## Acknowledgements

---

Standard & Special Eurobarometer surveys are conducted on behalf of the Commission of the European Communities, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Ronald Inglehart (University of Michigan), collaborated in the design and analysis of the surveys and helped make the data available to the social science community through the Inter-university Consortium for Political and Social Research (ICPSR). Data cleaning and processing was supported by National Science Foundation grants.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

## Introduction and preliminary remarks

---

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

### Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

### Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

### Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

# 1 Study Description – Eurobarometer 28.1

GESIS, Cologne [Publisher]: ZA2041, dataset version 1.0.1, doi:10.4232/1.10898.

## 1.2 Content

### 1.2.1 Abstract

Description of the work and training situation of young people. Attitude to European unification.

Topics: Contentment with life and satisfaction with democracy in the country; personal opinion leadership; frequency of political discussions; postmaterialism; knowledge about the European program to combat cancer; most important personal interests; readiness for action regarding selected social and political goals; educational goals; most important problems of young people; belonging to selected political, social, sport and leisure organizations; knowledge of foreign languages; language used at home; origin of language proficiency; importance of language proficiencies; judgement on the offerings to learn foreign languages; reasons for learning further languages; knowledge about the European Community; interest in more knowledge; EC knowledge from school; stays abroad as tourist and as employee; participation in international youth exchange programs and countries visited; EC countries visited; preferred EC countries for work or study; major problems of a stay abroad; living together with parents or friends; satisfaction in selected situations in life; membership in a youth organization; preferred sources of information; perceived discrimination against selected groups of young people; experienced personal discrimination; financial situation; sources of income; computer knowledge; origin of this computer knowledge; interest in further computer knowledge; reference persons, reference group with important life decisions; evaluation of the help of public agencies and perceived main difficulties; frequency of utilization of these positions and initiator of contact; knowledge of sources of information for young people run by young people; knowledge and evaluation of the EC Commission; attitude to the European Community; assessment of the speed of European unification; attitude to EC membership of one's own country; evaluation of the European domestic market regarding selected economic and political aspects; approval of further unification measures; advantages or disadvantages from EC membership; regret of a hypothetical failure of the EC; perceived changes in the relationship of the EC countries among one another during the last 12 months; attitude to the USA; evaluation of US policies regarding European unification; significance of ties between the USA and the EC and evaluation of development in the last 10 years; self-assessment on a right-left continuum; attitude regarding social changes; party identification.

The following questions were posed to school children and students: study of a desired subject; reasons for studies; selection of the subject; assumed age at end of studies; type of study facility or college.

The following questions were posed to part-time or full-time employed: full or part-time occupation and time worked each week; reasons for part-time employment; further education opportunities at work; manner of finding job; work satisfaction; current duration of employment; number of previous employments; frequency of unemployment since end of school; union membership and reasons for non-membership.

The following questions were also posed to those in training: length of occupational training up to now; detailed

information on occupational training. The following questions were posed to all no longer in school or university: length of general further education after conclusion of required school; reasons for breaking off training; taking up and conclusion of one or more occupational measures for further education; total time duration of these measures; information on training level, benefit and perceived help in the search for work from these measures for further education; school degree; supplemental qualifications through measures for further education.

The following questions were posed to unemployed: length and manner of search for work; major reason for unemployment.

Demography: self-classification on a left-right continuum; attitude to social change; party allegiance.

The following questions were also posed in Denmark: knowledge about the EC presidency of the country and perceived significance for Denmark.

### 1.2.2 Topic classification

- International Institutions, Relations
- Society, Culture
- Family
- Youth
- Occupation, Profession

## 1.3 Universe

The samples of Eurobarometer 28.1 are designed to be representative for the national population aged 15 to 24 years and over of the 12 European Community member countries, resident in and citizen of the respective country. Two separate samples have been drawn in the United Kingdom (Great Britain and Northern Ireland). Research area E.E.C. countries: Belgium, Federal Republic of Germany, Denmark, France, Greece, Ireland, Italy, Luxembourg, Netherlands, Portugal, Spain, United Kingdom, Northern Ireland.

## 1.4 Sampling procedure

Either a nationwide multi-stage stratified probability sample or a nationwide stratified quota sample. The dataset combines respondents aged 15 to 24 from the standard survey 28 (ZA1713) consisting of 2365 cases and a youth oversample of 7084 cases (two cases are not traceable).

The effective number of realized interviews in this round is indicated in table 1.

## 1.5 Fieldwork

## 1.6 Mode of data collection

Faits et Opinions developed equivalent French and English questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. The

The YOUTH OVERSAMPLES\* in Eurobarometer 17 and 28.1 are weighted separately and across ALL samples as documented in the respective study and weight variable description.

**Eurobarometer 28** contains both weighted and self-weighting (unweighted) national samples. Weighted samples are Denmark, Spain, Germany, France, Netherlands and United Kingdom. Self-weighting samples are Belgium, Italy, Luxembourg, Ireland, Portugal, Greece.

The weighted samples require the application of weights to make them representative of the countries from which they were drawn. The self-weighting samples do not require adjustment by weights for individual country analyses.

Three weight variables are provided in this dataset: Nation Weight I (variable 6), Nation Weight II (variable 8) and

European Weight (variable 9).

