Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the standard Eurobarometer measures and queried respondents on their opinions regarding mental well-being, telecommunications, harmful Internet content, and farm animal welfare. The first topic covered physical and mental well-being. Respondents were asked (1) about the state of their mental well-being over the previous four weeks, and the degree to which health concerns limited daily moderate physical activities, (2) about the effects of physical health and emotional problems on regular activities, (3) whether they were treated for mental illnesses, how often they sought help for mental problems, and where they turned to get support, (4) how easy or difficult they found acquiring information about mental health problems, and (5) how Europeans perceived people with a mental illness. The second topic addressed the access and use of telecommunications. Respondents were queried as to whether they used a fixed telephone, mobile telephone, computer, the Internet, or television in the household, what operator and company they used to provide the services, whether they considered changing providers, and their main reasons for changing. The third topic focused on the respondents' knowledge of and opinions about harmful Internet content. Respondents answered questions concerning Internet use and safety for their children and procedures for reporting illegal and harmful content. The final topic, farm animal welfare, included questions on food purchases, food consumption, and respondents' knowledge of and opinions about the welfare of farm animals. Background information includes respondent's age, gender, nationality, origin of birth (personal and parental), marital status, left-to-right political self-placement, occupation, age when they stopped full-time education, household composition, and region of residence.

1.3 Universe

In all, Eurobarometer 64.4 interviewed 29.248 citizens of the 25 countries in the European Union after the 2004 enlargement, in the remaining Accession Countries (AC) Bulgaria and Romania and Candidate Countries (CC) Croatia and Turkey, and among the Turkish Cypriote Community (TCC). All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic), Malta, and Cyprus (TCC) with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From December 07, 2005 to January 11, 2006, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are

represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 64.4 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

HOUSEHOLD WEIGHTS (W21 to W39): For the parts of the questionnaire for which respondents were asked to answer for their household (QB), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into

household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

Table 2: Overview of population size weights

European Weights in Eurobarometer 64.4	Function
W5 to W9, W11, W14; HH: W25 to W29, W31, W34	grouping EU member countries
W10, W13; HH: W30, W33	grouping new member countries
W15, W18, W19; HH: W35, W38, W39	grouping candidate/accession countries
W16; HH: W36	grouping member + candidate/accession countries
W12; HH: W32	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added "Inappropriate" (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only), creating separate "dummy" variables also to explicitly represent "Don't know", "No answer/refusal" or other residual responses, such as "None of the above". The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than

English, the archive documents the original language wording and supplies the English translation in brackets. Specific information on data preparation or inconsistencies is noted on variable level.

1.9 Further remarks

The topical module on ANIMAL WELFARE (QD) was only asked in Romania, Bulgaria, Turkey and Croatia. In the EU member countries identical questions were surveyed in the framework of Eurobarometer 63.2 (ZA4234).

The topical module on E-COMMUNICATIONS (QB) is partly a replication of a former IPSOS-INRA study outside the Eurobarometer framework: Telecoms Services Indicators 2004 (TSI-2004).

Standard trend questions are not included in this round.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																						
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																						

5 Variable Documentation

Variable, Label
Question Text (English Language)

v1 - STUDY NUMBER DISTRIBUTOR

Distributor Archive Study Number

Study Number of the distributing archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4416			29248	100.0	100.0
	Sum		29248	100.0	100.0
	Valid Cases		29248		

v2 - STUDY NUMBER PRODUCER

ZA Study Number

Study number of the data set producer.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4416			29248	100.0	100.0
	Sum		29248	100.0	100.0
	Valid Cases		29248		

v3 - EDITION NUMBER

ZA / ICPSR Edition Number

The number identifying the release edition of this data set.

1 1st GESIS archive edition as of February 4, 2009

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	1st GESIS archive edition as of February 4, 2009		29248	100.0	100.0
	Sum		29248	100.0	100.0
	Valid Cases		29248		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.0.1 adds the VERSION variable to the otherwise unchanged data set.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.0.1 (2012-03-30)			29248	100.0	100.0
	Sum		29248	100.0	100.0
	Valid Cases		29248		

v4 - EUROBAROMETER NUMBER

ZA / ICPSR Part Number

The number identifying the Eurobarometer sample.

