## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

# 1 Study Description – Eurobarometer 52.0

## 1.2 Content

### 1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures, such as how satisfied they were with their present life, whether they attempted to persuade others close to them to share their views on subjects they held strong opinions about, whether they discussed political matters, how important the role of the European Union (EU) will be in their daily life over the next five years, and how they viewed the need for societal change. Additional questions focused on the respondents' knowledge of and opinions on the EU, including how well-informed they felt about the EU, what sources of information about the EU they used, whether their country had benefited from being an EU member, and the extent of their personal interest in EU matters. Other major areas of focus in the surveys included European Parliament elections, the single European currency (the euro), and respondents' experiences with financial services. Respondents were asked which television news programs they watched, which newspaper(s) they read, and how much attention they gave to politics, social issues, the European Union, the economy, sports, the environment, foreign policy, and culture. They were also asked whether they voted in the most recent European Parliament elections, what their reasons were for voting or not voting, and how they viewed the importance and power of the European Parliament in the European Union. A number of questions probed for respondents' knowledge and use of the euro, whether they worried about changing to the euro, and what they thought about the timing of the change to the euro and about legislation surrounding the euro. Another set of questions queried respondents about financial services and obstacles to using those services, means of payment for important purchases, bank accounts, post office accounts, loans, and mortgages. Respondents were also asked for their knowledge of foreign languages and their assessment of the two most useful languages besides one's own native language. Standard demographic information was collected on left-right political self-placement, marital status, age at completion of education, current age, sex, number of people in the household, number of children in the household, current occupation, previous occupation, household income, size of locality, and region of residence.

### 1.2.2 Topic classification

- International Institutions, Relations
- Political Attitudes and Behavior
- Patterns of Consumption
- Economic Policy, National Economic Situation
- Communication, Public Opinion

### 1.2.3 Related publications

- European Commission: EUROBAROMETER 52. Public Opinion in the European Community. Brussels, April 2000.
- INRA (Europe) for the European Commission, Directorate-General "Health and Consumer Protection": Europeans and the Euro. Brussels, February 2000.
- INRA (Europe) pour la Commission Européenne, Direction Générale "Santé et protection des Consommateurs": Les Européens et les services financiers. Bruxelles, mai 2000.

### 1.3 Universe

In all, Eurobarometer 52.0 interviewed 16.071 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany.

### 1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Luxembourg (600) and Germany with separate samples for the Eastern and the Western part (1000 each). The effective number of realized interviews in this round is indicated in table 1.

### 1.5 Fieldwork

From October 15 to November 14, 1999, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the 'Survey, Research, Analysis' Unit of the Directorate General X, 'Information, Communication and Culture', of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels.

## 1.6 Mode of data collection

In all member states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO. Interviews were conducted face-to-face in respondents' homes in the appropriate national language.

INRA (Europe) developed equivalent French and English basic questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

## 1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided

in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

**Eurobarometer 52.0** provides five (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, NATION WEIGHT III (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. NATION WEIGHT IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM) combines NATION WEIGHT I and NATION WEIGHT III. WEIGHT ADJUSTED TO STANDARD SIZE (Nation Weight IIb) is equivalent to WEIGHT RESULT FROM TARGET adjusting all samples to the standard size of 1000 cases (respectively 300 for Northern Ireland and 600 for Luxembourg). All other samples (nations) are included,

likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

## 1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or documented. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information in the original INRA dataset. Four variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, NATION IV, and REGION II.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks (system missing) to standard values.

Question text and contingency text appearing in the variable description is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's original codebook and INRA's SPSS data definition statements as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or answer categories is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

	EB73.1 (2010)	Iceland	IS	500	standard and selected topical modules (CC)
		Switzerland	CH	1000	standard and selected topical modules (EFTA)
		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

## 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																																																																																																					
CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

## 5 Variable Documentation

**Variable, Label**

**Question Text (English Language)**

**v1 - STUDY NUMBER DISTRIBUTOR**

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
3204			16071	100.0	100.0
	Sum		16071	100.0	100.0
	Valid Cases		16071		

## v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
3204			16071	100.0	100.0
	Sum		16071	100.0	100.0
	Valid Cases		16071		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

- 1 1st za edition - release 17-11-2006
- 2 2nd za edition - release 04-06-2007

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
2	2nd za edition - release 04-06-2007		16071	100.0	100.0
	Sum		16071	100.0	100.0
	Valid Cases		16071		

#### version - GESIS ARCHIVE VERSION

##### VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set. Former version or edition identification variables are maintained unchanged as a reference to former releases.