Nation Weight I contains weights that adjust the weighted samples to make them representative of the countries from which they were drawn. Nation Weight I equals one for all respondents who were interviewed in countries with self-weighting samples. This weight variable should be used whenever countries with weighted samples are to be analyzed separately.

Nation Weight II allows for separate analyses of Great Britain and Northern Ireland. The weights assigned to respondents in Great Britain produce a representative sample for Great Britain alone instead of the United Kingdom as a whole. No weights need be applied to separately analyze Northern Ireland, since the sample selected there was self-weighting. Thus, this weight variable equals one for all respondents in Northern Ireland. For all other countries outside the United Kingdom, Nation Weight II is identical to Nation Weight I, except for some very slight differences due to rounding.

European weight contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. This weight variable also incorporates the within-country weighting information contained in Nation Weight I. European Weight may be used to analyze the European Community nations as a whole.

## 1.8 Data preparation

The data received by ZA from ZEUS (Center for European Survey Analysis and Studies, Mannheim) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or documented. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

ZA also added 'Inappropriate' (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the Faits et Opinions questionnaire was adhered to for (almost) every respondent.

Users should note that Faits et Opinions has occasionally represented answers to a question by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only) creating separate 'dummy' variables to explicitly represent 'Don't know', 'No answer' or other residual responses, such as 'None of the above'. ZA has recoded these residual responses in the case of inconsistencies with respect to the series of substantial answers.

ZA has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values.

Question text and contingency text appearing in the variable description is taken from the Faits et Opinions English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on Faits et Opinions English language version of the basic bilingual questionnaire, ZEUS documentation, the official survey report and the SPSS data definition statements. Whenever a discrepancy occurred between questionnaire, SPSS setup and dataset with respect to the coding scheme of a variable, ZA carried out corrections in agreement with ZEUS, whenever necessary and possible.

SAMPLE GROUPS (V4) have subsequently been identified by ICPSR in order to distinguish between respondents

(aged 15–24) from the standard wave 28 (code 1) and those belonging to the youth oversample (code 2). For two cases it was not possible to trace the origin of the respondent (code 3). The complete youth questionnaire was only asked to the oversample. For those questions which were not asked in the framework of the standard survey, sample groups 1 and 3 are coded to INAP.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

### 1.9 Further remarks

Data and documentation have been supplied via the Center for European Survey Analysis and Studies (ZEUS). The field questionnaires in the different language versions were not provided for the enlarged oversample questionnaire. For the standard survey youth module see Eurobarometer 28 (ZA1713).

## 2 Eurobarometer Series Description

---

### 2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

### 2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

### 2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

### 2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.20VR, 55.10VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

## 2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

## 3 Dataset structure and standards

---

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

### 3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

### 3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

#### 3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable

description. Due to general changes in party systems and to the ideological development of individual political parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

### 3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

### 3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

## 4 Explanation of the variable documentation

---

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (~1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values ( <i>absolute values</i> ) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies ( <i>row percent</i> ) refer to the valid cases ( <i>n valid sum</i> ), i.e. the total number of cases ( <i>n sum</i> ) reduced by the number of cases defined as missing data ( <i>M</i> ). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data ( <i>M</i> ), i.e. <i>percent</i> on the basis of all cases ( <i>sum</i> ) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

## 5 Variable Documentation

Variable, Label  
Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER DISTR (ZA)

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2041			9451	100.0	100.0
	Sum		9451	100.0	100.0
	Valid Cases		9451		

v2 - ARCHIVE STUDY NUMBER PROD (ZA)

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
2041			9451	100.0	100.0
	Sum		9451	100.0	100.0
	Valid Cases		9451		

#### v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

4 4th Archive Edition - Release 22-08-2008

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
4	4th Archive Edition - Release 22-08-2008		9451	100.0	100.0
	Sum		9451	100.0	100.0
	Valid Cases		9451		

## version - GESIS ARCHIVE VERSION

## VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the crosstabulation variable ISOCNTRY and the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

## version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-07-01)			9451	100.0	100.0
	Sum		9451	100.0	100.0
	Valid Cases		9451		

## v4 - EUROBAROMETER NUMBER (SAMPLE)

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

- 1 EB28 YOUTH SUBSAMPLE
- 2 EB28.1 YOUTH OVERSAMPLE
- 3 ORIGIN NOT TRACEABLE

Note:

Sample groups have subsequently been identified by ICPSR in order to distinguish between respondents (aged 15-24) from the standard wave 28 (code 1) and those belonging to the youth oversample (code 2). For two cases it was not possible to trace the origin of the respondent (code 3). The complete youth questionnaire was only asked to the oversample. For those questions which were not asked in the framework of the standard survey, sample groups 1 and 3 are coded to INAP.