1 Eurobarometer 64.4

v4

Value	Label	Missing	Count	Percent	Valid Percent
1	Eurobarometer 64.4		29248	100.0	100.0
	Sum		29248	100.0	100.0
	Valid Cases		29248		

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. This weight corresponds to former NATION WEIGHT II (up to EUROBAROMETER 31). Use NATION variable V6 or V7.

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Not United Kingdom

1 United Kingdom

v10 - W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM

W4 WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. The national weights are included. This weight in its function partly corresponds to former NATION WEIGHT I (until EUROBAROMETER 31). All other samples are excluded from calculation.

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Not Germany

1 Germany

v24 - W10 WEIGHT EURO NEW 3 (1995)

W10 WEIGHT EURO NEW 3 (1995)

W10 WEIGHT EURO NEW 3 only refers to the three new members as of January 1995: Finland, Sweden and Austria.

This variable contains weights that adjust each national sample to its nation's share in the total population of these three countries and should be used whenever these three countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

v25 - NATION GROUP EURO 15

NATION GROUP EURO 15

NATION GROUP EURO 15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

v38 - W18 WEIGHT ACCESSION COUNTRIES (BG RO)

W18 WEIGHT ACCESSION COUNTRIES (BG/RO)

W18 WEIGHT ACCESSION COUNTRIES refers to Bulgaria and Romania.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included. All other countries are excluded from calculation.

v39 - NATION GROUP CANDIDATE COUNTRIES (TR HR)

NATION GROUP EU CANDIDATE COUNTRIES (TR/HR)

NATION GROUP EU CANDIDATE COUNTRIES refers to Turkey and Croatia.

v40 - W19 WEIGHT CANDIDATE COUNTRIES (TR HR)

W19 WEIGHT CANDIDATE COUNTRIES (TR/HR)

W19 WEIGHT CANDIDATE COUNTRIES refers to Turkey and Croatia.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included. All other countries are excluded from calculation.

v41 - W21 HH WEIGHT RESULT FROM TARGET

W21 WEIGHT RESULT FROM TARGET - HOUSEHOLD WEIGHT

W21 WEIGHT RESULT FROM TARGET is for use in separate analyses of individual countries (=samples). It reproduces the real number of cases for each sample. British and Northern Irish as well as East and West German samples are weighted separately. Use NATION variable V6 or V7.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v42 - W24 HH WEIGHT SPECIAL UNITED KINGDOM

W24 WEIGHT SPECIAL UNITED KINGDOM - HOUSEHOLD WEIGHT

W24 WEIGHT SPECIAL UNITED KINGDOM adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom and should be used whenever the United Kingdom is to be analyzed as a whole. The national weights are included. This weight in its function partly corresponds to former NATION WEIGHT I (until EUROBAROMETER 31). All other samples are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v43 - W23 HH WEIGHT SPECIAL GERMANY

W23 WEIGHT SPECIAL GERMANY - HOUSEHOLD WEIGHT

W23 WEIGHT SPECIAL GERMANY adjusts the East and the West German samples to their respective proportions in the united Germany. The national weights are included. This weight should be used whenever the united Germany is to be analyzed as a whole. All other samples are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v44 - W25 HH WEIGHT EURO 6

W25 WEIGHT EURO 6 - HOUSEHOLD WEIGHT

W25 WEIGHT EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg).

