the multinational Russian state, because they live in its territory since ancient times. Second type of ethnic groups exists in Russia as a result of migration and doesn't have its territory for compact living. Most of these groups appeared in Russia as a result of the free movement of citizens of the former Soviet republics in the former USSR (the Ukrainians, Georgians, etc.) Many of them live in Russia for many years and now have Russian citizenship, speak Russian freely although they remain to determine their nationality origin (Ukrainian, Georgian). Third type of the ethnic groups appeared in Russia in the post-Soviet period as a result of inter-country migration, mostly of labor force, mainly from the former Asian Soviet republics

(Tajikistan, Uzbekistan, Kirgizstan). Representatives of these groups also do not have a compact territorial residence, Russian citizenship, speak Russian very bad and often consider Russia as a temporary place of residence to earn a living. Relationship of indigenous peoples, including ethnic groups with this type of ethnic migrants are complex, taking into account the linguistic, religious and cultural differences.
