Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures, such as how satisfied they were with their present life, whether they attempted to persuade others close to them to share their views on subjects they held strong opinions about, whether they discussed political matters, what their country's goals should be for the next 10 or 15 years, and how they viewed the need for societal change. Additional questions focused on the respondents' knowledge of and opinions on the European Union (EU), including how well-informed they felt about the EU, what sources of information about the EU they used, whether their country had benefited from being an EU member (or would benefit from being a future member), and the extent of their personal interest in EU matters. Another major focus of the surveys was to ask respondents to express their opinion regarding EU enlargement including whom they would favor to join the EU, and in particular, the possible accession of Turkey. Respondents residing in EU countries were asked to identify fears they may have regarding EU enlargement. All respondents were asked their opinion about the effects of and the EU's role in globalization. The survey also examines world politics by asking respondents about the roles of the United States and the EU, and in general how the EU would compare itself to the United States, Japan, China, and India in several areas. In addition, respondents were asked to identify two most important issues facing their country, and whether the process of decision-making about these issues should be done by their country alone, by the EU, or jointly. The survey also queried respondents about their views on (1) the EU's budget and its allocation of funds to programs, (2) the EU's role in immigration, health care and economics including trade, pensions, and employment, and (3) the EU's development of economic, defense, and security policies, educational programs, and a constitution. Special topics included energy consumption, agricultural policy, and media use. Respondents were asked about their usage of energy, and about how the EU's citizens and government could reduce consumption and utilize alternative resources. They were also asked about EU agricultural policy and how it may benefit farmers, consumers, the environment, and the world market. In addition, respondents were asked questions regarding the types of media they used to obtain news and information about the EU, frequency of news media use, the purpose for Internet use, and their views regarding how frequently the media talks about the EU and how the media presents the EU to citizens. Demographic and other background information includes respondent's age, gender, nationality, marital status, left-to-right political self-placement, occupation, age at completion of full-time education, household composition, and use of a fixed or a mobile telephone. In addition, country-specific data include size of locality, region of residence (local codes), language of interview (select countries), household income, and a list of television channels, radio stations, and daily newspapers that respondents regularly viewed, listened to, or read during the course of a week.

1.3 Universe

In all, Eurobarometer 64.2 interviewed 29.430 citizens of the 25 countries in the European Union after the 2004 enlargement, in the remaining Accession Countries (AC) Bulgaria and Romania and Candidate Countries (CC) Croatia and Turkey, and among the Turkish Cypriote Community (TCC). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Malta, and Cyprus (TCC) with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 11 to November 15, 2005, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried

out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size

of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 64.2 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W3 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W4 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their

respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

| European Weights in Eurobarometer 64.2 | Function |
|--|---|
| W5 to W9, W11, W14 | grouping EU member countries |
| W10, W13 | grouping new member countries |
| W15, W18, W19 | grouping candidate/accession countries |
| W16 | grouping member + candidate/accession countries |
| 12 | grouping (non-)Eurozone countries |

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS-ZA from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented (see notes in variable descriptions) or corrected, as a general rule and, if possible respectively appropriate, after consulting the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS-ZA.

GESIS-ZA added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for every or almost every respondent.

Users should note that answers to multiple-response questions are (originally) represented by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only), creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". GESIS-ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

GESIS-ZA has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire. Coding schemes and other documentation are based on the English language version of the basic (bilingual) questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data

regarding the coding scheme of a variable, GESIS-ZA as a general rule carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, GESIS-ZA documents the original language wording and supplies the English translation in brackets. Specific information on data preparation or inconsistencies is noted on variable level.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

| Topic | (Over-)Sample | Eurobarometer Survey |
|--------------------|--------------------------|-----------------------------------|
| Young Europeans | Youth aged 15-24 | 17, 28.1, 34.2, 47.2OVR, 55.1OVR |
| Elderly Europeans | Elderly aged 60+ | 37.2 |
| Consumer Behaviour | Responsible for shopping | 41.0 |
| Unemployment | Unemployed | 44.3OVR |
| Working Conditions | Professionally active | 37.0+1, 39.0+1 |
| Drug Abuse | Youth aged 15-24 | 43.0+1, 57.2OVR |
| Education Issues | Youth aged 15-24 | 44.0 / 44.1 (data not integrated) |

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

| Standard and trend surveys | Fieldwork Dates | GESIS ID | Standard Report | Special topic | Subset |