This variable contains weights that adjust each national sample to its nation's share in the population of the above mentioned countries and should be used whenever these six countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v45 - W26 HH WEIGHT EURO 9

W26 WEIGHT EURO 9 - HOUSEHOLD WEIGHT

W26 WEIGHT EURO 9 adds Denmark, Ireland, Great Britain and Northern Ireland to the EURO 6 countries.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v46 - W27 HH WEIGHT EURO 10

W27 WEIGHT EURO 10 - HOUSEHOLD WEIGHT

W27 WEIGHT EURO 10 adds Greece to the EURO 9 countries (new member as of January 1981).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v47 - W28 HH WEIGHT EURO 12

W28 WEIGHT EURO 12 - HOUSEHOLD WEIGHT

W28 WEIGHT EURO 12 adds Spain and Portugal to the EURO 10 countries (new member as of January 1986).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v48 - W29 HH WEIGHT EURO 12 + EAST GERMANY

W29 WEIGHT EURO 12+ EAST GERMANY - HOUSEHOLD WEIGHT

W29 WEIGHT EURO 12+ equals EURO 12 but including East Germany after the unification of Germany on October 3, 1990.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v49 - W30 HH WEIGHT EURO NEW 3 (1995)

W30 WEIGHT EURO NEW 3 (1995) - HOUSEHOLD WEIGHT

W30 WEIGHT EURO NEW 3 only refers to the three new members as of January 1995: Finland, Sweden and Austria.

This variable contains weights that adjust each national sample to its nation's share in the total population of these three countries and should be used whenever these three countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v50 - W31 HH WEIGHT EURO 15

W31 WEIGHT EURO 15 - HOUSEHOLD WEIGHT

W31 WEIGHT EURO 15 adds Austria, Finland and Sweden to the EURO 12+ countries, new members as of January 1995.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v51 - W32 HH WEIGHT SPECIAL EURO ZONE (2002)

W32 WEIGHT SPECIAL EURO ZONE (2002) - HOUSEHOLD WEIGHT

W32 WEIGHT SPECIAL EURO ZONE separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland).

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v52 - W33 HH WEIGHT EURO NEW 10 (2004)

W33 WEIGHT EURO NEW 10 (2004) - HOUSEHOLD WEIGHT

W33 WEIGHT EURO NEW 10 refers to the group of the ten new members of the enlargement in 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v53 - W34 HH WEIGHT EURO 25

W34 WEIGHT EURO 25 - HOUSEHOLD WEIGHT

W34 WEIGHT EURO 25 refers to the EU member countries after the enlargement in 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v54 - W35 HH WEIGHT SPECIAL AC2/CC2

W35 WEIGHT SPECIAL AC2/CC2 - HOUSEHOLD WEIGHT

W35 WEIGHT SPECIAL AC2/CC2 refers to the group of the two Accession (Bulgaria, Romania) and the two remaining Candidate Countries (Croatia, Turkey) as of 2004.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. All other countries are excluded from calculation. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v55 - W36 HH WEIGHT EURO 29 (EURO 25 + AC2/CC2)

W36 WEIGHT EURO 29 (EURO 25 + AC2/CC2) - HOUSEHOLD WEIGHT

W36 WEIGHT EURO 29 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession and Candidate Countries (AC2/CC2). Northern Cyprus (Turkish Cypriote Community=TCC) is excluded from calculation.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v56 - W38 HH WEIGHT ACCESSION COUNTRIES (BG RO)

W38 WEIGHT ACCESSION COUNTRIES (BG/RO) - HOUSEHOLD WEIGHT

W38 WEIGHT ACCESSION COUNTRIES refers to Bulgaria and Romania.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included. All other countries are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v57 - W39 HH WEIGHT CANDIDATE COUNTRIES (TR HR)

W39 WEIGHT CANDIDATE COUNTRIES (TR/HR) - HOUSEHOLD WEIGHT

W39 WEIGHT CANDIDATE COUNTRIES refers to Turkey and Croatia.

