Study Description

ISSP Study Description Form

Modules 2007 and 2009

Study title: ***Leisure time and social inequalities***

Fieldwork dates: 15.12.2008 – 26.01.2009

Principal investigators: Agency for Social Analyses (ASA)

Sample type: Two stage random sampling.
The first stage of the sampling procedure was based on the list of electoral sections from the General Election 2005. Electoral sections cover the whole territory of the country and respectively provide access to the whole Bulgarian population aged 18 and over. The agency disposes of the complete list of electoral sections, which includes: its number, territorial location, and number of registered voters. Selection of electoral sections included in the sample was based on the procedure of systematic random selection. Within each selected 125 units were randomly selected on the basis of 'last birthday' approach 8 respondents who were 18 of age and over.

Fieldwork institute: ProField Data Partners
