Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the Standard Eurobarometer measures and queried participants on the following major areas of focus: (1) national and European identity, and (2) electromagnetic fields and health.

For the first major area of focus, national and European identity, the survey focused on how citizens of the European Union (EU) identify with their current country, their country of origin, and Europe as a whole. They were asked what they believe it means to be a member of their nationality, to identify the most important aspects of being European and how important this identity is to them, and about the origins and citizenships of their family members. Participants then cited their connections to other countries, including whether they have family or friends abroad or have lived abroad themselves, lived with a partner of a different citizenship, speak another language, spend a significant amount of time abroad for work or holiday, own property in another country, follow news, cultural life, or sports from abroad, or eat food typical of another country. Interviewers also asked participants to identify their native language and any other languages they speak fluently, whether they would move to and live in another country in the next ten years, and, if so, which one, and whether they feel attached to another country and why. Finally, they were asked about their level of attachment to the town, village, or region in which they live, whether they feel they belong of a majority or minority group, and reasons other in their country could identify them with a specific group.

For the second major area of focus, electromagnetic fields and health, the survey focused on the participants' level of awareness about the sources of electromagnetic fields and how these fields affect their health. They were asked how concerned they were about these fields, and whether they have received any information regarding the potential health risks linked to electromagnetic fields. If the participants had received this information, they were asked how satisfied they were with it, and to identify the two main ways they received the information. If the participants were not satisfied with the quality of the information, the interviewer asked why they were unsatisfied. All participants were queried about the two main ways they would prefer to receive information about electromagnetic fields, whether public organizations effectively protect them from electromagnetic fields, and how the EU could intervene to reduce health risks.

Demographic and other background information includes age, gender, nationality, marital status and parental relations, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other goods, difficulties in paying bills, level in society, Internet use, type and size of locality, region of residence, and language of interview (in select countries).

1.3 Universe

In all, Eurobarometer 73.3 interviewed 26.602 citizens in the 27 countries of the European Union after the 2004/2007 enlargement (i.e. including the Accession Countries Romania and Bulgaria). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From March 13 to April 1, 2010, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 73.3 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 73.3	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W18	grouping EU candidate/accession countries
-	grouping EU member + candidate/accession countries
W81, W82	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Specific information on data preparation, harmonization or regarding inconsistencies is noted on variable level.

1.9 Further remarks

Data for question module QA (Consumer empowerment) are only available as a separate dataset which merges responses to identical questions plus demographics from surveys 73.2 and 73.3 (ZA5236). This module was also surveyed in EU27 plus ICELAND and NORWAY.

The following protocol variables are not made available by the data producer:

- P1 - DATE OF INTERVIEW
- P2 - TIME OF INTERVIEW BEGINNING
- P3 - DURATION OF INTERVIEW
- P4 - N OF PERSONS PRESENT DURING THE INTERVIEW
- P5 - RESPONDENT COOPERATION.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study Number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
5233			26602	100.0	100.0
	Sum		26602	100.0	100.0
	Valid Cases		26602		

v2 - STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
5233			26602	100.0	100.0
	Sum		26602	100.0	100.0
	Valid Cases		26602		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
3.0.0 (2012-08-31)			26602	100.0	100.0
	Sum		26602	100.0	100.0
	Valid Cases		26602		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

733 Eurobarometer 73.3

v4

Value	Label	Missing	Count	Percent	Valid Percent
733	Eurobarometer 73.3		26602	100.0	100.0
	Sum		26602	100.0	100.0
	Valid Cases		26602		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania

Note:

Use of weighting factor W1 (V8) is optional.

v6

	Sum		26602	100.0	100.0
	Valid Cases		26602		

v7 - NATION - ALL SAMPLES ISO 3166

NATION – ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EU NMS 10

NATION GROUP EU NMS 10

NATION GROUP EU NMS 10 refers to the group of the ten new members of the enlargement in 2004.

0 Other

1 EU NMS 10

Note:

Use of weighting factor W13 (V28) is mandatory.

v40 - W82 WEIGHT NON EURO ZONE 2009

W82 WEIGHT NON EURO ZONE 2009

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2009 must be applied whenever these countries are to be analyzed altogether as a group.

v41 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v42 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country(ies) that applies(y).

(MULTIPLE ANSWERS POSSIBLE)

v73 - D7 MARITAL STATUS (REC)

D.7 Marital Status (RECODED)

- 1 Married or remarried (codes 1 to 4 in V72)
- 2 Single living with a partner (codes 5 to 8 in V72)
- 3 Single (codes 9 and 10 in V72)
- 4 Divorced or separated (codes 11 and 12 in V72)
- 5 Widow (codes 13 and 14 in V72)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to D.7 into five categories.

Note:

See D.7 for complete question text.

v74 - D11 AGE EXACT

D.11

How old are you?