#### version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-03-30)			16071	100.0	100.0
	Sum		16071	100.0	100.0
	Valid Cases		16071		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 52.0

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 52.0		16071	100.0	100.0
	Sum		16071	100.0	100.0
	Valid Cases		16071		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

	Valid Cases		16071		

v6 - NATION I (UNITED KINGDOM)

Nation of Interview I

15 EC countries including separate samples for East and West Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany (East)
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v6

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1003	6.2	6.2

17	Austria		1018	6.3	6.3
	Sum		16071	100.0	100.0
	Valid Cases		16071		

v7 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. All national weights are included. This weight should be used together with NATION I.

Unlike the "Nation Weight I" in earlier Eurobarometer up to 31 this weight adjusts all samples to the standard size.

v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany (East)
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1003	6.2	6.2
2	Belgium		1044	6.5	6.5
3	The Netherlands		1010	6.3	6.3
4	Germany (West)		1018	6.3	6.3
5	Italy		1010	6.3	6.3
6	Luxembourg		598	3.7	3.7
7	Denmark		1001	6.2	6.2
8	Ireland		1001	6.2	6.2
9	Great Britain		1002	6.2	6.2
10	Northern Ireland		320	2.0	2.0
11	Greece		1010	6.3	6.3
12	Spain		1000	6.2	6.2
13	Portugal		1001	6.2	6.2
14	Germany (East)		1020	6.3	6.3
16	Finland		1015	6.3	6.3
17	Sweden		1000	6.2	6.2
18	Austria		1018	6.3	6.3
	Sum		16071	100.0	100.0
	Valid Cases		16071		

v9 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each country. Great Britain and Northern Ireland as well as East and West Germany are treated as independent samples. This weight should be used together with NATION II.

Note:

This weight corresponds to "NATION WEIGHT II" in earlier Eurobarometer up to 31.

v10 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" but adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland ) or 600 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

v11 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway (not included)
- 15 Finland
- 16 Sweden
- 17 Austria

v11

Value	Label	Missing	Count	Percent	Valid Percent
1	France		1003	6.2	6.2
2	Belgium		1044	6.5	6.5
3	The Netherlands		1010	6.3	6.3
4	Germany (West+East)		2038	12.7	12.7
5	Italy		1010	6.3	6.3
6	Luxembourg		598	3.7	3.7
7	Denmark		1001	6.2	6.2
8	Ireland		1001	6.2	6.2

11	Greece		1010	6.3	6.3
12	Spain		1000	6.2	6.2
13	Portugal		1001	6.2	6.2
15	Finland		1015	6.3	6.3
16	Sweden		1000	6.2	6.2
17	Austria		1018	6.3	6.3
	Sum		16071	100.0	100.0
	Valid Cases		16071		

v12 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and the West German samples to their respective proportions in the united Germany. All national weights are included and all samples adjusted to the standard size. This weight should be used whenever the united Germany is to be analyzed as a whole (NATION III).

v13 - NATION IV (UK + UNITED GERMANY)

Nation of interview IV

United Germany (East+West) and United Kingdom

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Norway (not included)
- 14 Finland
- 15 Sweden
- 16 Austria

v13

Value	Label	Missing	Count	Percent	Valid Percent

v14 - WEIGHT SPECIAL UK + GERMANY

Nation Weight IV (WEIGHT SPECIAL GERMANY & UNITED KINGDOM)

This variable adjusts the East and the West German samples to their respective proportions in the united Germany, and the British and Northern Irish samples to their respective proportions in the United Kingdom. All national weights are included and all samples adjusted to the standard size. This weight should be used whenever both, the united Germany and the United Kingdom, are to be analyzed as a whole (NATION IV).

v15 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

WEIGHT EURO 6 refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

This variable contains weights that adjust each national sample to its nation's share in the population of the above mentioned countries and should be used whenever these six countries are to be analyzed as a group in total. All other countries are excluded from calculation.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

#### v16 - WEIGHT EURO 9

European Weight IIa (WEIGHT EURO 9)

WEIGHT EURO 9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EURO 6 countries.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v17 - WEIGHT EURO 10

European Weight IIb (WEIGHT EURO 10)

WEIGHT EURO 10 adds Greece to the EURO 9 countries (new member as of January 1981).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v18 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

WEIGHT EURO 12 adds Spain and Portugal to the EURO 10 countries (new member as of January 1986).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v19 - WEIGHT EUROPE 12 +

European Weight IV (WEIGHT EURO 12+)

WEIGHT EURO 12+ equals EURO 12 but including East Germany after the unification of Germany on October 3, 1990.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

#### v20 - WEIGHT EURO 15

European Weight Va (WEIGHT EURO 15)

WEIGHT EURO 15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. This weight variable includes the national weights for each sample.

