Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

Language(s): Spanish

Weight present: No

Weighting procedure:

Known systematic properties of sample: description of biases or other deviations of the sample

Deviations from ISSP questionnaire: No deviations from the core module.
The Union question was not asked. The urb-rural was asked in a different way. For income, an open question was first asked; if DK, different income ranges were offered. The final income variable is a mix of this two alternatives.
The questionnaire has more background questions than required.