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	EB28 YOUTH SUBSAMPLE		2365	25.0	25.0
2	EB28.1 YOUTH OVERSAMPLE		7084	75.0	75.0
3	ORIGIN NOT TRACEABLE		2	0.0	0.0
	Sum		9451	100.0	100.0
	Valid Cases		9451		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

## isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

## NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

## isocntry

Value	Label	Missing	Count	Percent	Valid Percent
BE			833	8.8	8.8
DE			801	8.5	8.5
DK			813	8.6	8.6
ES			788	8.3	8.3
FR			803	8.5	8.5

NL			750	7.9	7.9
PT			832	8.8	8.8
	Sum		9451	100.0	100.0
	Valid Cases		9451		

## v6 - NATION I (UNITED KINGDOM)

## Nation of interview

This variable identifies the E.C. nation where the respondent was interviewed. A unique numeric code is assigned to each of the E.C. countries.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal

## v6

Value	Label	Missing	Count	Percent	Valid Percent
1	France		803	8.5	8.5
2	Belgium		833	8.8	8.8
3	Netherlands		750	7.9	7.9
4	Germany		801	8.5	8.5
5	Italy		856	9.1	9.1
6	Luxembourg		260	2.8	2.8
7	Denmark		813	8.6	8.6
8	Ireland		844	8.9	8.9
9	United Kingdom		1081	11.4	11.4
10	Greece		790	8.4	8.4
11	Spain		788	8.3	8.3
12	Portugal		832	8.8	8.8
	Sum		9451	100.0	100.0
	Valid Cases		9451		

v7 - NATION WEIGHT I

Nation Weight I (Great Britain and Northern Ireland together)

NATION WEIGHT I contains weights that adjust the weighted samples to make them representative of the countries from which they were drawn. This weight variable should be used whenever countries are to be analyzed separately, i.e. breaking data down by NATION I (V6).

Actual number is coded.

## v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview, with two codes for U.K.

This variable identifies the nation of interview and two areas of the U.K.: Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 Netherlands
- 4 Germany
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal

v8

Value	Label	Missing	Count	Percent	Valid Percent
1	France		803	8.5	8.5
2	Belgium		833	8.8	8.8
3	Netherlands		750	7.9	7.9
4	Germany		801	8.5	8.5
5	Italy		856	9.1	9.1
6	Luxembourg		260	2.8	2.8
7	Denmark		813	8.6	8.6
8	Ireland		844	8.9	8.9
9	Great Britain		812	8.6	8.6
10	Northern Ireland		269	2.8	2.8
11	Greece		790	8.4	8.4
12	Spain		788	8.3	8.3
13	Portugal		832	8.8	8.8
	Sum		9451	100.0	100.0
	Valid Cases		9451		

#### v9 - NATION WEIGHT II

Nation Weight II (Great Britain and Northern Ireland separate)

NATION WEIGHT II allows for separate analyses of Great Britain and Northern Ireland. The weights assigned to respondents in Great Britain produce a representative sample for Great Britain alone instead of the United Kingdom as a whole, i.e. breaking data down by NATION II (V8). For all other countries outside the United Kingdom, NATION WEIGHT II is identical to NATION WEIGHT I, except for some very slight differences due to rounding.

Actual number is coded.

#### v10 - EUROPEAN WEIGHT

##### European Weight

This is a weight variable which adjusts each national sample in proportion to its nation's share in the total population the E.C. European Weight also incorporates the within-country weighting information contained in Nation Weight I. It should be used when analyzing the E.C. as a whole.

Actual number is coded.

## v11 - Q135 LIFE SATISFACTION

Q.135

On the whole, are you very satisfied, fairly satisfied, not very satisfied or not at all satisfied with the life you lead?

0 DK NA

1 Very satisfied

2 Fairly satisfied

3 Not very satisfied

4 Not at all satisfied

Note:

Last trend: EB28, Q.135

## v15 - Q139 VALUE ORIENTATION 1ST CHOICE

## Q.139

There is a lot of talk these days about what this country's goals should be for the next ten or fifteen years. On this card are listed some of the goals that different people say should be given top priority.

(SHOW CARD)

Would you please say which one of them you yourself consider most important in the long run?

(SHOW THE CARD)

(ONE ANSWER ONLY)

0 DK NA

1 Maintaining order in the nation

2 Giving the people more say in important government decisions

3 Fighting rising prices

4 Protecting freedom of speech

## v71 - Q148 LANGUAGE R LEARNED: DANISH

Q.148

What languages have you learned?

(SHOW CARD - SEVERAL ANSWERS POSSIBLE)

Q.148\_1\_1 Danish

0 Not mentioned

1 Mentioned

9 DK NA

Note:

Q148 (Language learned)/Q149 (Language spoken): The original data set as supplied by ZEUS provides a 1st and 2nd answer variable for each language, labelled "learned" / "learned too" and "speaks well" / "speaks well too". The basic questionnaire indicates simple multiple response questions ("several answers possible"). For both questions the respective 1st answer (V71 to V80 / V91 to V100) results in a large majority of respondents indicating the national language in the respective country, hence obviously including their respective mother tongue. The 2nd answers cover further (foreign) languages in all countries (V81 to V90 / 101 to V110).

Q148 (Language learned)/Q149 (Language spoken): The original data set as supplied by ZEUS provides a 1st and 2nd answer variable for each language, labelled "learned" / "learned too" and "speaks well" / "speaks well too". The basic questionnaire indicates simple multiple response questions ("several answers possible"). For both questions the respective 1st answer (V71 to V80 / V91 to V100) results in a large majority of respondents indicating the national language in the respective country, hence obviously including their respective mother tongue. The 2nd answers cover further (foreign) languages in all countries (V81 to V90 / 101 to V110).

## v84 - Q148 LANGUAGE R LEARNED TOO: ITALIAN

Q.148

What languages have you learned?