This variable contains weights that adjust each national sample to its nation's share in the population of the included countries and should be used whenever these countries are to be analyzed as a group in total. The national weights for each sample are included. All other countries are excluded from calculation.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (Q.B), for each type of weight an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the Universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS Opinion & Social applied the official household figures as provided by EUROSTAT or national statistic offices.

v143 - QB1 TELECOM DEV IN HH: FIXED TELEPHONE

Q.B1

For each of the following please tell me how many of them are available in your household.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE - READ OUT)

Q.B1_6 Fixed telephone access (including those provided by a cable operator or by an operator providing voice over IP) e.g.

one standard line plus a second line (2nd number) for fax or Internet counting as 2

- 0 None
1 One
2 Two
3 Three
4 Four
5 Five
6 Six
7 Seven
8 Eight
9 Nine or more
10 DK

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

v153 - QB1 TELECOM DEV IN HH: MOBILE DATA COM (REC)

Q.B1 Telecommunication devices in the household - RECODED

Q.B1_5 Mobile phone giving access to advanced mobile data communication services. By this we mean those allowing you to access websites for downloading audio/video content, sending and receiving e-mails

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 DK
- 9 Inap. (not coded 1-9 in V140 and V141)

Derivation:

This variable collapses answers to V142.

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

See V142 for complete question text.

v154 - QB1 TELECOM DEV IN HH: FIXED TELEPHONE (REC)

Q.B1 Telecommunication devices in the household - RECODED

Q.B1_6 Fixed telephone access (including those provided by a cable operator or by an operator providing voice over IP) e.g. one standard line plus a second line (2nd number) for fax or Internet counting as 2

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 DK

Derivation:

This variable collapses answers to V143.

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

See V143 for complete question text.

v158 - QB1 TELECOM DEV IN HH: INTERNET ACCESS (REC)

Q.B1 Telecommunication devices in the household - RECODED

Q.B1_10 Internet access (free or not) (one single access can connect several PCs)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more
- 5 DK

Derivation:

This variable collapses answers to V147.

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

See V147 for complete question text.

v901 - QB8 FIXED PHONE LINE - HH SITUATION

Q.B8

ASK Q.B8 AND Q.B9 IF "NO FIXED TELEPHONE LINE IN THE HOUSEHOLD", CODE 0 IN Q.B1 ITEM 6 - OTHERS GO TO Q.B10

You said there is no fixed telephone line at your home. Among the following list which situation applies to your household?
 (READ OUT - ONE ANSWER ONLY)

- 0 NA
- 1 Your household has given up its fixed telephone line in the last 12 months
- 2 Your household has given up its fixed telephone line more than one year ago
- 3 Your household has never had a fixed telephone line
- 4 Other (SPONTANEOUS)
- 5 DK
- 9 Inap. (not coded 0 in V143)

Note:

High numbers of respondents (603 cases) without fixed telephone line (0 in V143) do not give any answer and are recoded to "0" (NA).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

v909 - QB9 FX PHONE HH: DO NOT WANT

Q.B9

ASK Q.B8 AND Q.B9 IF "NO FIXED TELEPHONE LINE IN THE HOUSEHOLD", CODE 0 IN Q.B1 ITEM 6

You said there is no fixed telephone line at your home. Among the following list which ones best explain why your household does not have a fixed telephone line?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.B9_8 You or other members of your household do not want a fixed telephone line

- 0 Not mentioned
- 1 Mentioned
- 8 NA
- 9 Inap. (not coded 0 in V143)

Note:

High numbers of respondents (603 cases) without fixed telephone line (0 in V143) do not give any answer and are recoded to "8" (NA) in V902 to V911.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

v922 - QB13 MOBILE PHONE USE - N OF HH MEMBERS (REC)

Q.B13 Mobile phone use - number of household members - RECODED

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four and more
- 5 DK

Derivation:

This variable collapses answers to Q.B13 / V921.

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

See Q.B13 / V921 for complete question text.