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

| Category | | Party Family |
|----------|-----------|--|
| | | |
| 0 | (001-099) | not affiliated / electoral alliances across "families" |
| 1 | (100-199) | Communists |
| 2 | (200-299) | Socialists |
| 3 | (300-399) | Liberals |
| 4 | (400-499) | Christian Democrats |
| 5 | (500-599) | Conservatives |
| 6 | (600-699) | Extreme Rights / Nationalists |
| 7 | (700-799) | Regionalists / Ethnic |
| 8 | (800-899) | Environmental parties |
| 9 | (900-949) | Agricultural parties |
| 9 | (950-989) | other special issue parties (e.g. Eurosceptics) and independents |
| | | |
| | 990 | other (spontaneous) |
| | 994 | not voting age |
| | 995 | empty ballot (blank) or invalid vote |
| | 996 | not voted / would not vote |
| | 997 | Refused |
| | 998 | DK / DK+NA if NA not coded separately |
| | 999 | INAP (inappropriate) |

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

| | | | |
|--------|----------------------------|----|-------------------|
| AT | Austria | HR | Croatia |

| GR | Greece | TR | Turkey |

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Note: Last trend: EB ... , Q ... | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate). | Absolute Values (Row Percent), weighted by v8 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable. | <table><tr><th></th><th>v77</th><th>1</th><th>2</th><th>3</th><th>4</th><th>5</th><th>6</th><th>N Sum</th><th>N Valid | N Valid Sum | 4526 | 10021 | 4348 | 1640 | 5750 | | | 26285 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> . | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

Distributor Archive Study Number

Study Number of the distributing archive.

v1

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|-------------|---------|-------|---------|---------------|
| 4414 | | | 29430 | 100.0 | 100.0 |
| | Sum | | 29430 | 100.0 | 100.0 |
| | Valid Cases | | 29430 | | |

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|-------------|---------|-------|---------|---------------|
| 4414 | | | 29430 | 100.0 | 100.0 |
| | Sum | | 29430 | 100.0 | 100.0 |
| | Valid Cases | | 29430 | | |

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

1 1st GESIS-ZA edition as of 27-03-2008

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|---------------------------------------|---------|-------|---------|---------------|
| 1 | 1st GESIS-ZA edition as of 27-03-2008 | | 29430 | 100.0 | 100.0 |
| | Sum | | 29430 | 100.0 | 100.0 |
| | Valid Cases | | 29430 | | |

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

| Value | Label | Missing | Count | Percent | Valid Percent |
|--------------------|-------------|---------|-------|---------|---------------|
| 1.1.0 (2012-03-30) | | | 29430 | 100.0 | 100.0 |
| | Sum | | 29430 | 100.0 | 100.0 |
| | Valid Cases | | 29430 | | |

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 64.2

v4

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|--------------------|---------|-------|---------|---------------|
| 1 | Eurobarometer 64.2 | | 29430 | 100.0 | 100.0 |
| | Sum | | 29430 | 100.0 | 100.0 |
| | Valid Cases | | 29430 | | |

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. This weight corresponds to former NATION WEIGHT II (up to EUROBAROMETER 31). Use NATION variable V6 or V7.

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Not United Kingdom

1 United Kingdom

v10 - W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. The national weights are included. This weight in its function partly corresponds to former NATION WEIGHT I (until EUROBAROMETER 31). All other samples are excluded from calculation.

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Not Germany

1 Germany

v34 - W15 WEIGHT SPECIAL AC2/CC2

W15 WEIGHT SPECIAL AC2/CC2

W15 WEIGHT SPECIAL AC2/CC2 refers to the group of the two Accession (Bulgaria, Romania) and the two remaining Candidate Countries (Croatia, Turkey) as of 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v35 - NATION GROUP EURO 29 (EURO 25 + AC2/CC2)

NATION GROUP EURO 29 (EURO 25 + AC2/CC2)

NATION GROUP EURO 29 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession and Candidate Countries (AC2/CC2). Northern Cyprus (Turkish Cypriote Community=TCC) is excluded.

0 Not EURO 29 (EURO 25 + AC2/CC2)

v72 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY, CODE 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF-EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk, but travelling (salesmen, driver, ...)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

0 NA

15 Never did any paid work

99 Inap. (not coded 1 to 4 in V71)

Note:

Coding shifted compared to the questionnaire

Please notice high item non-responses (NA) for Bulgaria.

