Acknowledgement for Assistance

All manuscripts utilizing data made available through the ZENTRALARCHIV or the Consortium should acknowledge that fact as well as identify the original collectors of the data.

We kindly ask the users to follow some adaptation of the following statement:

The data utilized in this <publication> were documented and made available by the ZENTRALARCHIV FUER EMPIRISCHE SOZIALFORSCHUNG.

The data for the "German Election Study, 1983" were originally collected by the Forschungsgruppe Wahlen e.V. and ipos, both Mannheim. Neither the original collectors nor the ZENTRALARCHIV bear any responsibility for the analyses or interpretation presented here.

In order to provide funding agencies with essential information about the use of archival resources, and to facilitate the exchange of information about research activities based on the ZENTRALARCHIV's holdings, each user is expected to send two copies of each completed manuscript to the ZENTRALARCHIV or the ICPSR.

The "German Election Study, 1983" in the context of the
German Election Data Project

Election studies are a focal point of the ZENTRALARCHIV's data collection. In the "German Election Data Project" 15 election studies covering the period from 1953 to 1976 have been released and documented. This project started as joint venture of the ZENTRALARCHIV FUER EMPIRISCHE SOZIAL-FORSCHUNG (ZA, Koeln), the ZENTRUM FUER UMFRAGEN, METHODEN UND ANALYSEN (ZUMA, Mannheim) and the INTER-UNIVERSITY CONSORTIUM FOR POLITICAL AND SOCIAL RESEARCH (ICPSR, Ann Arbor, Michigan). The 1980 German Election Study was cleaned and documented in German by the ZENTRALARCHIV; the translation into English was provided by the ICPSR. Recently, trend and panel studies for the 1983 and for the 1987 elections for the Bundestag were added to the collection by the ZENTRALARCHIV.

Furthermore, a Continuity Guide has been prepared for all election studies to facilitate the search for specific indicators or questions across time.

The German Election Study, 1983

This codebook documents the first part of the data available for the 1983 elections for the Bundestag; part 2 is documented separately.

The "German Election Study, 1983" is a datapool combining five separate surveys which were conducted monthly by MARPLAN. Four surveys - the "Politbarometer" - were organized by the FORSCHUNGSGRUPPE WAHLEN e.V. (Mannheim) as project leaders and financed by the Second Television Network (ZDF). Continuity of study content is a particular important aspect of the German Election Data Series. Therefore, an expanded survey was conducted in February under the responsibility of ipos (Mannheim) in order to assure continuity for 1983.

Overall the datapool includes four pre-election surveys, namely August and October 1982, January and February 1983, and one post-election survey carried out in March 1983. This dataset integrates the separate surveys by coding identical questions from each of the surveys under one variable; this necessitates the use of a study filter variable V3 for all analyses). Questions which occur only in single surveys are collected following the common variables, but precede the demographic variables which were usually included in all surveys (see Question-Variable Cross Reference List).

The study was cleaned and the German codebook was prepared in the ZENTRALARCHIV FUER EMPIRISCHE SOZIALFORSCHUNG (Koeln) by Renate Klever, Gisela Roellgen, Rolf Roentgen and Rolf Uher.

The English documentation was prepared by Maria Wieken-Mayser. Where appropriate the translations from earlier studies in the German Election Study Series have been used to provide continuity in question wording.

Study Description

German Election Study, 1983

ZA No. 1275 Accessibility: class A ZA category: 15

Time Dimension

Trend study, five waves: August 1982 to March 1983

Principal Investigators

M.Berger, Wolfgang G.Gibowski, D.Roth, W.Schulte,
Forschungsgruppe Wahlen e.V. and ipos, both Mannheim

Fieldwork

MARPLAN, Offenbach

Study Content

Voting behavior 1980; planned and actual voting behavior 1983; party preference ranking; scalometers for CDU/CSU, SPD, FDP, the Greens and for leading politicians; satisfaction with past and present government; issue importance; issue competence of past and present government; ranking of political goals; party preference; satisfaction with political system and with present leaders; evaluation of 1983 election outcome; preferred coalition; the role of the FDP in new coalition; significance of candidate and party vote; attitude toward upcoming census.

