ISSP Background Variable Documentation

by

Markus Quandt, Evi Scholz and Insa Bechert GESIS

on behalf of the

ISSP Demographics Method Group
(Germany, Mexico, Norway, the Philippines, South Africa, Spain, Sweden, Switzerland, Taiwan, and the Archive)

Users of the international ISSP data file should have all relevant information to understand the construction of the ISSP background variables. Thus, the ISSP has decided to provide a documentation of its background variables and to regularly update this documentation (decisions of the ISSP General Meetings in 2005 and 2006). The information collected with this document will be published with the ISSP data files. Furthermore, it will help to discuss and decide on streamlining the ISSP background variables.

The Demographics Method Group asks you to provide information on all your ISSP background variables. The document at hand serves to collect and structure this information from ISSP members in a template.

Please note that, due to changes in the ISSP Background Variables, there are different versions of documentation templates to use, related to the respective ISSP study under consideration. The template at hand serves to document your national **ISSP 2011 and 2012** surveys.

The document consists of three sections: Section 1 of this documentation refers to basic elements: source description, information on filters and routing, and construction information. In section 2, as an example, we present the relevant information for the variable UNION (Trade union membership) from Germany. Section 3 finally offers the documentation template for all ISSP background variables valid from the ISSP module 2010 forward.

If you have any questions on the documentation, please do not hesitate to contact us:

isspservice@gesis.org

1. Basic Elements

For each of the variables listed in section 3 below, please give the following information as applicable.

❖ **Source description**

- Please give the **question no./position/name(s)** used in your field questionnaire and report additional information sources, for example, if interviewer observation was used instead of asking questions to respondents. If your ISSP is run with a larger survey and the background variable is taken from this survey, then refer to that (those) source question(s). Please make a **note** from which survey the question(s)/variable(s) come(s) (see below).

- Please give the text of the **original question(s)** exactly as used in your field questionnaire and **in your national language**.

  ▪ Please include all **response categories** of the original field questionnaire.

- Please give **interviewer instructions** if necessary to understand the generation of response codes.

- Please **translate original questions, response categories and interviewer instructions** into English.

- Please provide **notes** if needed. Notes can address both possible translation issues (**translation note**) and country specific particularities of question background, of variable generation or of the meaning of individual response categories (**note**).

❖ **Filter Variables and Conditions:** If any variables cover only part of the sample, please list the conditions (questions/variables and categories/codes) used to define the *excluded cases*. In other words, report the conditions which lead to a 'not applicable' code in the variable following the filter.

❖ **Construction/Recoding**

- Please report how the codes of the ISSP target variable were derived from your source data.

- Please use a table of correspondence with source and target codes (see the example in section 2 and tables in section 3).

- If construction of ISSP target codes involves more than simple 1-1 relationships between source and target codes, please use roughly Boolean syntax as shown in the example 2 below. Command syntax of common statistics programs is also welcome. Just put the syntax used into the "Optional: Recoding Syntax" box if you consider that it will increase comprehensibility and transparency.

- Please always (also for country specific variables) report how the ISSP missing values (not applicable-NAP, no answer-NA, don't know-DK) were filled.

❖ **Complementary information (see last page)**

- Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick the box on the last page of this document. (PDF or MS Word format preferred.)

- Please also supply frequency tables with absolute and relative frequencies, missing values *included*, for **all** *source* variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

- If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

2. Example

The German example for the variable UNION is constructed from two variables referring to two questions in the German field questionnaire.

UNION – Trade union membership

	National Language	**English Translation**
Question no. and text	#1 Darf ich Sie fragen, ob Sie derzeit Mitglied in einer Gewerkschaft sind?	#1 May I ask you whether you are currently a member of a trade union?
Codes/ Categories	1. Ja, bin Mitglied	1. Yes, I am member
	2. Nein, bin kein Mitglied	2. No, I am not member
	9. Keine Angabe*	9. No answer*
	0. Nein, Befragter will Frage nicht beantworten*	0. Respondent refuses to answer*
Question no. and text	#2 Waren Sie früher einmal Mitglied in einer Gewerkschaft?	#2 Were you once a member of a trade union?
Codes/ Categories	1. Ja	1. Yes
	2. Nein	2. No
	8. Weiß nicht	8. Don't know
	9. Keine Angabe*	9. No answer*
Note	Falls Befragter aktuell kein Gewerkschaftsmitglied ist; „nein" in #1	If respondent not currently union member; no in #1
Interviewer Instructions	—	
Translation Note	—	
Note	Current and former union membership taken from ALLBUS 2010 Answer categories marked by an asterisk are not read aloud.	