15 15 years

97 97 years

Note:

Actual number is coded.

Last trend: EB73.2, D.11

v75 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v76 - D11 AGE RECODED - SIX GROUPS

D.11R2 AGE - RECODED IN SIX GROUPS

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to D.11 into six categories.

Note:

See D.11 for complete question text.

v82 - QB1 NATIONAL IDENTITY: COUNTRY LANGUAGE

Let's talk about another topic

We would like to find out more about the diversity of people living in Europe, their origins, their sense of identity, their connections to other countries and cultures. Here are some questions on your sense of national and European identity.

Q.B1

People differ in what they think it means to be (NATIONALITY). In your view, among the following, what do you think are the most important characteristics to be (NATIONALITY)?

(SHOW CARD – READ OUT – ROTATE – MAX. 3 ANSWERS)

Q.B1_6 (ONLY TO UNILANGUAGE COUNTRIES) To master (COUNTRY LANGUAGE)

0 Not mentioned

1 Mentioned

9 Inap. multilanguage countries (coded 2, 6, 12, 16 or 25 in V6)

Note:

According to the filter instruction original variable QB1.6 is split into variables V82 and V83 by the Archive.

Please notice that no appropriate weight is available for analysing these unilanguage countries altogether as a group.

v102 - QB4 CNTRY OF BIRTH: RESPONDENT

Q.B4

(Please code according to what the country is now for example, if the country no longer exists or has changed name or ownership.)

I am now going to ask you some questions about where you and your family were born.

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.B4_1 You were born in

- 1 (OUR COUNTRY) or a place that is part of (OUR COUNTRY) today
- 2 Another country that is today a member of the EU
- 3 Another country in Europe, including Turkey, but not a member of the EU
- 4 USA, Canada, Japan, Australia or New Zealand
- 5 Another country outside Europe
- 7 Refusal (SPONTANEOUS)
- 8 DK

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_1 Friulian

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v156 - QB7A MOTHER TONGUE OTHER: CROATIAN

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_4 Croatian

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v171 - QB7A MOTHER TONGUE OTHER: SOMALI

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_19 Somali

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v179 - QB7A MOTHER TONGUE OTHER: CREOLE

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_27 Creole

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v187 - QB7A MOTHER TONGUE OTHER: ARAMESE

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_35 Aramese

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v195 - QB7A MOTHER TONGUE OTHER: CHECHEN

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_43 Chechen

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_66 Yoruba

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v226 - QB7A MOTHER TONGUE OTHER: BRETON

[Q.B7A

What is(are) your mother tongue(s)?]

Q.B7AO

ASK Q.B7AO IF "OTHER", CODE 29 IN Q.B7A

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7AO_74 Breton

0 Not mentioned

1 Mentioned

9 Inap. No other mother tongue in Q.B7A (not coded 1 in V150)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v260 - QB7B LANGUAGE SPEAK WELL OTHER: FRIULIAN

[Q.B7B

And what other language(s) do you speak well enough to be able to have a conversation?]

Q.B7BO

ASK Q.B7BO IF "OTHER", CODE 29 IN Q.B7B

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7BO_1 Friulian

0 Not mentioned

1 Mentioned

9 Inap. No other language speak well in Q.B7B (not coded 1 in V257)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v286 - QB7B LANGUAGE SPEAK WELL OTHER: CREOLE

[Q.B7B

And what other language(s) do you speak well enough to be able to have a conversation?]

Q.B7BO

ASK Q.B7BO IF "OTHER", CODE 29 IN Q.B7B

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7BO_27 Creole

0 Not mentioned

1 Mentioned

9 Inap. No other language speak well in Q.B7B (not coded 1 in V257)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v317 - QB7B LANGUAGE SPEAK WELL OTHER: VALENCIANO

[Q.B7B

And what other language(s) do you speak well enough to be able to have a conversation?]

Q.B7BO

ASK Q.B7BO IF "OTHER", CODE 29 IN Q.B7B

Which other(s)?

(DO NOT READ OUT – DO NOT SHOW THE CARD – MULTIPLE ANSWERS POSSIBLE)

Q.B7BO_58 Valenciano

0 Not mentioned

1 Mentioned

9 Inap. No other language speak well in Q.B7B (not coded 1 in V257)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v327 - QB10AB AFFINITY TO COUNTRIES: AUSTRIA

Q.B10AB Affinity to countries - SUMMARIZED

Q.B10AB_1 Austria

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.B10A (V323) and Q.B10B (V325).

Note:

See Q.B10A (V323) and Q.B10B (V325) for complete question texts. Variables summarize answers to Q.B10A (V323) and Q.B10B (V325), except for category '31' (DK) (V357).

v333 - QB10AB AFFINITY TO COUNTRIES: FRANCE

Q.B10AB Affinity to countries - SUMMARIZED

Q.B10AB_7 France

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.B10A (V323) and Q.B10B (V325).