Universe and Sample

Voting age population of the German Federal Republic
Multi-stage random sample

Method of Data Collection

Oral interview, structured questionnaire

Dimensions of the Dataset

Number of units(cases): 5196 (1012+1031+1037+1084+1032)
Number of variables per case:118
Number of decks per case: 3
Single punch, OSIRIS, Z.A.R.Codebook

References to Related Studies

The German Election Study, 1980 (ZA No.1053) integrates trend surveys before and after the 1980 elections. A three-wave panel study for the 1983 elections is archived as German Election Panel Study 1983 (ZA No.1276).

Sampling Information

The sample was drawn to represent all German citizens over age 18 who reside in private households. West Berlin was excluded from the sample.

The sample was drawn using a stratified multi-stage random sample with three levels. First, the regional sample points (election districts = Wahlbezirke) were chosen, then the households within each sample point, and finally the persons within each household.

In the regional selection each community was represented with its election districts from the 1976 elections to the Bundestag. From the total of all election districts (which was stratified according to size of town) 201 election districts were chosen as sample points, one for each of the interviewers.

The selection of household addresses within each election district proceeds in each study according to the random-route procedure. Each interviewer was instructed which streets to walk and which private households to select. In each sample point a maximum of eight interviews were to be conducted.

The resulting addresses constitute the "gross household sample" for the survey. Using a random procedure, the respondent was chosen from the members of the household who were eligible to vote.

This dataset includes two weight variables to be used in the analyses. First, the sample representative of households was transformed into a sample representative of individuals to account for the fact that the chances of each household member to be interviewed are inversely proportional to the size of the household. The sample of individuals. Separately for each Bundesland, the sample was then weighted by sex and age to account for age and sex biases in the data. The average weights by sex and age are shown in the table below.

The weighted survey is representative for the voting population of the Federal Republic. Since this is a random sample, a confidence interval can be calculated for each result within which the true population value will be found with a certain probability.

Age	August 1982		October 1982

Total	0.98	1.02

Explanation

- <1> A variable number and a reference number have been assigned to each item in the study. In the present codebook which documents the archived data set, these numbers are identical. Should the data set be subsetted or rearranged the variable numbers might change to reflect the order of the new data set while the reference numbers would remain unchanged to provide a link to the archived data set.
- <2> Indicates the abbreviated (24 characters maximum) variable label used within OSIRIS and SPSS system files.
- <3> "MD" indicates the designation of missing data. MD1: indicates a specific single value declared as missing; MD2: designates a single value or a value range, i.e. all values equal or greater than this value have been declared missing. Although these categories are defined as missing data categories, this does not mean that the user should not or cannot use these codes if so desired.
- <4> Indicates the starting location and the width of the variable when the data set is stored in OSIRIS. These locations may also be used to access the data with software not using the OSIRIS dictionary.
- <5> "Deck" and "Column" indicate the location of the variable by deck and column(s) when the data are in card image form (80 column format).
- <6> Indicates the full question text taken from the original questionnaires including interviewer instructions. Wherever possible the original sequence of the questions has been retained, although some changes were necessary to integrate the different questionnaires.
- <7> Indicates commentaries and explanations added during the processing of the study. < > within question or answer texts also indicate whether the questionnaire in a particular survey deviated from the general format.
- <8> Indicates the code values for the single answer categories. These values are the same whether the positional information in the system file <4> or the information in card image file <5> is used.
- <9> Indicates the textual definition of the codes. Abbreviations commonly used are "DK" (don't know), "NA" (not ascertained) and "INAP." (inappropriate).
- <10> Indicates frequencies by Month of Survey (V3). Column percentages are based only on "valid cases". Missing data were excluded from percentaging.
- <11> This column contains the cumulated frequencies of the integrated datapool.
- <12> If a variable contains implied decimals the message "Dec. Places" followed by a number indicates the number of decimal places (see weight variables).