(SEVERAL ANSWERS POSSIBLE)

Q.148\_2\_4 Italian

0 Not mentioned

1 Mentioned

9 DK NA

Note:

Q148 (Language learned)/Q149 (Language spoken): The original data set as supplied by ZEUS provides a 1st and 2nd answer variable for each language, labelled "learned" / "learned too" and "speaks well" / "speaks well too". The basic questionnaire indicates simple multiple response questions ("several answers possible"). For both questions the respective 1st answer (V71 to V80 / V91 to V100) results in a large majority of respondents indicating the national language in the respective country, hence obviously including their respective mother tongue. The 2nd answers cover further (foreign) languages in all countries (V81 to V90 / 101 to V110).

## v95 - Q149 LANGUAGE R SPEAKS WELL: DUTCH

Q.149

And what languages can you speak well enough to take part in a conversation?

(SEVERAL ANSWERS POSSIBLE)

Q.149\_1\_5 Dutch

0 Not mentioned

1 Mentioned

9 DK NA

Note:

Q148 (Language learned)/Q149 (Language spoken): The original data set as supplied by ZEUS provides a 1st and 2nd answer variable for each language, labelled "learned" / "learned too" and "speaks well" / "speaks well too". The basic questionnaire indicates simple multiple response questions ("several answers possible"). For both questions the respective 1st answer (V71 to V80 / V91 to V100) results in a large majority of respondents indicating the national language in the respective country, hence obviously including their respective mother tongue. The 2nd answers cover further (foreign) languages in all countries (V81 to V90 / 101 to V110).

Note:

Q148 (Language learned)/Q149 (Language spoken): The original data set as supplied by ZEUS provides a 1st and 2nd answer variable for each language, labelled "learned" / "learned too" and "speaks well" / "speaks well too". The basic questionnaire indicates simple multiple response questions ("several answers possible"). For both questions the respective 1st answer (V71 to V80 / V91 to V100) results in a large majority of respondents indicating the national language in the respective country, hence obviously including their respective mother tongue. The 2nd answers cover further (foreign) languages in all countries (V81 to V90 / 101 to V110).

9 INAP - NOT YOUTH OVERSAMPLE (coded 1 or 3 in V4)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. Consequently the references to specific categories in the original question text or in interviewer instructions should be read as referring to the respective dummy variable if selected (code 1).

- 7 (Not documented)
- 8 (Not documented)
- 9 (Not documented)
- 10 (Not documented)
- 11 (Not documented)
- 12 (Not documented)

in Portugal (PT):

Portuguese Escudos per month

- 1 Less than 20.000 ESCUDOS
- 2 20.000 - 29.999 ESCUDOS
- 3 30.000 - 39.999 ESCUDOS
- 4 40.000 - 49.999 ESCUDOS
- 5 50.000 - 59.999 ESCUDOS
- 6 60.000 - 69.999 ESCUDOS
- 7 More than 70.000 ESCUDOS (not mentioned)
- 9 (Not documented)
- 10 (Not documented)
- 11 (Not documented)

Note:

No documentation on country specific categories was supplied for the question on monthly revenues of the young INCOME YOUNG (Q238). Category schemes have been deduced from the annex of the official survey report. Inconsistencies between the data set and the reported (weighted) results have been detected as follows:

France: no inconsistencies

Belgium: no inconsistencies if defining not documented data (code 10) as missing

The Netherlands: slight deviations

Germany: no inconsistencies

Italy: no inconsistencies if defining not documented data (code 10) as missing

Luxembourg: significant deviations, codes might be shifted or in the data set or in the report

Denmark: slight deviations also if defining not documented data (code 12) as missing, no deviations if in addition defining category 10 (results not reported) as missing

Ireland: deviations mainly for category 1, no deviations if defining category 12 (not documented) and category 10 (results not reported) as missing

United Kingdom: slight deviations, principally for category 10

Greece: no inconsistencies

Spain: substantial deviations, more than 50% of the responses are not documented, data are probably corrupt

Portugal: no deviations, categories 9 and 11 not documented (3 cases)

## v273 - Q242 FUTURE DECISION ADVICE: NEVER

## Q.242

At different times in life, we have to make choices that affect our future, for instance, which course to take, which job to apply for, etc.

You, personally, who have you talked with when you had to make such a choice?

(SHOW CARD - SEVERAL ANSWERS POSSIBLE)

## Q.242\_10 Never asked advice

v274 - Q243 FUTURE DEC HELP BY OFFICIAL SOURCES

Q.243

ASK Q.243 TO Q.246 TO THOSE WHO MENTIONED 3, 4 OR 5 IN PREVIOUS QUESTION. OTHERS GO TO Q.247.

Generally speaking, how would you rate the help you have received from official services? Please use this scale going from 1 = useless to 5 = very useful.

(SHOW CARD)

- 0 DK NA
- 1 Useless
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Very useful
- 8 Inap. - not coded 1 in V266 to V268
- 9 INAP - NOT YOUTH OVERSAMPLE (coded 1 or 3 in V4)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. Consequently the references to specific categories in the original question text or in interviewer instructions should be read as referring to the respective dummy variable if selected (code 1).

## v282 - Q244 DIFFICULTIES - NO PROBLEM

Q.244

ASK Q.243 TO Q.246 TO THOSE WHO MENTIONED 3, 4 OR 5 IN Q.242. OTHERS GO TO Q.247.

What do you think were the main difficulties when talking with these guidance services?