Last trend: EB64.1, D.15B

v434 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 4 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v437 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE "00")

1 1 year

64 64 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98"

Actual number is coded.

Last trend: EB64.1, D.8

v438 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 12 DK

v440 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB64.1, D.11

v441 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v447 - D40B HOUSEHOLD COMPOSITION: AGED <10 (REC)

D.40B HOUSEHOLD COMPOSITION: AGED <10 RECODED

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 NA

Derivation:

This variable groups answers to question D40B/V446.

Note:

See V446 for complete question text.

v449 - D40C HOUSEHOLD COMPOSITION: AGED 10-14 (REC)

D.40C HOUSEHOLD COMPOSITION: AGED 10-14 RECODED

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 9 NA

Derivation:

This variable groups answers to question D40C/V448.

Note:

See V448 for complete question text.

v450 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 30 Thirty
- 99 NA

Derivation:

This variable summarizes V444, V446 and V448.

Note:

See V444, V446 and V448 for complete question text.

Generated by the archive in accordance with former surveys.

v3309 - P1 DATE OF INTERVIEW

P.1 Date of interview

- 1 Tuesday 11th October 2005
- 2 Wednesday 12th October March 2005
- 3 Thursday 13th October 2005
- 4 Friday 14th October 2005
- 5 Saturday 15th October 2005
- 6 Sunday 16th October 2005
- 7 Monday 17th October 2005
- 8 Tuesday 18th October 2005
- 9 Wednesday 19th October March 2005
- 10 Thursday 20th October 2005
- 11 Friday 21st October 2005
- 12 Saturday 22nd October 2005
- 13 Sunday 23rd October 2005
- 14 Monday 24th October 2005
- 15 Tuesday 25th October 2005
- 16 Wednesday 26th October March 2005
- 17 Thursday 27th October 2005
- 18 Friday 28th October 2005
- 19 Saturday 29th October 2005
- 20 Sunday 30th October 2005
- 21 Monday 31st October 2005
- 22 Tuesday 1st November 2005
- 23 Wednesday 2nd November 2005
- 24 Thursday 3rd November 2005
- 25 Friday 4th November 2005
- 26 Saturday 5th November 2005
- 27 Sunday 6th November 2005
- 28 Monday 7th November 2005
- 29 Tuesday 8th November 2005
- 30 Wednesday 9th November 2005
- 31 Thursday 10th November 2005
- 32 Friday 11th November 2005
- 33 Saturday 12th November 2005
- 34 Sunday 13th November 2005
- 35 Monday 14th November 2005
- 36 Tuesday 15th November 2005

v3310 - P2 TIME OF INTERVIEW

P.2 Time of the beginning of the interview

Note:

Ambiguous time specifications in V3310 have been recoded to '0' in V3311 (NA (ambiguous)).

Actual number is coded.

v3311 - P2 TIME OF INTERVIEW - RECODED

P.2 Time of the beginning of the interview - RECODED

- 0 NA (ambiguous)
- 1 Before 8 h
- 2 8 - 12 h
- 3 13 - 16 h
- 4 17 - 19 h
- 5 20 - 22 h
- 6 23 h +

Derivation:

This variable collapses specifications in V3310.

Note:

Ambiguous time specifications in V3310 have been recoded to '0' in V3311(NA (ambiguous)).

| | Valid Cases | | 1009 | | |

v3324 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan (Great Britain only)
- 99 Inap. (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been coded together (matched).

Weighting required for United Kingdom (Great Britain and Northern Ireland) - see V10

v3324, weighted by v10

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|----------------------------|---------|-------|---------|---------------|
| 1 | Rural | | 184 | 13.9 | 13.9 |
| 2 | Urban | | 454 | 34.4 | 34.4 |
| 3 | Metropolitan (GB_GBN only) | | 682 | 51.7 | 51.7 |
| 99 | Inap. (not 9 or 10 in V6) | M | 0 | 0.0 | |
| | Sum | | 1320 | 100.0 | 100.0 |
| | Valid Cases | | 1320 | | |

v3325 - P6 SIZE OF COMMUNITY - GREECE

P.6_GR (Objective) Size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban
- 4 Thessaloniki
- 5 Athens
- 99 Inap. (not coded 11 in V6)

v3325, weighted by v8

v3391 - P13 LANGUAGE OF INTERVIEW - BELGIUM

P.13_BE Language of questionnaire: Belgium

- 1 French
- 2 Dutch
- 9 Inap. (not coded 2 in V6)