Filter Variable(s) and Conditions:

Former membership (#2) not asked if respondent currently member (#1=1)

Construction/Recoding:

Country Variable Codes/ Construction Rules	**➔UNION**
If (#1=1)	1. Yes, currently
If (#2=1)	2. Yes, previously but not currently
If (#1=2 and #2=2)	3. No, never
If (#1=0)	7. Refused
Else	9. No answer

3. Variable List

In the following you will find forms to ease documentation of the points described in section 1 above.

Some Hints to Fill in the Forms

- Please fill in the forms on the screen and return the file to <isspservice@gesis.org> – please do *not* return a printout using paper and pencil!

- In general, please feel free to be flexible in using the forms. If necessary adopt them to your reporting needs. In particular:

  - Please insert as many additional fields as needed, e.g. add lines if your country variable has more categories than the template provides.

  - Please skip fields not needed, e.g. skip 'note' lines if no note is required.

  - If individual response categories require separate notes, insert as many additional lines as necessary *below* the respective category.

  - If your field questionnaire has more than one language version, please replicate the complete 'National Language - English Translation/Note' block as often as needed.

- The question numbers should refer to the numbers of your original field questionnaire.

- For variables with continuous data (AGE, WRKHRS…), please list the lowest and the highest valid codes empirically found in your country's data and the various non-response codes, e.g. NAP (not applicable), DK (don't know); if additional non-response codes occur in your data, such as 'refused', please add.

- If source variables are relevant for *several* ISSP target variables, please copy the information for the source variables each time to offer a complete documentation of the individual ISSP target variable.

Please name the **ISSP module** which the documentation refers to (e.g., "*Health and Health Care / ISSP2011*"):

Health and Health Care / ISSP2011

Please name your **country**:

Belgium - Wallonia

SEX - Sex of respondent

	National Language	**English Translation**
Question no. and text	Question 33 "Vous êtes?"	Question 33. Are you?
Codes/ Categories	1. Un homme	1. a male
	2. Une femme	2. a female
	- not used -	9. NA, refused
Interviewer Instruction		

Construction/Recoding:

Country Variable Codes (in translation)	**➔ SEX**
1 male	1. Male
2 female	2. Female
- not used -	9. No answer

Optional: **Recoding Syntax**

```
*SEX

RECODE Q33 (MISSING=9) (ELSE=Copy) INTO SEX.
VARIABLE LABELS  SEX 'Sex of respondant'.
EXECUTE.
VALUE LABELS SEX 1 'Male' 2 'Female' 9 ' No answer'.
EXECUTE.
```

BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR 'year of interview' minus AGE 'age of respondent'.

	National Language	**English Translation**
Question no. and text	Question 34 Quelle est votre année de naissance	Question 34 What's the year of your birth?
Interviewer Instruction		

Construction/Recoding: (list lowest, highest, and 'missing' codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	**➔BIRTH**
Construction		
Codes	1918	[MIN BIRTH]
	1993	[HIGH BIRTH]
	9999	9999. No answer

Optional: **Recoding Syntax**

```
RECODE  Q34 (MISSING=9999) (ELSE=Copy) INTO  BIRTH.
VARIABLE LABELS  BIRTH 'Year of birth'.
EXECUTE.
```

AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR 'year of interview' minus BIRTH 'year of birth'.