Q.B29

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B29 AND Q.B30 IF "NARROWBAND INTERNET ACCESS", CODE 1 OR 2 IN Q.B22 - OTHERS GO TO Q.B31

Why does your household not have a broadband Internet access?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.B29_1 We\ I plan to subscribe\ connect to a broadband access in the next 2 months

0 Not mentioned

1 Mentioned

9 Inap. (not coded 1-9 in V147 and V148, not coded 1 in V1204 and V1205)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1718 - QB29 INTERNET BROADBAND: SATISFIED

Q.B29

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B29 AND Q.B30 IF "NARROWBAND INTERNET ACCESS", CODE 1 OR 2 IN Q.B22 - OTHERS GO TO Q.B31

Why does your household not have a broadband Internet access?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.B29_2 We are\ I am satisfied with the speed of our\ my current dial-up connection

0 Not mentioned

1 Mentioned

9 Inap. (not coded 1-9 in V147 and V148, not coded 1 in V1204 and V1205)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1719 - QB29 INTERNET BROADBAND: NOT COVERED

Q.B29

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B29 AND Q.B30 IF "NARROWBAND INTERNET ACCESS", CODE 1 OR 2 IN Q.B22 - OTHERS GO TO Q.B31

Why does your household not have a broadband Internet access?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.B29_3 The local area is not covered by a broadband access network technology

0 Not mentioned

1 Mentioned

9 Inap. (not coded 1-9 in V147 and V148, not coded 1 in V1204 and V1205)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1722 - QB29 INTERNET BROADBAND: NOT USE ENOUGH

Q.B29

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B29 AND Q.B30 IF "NARROWBAND INTERNET ACCESS", CODE 1 OR 2 IN Q.B22 - OTHERS GO TO Q.B31

Why does your household not have a broadband Internet access?

(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.B29_6 We\ I do not use the Internet enough (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. (not coded 1-9 in V147 and V148, not coded 1 in V1204 and V1205)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see V41 to V57.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1727 - QB30 INTERNET BROADBAND IF: 10% CHEAPER

Q.B30

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B29 AND Q.B30 IF "NARROWBAND INTERNET ACCESS", CODE 1 OR 2 IN Q.B22

Would you be willing to change to broadband Internet access if ...?

(ONE ANSWER PER LINE - READ OUT)

Q.B30_3 Broadband Internet service was 10% cheaper than it is now

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. (not coded 1-9 in V147 and V148, not coded 1 in V1204 and V1205)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1729 - QB31 INTERNET SERV CHANGE: NO PHONE LINE

Q.B31

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B31 AND QB32 IF "BROADBAND INTERNET ACCESS", CODE 3 TO 7 IN Q.B22 - OTHERS GO TO Q.B33

Would you personally like to change your service subscriptions in any of the following ways?

(ONE ANSWER PER LINE - READ OUT)

Q.B31_1 Keep the broadband service but drop the fixed telephone service

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. (not coded 1-9 in V147 and V148; not coded 1 in V1206 to V1210)

Note:

According to the data set and the national field questionnaires filter instruction "code 3 or 7" in the English questionnaire is incorrect and should be considered as "code 3 to 7".

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1732 - QB32 INTERNET SPEED UPGRADE: NO PHONE LINE

Q.B32

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B31 AND QB32 IF "BROADBAND INTERNET ACCESS", CODE 3 TO 7 IN Q.B22

Would you be willing to upgrade your broadband Internet access to an even higher speed if ...?

(ONE ANSWER PER LINE - READ OUT)

Q.B32_1 You could have a higher speed connection service without having a telephone line

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. (not coded 1-9 in V147 and V148; not coded 1 in V1206 to V1210)

Note:

According to the data set and the national field questionnaires filter instruction "code 3 or 7" in the English questionnaire is incorrect and should be considered as "code 3 to 7".

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1737 - QB34 INTERNET - DO TO COMBAT SPAM

Q.B34

ASK Q.B22 TO Q.B36 IF "INTERNET ACCESS AT HOME", CODE 1 TO 9 IN Q.B1 ITEM 10 OR 11 / ASK Q.B34 TO Q.B36 IF CODE 1 TO 3 IN Q.B33 - OTHERS GO TO Q.B37

What did you do to combat spam?

