

ZA Study 4189

Flash Eurobarometer 165: Euro, third anniversary – 2004

Errata Documentation

- D3 („Age when finished full time education“) was only delivered as recoded (categorised) variable. Please notice that respondents “still in full time education” have been coded with their actual age (cross tabulation D3 by D2). Value labels for codes ‘0’ and ‘99’ do not coincide with the questionnaire and should be dealt with caution.
- Q4A / Q4B: Answer categories in the original dataset did not correspond to the questionnaire. Particularly answer category “Neither easy nor difficult, normal” was set to code 3 in the dataset but is listed as code 5 in the questionnaire. Consequently “Rather difficult” and “Very difficult” were shifted to code 4 and 5 in the dataset. After plausibility checks these answer categories were recoded and in accordance with the European Commission’s official report. They now match with the answer categories as provided by the questionnaire.
