ISSP 2007 – Leisure Time and Sports
Study Description

1.8. 2007

ISSP Study Description Form – Czech Republic (CZ)

Study title: ISSP 2007 Leisure time and sport

Fieldwork dates: 13.06. – 27.06. 2007

Principal investigators: Doc. Milan Tuček, CSc., IS AS CR

Sample type: Stratified random address

Fieldwork institute: GfK Prague

Fieldwork methods: Face to face interview

N. of respondents: 1222

Details about issued sample:

1. Total number of starting or issued names/addresses (gross sample size) *	2490
2. Interviews (1.0)	1222
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	392
B. Non-Contact (2.20)	680
C. Other	12
i. Language Problems (2.33)	0
ii. Miscellaneous Other (2.31, 2.32, 2.35)	0
3. Unknown Eligibility, Non-Interview (3.0)	168
4. Not Eligible	
A. Not a Residence (4.50)	4
B. Vacant Residence (4.60)	0
C. No Eligible Respondent (4.70)	12
D. Other (4.10,4.90)	0

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp 9-10 for further clarification.

Language(s): Czech

Weight present: Yes

Weighting procedure: Weighting algorithm is iterative proportional fitting method, known also as raking. There are given limits on the weight coefficients, lower limit is 0.25 and upper limit is 4.

Known systematic properties of sample:

- Under-represented groups are those, who are often out of their flat (students living in schools and colleges, conscripts). Inaccessible are persons who are not at their addresses at the time of the research (e.g., they are at longer journey out of their residence, in hospital, etc.), and persons who do not have any private address at time of the research (prisoners, homeless, persons living abroad, habitants of lodging-house, tourist home, guest-house, children's home, cloisters, etc). People who worked

1.8. 2007

or had some previous experience from the area of market research, public opinion research and advertising were excluded.

- Due to response differences the basic socio-demographic characteristics are significantly different from the known population characteristics.

Deviations from ISSP questionnaire:

- New value labels for Czech specific questions CZ_PRTY, CZ_INC, CZ_RINC (see czech06labels.doc).

- Specification of income variables:

CZ_RINC: Total average net income of respondent per month in CZK. It includes incomes from main job or business, incomes from additional gainful activities or property, rents, social incomes as are unemployment benefits, maternal benefits, allowances, etc. It does not include child allowances and state compensatory benefits for children. Income asked in categories, i.e. midpoints of categories are coded.

CZ_INC: Total average net income of household per month in CZK. It includes incomes and rents of all members of household and all social benefits, allowances and complementary incomes. Income asked in categories, i.e. midpoints of categories are coded.