(READ OUT - ONE ANSWER ONLY)

- 1 I have anti-spam software that was free of charge
- 2 I purchased and installed anti-spam software
- 3 I do not have anti-spam software but rely on my Internet service company
- 4 Nothing, I do not care about it
- 5 Other (SPONTANEOUS)
- 6 DK
- 9 Inap. (not coded 1-9 in V147 and V148, not coded 1-3 in V1736)

v1781 - QC2 INTERNET EXPERIENCE - RESPONDENT

Q.C2

ASK Q.C2 IF "USE THE INTERNET", CODE 1 TO 4 IN Q.C1 - OTHERS GO TO Q.C3

How would you describe yourself in terms of going and surfing on the Internet? Would you say that you are ...?

(READ OUT - ONE ANSWER ONLY)

- 1 A beginner
- 2 An intermediate user
- 3 An advanced user
- 4 An expert user
- 5 DK
- 9 Inap. (not coded 1 in V1774-V1777)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1790 - QC3BC INTERNET - CLOSEST BIRTHDAY CHILD

[Q.C3A

Do you have, in your household, any child under your responsibility in each of the following age bans?]

QC.3BC

IF "DO NOT HAVE ANY CHILDREN UNDER 18", CODE 8 IN Q.C3A - DO NOT ASK Q.C3B TO Q.C10 AND GO TO Q.C11 /
ASK Q.C3B and Q.C3C FOR THE CHILD WHO'S BIRTHDAY IS CLOSEST TO DATE OF INTERVIEW

And is it a boy or a girl?

And what age ban is he / she located?

- 0 NA
- 1 Girl * Under 6
- 2 Girl * 6 - 7 years old
- 3 Girl * 8 - 9 years old
- 4 Girl * 10 - 11 years old
- 5 Girl * 12 - 13 years old
- 6 Girl * 14 - 15 years old
- 7 Girl * 16 - 17 years old
- 8 Boy * Under 6
- 9 Boy * 6 - 7 years old
- 10 Boy * 8 - 9 years old
- 11 Boy * 10 - 11 years old
- 12 Boy * 12 - 13 years old
- 13 Boy * 14 - 15 years old
- 14 Boy * 16 - 17 years old
- 99 Inap. (coded 1 in V1789)

Note:

Questions Q.C3B and Q.C3C are integrated in one variable V1790.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

ASK Q.C4 TO Q.C10 FOR THE CHILD WHO'S BIRTHDAY IS CLOSEST TO DATE OF INTERVIEW, CHILD CODED IN Q.C3B / ASK Q.C5 AND Q.C6 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4 - OTHERS GO TO Q.C7

Are filtering\ blocking tools avoiding the access to certain web sites applied when your child uses the Internet?
 (SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE - ASK ONLY IF MENTIONNED IN Q.C4)

Q.C5_1 No

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Are filtering\ blocking tools avoiding the access to certain web sites applied when your child uses the Internet?
(SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE - ASK ONLY IF MENTIONED IN Q.C4)

Q.C5_3 Yes, at school

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Please notice that several respondents mention an item in V1801 to V1806 without having indicated the specific item in Q.C4 (V1791 to V1796).

v1808 - QC5 INTERNET FILTERING TOOLS: DK

Q.C5

ASK Q.C4 TO Q.C10 FOR THE CHILD WHO'S BIRTHDAY IS CLOSEST TO DATE OF INTERVIEW, CHILD CODED IN Q.C3B / ASK Q.C5 AND Q.C6 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4 - OTHERS GO TO Q.C7

Are filtering\ blocking tools avoiding the access to certain web sites applied when your child uses the Internet?
 (SHOW CARD - READ OUT - MULTIPLE ANSWERS POSSIBLE - ASK ONLY IF MENTIONNED IN Q.C4)

Q.C5_9 DK

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

8 NA

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797; not coded 1 in V1814)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797; not coded 1 in V1814)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1834 - QC9 INTERNET RULES: DK

Q.C9

ASK Q.C4 TO Q.C10 FOR THE CHILD WHO'S BIRTHDAY IS CLOSEST TO DATE OF INTERVIEW, CHILD CODED IN Q.C3B / ASK Q.C9 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4 AND IF "RULES ABOUT USING THE INTERNET", CODE 4 IN Q.C8 - OTHERS GO TO Q.C10

What rules have you set regarding how he\ she uses the Internet?