Variable Description List

	1	ZENTRALARCHIV Study Number 1275
	2	Respondent number
	3	Month of survey
	4	Form of questionnaire
	5	Are the right people in the leadership positions
	6	Satisfaction with democracy
7 -	8	Interest in politics
9 -	12	Voting intention for next elections
13 -	14	Constituency candidate and party vote in 1980
15 -	19	Voting behavior in 1983
20 -	21	Impact of the publication of polls results on R's voting decision
22 -	26	Preference rank which R gives to parties
27 -	31	Parties R would never vote for
32 -	36	What R thinks of the parties
37 -	38	Satisfaction with the government and the with opposition performance
39 -	40	Satisfaction with the individual coalition partners
	41	Satisfaction with top candidate of R's party
42 -	50	What R thinks of individual politicians
51 -	52	What R thinks of the American President and the British Prime Minister
	53	R's evaluation of the relationship between the United States and the German Federal Republic
54 -	55	R's evaluation of the general economic situation
	56	R's preference for the chancellorship candidate
57 -	59	R's opinion about economic relations with the Soviet Union
60 -	63	R's evaluation of his/her own economic situation and the impact the government has on this
64,65,78		What R thinks of the end of the SPD-FDP coalition
	66	Should Franz Josef Strauss take an office in Bonn
	67	When should new elections be held
68 +	85	Does R want the FDP in the Bundestag
69 +	86	Does R want the Greens in the Bundestag
70 -	71	Significance of the candidate and the party vote
	72	Would it be good if one party received the absolute majority in the elections
73 -	74	Which parties should form the government together
	75	Who does R think will win the next elections
76 -	77	Will the FDP and the Greens be represented in the next Bundestag
79 -	82	R's opinion on the position of the FDP in the new coalition
	83	Which government would solve best the most urgent problems
	84	Self-placement on left-right scale
	87	Does R approve of the present coalition government
88 -	89	Why did the SPD loose so many votes
90 -	93	R's attitude toward the upcoming census
111 -	112	R's party preference

Demographic variables

- 94 - 95 Total number of persons and number of persons
over 18 years permanently living in R's household
- 96 - 101 R's sex, age, marital status, educational back-
ground attended, employment status, occupational
group
- 102 R's comparison of his/her occupational position
with that of his/her father
- 103 R's relationship to head of household
- 104 - 105 Employment status and occupational group of head
of household
- 106 - 107 Interviewer check whether R is female and married
or widowed; R's comparison of her husband's occu-
pational position with that of her father
- 108 Is R or someone in the household a union member
- 109 - 110 R's religious preference and church attendance
- 113 Occupational groups represented in R's neighbor-
hood
- 114 Federal state where the interview was conducted
- 115 Administrative district identification code
- 116 Size of town
- 117 - 118 Weight: household and representative

V4 QUESTIONNAIRE FORM

Location: 11
Width: 1

Form of Questionnaire

In the August and in the October surveys two forms of the questionnaire were used: The placement of the questions for R's voting intention in 1983 and R's 1980 vote recall had been reversed. The coding scheme for the entire data set, however, follows version 1

1. Version 1: voting intention before recall
2. Version 2: recall before voting intention

V42 THINK OF GENSCHER

Location: 58 MD1: 99
Width: 2

Q.14. Please tell me by using this scale what you think about some leading politicians.
(Interviewer: Shuffle pink deck of cards and present the cards one at a time together with list no.3)
+5 means that you think a great deal of the particular politician. -5 means that you do not think much of him at all. If you do not know one or the other of the politicians, you do not have to rate him, of course.

Q.14.1 What do you think of Hans-Dietrich Genscher?

01. -5 -- do not think much of the politician at all

V88 WHY SPD LOST VOTES 1RST

Location: 118 MD1: 00
Width: 2 MD2: 99

Q.45 What factors were, in your mind, responsible for the fact that the SPD lost so many votes?
(Interviewer: Allow only two responses)

Q.45(A) Factors responsible for SPD loss of votes --
First mention

Reference to political issues

	Ungewichtet Abs.	%	N= 941
01. Unemployment	146	2.81	15.52
02. Public debt, governmental indebtedness, fiscal policy	98	1.89	10.41
03. Economic policy in general, economic crisis, budget policy	161	3.10	17.11
04. Policy concerning pensions	4	0.08	0.43
05. Policy concerning aliens, foreign workers	2	0.04	0.21
06. Education, education policy	2	0.04	0.21
07. Other domestic policy issues	3	0.06	0.32
08. Peace policy, defense policy, alliance policy (NATO, United States)	3	0.06	0.32
09. Foreign policy (other than coded under 08)	1	0.02	0.11