(SHOW CARD)

Q.244\_8 None of the above

0 Not mentioned

1 Mentioned

7 DK NA

8 Inap. - not coded 1 in V266 to V268

9 INAP - NOT YOUTH OVERSAMPLE (coded 1 or 3 in V4)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. Consequently the references to specific categories in the original question text or in interviewer instructions should be read as referring to the respective dummy variable if selected (code 1).

## v335 - Q280 UNEMPLOYED - MAIN REASON

Q.280

QUESTIONS 278 TO 280 TO THOSE UNEMPLOYED AND LOOKING FOR A JOB (ANSWER 5 TO QUESTION 248)

What is the main reason you are unemployed?

(ONE ANSWER ONLY)

(GO TO Q.326)

0 DK NA

1 The jobs I have been offered do not really appeal to me

2 I can get at least as much money on the dole as I could in a job

3 There are no jobs available that would suit my training and qualifications

4 There are absolutely no jobs at all around here

5 Personal or family reasons (e.g. looking after children)

6 Other

8 Inap. - not coded 5 in V286

9 INAP - NOT YOUTH OVERSAMPLE (coded 1 or 3 in V4)

Note:

## v360 - Q342/Q344 EC SINGLE MARKET - ELIM CUSTOM CONTROLS

## Q.342/Q.344

The coming into being of the single common European market in 1992 will mean free circulation of persons, goods and property within the European Community Countries. Some people think this will be mostly an advantage, others think it will be a disadvantage. Can you tell me, for each aspects of this single common European market which I am going to mention, whether you personally think it will be an advantage or a disadvantage?

## Q.342/Q.344\_1 Elimination of custom controls when crossing frontiers between countries inside the European Community

0 DK NA

1 More advantage

2 More disadvantage

## v361 - Q342/Q344 EC SINGLE MARKET - FREEDOM OF RESIDENCE

## Q.342/Q.344

The coming into being of the single common European market in 1992 will mean free circulation of persons, goods and property within the European Community Countries. Some people think this will be mostly an advantage, others think it will be a disadvantage. Can you tell me, for each aspects of this single common European market which I am going to mention, whether you personally think it will be an advantage or a disadvantage?

Q.342/Q.344\_2 The opportunity for any citizen of a country within the European Community to go and live without limitation in any other country of the Community, for instance to retire there or to study there

0 DK NA

1 More advantage

2 More disadvantage

## v389 - Q358 SOCIAL CHANGE SOCIETY

Q.358

On this card are three basic kinds of attitudes vis-à-vis the society we live in. Please choose the one which best describe your own opinion.

(SHOW CARD - ONE ANSWER ONLY)

0 DK NA

1 The entire way our society is organised must be radically changed by revolutionary action

2 Our society must be gradually improved by reforms

3 Our present society must be valiantly defended against all subversive forces

v392 - AGE EDUCATION

How old were you when you finished your full-time education?

- 0 DK NA
- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying

Note:

Last trend: EB28, Q.61

In V392 (AGE EDUCATION) for 90 respondents a value is coded which is too high for their AGE (V416). These cases are coded to 0 (DK NA) in V392 and V393 (AGE EDUCATION RECODED).

Respondents coded 10 (STILL STUDYING) in V392 (AGE EDUCATION) which were coded 0 (DK/NA) in V434 (OCCUPATION OF RESPONDENT) are recoded to 15 (STUDENT, MILITARY SERVICE) in V434 (29 cases).

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

v393 - AGE EDUCATION - RECODED

Age when finished full-time education - RECODED

- 0 DK NA
- 1 15 years or younger
- 2 16-19 years
- 3 20 years or older
- 4 Still studying

Derivation:

Age finished full-time education in four categories.

Note:

See V392 for complete question text.

In V392 (AGE EDUCATION) for 90 respondents a value is coded which is too high for their AGE (V416). These cases are coded to 0 (DK NA) in V392 and V393 (AGE EDUCATION RECODED).

Respondents coded 10 (STILL STUDYING) in V392 (AGE EDUCATION) which were coded 0 (DK/NA) in V434 (OCCUPATION OF RESPONDENT) are recoded to 15 (STUDENT, MILITARY SERVICE) in V434 (29 cases).

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

v400 - VOTE INTENTION - DENMARK

If there were a general election tomorrow (SAY IF CONTACT UNDER 18: AND YOU HAD A VOTE), which party would you support?

DENMARK

- 0 DK / NA / not vote / vote blank / Venstre
- 5 Venstresocialisterne
- 10 Kommuniste
- 15 Socialistik Folkeparti
- 20 Socialdemokratiet
- 30 Faelles
- 40 Centrum-Demokraterne
- 41 Radikale
- 50 De Groenne (see code 90)
- 51 Retsforbundet
- 60 Konservative
- 61 Kristeligt Folkeparti
- 70 Venstre (collapsed with code 0 in the original data set)
- 80 Fremskridtpartiet (see code 90)
- 90 Other party (De Groenne and Fremskridtpartiet collapsed in the original data set)
- 95 Would vote blank (collapsed with code 0 in the original data set)
- 98 Would not vote (collapsed with code 0 in the original data set)
- 99 Inap. - not coded 7 in V8

Note:

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

Danish respondents who declared for political party "Venstre" (VOTE INTENTION) had been coded as falling into the missing value category during the raw data processing for Eurobarometer 28 and 28.1. The original coding for Eurobarometer 28 has been made

available by Danish Gallup via Danish Data Archives, and ZA corrected Danish VOTE INTENTION data accordingly. As far as possible this was also applied to Eurobarometer 28.1. Responses for VENSTRE could not be recovered and collapsed responses for DE

GROENNE and FREMSKRIDTPARTIET not be separated. The correction has been effected in the 4th data set edition as of August 22, 2008.

