Flash Eurobarometer 193

The Eurozone, 5 years after the introduction of the banknotes and coins in 12 Member State

Remarks

- D2/D3: For 2 respondents the indicated "AGE WHEN STOPPED FULL-TIME EDUCATION" is too high for the ACTUAL AGE.
- D3/D4: Several cases coded "Student (full-time)" in D4, indicate an "age when stopped full time education" in D3 or declare that they never have been in full-time education.
- D4: Value label for code '27' was subsequently defined as "OTHER" in accordance with the basic ENGLISH questionnaire and the GALLUP tabular report.
- REGION: Value labels have subsequently been defined in accordance with official the NUTS coding scheme, except for Italy and Germany. For Italy and Germany the official NUTS codes on this level are not numeric. For ITALY the labels have tentatively been assigned in the NUTS hierarchy order, i.e. the region information for ITALY should only be used with caution. For GERMANY the official national code numbers for the Federal States (Bundesländer) have been applied, resulting in plausible frequency counts per region.
- NUTS: Please notice that all countries have been coded together, i.e. identical codes have country specific meanings. If at all, this variable should only be used country by country. Regarding the content this variable differs from REGION only for BELGIUM, applying coding level NUTS 1 instead of NUTS 2.