Reference to performance of government and politicians

10. General statements about government performance (e.g. had not done anything, passed bad laws, have messed things up, did not keep promises, bad performance)	92	1.77	9.78
11. Attrition (e.g. had been in government too long, worn out, not credible, had lost confidence)	58	1.12	6.16
12. Vogel (wrong candidate, too honest)	75	1.44	7.97
13. Schmidt	41	0.79	4.36
14. Leaders or leading team (including individual politicians like Brandt, Wehner)	3	0.06	0.32
15. Bad politicians, bad team, not the right people	8	0.15	0.85
16. Kohl (e.g. expect more from Kohl, has promised more)	9	0.17	0.96
17. "The turn"	14	0.27	1.49
18. Other statements referring to government performance or politicians	1	0.02	0.11

Reference to political parties

20. SPD is too much to the right, not a workers' party anymore	5	0.10	0.53
21. SPD is too much to the left, socialism fails, rapprochement to Moscow	10	0.19	1.06
22. SPD is at variance, in disagreement	20	0.38	2.13
23. Other statements about the SPD as a party	7	0.13	0.74
24. References to the FDP: betrayal, breach of trust, Genscher, change towards the CDU/CSU	23	0.44	2.44
25. References to the Greens: too much distance from the Greens, did not want to cooperate with them	4	0.08	0.43
26. References to the Greens: too little distance from the Greens, wanted to join in with them	24	0.46	2.55
27. References to the CDU/CSU - positive: CDU is the better party, gave hope	26	0.50	2.76
28. References to the CDU/CSU - negative: talk about economic upswing, people were tricked in	16	0.31	1.70
29. Other references to parties	7	0.13	0.74

V88 WHY SPD LOST VOTES 1RST (continued)

Reference to election campaign and voting behavior

30.	SPD had wrong campaign (e.g. too factual, too technical, not persuading)	27	0.52	2.87
31.	Misleading campaign of the CDU	9	0.17	0.96
32.	Other statements about the campaign (without reference to the SPD or CDU)	6	0.12	0.64
33.	SPD lost votes to the CDU (many turned to the CDU)	2	0.04	0.21

V113 NEIGHBORHD OCCUPATIONS

Location: 152 MD1: 9
Width: 1

S.R Let us assume a visitor from elsewhere asked you which occupational groups are particularly strongly represented in this neighborhood. Which of the descriptions on this list would you give as an answer? Please simply name the appropriate letter.
(Interviewer: Hand list S.5 to the respondent; allow only one response)

1. (A) Almost only workers
2. (B) Predominantly workiers, but also civil servants and salaried white-collar employees
3. (C) Almost only salaried white-collar employees, civil servants and self-employed
4. (D) Predominantly salaried white-collar employees and civil servants, but also workers
5. (E) Almost only farmers
6. (F) Predominantly farmers, but also workers
7. (G) Predominantly farmers, but also salaried white-collar employees, and civil servants
8. Mixed
9. DK

V117 WEIGHT - HOUSEHOLD

Location: 161

Width: 3 Decimal Places: 2

Weight - Household

This weight variable creates a sample representative of all households of the Federal Republic.

V118 WEIGHT - REPRESENTATIVE

Location: 164

Width: 3 Decimal Places: 2

Weight - Representative

This variable corrects for sex and age biases in the data and produces a sample representative of the voting age population of the Federal Republic.

Note 0001

Administrative District Identification Code
THIS NOTE RELATES TO VARIABLE V115.

The following codes can be used to identify the location of each interview in terms of state ("Bundesland"), district ("Regierungsbezirk") and county ("Kreis").

The first and second digits of the code identify the state (Bundesland). The third digit identifies the administrative district (Regierungsbezirk) within each state. The fourth and the fifth digits identify the county within each district.

Unidentifiable codes have been documented.

The assignment of these codes follows the publication of the Federal Statistical Office

"Bevoelkerung und Erwerbstaetigkeit, Fachserie 1,
Bevoelkerung der Gemeinden 1976"
