--	--	-----------	-------------	--------------	------------	----

1	Picture robot 1	1	2	3	4	5
2	Picture robot 2	1	2	3	4	5

EB82.4 QA1

INT.: (READ OUT) A robot is defined as a machine which can assist humans in everyday tasks without constant guidance or instruction, e.g. as a kind of co-worker helping on the factory floor or as a robot cleaner, or in activities which may be dangerous for humans, like search and rescue in disasters. Robots can come in many shapes or sizes and some may be of human appearance. Traditional kitchen appliances, such as a blender or a coffee maker, are not considered as robots.

INT.: (READ OUT) Artificial Intelligence (AI) is a term used to describe systems that, to some extent, can sense, perceive, think and act like humans and behave rationally. Artificial Intelligence is used, for instance, in driverless cars or drones, in our homes to adjust the heating automatically, in healthcare to improve medical diagnoses and in farming to apply pesticides only where they are absolutely necessary.

QD8: CODE 4 AND 5 ARE EXCLUSIVE

QD8	Have you ever used or do you currently use a robot at home or at work (e.g. a robotic vacuum cleaner at home or an industrial robot at work)?
-----	---

(READ OUT – MULTIPLE ANSWERS POSSIBLE)