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

## v408 - VOTE INTENTION PROBE - IRELAND

IN IRELAND - ASK RESPONDENTS WHO DID NOT STATE ANY PARTY PREFERENCE IN RESPONSE TO V401

Which party would you be most inclined to give your first preference vote to?

- 0 DK / NA
- 20 Labour
- 21 Worker Party
- 22 Progressive Democratic Party
- 30 Fien Gael
- 50 Ecology Party
- 60 Fianna Fail
- 90 Other Party
- 95 Would vote blank
- 98 Would not vote
- 99 Inap. - not coded 8 in V8

Note:

Notice that according to Eurobarometer 28.0 this question was asked only of some respondents in Ireland and The United Kingdom. Respondents in Great Britain who indicated "Don't know" in V402 (VOTE INTENTION) were probed by V409. In Ireland and Northern Ireland respondents who did not state any party preference in V401 and V403 respectively, were probed by V408 and V410 respectively. V408 to V410 are actually combining responses from V401 to V403 with responses to the probe questions.

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

Last trend: EB28, Q.63

- 6 60.000 - 69.999 ESCUDOS
- 7 70.000 - 79.999 ESCUDOS
- 8 80.000 - 89.999 ESCUDOS
- 9 90.000 - 99.999 ESCUDOS
- 10 100.000 - 150.000 ESCUDOS
- 11 More than 150.000 ESCUDOS

Note:

Last trend: EB28, Q.72

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

## v434 - OCCUPATION OF RESPONDENT

What is your current occupation?

- 0 DK NA
- 1 Farmers, Fisherman
- 3 Professionals
- 4 Owner of shops
- 6 General Management
- 8 Other office employed
- 12 Other manual
- 13 Retired
- 14 Housewife, not employed
- 15 Student, Military Service
- 17 Unemployed

Note:

Last trend: EB28, Q.73

Respondents coded 10 (STILL STUDYING) in V392 (AGE EDUCATION) which were coded 0 (DK/NA) in V434 (OCCUPATION OF RESPONDENT) are recoded to 15 (STUDENT, MILITARY SERVICE) in V434 (29 cases).

Due to lacking documentation in original youth oversample questionnaire, question text and answer categories for demographics were complemented in accordance with the standard survey Eurobarometer 28.

v451 - SIZE OF COMMUNITY - ALL INTEGRATED

(Objective) Size of locality

ALL INTEGRATED

in France (FR):

- 0 DK NA
- 1 Rural
- 2 Less than 20.000 inhabitants
- 3 20.000 - 100.000 inhabitants
- 4 More than 100.000 inhabitants
- 5 Paris Urban

in Belgium (BE):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 4.999 inhabitants
- 3 5.000 - 9.999 inhabitants
- 4 10.000 - 24.999 inhabitants
- 5 25.000 inhabitants and more
- 6 Metrop. area
- 10 (Not documented)

in Netherlands (NL):

- 1 Less than 5.000 inhabitants
- 2 5.000 - 9.999 inhabitants
- 3 10.000 - 19.999 inhabitants
- 4 20.000 - 49.999 inhabitants
- 5 50.000 - 99.999 inhabitants
- 6 100.000 - 399.999 inhabitants
- 7 400.000 inhabitants and over

in Germany - West (DE\_W):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 4.999 inhabitants
- 3 5.000 - 19.999 inhabitants
- 4 20.000 - 49.999 inhabitants
- 5 50.000 - 99.999 inhabitants
- 6 100.000 - 499.999 inhabitants
- 7 More than 500.000 inhabitants

in Italy (IT):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 2.999 inhabitants

- 3 3.000 - 4.999 inhabitants
- 4 5.000 - 9.999 inhabitants
- 5 10.000 - 19.999 inhabitants
- 6 20.000 - 29.999 inhabitants
- 7 30.000 - 49.999 inhabitants
- 8 50.000 - 99.999 inhabitants
- 9 100.000 - 249.999 inhabitants
- 10 More than 250.000 inhabitants

in Luxemburg (LU):

- 0 NOT DOCUMENTED
- 1 Less than 2.500 inhabitants (not mentioned)
- 2 2.500 - 4.999 inhabitants
- 3 5.000 - 9.999 inhabitants
- 4 10.000 - 19.999 inhabitants
- 5 20.000 - 49.999 inhabitants
- 6 50.000 inhabitants or more

in Denmark (DK):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 4.999 inhabitants
- 3 5.000 - 9.999 inhabitants
- 4 10.000 - 19.999 inhabitants
- 5 20.000 - 49.999 inhabitants
- 6 50.000 - 99.999 inhabitants
- 7 More than 100.000 inhabitants

in Ireland (IE):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 19.999 inhabitants
- 3 20.000 - 99.999 inhabitants
- 4 More than 100.000 inhabitants

in Great Britain (GB\_GBN):

- 98 Inap. (Not available)

in Northern Ireland (GB\_NIR):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 19.999 inhabitants
- 3 20.000 - 99.999 inhabitants
- 4 More than 100.000 inhabitants

in Greece (GR):