v3391

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|---------------------|---------|-------|---------|---------------|
| 1 | French | | 463 | 1.6 | 45.2 |
| 2 | Dutch | | 561 | 1.9 | 54.8 |
| 9 | Inap. (not 2 in V6) | M | 28406 | 96.5 | |
| | Sum | | 29430 | 100.0 | 100.0 |
| | Valid Cases | | 1024 | | |

v3392 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German
- 9 Inap. (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

v3392

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|---------------------|---------|-------|---------|---------------|
| 1 | Luxembourgish | | 88 | 0.3 | 17.3 |

v3399 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

- 0 DK/NA (coded 5 for V74 and 4 for V73)
 1 - - low (coded 3, 4 or 5 for V74 and 3 for V73; or coded 3 or 4 for V74 and 3 or 4 for V73)
 2 - (coded 3, 4 or 5 for V74 and 2 for V73; or coded 1 or 2 for V74 and 3 or 4 for V73)
 3 + (coded 3, 4 or 5 for V74 and 1 for V73; or coded 1 or 2 for V74 and 2 for V73)
 4 ++ high (coded 1 or 2 for V74 and 1 for V73)

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? Does this happen often ...?" (Q.A2) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.A1). Interviewees giving affirmative answers to both questions are

labelled ++. Interviewees giving negative answers to both questions are labelled - -. Middle categories (+ and -) are constituted correspondingly.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this

variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v3400 - C2 VALUE ORIENTATION - POST-MATERIALISM

C.2 VALUE ORIENTATION

- 0 DK/coded identical (coded 5 for V268 and 5 for V269; coded identical in V268 and V269)
- 1 Materialist (coded 1 for V268 and 3 for V269; or coded 3 for V268 and 1 for V269)
- 2 Mixed (coded 1 or 3 for V268 and 2 or 4 for v269; or coded 2 or 4 for V268 and 1 or 3 for v269 or coded 5 for either V268 or V269)
- 3 Post materialist (coded 2 for V268 and 4 for V269; or coded 4 for V268 and 2 for V269)

Derivation:

This index is based on question Q.A33 (V268/V269): "There is a lot of talk these days about what (OUR COUNTRY)'s goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority. Would you please say which one of them you, yourself, consider to be most important in the long run?: (1) Maintaining order in the country; (2) Giving people more say in important Government decisions; (3) Fighting rising prices; (4) Protecting Freedom of speech. And what would be your second choice?". Respondents combining item (1) and (3) are labelled "materialist". Respondents combining items (2) and (4) are labelled "post-materialist", and others are labelled "mixed".

For a complete discussion of this variable, see Ronald Inglehart, The Silent Revolution: Changing Values and Political Styles among Western Publics (Princeton University Press, 1977).

Please notice that almost 20% of Italian respondents are coded as MISSING (0), because they were coded identical for the first and the second priority (174 with identical items plus 17 DK).

v3401 - C11 MEDIA USE INDEX

C.11 MEDIA USE INDEX

0 DK/NA (coded 6 for one or more variables)

1 +++ (coded 1 or 2 for V161, V162 and V163)

2 ++ (coded 1 or 2 for two of these variables and coded 3, 4, or 5 for the third variable)

3 -- (coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables)

4 --- (coded 3, 4 or 5 for V161, V162 and V163)

Derivation:

This index is based upon answers to question Q.A19 (V161-V163): "About how often do you watch television news programmes, read the news in daily newspapers, listen to radio news programmes?"

It combines the answers in the following way:

+++ News on TV, radio, and newspapers everyday or several times a week;

++ Two media everyday or several times a week, the third medium not more than once or twice a week;

-- One of the three media everyday or several times a week, the two others, not more than once or twice a week;

--- The three media no more than once or twice a week.

v3402 - C14 RESPONDENT OCCUPATION SCALE

C.14 Respondent Occupation Scale

- 1 Self-employed (coded 5 to 9 in V71)
- 2 Managers (coded 10 to 12 in V71)
- 3 Other white collars (coded 13 or 14 in V71)
- 4 Manual workers (coded 15 to 18 in V71)
- 5 House persons (coded 1 in V71)
- 6 Unemployed (coded 3 in V71)
- 7 Retired (coded 4 in V71)
- 8 Students (coded 2 in V71)

Note:

This scale is based on a combination / selection of the current respondent occupation variable D.15A/V71.