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometer up to 31 this weight contains the adjustment to the standard size.

v21 - WEIGHT EUROPE + 3

European Weight Vb (WEIGHT EURO +3)

WEIGHT EURO +3 only refers to the three new members as of January 1995: Finland, Sweden and Austria. (All other countries are excluded and weighted by "zero".)

This variable contains weights that adjust each national sample to its nation's share in the total population of these three countries and should be used whenever these three countries are to be analyzed as a group in total. All other countries are excluded from calculation.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v22 - WEIGHT SPECIAL EURO/NON-EURO

Weight Special Euro/Non-Euro (GREECE NON-EURO)

Starting with Eurobarometer 49 this variable separates the group of 11 countries which accepted to introduce the EURO, as of 01/01/99 (Belgium, Germany, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland). This weight should be used together with the corresponding EURO/NON-EURO SPLIT VARIABLE V892.

This variable contains weights that adjust each national sample to its nation's share in the total population of each group and should be used whenever both groups are to be analyzed for the purpose of comparison.

This weight variable includes the national weights for each sample and contains the adjustment to the standard size.

v23 - Q1 NATIONALITY BELGIUM

v449 - Q18 EU INFO SOURCES: NEVER LOOK FOR

Q.18

When you are looking for information about the European Union, its policies, its institutions, which of the following sources do you use?

(SHOW CARD - READ OUT - SEVERAL ANSWERS POSSIBLE)

Which else?

(IF CODE 16: GO TO Q.20)

Q.18\_16 Never look for such information/not interested

0 Not mentioned

1 Mentioned

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v615 - Q44 KNOWLEDGE MINISTER OF FOREIGN AFFAIRS

Q.44

ASK ALL

Let us now look at some public figures.

Using this card, could you give me the name of the individual who currently holds the following jobs?

(SHOW CARD)

(CARD TO BE APPLIED - BUT NOT INSERTED IN THE FIELD QUESTIONNAIRE)

A. (COUNTRY SPECIFIC NAME) (OF A PUBLIC FIGURE, IMPORTANT IN NATIONAL OR REGIONAL POLITICS)

B. Romano Prodi

C. Kofi Annan

D. (NAME OF (IN UK, F, I, E, D: ONE OF) THE COMMISSIONER(S) OF THE COUNTRY)

E. (IN UK, F, I, E, D: NAME OF THE OTHER COMMISSIONER OF THE COUNTRY)

F. (COUNTRY SPECIFIC NAME) (OF A PUBLIC FIGURE, IMPORTANT IN NATIONAL OR REGIONAL POLITICS)

G. (NAME OF THE NATIONAL MINISTER OF FINANCE)

H. (NAME OF FORMER NATIONAL COMMISSIONER)

I. (NAME OF THE HEAD OF NATIONAL GOVERNMENT)

J. (NAME OF THE NATIONAL MINISTER OF FOREIGN AFFAIRS)

K. Javier Solana

L. Jacques Santer)

Q.44\_4 (NATIONALITY) Minister of Foreign Affairs

0 NA

1 Correct (letter = J)

2 Incorrect

3 DK

v616 - Q45A EU AND PEOPLE - RELY ON EUROP COMMISSION

Q.45

Many important decisions are made by the European Union. They might be in the interest of people like yourself, or they might not. To what extent do you feel you can rely on each of the following bodies to make sure that these decisions are in the interest of people like yourself ? Please use this scale.

(SHOW CARD)

"1" means that you cannot rely on it at all, "10" that you can rely on it completely. The scores in between allow you to say how close to either side you are.

Q.45A

First, to what extent do you feel you can rely on the European Commission?

v619 - Q45D EU AND PEOPLE - RELY ON EUROP PARLIAMENT

Q.45

Many important decisions are made by the European Union. They might be in the interest of people like yourself, or they might not. To what extent do you feel you can rely on each of the following bodies to make sure that these decisions are in the interest of people like yourself ? Please use this scale.