(DO NOT READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.C9_16 DK

0 Not mentioned

1 Mentioned

8 NA

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797; not coded 1 in V1814)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Last trend slightly modified: EB60.2, Q.26

v1853 - QC12 INTERNET - CHILD KNOWS WHAT TO DO

Q.C12

DO NOT ASK Q.C12 TO Q.C15 IF "DO NOT HAVE ANY CHILD UNDER 18", CODE 8 IN Q.C3A - ASK Q.C12 TO Q.C15 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4 - OTHERS GO TO Q.D1

Would you say that this child in your household knows what to do if a situation on the Internet makes him\ her feel uncomfortable?

- 1 Yes
- 2 No
- 3 DK
- 9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1857 - QC14 INTERNET SAFETY INFO: AUTHORITIES

Q.C14

DO NOT ASK Q.C12 TO Q.C15 IF "DO NOT HAVE ANY CHILD UNDER 18", CODE 8 IN Q.C3A - ASK Q.C12 TO Q.C15 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4

From whom would you like to receive information about using the Internet in a safer way?

(DO NOT READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.C14_3 Government\ local authority

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797, V1855-V1866, V1868)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1878 - QC15 INTERNET SAFETY INFO: RADIO

Q.C15

DO NOT ASK Q.C12 TO Q.C15 IF "DO NOT HAVE ANY CHILD UNDER 18", CODE 8 IN Q.C3A - ASK Q.C12 TO Q.C15 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4 / ASK QC15 IF CODE 1 TO 12 OR 14 IN Q.C14 - OTHERS GO TO Q.D

How would you like to receive this information?

(DO NOT READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.C15_9 From the radio

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797, V1855-V1866, V1868)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1883 - QC15 INTERNET SAFETY INFO: DK

Q.C15

DO NOT ASK Q.C12 TO Q.C15 IF "DO NOT HAVE ANY CHILD UNDER 18", CODE 8 IN Q.C3A - ASK Q.C12 TO Q.C15 IF "THE CHILD CODED IN Q.C3B USES THE INTERNET", CODE 1 TO 7 IN Q.C4 / ASK QC15 IF CODE 1 TO 12 OR 14 IN Q.C14 - OTHERS GO TO Q.D

How would you like to receive this information?

(DO NOT READ OUT - MULTIPLE ANSWERS POSSIBLE)

Q.C15_14 DK

0 Not mentioned

1 Mentioned

9 Inap. (coded 1 in V1789; not coded any 1 in V1791-V1797, V1855-V1866, V1868)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v1922 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE "00" - IF "NO FULL-TIME EDUCATION", CODE '98' - IF "DK", CODE '99')

1 1 year

63 63 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98"

Original code "98" recoded to "97"

Actual number is coded.

Last trend: EB64.3, D.8

D.8 Note: Original code "00" recoded to "98" Original code "98" recoded to "97" Outlier (< 6) for FRANCE (n=1) and Finland (n=4). ALL cases <15 have been recoded to "up to 14" in V1923. Actual number is coded.

v1923 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 12 DK

Note:

See D.8 for complete question text.

v1925 - D11 AGE EXACT

D.11

How old are you?

15 15 years

98 98 years

Note:

Actual number is coded.

Last trend: EB64.3, D.11

v1926 - D11 AGE RECODED - FOUR GROUPS

D.11R1 R'S age - four collapsed categories

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v1929 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY, CODE 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

SELF-EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, ...)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk, but travelling (salesmen, driver, ...)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, ...)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

0 NA

15 Never did any paid work

99 Inap. (not coded 1 to 4 in V1928)

Note:

Coding shifted compared to the questionnaire in accordance with former surveys.

Please notice high item non-responses (NA) for Bulgaria.

Last trend: EB64.3, D.15B

NO QUESTIONS D.16 TO D.24

v1932 - D40A HOUSEHOLD COMPOSITION: AGED 15+ (REC)

D.40A HOUSEHOLD COMPOSITION: AGED 15+ RECODED

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question D.40A/V1931.

