* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.

**These figures pertain to interviews in Jewish and Mixed (Jewish-Arab) communities. In the case of additional 147 interviews conducted in small Arab communities there was no sampling list and we have no information on response rates