(SHOW CARD)

"1" means that you cannot rely on it at all, "10" that you can rely on it completely. The scores in between allow you to say how close to either side you are.

Q.45A

First, to what extent do you feel you can rely on the European Commission?

Q.45D

And what about the European Parliament?

(SHOW SAME CARD)

v631 - Q48 EUROP ELECTIONS - SEATS FOR PARTIES

Q.48

In an election, some parties win more seats and some parties win fewer seats. Some people say that this matters very little, other people say that it matters a great deal. Thinking about a European Parliament election like the one we had in June, where would you place your own view on this scale?

v783 - D4 VOTE INTENTION - FRANCE

D.4

If there were a "general Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote) which party would you vote for?

D.4\_FR

Vote intention: France

0 NA

5 (PSU) Parti Socialiste Unifie et extreme gauche (Lutte Ouvriere) (Unified Socialists and extreme left (Workers Struggle))

10 (PCF) Partie Communiste Francais (Communist Party)

20 (PS) Parti Socialiste (Socialist Party)

21 Mouvement des Citoyens (Citizen's movement)

30 (MRG) Mouvement des Radicaux de Gauche (Left radicals)

50 Les Verts (Green Party)

51 (GE) Generation Ecologie (Ecologists)

56 (CPN) Chasse, Peche, Nature et Tradition (Hunting, Fishing, Nature and Tradition)

59 (CNI) Centre National des Independants (National Centre of Independents)

60 (RPR) Rassemblement Por la Republique (Rally for the Republic)

69 (MPF) Mouvement pour la France (Movement for France)

70 (PR) Parti Republicain (Republican Party)

71 (CDS) Centre des Democrates Sociaux (Social Democratic Centre)

72 (UDF) Union pour la Democratie Francaise (Union for French Democracy)

73 (UPF) Union pour la France (Union for France)

74 (DL) Democratie Liberal (Liberal Democracy)

80 (FN) Front National et extreme droite (National front and extreme right)

95 Would vote blank/would spoil your vote

96 Would not vote

98 DK

99 Inap. (not coded 1 in V8)

Note:

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

99 Inap. (not coded 7 in V8)

Note:

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

v798 - D4 VOTE INTENTION - AUSTRIA

D.4

If there were a "general Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote) which party would you vote for?

D.4\_AT

Vote intention: Austria

0 NA

20 (SPÖ) Sozialdemokratische Partei Österreichs (Social Democratic Party of Austria)

50 (GAL) Die Grünen (Greens)

60 (ÖVP) Österreichische Volkspartei (Austrian People's Party)

70 (LIF) Liberales Forum (Liberal Forum - breakaway of (FPÖ))

80 (FPÖ) Freiheitliche Partei Österreichs (Die Freiheitlichen) (Freedom Party of Austria)

90 Other party

95 Would vote blank/would spoil your vote

96 Would not vote

98 DK

99 Inap. (not coded 18 in V8)

Note:

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

- 90 Other party

Note:

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

Starting with EB2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Users may modify these codings or part of these codings in order to suit their special needs.

Weighting required for united Germany (East+West) - see V12

Please notice that regional political parties ICV and BNG are corrected in accordance with the respective regional attribution. ICV is represented only in Catalunya, BNG only in Galicia.

v801 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF STILL STUDYING : CODE 00 - GO TO D.10)

0 NA (see note)

6 6 years

39 39 years

98 Still studying (see note)

Note:

Last trend: EB 51.1, D.8

Original code "00" recoded to "98"

For 4 respondents the indicated age "When stopped full-time education" was too high for their actual age (D.11/V804). These cases were recoded to "0" (NA).

6 missing cases which are coded "2" (Student) in D15A/V809 have been recoded to "98" (Still studying).

v802 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 0 NA (see note)
- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying (see note)

Derivation:

This variable is constructed from answers to D.8.

Note:

See D.8 for complete question text

For 4 respondents the indicated age "When stopped full-time education" was too high for their actual age (D.11/V804). These cases were recoded to "0" (NA).

6 missing cases which are coded "2" (Student) in D15A/V809 have been recoded to "10" (Still studying).

v804 - D11 AGE EXACT

D.11

How old are you?