- 1 Less than 500 inhabitants
- 2 500 - 999 inhabitants
- 3 1.000 - 1.999 inhabitants
- 4 2.000 - 2.999 inhabitants

- 5 3.000 - 4.999 inhabitants
- 6 5.000 - 9.999 inhabitants
- 7 10.000 - 19.999 inhabitants
- 8 20.000 - 29.999 inhabitants
- 9 30.000 - 49.999 inhabitants
- 10 50.000 inhabitants and over
- 11 Thessaloniki
- 12 Athens

in Spain (ES):

- 1 Less than 2.000 inhabitants
- 2 2.000 - 4.999 inhabitants
- 3 5.000 - 9.999 inhabitants
- 4 10.000 - 29.999 inhabitants

## v453 - FAMILY INCOME QUARTILES

## FAMILY INCOME IN APPROXIMATE QUARTILES

- 1 - - lowest quartile
- 2 -
- 3 +
- 4 ++ highest quartile
- 5 DK NA

## Derivation:

This variable collapses answers to INCOME FAMILY (V420 to V432) into four groups representing approximate quartiles.

## Note:

See V420 to V432 for complete question text.

Last trend: EB28, Q.72-R

## v472 - OPINION LEADERSHIP INDEX

## OPINION LEADERSHIP INDEX

## Cognitive Mobilization Index (1)

- 1 Low Cognitive Mobilization (coded 3, 4 or 0 in V13 and coded 3 or 0 in V14)
- 2 Medium-Low Cognitive Mobilization (coded 3, 4 or 0 in V13 and coded 2 in V14 or coded 1 or 2 in V13 and coded 3 or 0 in V14)
- 3 Medium-High Cognitive Mobilization (coded 3, 4 or 0 in V13 and coded 1 in V14 or coded 1 or 2 in V13 and coded 2 in V14)
- 4 High Cognitive Mobilization (coded 1 or 2 in V13 and coded 1 in V14)

## Derivation:

This variable combines responses to Q.137/V13 and Q.138/V14.

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates, see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

## Note:

## v473 - VALUE ORIENTATION (POST-MATERIALISM)

## VALUE ORIENTATION (POST-MATERIALISM)

## Materialist/Post-Materialist Values Index

- 1 Materialist (coded 1 in V15 and 3 in V16 or 3 in V15 and 1 in V16)
- 2 Mixed (coded 1 or 3 in V15 and 2 or 4 in V16 or 2 or 4 in V15 and 1 or 3 in V16)
- 3 Post-Materialist (coded 2 in V15 and 4 in V16 or 4 in V15 and 2 in V16)
- 4 DK NA (coded 0 in either V15 or V16)

## Derivation:

This index was constructed from responses to Q.139/V15 and Q.140/V16.

For a complete discussion of this variable, see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

## Note:

v474 - POLITICAL ORIENTATION (TYPOLOGY 7)

POLITICAL ORIENTATION (TYPOLOGY 7)

Political Orientation Typology - Seven Point Scale

0 DK NA

1 Unmobilized Materialist (coded 1 or 2 in V472, 1 in V473 and 0, 2, OR 3 in V389)

2 Unmobilized Mixed (coded 1 or 2 in V472, 2 in V473 and 0, 2, or 3 in V389)

3 Unmobilized Post-Materialist (coded 1 or 2 in V472, 3 in V473 and 0, 2, or 3 in V389)

4 Mobilized Materialist (coded 3 or 4 in V472, 1 in V473 and 0, 2, or 3 in V389)

5 Mobilized Mixed (coded 3 or 4 in V472, 2 in V473 and 0, 2, or 3 in V389)

6 Mobilized Post-Materialist (coded 3 or 4 in V472, 3 in V473 and 0, 2, or 3 in V389)

7 Revolutionary (coded 1 in V389)

Derivation:

This typology was constructed from respondent's scores on the Cognitive Mobilization Index (1) (V472), the Materialist/Post-Materialist Value Index (V473) and responses to V389.

For details on the construction of this typology and its correlates, see Ronald Inglehart and Jacques-Rene Rabier, "Economic Uncertainty and European Solidarity", *Annals of the American Academy of Political and Social Science* (Vol. 440, 1978).

v476 - COGNITIVE MOBILIZATION INDEX

COGNITIVE MOBILIZATION INDEX

Cognitive Mobilization Index (2)

0 DK NA

- 1 Lowest level of cognitive mobilization (coded 0 or 3 for V14 and either (I) 1 in V393 or (II) 4 in V393 and 15 for V416)
- 2 Next to lowest level of cognitive mobilization (coded 0 or 3 for V14 and either (I) 2 in V393 or (II) 4 in V393 and 16 to 19 for V416; or coded 2 for V14 and either (I) 1 in V393 or (II) 4 in V393 and 15 for V416 )
- 3 Medium level of cognitive mobilization (coded 0 or 3 for V14 and either (I) 3 in V393 or (II) 4 in V393 and 20 or more for V416; or coded 2 for V14 and either (I) 2 in V393 or (II) 4 in V393 and 16 to 19 for V416; or 1 for V14 and either (I) 1 in V393 or (II) 4 in V393 and 15 for V416)
- 4 Next to highest level of cognitive mobilization (coded 2 for V14 and either (I) 3 in V393 or (II) 4 in V393 and 20 or more for V416; or coded 1 for V14 and either (I) 2 in V393 or (II) 4 in V393 and 16 to 19 for V416)
- 5 Highest level of cognitive mobilization (coded 1 for V14 and either (I) 3 in V393 or (II) 4 in V393 and 20 or more for V416)

Derivation:

This index of Cognitive Mobilization is constructed from responses to V14, V393 and V416.