	National Language	**English Translation**
Question no. and text	Question 34 Quelle est votre année de naissance	Question 34 What's the year of your birth?
Interviewer Instruction		

Construction/Recoding: (list lowest, highest, and 'missing' codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	**➔AGE**
Construction		
Codes	18	[MIN AGE]
	93	[HIGH AGE]
	999	999. No answer

Optional: **Recoding Syntax**

```
*AGE

IF  (BIRTH < 9999) AGE=2011-Birth.
IF (BIRTH = 9999) AGE=999.
VARIABLE LABELS  AGE  'Age of respondent'.
EXECUTE.

RECODE
AGE
(missing = 999) (else = copy) INTO AGE.
EXECUTE.

VALUE LABELS AGE 999 'No answer'.
EXECUTE.
```

EDUCYRS - Education I: years of schooling

	National Language	**English Translation**
Question no. and text	Question 37. Combien d'années avez-vous suivi dans l'enseignement primaire (ne pas compter les années de redoublement)?	Question 37. How many years of primary education did you complete?
Interviewer Instruction		
Note	Primary school : age 6 – 12	
Question no. and text	Question 38 . Combien d'années avez vous suivi dans l'enseignement secondaire (ne pas compter les années de redoublement)?	Question 38. How many years of secondary education did you complete?
Interviewer Instruction		1
Note	Secondary school: age 13 – 18	
Question no. and text	Question 39 . Combien d'années avez vous suivi dans l'enseignement supérieur de type court, long ou universitaire (ne pas compter les années de redoublement)?	Question 39. How many years higher education of short or long type or university did you complete?
Interviewer Instruction		
Note	Higher education or university: age 18 or older	

Country Variable Codes/Construction Rules	**➔ EDUCYRS**
0	0. No formal schooling
1	1. One year
25	25. 25 years
98	98. Don't know
99	99 No answer

Optional: **Recoding Syntax**

```
* Educyrs - Education I: years of schooling

COMPUTE EDUCYRS=Q37+Q38+Q39.
VARIABLE LABELS  EDUCYRS 'Education I: years of schooling'.
EXECUTE.

RECODE EDUCYRS (MISSING=99).
EXECUTE.
```

BE_DEGR - Country-specific highest completed degree of education

	National Language	**English Translation**
Question no. and text	Question 36. Quel est le niveau d'enseignement le plus élevé que vous avez terminé avec succès	Question 36 What's the highest degree you completed?
Codes/ Categories	1. Aucun	1. none
	2. Enseignement primaire	2. primary education
	3. 1er degré de l'enseignement secondaire	3. secondary education first grade
	4 Enseignement secondaire inférieur général	4. lower general secondary education
	5. Enseignement secondaire inférieur technique ou artistique	5. lower technical or art secondary education

ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file.* Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] ''inadequately described'' use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

execute.

VARIABLE LABEL SUBCASE "Case substitution flag".
VALUE LABELS SUBCASE
 0 "NAP, no substitution in this survey"
 1 "Case from original sample"
 2 "Case substituted".
```

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

Design weight to adjust for unequal selection probabilities	No	[X]	
	Yes	[ ]	
Weight to adjust for non-response bias	No	[ ]	
	Yes	[X] → ☐please specify variables used for calculation of weight	
		In Flanders the ISSP-questionnaire 2011 was an addition (drop-off questionnaire) to a general face-to-face survey.	
		In Wallonia the ISSP questionnaire 2011 including the standard background variables was a postal survey in 2012.	
		In order to deliver one integrated harmonized data file for Belgium **post stratification weights were calculated based upon age, sex, nationality, and geographical classification (NUTS2)**. All these characteristics are known for all sampled units. The weights were scaled to make the weighted sample size equal to the unequal sample size.	
Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?	No	[ ] → ☐please specify target population represented by sum of all case weights	
	Yes	[X]	
Note			

Construction/Recoding:

Country Variable Codes/Construction Rules	➔ WEIGHT
	1. No weighting

<div align="center">**MODE –** Administrative mode of data-collection</div>

Note	Arrives with interviewer, drops off, mailed back by R

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

[ ] Already included in field questionnaire provided with the country data file.

[X] Attached file: **Standard_backgroundvariables_ISSP2011_Belgium_Flanders**

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** *source* variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: **Frequencies_standard_background_Flanders(Belgium)_ISSP11.doc**

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

[X] ISCO88 is used to code responses directly.

[ ] Conversion of national coding scheme to ISCO88. Attached file:
