## ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes attached as a separate file. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.
Please do not enter standard ISCO88 codes here. But please report if your country adds or changes codes compared to ISCO88, if any.
Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3 -digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

|  | 23. CAPI, interpreter or translator - no <br> visuals |
|  | 24. CAPI, interpreter or translator - <br> visuals |
|  | 30. SC, arrives with interviewer, <br> interviewer attending |
|  | 31. SC, arrives with interviewer, <br> drops-off, picks up later |
|  | 32. SC, arrives with interviewer, drops <br> off, mailed back by R |
|  | 33. SC, mailed to, completed by R and <br> hold for pick up |
|  | 34. SC, mailed to, mailed back by R |
|  | 40. CASI, self-completion, computer- <br> assisted |
|  |  |

## 4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)
[ ] Already included in field questionnaire provided with the country data file.
[X ] Attached file: "BSA 2017 CAPI documentation FINAL.doc"

## 5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values included, for all source variables. Source variables are the country-specific variables before recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)
Attached file: "BV frequencies 2017 GB.docx".

## 6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)
[ ] ISCO88 is used to code responses directly.
[ X] Conversion of national coding scheme to ISCO88. Attached file: "ug 21.1.xls".