0 NA (GB: including 99)

15 15 years

98 98 years

Note:

Last trend: EB 51.1, D.11

Actual number is coded

10 cases coded "99" as age of respondent for Great Britain were recoded to "0" (NA= not plausible extreme values).

v805 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 0 NA (GB: including 99)
- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text

10 cases coded "99" as age of respondent for Great Britain were recoded to "0" (NA= not plausible extreme values).

v814 - D21B OCCUPATION OF HEAD OF HH - LAST JOB

D.21B

IF CODE 2 AT D.19B / IF NOT DOING ANY PAID WORK CURRENTLY - CODE 1 TO 4 IN D.21A

Did she/he do any paid work in the past? What was her/his last occupation?

SELF-EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 4 Owner of a shop, craftsmen, other self employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, ...)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

99 Inap. (not coded 1 to 4 in V813)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

v815 - D29 INCOME HH - FRANCE

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

- 12 500.001 PTE or more

in Finland (FI):

Finmark per month

- 1 Up to 5.000 FIM
- 2 5.001 - 7.500 FIM
- 3 7.501 - 10.000 FIM
- 4 10.001 - 12.500 FIM
- 5 12.501 - 15.000 FIM
- 6 15.001 - 17.500 FIM
- 7 17.501 - 20.000 FIM
- 8 20.001 - 22.500 FIM
- 9 22.501 - 25.000 FIM
- 10 25.001 - 27.500 FIM
- 11 27.501 - 30.000 FIM
- 12 30.001 FIM or more

in Sweden (SE):

Swedish Kroner per month

- 1 Less than 5.000 SEK
- 2 5.000 - 10.000 SEK
- 3 10.001 - 15.000 SEK
- 4 15.001 - 20.000 SEK
- 5 20.001 - 25.000 SEK
- 6 25.001 - 30.000 SEK
- 7 30.001 - 35.000 SEK
- 8 35.001 - 40.000 SEK
- 9 40.001 - 45.000 SEK
- 10 45.001 - 50.000 SEK
- 11 50.001 - 55.000 SEK
- 12 55.001 SEK or more

in Austria (AT):

Austrian Schilling per month

- 1 Up to 6.000 ATS
- 2 6.001 - 8.000 ATS
- 3 8.001 - 10.000 ATS
- 4 10.001 - 12.000 ATS
- 5 12.001 - 14.000 ATS
- 6 14.001 - 16.000 ATS
- 7 16.001 - 20.000 ATS

- 8 20.001 - 25.000 ATS
- 9 25.001 - 30.000 ATS
- 10 30.001 - 35.000 ATS
- 11 35.001 - 40.000 ATS
- 12 More than 40.000 ATS

Note:

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

Weighting required for united Germany (East+West) - see V12

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V7

Last trend: EB51.1, D.29

v833 - D29 INCOME HH QUARTILES

D.29R HOUSEHOLD INCOME (HARMONISED)

- 1 -- (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 ++ (Highest income quartile)
- 5 DK/Refusal

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

Please notice that the income quartiles are produced for comparison purposes and are retained as provided by the principal investigator. They are based on categorised income question as coded in the country specific variables V815 to V831.

- 7 500.000 and more inhabitants

in Italy (IT):

- 1 Up to 10.000 inhabitants
- 2 10.001 - 100.000 inhabitants
- 3 100.001 - 250.000 inhabitants
- 4 More than 250.000 inhabitants

in Luxembourg (LU):

- 1 Up to 2.500 inhabitants

- 2 2.501 - 5.000 inhabitants
- 3 5.001 - 10.000 inhabitants
- 4 10.001 - 20.000 inhabitants
- 5 20.001 - 50.000 inhabitants
- 6 More than 50.000 (Luxembourg ville)

in Denmark (DK):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 4.999 inhabitants
- 3 5.000 - 9.999 inhabitants
- 4 10.000 - 19.999 inhabitants
- 5 20.000 - 49.999 inhabitants
- 6 50.000 - 99.999 inhabitants
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 Up to 2.000 inhabitants
- 2 2.001 - 20.000 inhabitants
- 3 20.001 - 100.000 inhabitants
- 4 100.000 and more inhabitants

in Great Britain (GB\_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB\_NIR):

- 1 Up to 2.000 inhabitants
- 2 2.001 - 20.000 inhabitants
- 3 20.001 - 100.000 inhabitants
- 4 More than 100.000 inhabitants

in Greece (GR):

