Introduction and preliminary remarks

The present dataset is the third of three cross section studies of the Cologne Election Study 1961 – a research series which was carried out on the occasion of the federal election taking place in the same year. Also the first and second cross section studies are archived at the GESIS Data Archive. The aim of the survey is the registration of opinions and attitude of the elective population towards parties, party systems and politicians, towards the election and the recent governing coalitions, however, also for general social developments. For this purpose, the respondents were interviewed directly before the beginning of the "election campaign phase" (ZA0055), in the days before the election (ZA0056) and after the formation of the new government (ZA0057). The study series is part of the group 'German Election studies 1949-2009' in the GESIS Data Archive for the Social Sciences.

This report comprises four parts: part one presents a description of the Cologne Election Study (Federal Republic, November 1961), including bibliographic information, an abstract, methodological comments, notes to the weighting and general information on the data processing. The second part offers general information on the documentation standard. Part three provides a short explanation of the variable documentation itself. Part four contains the variable documentation: the documentation of each variable including complete question texts with all answer categories enriched with archival remarks. In addition, this Variable Report presents frequency distributions for all substantial and demographic variables. All frequency distributions are based on unweighted data.

Data access

Data for statistical analysis and related documentation (original questionnaires, Variable Reports) are made available by GESIS – Leibniz-Institute for the Social Sciences by the online platforms GESIS Data Catalogue (<https://dbk.gesis.org/dbksearch/home.asp?db=e>) or by ZACAT (<http://zacat.gesis.org>), the GESIS Online Study Catalogue. Access to the Data Catalogue and ZACAT is free of charge; download of data sets requires registration.

The [GESIS Data Catalogue](#)¹ offers study descriptions of the German Election Studies 1949-2009, which comprise methodological information, version history and errata. In addition, the GESIS Data Catalogue provides datasets and related documentation for download.

[ZACAT](#)² offers data and documentation for full-text search as well as for online analysis.

Usage requirements

To get an overview over the use of the GESIS Data Archive, all users are requested to send bibliographic citations for each completed manuscript or thesis abstracts. Please explain in an accompanying letter, which data (study as well as respective variables) you have used.

1.6 Mode of data collection

Oral survey with standardized questionnaire

1.7 Weighting

All frequency distributions in this Variable Report are based on unweighted data.

1.8 Data processing

Generally, the variable structure of the dataset is based on the structure of the questionnaire. Preceding, there are some technical variables. These comprise archive identification variables (ZA-study number, version and DOI) and survey identification variables (respondent ID) as well as a weight variable. At the bottom of the dataset, you find a variable for the federal state.

In general, the variables adopt the codes of the questionnaire.

For questions that allow for multiple responses a dummy variable is created for each answer category. E.g., a question with four answer categories in an item battery has four dummy variables as final data. In general, a value "1" means that the respondent chose the particular category as an answer (mentioned, yes, ...). In case of a value "0" the respondent did not choose the particular category as answer (not mentioned, no, ...). Dummy variables are also created for "none of these", "Don't know" or other residual responses.

Number of variables: 187

2 International documentation standard

The variable documentation is produced according to the international metadata specifications in the social sciences, which are defined by the Data Documentation Initiative <DDI>. The Variable Reports are based on the XML representation of DDI Version 2.

3 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. It is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with the international metadata specification for the social and behavioral sciences, established by the Data Documentation Initiative (DDI-Codebook/XML).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire. The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable.

The frequency distributions of the substantive variables are based on unweighted data. Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as a string.

The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.11990>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

S.B

SOCIAL STRATUM

- 1 A (HIGH)
- 2 B
- 3 C
- 4 D - SUBCATEGORY D1
- 5 D - SUBCATEGORY D2 (LOW)

THE SOCIAL STRATUM SCALE IS AN INTERVIEWER DETERMINED RATING OF THE SOCIAL STATUS OF THE RESPONDENT'S FAMILY SETTING. THE SCALING VARIABLES WHICH WERE USED INCLUDE THE OCCUPATION AND INCOME OF THE HEAD OF THE HOUSEHOLD, THE EDUCATION OF THE RESPONDENT, AND THE PROPERTY HOLDINGS OF THE FAMILY. THE WEIGHTING OF THE VARIOUS MEASURES WAS BASED ON ONLY VERY ROUGH STANDARDS. THEREFORE, THE USER SHOULD BE AWARE OF THE IMPRECISION OF THIS SCALE. THE FOLLOWING DESCRIPTION OF SCALE CATEGORIES WAS ABSTRACTED FROM: DIVO-INSTITUT, BUCH UND LESER IN DEUTSCHLAND, (GUETERSLOH: BERTELSMANN VERLAG, 1965), PP. 118-120.

CATEGORY A: CONTAINS PROFESSIONAL OCCUPATIONS WHO ARE FAR ABOVE AVERAGE IN TERMS OF SOCIAL STATUS, INCOME OR PROPERTY HOLDINGS. BECAUSE THE FINANCIAL SITUATION IS ESPECIALLY IMPORTANT, A DOCTOR WOULD BE CLASSIFIED IN CATEGORY B IF HE WAS NOT SELF-EMPLOYED. WHEREAS, A HIGH EXECUTIVE IN A LARGE CORPORATION WOULD BE CLASSIFIED IN CATEGORY A, EVEN IF HE HAD ONLY ELEMENTARY SCHOOLING.

CATEGORY B: INCLUDES ALL CIVIL SERVANTS (EXCEPT THOSE IN THE UPPERMOST POSITIONS), SELF-EMPLOYED BUSINESSMEN WITH MIDDLE-SIZED PROPERTY HOLDINGS, WELL-TO-DO SALES REPRESENTATIVES OF LARGE CORPORATIONS, PROSPEROUS SELF-EMPLOYED CRAFTSMEN, OWNERS OF FINER HOTELS AND RESTAURANTS AND SIMILAR OCCUPATIONS. ALL INDIVIDUALS IN THIS CATEGORY HAVE A GOOD EDUCATION, AND SUBSTANTIAL INCOME OR PROPERTY HOLDINGS.

CATEGORY C: INCLUDES THOSE INDIVIDUALS WHOSE EDUCATION OR OCCUPATIONAL STATUS WOULD CLASSIFY THEM IN CATEGORY B, BUT THEIR INCOME OR PROPERTY HOLDINGS LOWERED THEM TO CATEGORY C. ALSO INCLUDED IN THIS CATEGORY ARE MOST BLUE COLLAR WORKERS.

CATEGORIES D1, D2: CONTAINS ALL EMPLOYEES AND WORKERS WITH VERY LOW INCOMES. THIS CATEGORY ALSO INCLUDES RETIRED PERSONS, WIDOWS WHO LIVE ON SOCIAL SECURITY OR PENSIONS, AND PERSONS WHO ARE UNEMPLOYED. THIS GROUP IS FURTHER BROKEN DOWN INTO CATEGORY D1 FOR THOSE WITH INCOMES ABOVE SUBSISTENCE LEVEL, AND CATEGORY D2 FOR THOSE WITH INCOMES BELOW SUBSISTENCE LEVEL.