Note:

See Q.B10A (V323) and Q.B10B (V325) for complete question texts. Variables summarize answers to Q.B10A (V323) and Q.B10B (V325), except for category '31' (DK) (V357).

v340 - QB10AB AFFINITY TO COUNTRIES: PORTUGAL

Q.B10AB Affinity to countries - SUMMARIZED

Q.B10AB_14 Portugal

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.B10A (V323) and Q.B10B (V325).

Note:

See Q.B10A (V323) and Q.B10B (V325) for complete question texts. Variables summarize answers to Q.B10A (V323) and Q.B10B (V325), except for category '31' (DK) (V357).

v354 - QB10AB AFFINITY TO COUNTRIES: TURKEY

Q.B10AB Affinity to countries - SUMMARIZED

Q.B10AB_28 Turkey

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to this item in Q.B10A (V323) and Q.B10B (V325).

Note:

See Q.B10A (V323) and Q.B10B (V325) for complete question texts. Variables summarize answers to Q.B10A (V323) and Q.B10B (V325), except for category '31' (DK) (V357).

v408 - QB13AB ATTACHMENT TO: REGION

Q.B13AB Attachment to region - SUMMARIZED

Q.B13AB_2 (SPLIT A) Your region / (SPLIT B) The region where you live

- 1 Very attached
- 2 Fairly attached
- 3 Not very attached
- 4 Not at all attached
- 5 DK

Derivation:

This variable summarizes responses to this item in Q.B13A_3 (V406) and Q.B13B_4 (V407).

Note:

See Q.B13A_3 (V406) and Q.B13B_4 (V407) for complete question texts.

v455 - QC2 ELECTROMAG SOURCES: DK

Q.C2

As far as you are aware, which of the following are sources of electromagnetic fields?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C7

ASK Q.C7 IF "NOT SATISFIED", CODE 3 OR 4 IN Q.C5 – OTHERS GO TO Q.C8

Which of the following reasons best explains why you are not satisfied with the information you have about the potential health risks linked to electromagnetic fields? The information is...

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Not trustworthy
 - 2 Insufficient
 - 3 Not objective
 - 4 Complicated
 - 5 Badly explained
 - 6 Not interesting
 - 7 Not communicated in an appropriate way
 - 8 Other (SPONTANEOUS)
 - 9 DK
- 99 Inap. Satisfied or DK in Q.C5 (not coded 3 or 4 in V458)

Note:

Answer category "DK" (9) corrected according to official tables.

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Last trend: EB66.2, Q.B4

v490 - QC9 ELECTROMAG PROTECTION - PUBLIC BODIES

Q.C9

In your opinion, do public bodies act effectively or not to protect you from potential health risks linked to electromagnetic fields?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, very effectively
- 2 Yes, fairly effectively
- 3 No, not very effectively
- 4 No, not at all effectively
- 5 DK

v501 - D8 AGE EDUCATION

DEMOGRAPHICS

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

- 0 Refusal
- 2 2 years
- 90 90 years
- 97 No full-time education
- 98 Still studying
- 99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "0" is recoded to "97" for Portugal.

Actual number is coded.

Last trend: EB73.2, D.8

NO QUESTIONS D.1 TO D.6

D.7 ASKED BEFORE Q.A

v502 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Note:

Due to a deviant specification in the coding instruction in the Portuguese field questionnaire data for Portugal have been corrected according to the basic questionnaire.

Code "97" is recoded to "11" for Portugal.

See D.8 for complete question text.

v510 - D40C HOUSEHOLD COMPOSITION: AGED 10-14 (REC)

D.40CR HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

n of people in household

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40C/V509.

Note:

See V509 for complete question text.

v511 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 16 Sixteen
- 17 Seventeen
- 18 Eighteen
- 20 Twenty

Derivation:

This variable summarizes V505, V507 and V509.

Note:

See V505, V507 and V509 for complete question text.

Generated by the Archive in accordance with former surveys.

v512 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40R HOUSEHOLD COMPOSITION: SIZE (A+B+C) (RECODED)

n of people in household

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V511.

Note:

See V505, V507 and V509 for complete question text.

Generated by the Archive in accordance with former surveys.

	Valid Cases		26602		

v543 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately.

Last trend: EB73.2, P.6

v543, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		220	16.6	16.6

v606 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German (category not used)
- 9 Inap. not LU (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion and rough plausibility regarding the regional distribution of questionnaire language versions is recovered. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire. Starting with 72.3 the total proportion of language versions is inversed again with up to about 75% of French questionnaires, but maintaining rough plausibility regarding the regional distribution. Starting with Eurobarometer 72.2 data on the questionnaire language version (P13) are not anymore regularly made available for all waves.

Last trend: EB73.2, P.13

v606