- 1 Up to 2.000 inhabitants
- 2 2.001 - 10.000 inhabitants
- 3 10.001 - 50.000 inhabitants
- 4 50.001 - 1.000.000 inhabitants
- 5 1.000.001 and more inhabitants

in Spain (ES):

- 1 Up to 2.000 inhabitants
- 2 2.001 - 10.000 inhabitants
- 3 10.001 - 50.000 inhabitants
- 4 50.001 - 100.000 inhabitants
- 5 100.001 - 300.000 inhabitants
- 6 300.001 - 500.000 inhabitants

- 7 500.001 - 1.000.000 inhabitants
- 8 More than 1.000.000 inhabitants

in Portugal (PT):

- 1 Up to 100 inhabitants
- 2 101 - 200 inhabitants
- 3 201 - 500 inhabitants
- 4 501 - 1.000 inhabitants
- 5 1.001 - 2.000 inhabitants
- 6 2.001 - 5.000 inhabitants
- 7 5.001 - 10.000 inhabitants
- 8 5.001 - 10.000 inhabitants
- 9 20.001 - 100.000 inhabitants
- 10 100.001 - 500.000 inhabitants
- 11 More than 500.000 inhabitants

in Finland (FI):

- 1 Helsinki area
- 2 Turku, Tampere
- 3 Other town
- 4 Rural center

in Sweden (SE):

- 1 Less than 5.000 inhabitants
- 2 5.000 - less than 10.000 inhabitants
- 3 10.000 - less than 30.000 inhabitants
- 4 30.000 - less than 50.000 inhabitants
- 5 50.000 - less than 100.000 inhabitants
- 6 100.000 - less than 150.000 inhabitants
- 7 150.000 and more inhabitants

in Austria (AT):

- 1 Rural (up to 5.000 inhabitants)
- 2 Mixed urban/rural (Klein-/Mittelstadt)
- 3 Urban (Landeshauptstadt)
- 4 Metropolitan (Vienna)

Note:

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

999 Inap. (not coded 4 or 14 in V8)

Note:

Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer Region II for example was formerly only composed of Halle and Magdeburg. PLEASE NOTICE that EAST GERMAN regional units (Brandenburg, Mecklenburg-Vorpommern and Thüringen) on NUTS II level have not been supplied for EUROBAROMETER 52.0.

Weighting required for united Germany (East+West) - see V12

- 8 Burgenland
- 9 Wien (Vienna)

Note:

In the cases of France, West Germany, Italy, Ireland and the United Kingdom "Region I" corresponds to the variable labelled "Province" in earlier Eurobarometers up to number 31. If indicated, "Region I" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

Weighting required for analysis on U.K. level - see V7

Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the

regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer Region II for example was formerly only composed of Halle and Magdeburg. PLEASE NOTICE that EAST GERMAN regional units (Brandenburg, Mecklenburg-Vorpommern and Thüringen) on NUTS II level have not been supplied for EUROBAROMETER 52.0.

Weighting required for united Germany (East+West) - see V12

Starting with EB51.0 regions for Sweden changed. The new subdivision is independent of the subdivision into counties ("Län" up to EB43.1bis) and Riksomraden (EB44.0 up to EB50.1). Some provinces are a part of two or three counties. Sometimes there is more than one province within a county. There are also provinces and counties that share exactly the same borderlines.

99 Inap. (no Region II available)

Note:

Starting with Eurobarometer 44.2bis the East German federal units (Neue Bundesländer) are not any more constructed from the ex-GDR administrative regional units (Bezirke). There may be minor changes in the real territorial outline of each unit in comparison with the categories as constructed in former Eurobarometer up to survey number 44.1.

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

Weighting required for united Germany (East+West) - see V12

Weighting required for United Kingdom (GB+NIRL) - see V7

This variable integrates all countries in accordance with other Eurobarometer codebooks up to survey 48.

v887 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilisation Index 1

- 0 DK/NA
- 1 - - low
- 2 -
- 3 +
- 4 ++ high

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.6) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.5). Interviewees giving affirmative answers to both questions are labelled + +. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

CODE 0: coded 0 or 5 for V80 and 0 or 4 for V79

CODE 1: coded 3, 4, 5 or 0 for V80 and 3 for V79; or coded 3 or 4 for V80 and 3, 4 or 0 for V79

CODE 2: coded 3, 4, 5 or 0 for V80 and 2 for V79; or coded 1 or 2 for V80 and 3, 4 or 0 for V79