Note:

See V1931 for complete question text.

	Sum		29248	100.0	100.0
	Valid Cases		1000		

v1956 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan (Great Britain only)
- 99 Inap. (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes '1' or '2') and Great Britain (codes '3' to '5'). In order to facilitate the analysis for the United Kingdom as a whole (V9 coded '1'), identical categories have been coded together (matched). The category "metropolitan" (code '3') is only available for Great Britain.

For meaningful results this variable has to be used for Great Britain and Northern Ireland separately (breakdown by NATION variables V6 or V7). For the United Kingdom as a whole (V9 coded '1') data need to be weighted by W4 WEIGHT SPECIAL UNITED KINGDOM (V10).

v1956, weighted by v10

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		183	14.0	14.0
2	Urban		450	34.4	34.4
3	Metropolitan (GBN only)		677	51.7	51.7
99	Inap. (not 9 or 10 in V6)	M	0	0.0	
	Sum		1310	100.0	100.0
	Valid Cases		1310		

v1957 - P6 SIZE OF COMMUNITY - GREECE

P.6_GR (Objective) Size of community: Greece

- 1 Rural
- 2 Semi-urban
- 3 Urban
- 4 Thessaloniki
- 5 Athens
- 99 Inap. (not coded 11 in V6)

v1957, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		271	0.9	27.1
2	Semi-urban		132	0.5	13.2
3	Urban		233	0.8	23.3
4	Thessaloniki		72	0.2	7.2
5	Athens		291	1.0	29.1
99	Inap. (not 11 in V6)	M	28249	96.6	
	Sum		29248	100.0	100.0
	Valid Cases		999		

v1958 - P6 SIZE OF COMMUNITY - SPAIN

P.6_ES (Objective) Size of community: Spain

- 1 Up to 2.000 inhabitants
- 2 2.001 - 10.000 inhabitants
- 3 10.001 - 50.000 inhabitants
- 4 50.001 - 100.000 inhabitants
- 5 100.001 - 500.000 inhabitants
- 6 500.001 - 1.000.000 inhabitants
- 7 More than 1.000.000 inhabitants
- 99 Inap. (not coded 12 in V6)

v1958, weighted by v8

Value	Label	Missing	Count	Percent	Valid Percent
1	Up to 2.000		70	0.2	7.0
2	2.001 - 10.000		155	0.5	15.5

v2023 - P13 LANGUAGE OF INTERVIEW - BELGIUM

P.13_BE Language of questionnaire: Belgium

- 1 French
- 2 Dutch
- 9 Inap. (not coded 2 in V6)

v2023

Value	Label	Missing	Count	Percent	Valid Percent
1	French		427	1.5	42.2
2	Dutch		584	2.0	57.8
9	Inap. (not 2 in V6)	M	28237	96.5	
	Sum		29248	100.0	100.0
	Valid Cases		1011		

v2024 - P13 LANGUAGE OF INTERVIEW - LUXEMBOURG

P.13_LU Language of questionnaire: Luxembourg

- 1 Luxembourgish
- 2 French
- 3 German
- 9 Inap. (not coded 6 in V6)

Note:

Starting with Eurobarometer 62 and with the change of fieldwork responsibility to TNS, the relation between average frequencies for language categories "French" and "Luxembourgish" appears to be inversed. The majority of respondents in Luxembourg are now coded as being interviewed in French and not in Luxembourgish as former Eurobarometer surveys indicate. It could not be ascertained if TNS (intermittently) changed the fieldwork strategy regarding languages. Starting with Eurobarometer 69 the former proportion is recovered, again representing the actual proportion between Luxembourgish and French as mother languages in Luxembourg. This is probably also true for Eurobarometer 68.1 and 68.2 where the labelling in the data set (value label) is shifted compared to the field questionnaire.

v2024

Value	Label	Missing	Count	Percent	Valid Percent
1	Luxembourgish		124	0.4	24.8
2	French		371	1.3	74.2
