Weight present: yes

Weighting procedure: In Wallonia the ISSP questionnaire 2011 including the standard background variables was a postal survey in 2012. In order to deliver one integrated harmonized data file for Belgium post stratification weights were calculated based upon age, sex, nationality, and geographical classification (NUTS2). All these characteristics are known for all sampled units. The weights were scaled to make the weighted sample size equal to the unequal sample size.