CODE 3: coded 3, 4, 5 or 0 for V80 and 1 for V79; or coded 1 or 2 for V80 and 2 for V79

CODE 4: coded 1 or 2 for V80 and 1 for V79

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v888 - C4 SOCIO PROF STATUS

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any paid work, NA)
- 1 Farmer & fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Note:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EUROBAROMETER 48, March 1998, Brussels, C.5.

v889 - C5 EUROPEAN POLITICAL PARTY PREFERENCE

C.5 EUROPEAN PARTY PARLIAMENTARY PREFERENCE INDEX

- 0 Other answers/NA
- 1 (PSE) Group of the Party of European Socialists
- 2 (PPE) Group of the European People's Party/Christian-Democratic Group
- 3 (ELDR) Group of the European Liberal, Democrat and Reform Party
- 4 (UPE) Group Union for Europe
- 5 (GUE-NGL) Confederal Group of the European United Left/Nordic Green Left
- 6 (V) The Green Group in the European Parliament
- 7 (ARE) Group of the European radical Alliance
- 8 (I-EDN) Group of Independents for a Europe of Nations
- 9 (N.I.) Non-attached
- 10 No clear attribution
- 11 Not represented (other parties)

Derivation:

This index is based upon the vote intention question D.4: "If there were a "General Election" tomorrow (SAY IF CONTACT UNDER 18 YEARS: and you had a vote), which party would you vote for?"

Answers are grouped according to the affiliation of the representatives of the respective party to a group in the European Parliament.

If a party was not represented in the European Parliament at the time the survey was carried out but had been represented before, its supporters are included in the European Parliament group their party has previously been affiliated with. Supporters of parties represented in the European Parliament whose members (of the European Parliament) are not affiliated with any group are labelled N.I. ("non-attached"), supporters of parties not represented in the European Parliament are labelled "other parties". In some cases "no clear attribution" may be possible.

This variable is constructed by the Central Archive mapping the country specific variables V783 to V798 to the party group structure of the 5th EU-Parliament period (1999-2004). Spanish regional parties, combined coded '57' in V794, are attributed separately to its corresponding group in the EU-Parliament. Different internet resources were used for information on the respective party affiliations:

[www.europarl.europa.eu/election/def\\_nig.htm](http://www.europarl.europa.eu/election/def_nig.htm) (official website of the EP)

[www.parties-and-elections.de](http://www.parties-and-elections.de)

<http://en.wikipedia.org/wiki/User:Electionworld/Electionworld>.

v890 - C11 MEDIA USE INDEX

C.11 MEDIA USE

0 DK/NA

1 +++

2 ++

3 --

4 ---

Derivation:

This index is based upon answers to question Q.5 (V41-V43): "About how often do you watch the news on television, read the news in daily papers, listen to the news on the radio?"

It combines the answers in the following way: +++ News on TV, radio, and papers everyday or several times a week; ++ Two media everyday or several times a week, the third medium not more than once or twice a week; - - One of the three media everyday or several times a week, the two others, not more than once or twice a week; - - - The three media no more than once or twice a week.

CODE 0: coded 0 or 6 for one or more variables

CODE 1: coded 1 or 2 for V91, V92 and V93

CODE 2: coded 1 or 2 for two of these variables and coded 3, 4, or 5 for the third variable

CODE 3: coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables

CODE 4: coded 3, 4 or 5 for V91, V92 and V93

v891 - C14 OCCUPATION OF RESPONDENT - SCALE

C.14 Respondent Occupation Scale

- 0 NA
- 1 Self-employed (coded 5 to 9 in V809)
- 2 Managers (coded 10 to 12 in V809)
- 3 Other white collars (coded 13 or 14 in V809)
- 4 Manual workers (coded 15 to 18 in V809)
- 5 House persons (coded 1 in V809)
- 6 Unemployed (coded 3 in V809)
- 7 Retired (coded 4 in V809)
- 8 Students (coded 2 in V809)

Derivation:

This scale is based on a combination / selection of the current respondent occupation variable D.15A.

v893 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 16: Finland; 17: Sweden; 18: Austria). The remaining four digits contain the country-specific questionnaire numbers.

Note:

For technical reasons two original respondent ID's have been recoded, one for Sweden (10380 to 3500) and one for Denmark (10685 to 3500).

Actual number is coded