Note:

Last trend: EB28, V491

## v477 - POLITICAL MOBILIZATION INDEX

## POLITICAL MOBILIZATION INDEX

0 DK NA

1 Low - coded 1 or 2 in V476 and 4 or 0 in V390

2 Next to low - coded 1 or 2 in V476 and 1-3 in V390

3 Next to high - coded 3-5 in V476 and 4 or 0 in V390

4 High - coded 3-5 in V476 and 1-3 in V390

## Derivation:

This index was constructed from responses recorded in Cognitive Mobilization Index 2 (V476) and V390.

## Note:

Last trend: EB28, V492

v478 - EUROPEAN POL PARTY PREFERENCE

EUROPEAN POL PARTY PREFERENCE

European Party Parliamentary Preference Index

0 DK NA (would not vote; would vote blank etc.) - coded 0, 95 or 98 (DENMARK also if coded 90)

1 Socialist-

Belgium: coded 20 or 21 in V395;

Denmark: coded 20 in V400;

Germany: coded 20 in V397;

France: coded 20, 30 in V394;

Italy: coded 20 or 30 in V398;

Ireland: coded 20 in 408;

Northern Ireland: coded 15 in V414;

Luxembourg: coded 20 in V399;

Netherlands: coded 20 in V396;

Great Britain: coded 20 in V413;

Greece: coded 20 in V404;

Spain: coded 20 in 405;

Portugal: coded 05, 20 in V406

2 P.P.E. -

Belgium: coded 60 or 61 in V395;

Denmark: coded 40 in V400;

Germany: coded 60 in V397;

France: coded 71 in V394;

Italy: coded 60 in V398;

Ireland: coded 30 in 408;

Luxembourg: coded 60 in V399;

Netherlands: coded 63 in V396;

Greece: coded 60 in V404;

Spain: coded 56 in 405;

Portugal: coded 60 in V406

3 European Democratic -

Denmark: coded 60 in V400;

Great Britain: coded 60 in V413;

Spain: coded 70 in 405

4 Communist -

Belgium: coded 10 in V395;

Denmark: coded 15 in V400;

Germany: coded 10 in V397;

France: coded 10 in V394;  
Italy: coded 10 in V398;  
Luxembourg: coded 10 in V399;  
Greece: coded 10 OR 11 or 31 in V404;  
Spain: coded 10 in 405;  
Portugal: coded 10 in V406

5 Liberal -

Belgium: coded 41 or 53 in V395;  
Germany: coded 40 in V397;  
France: coded 70 or 72 in V394;  
Italy: coded 40 or 70 in V398;  
Luxembourg: coded 70 in V399;  
Netherlands: coded 70 in V396;  
Great Britain: coded 30, 40 or 45 in V413;  
Portugal: coded 30 in V406;  
Ireland: coded 22 in V408

6 R.D.E. -

Denmark: coded 80 in V400;  
France: coded 60 in V394;  
Ireland: coded 60 in 408;  
Great Britain: coded 50 in V413

7 A.R.C. -

Belgium: coded 50 or 55 in V395;  
Denmark: coded 5, 10, 50 or 51 in V400;  
Germany: coded 50 in V397;  
France: coded 5 or 50 in V394;  
Italy: coded 4 in V398;  
Ireland: coded 21 or 50 in 408;  
Luxembourg: coded 50 in V399;  
Netherlands: coded 10, 15 or 16 in V396;  
Great Britain: coded 51 in V413;  
Portugal: coded 81 in V406;  
Northern Ireland: coded 80 or 81 in V414

8 European Right -

Germany: coded 80 in V397;  
France: coded 80 in V394;  
Italy: coded 80 in V398;  
Northern Ireland: coded 60 in V414;  
Greece: coded 85 in V404

9 C.I.D.I. -

Netherlands: coded 81, 82 or 84 in V396;  
Italy: coded 5 V413;

Spain: coded 60 in 405

10 Non-Attached -

Netherlands: coded 22 in V396;

Northern Ireland: coded 62 in V413;

Spain: coded 55 in 405

11 Others -

France: coded 90 in V394;

Belgium: coded 51, 80 or 90 in V395;

Netherlands: coded 55, 90 in V396;

Germany: coded 90 in 397;

Luxembourg: coded 90 in V399;

Denmark: coded 30, 41 or 61 in 400;

Ireland: coded 90 in 408;

Great Britain: coded 90 in V413;

Northern Ireland: coded 64, 65 or 90 in V414;

Greece: coded 71 or 90 in V404;

Spain: coded 90 in 405;

Portugal: coded 15, 31, 70 or 90 in V406

Derivation:

This variable is a 12-category recode of R's political party preference.

Note:

Please notice that for Northern Ireland and Great Britain this variable is based on responses to the PARTY PREFERENCE question (V413/V414). For Ireland this variable is based on responses to VOTE INTENTION PROBE (V408). All other countries refer to the VOTE INTENTION question.

Last trend: EB28, V493
