Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys diverged from the standard Eurobarometer measures and queried respondents on the following major areas of focus: (1) discrimination, (2) radioactive waste, and (3) purchasing in the European Union (EU). For the first major focus, discrimination, respondents were queried about how widespread various types of discrimination were, how common they were compared with five years ago, if in the past year they had personally felt discriminated against or witnessed discrimination, and the existence of multiple discrimination. Additional queries included how comfortable respondents would be with having a person from a different minority group as a neighbor, what criteria would put an employment candidate at a disadvantage, their feelings about having people from different minority groups holding the highest elected political position in their country, opinions about specific measures for equal opportunity in employment, whether enough effort was made to fight discrimination, and if they would know their rights if a victim of discrimination. For the second major focus, radioactive waste, respondents were asked how informed they felt about radioactive waste, their opinions about nuclear energy, its management and the advantages of its use, and their opinions about radioactive waste and its disposal. Further queries asked respondents whom they trusted to give them information about radioactive waste management, their reactions to a radioactive waste site being built near their home, and their opinions about the management and monitoring practices of radioactive waste between EU member states and the EU. For the third major focus, purchasing in the European Union, respondents were queried about whether they had purchased or tried to purchase goods/services in the last 12 months, in their own and in another EU country, the total value of purchases, and whether they had offers from sellers in other EU countries. Queries also asked if respondents experienced unsolicited, deceptive, or fraudulent offers, coercion, unfair contract terms, shopping at a distance, the cooling-off period, making complaints, and their interest and confidence in cross-border shopping in comparison to shopping in their own country. Finally, on the same topic, respondents were asked about their use of price comparison Web sites, the protection of consumers and the process for resolving disputes, financial services, holiday packages, and nonfood purchases. Demographic and other background information includes age, gender, nationality, origin of birth (personal and parental), marital status, left-right political self-placement, occupation, age when stopped full-time education, household composition, religious affiliation, ownership of a fixed or a mobile telephone and other durable goods, social contacts, minority group affiliation, quality of life pertaining to health, type and size of locality, region of residence, and language of interview (in select countries).

1.3 Universe

In all, Eurobarometer 69.1 interviewed 26.746 citizens of the 25 countries in the European Union after the 2004 enlargement and in the remaining Accession Countries (AC) Bulgaria and Romania. All respondents were residents in the respective country, nationals and non-nationals but EU-citizens, and aged 15 and over. They were supposed to have sufficient command of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Northern Ireland and East Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU, at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From February 18 to March 22, 2008, the TNS Opinion & Social, a consortium created between Taylor Nelson Sofres and EOS Gallup Europe, carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate General Press and Communication, Opinion Polls. TNS Opinion & Social is based at Avenue Herrmann Debroux, 40, 1160 Brussels, Belgium. TNS Opinion & Social coordinates the fieldwork carried out through its network of national institutes.

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS Opinion Social. Interviews were conducted face-to-face in people's home in the appropriate national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Backtranslation procedures were applied for controlling semantic equivalence.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding

weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 69.1 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT SPECIAL UNITED KINGDOM) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT SPECIAL GERMANY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or

candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights

European Weights in Eurobarometer 69.1	Function
W5 to W9, W11, W14, W22	grouping EU member countries
W10, W13, W24	grouping new member countries
W18	grouping candidate/accession countries
W25, W26	grouping member + candidate/accession countries
W12, W29, W30	grouping (non-)Eurozone countries

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS Opinion & Social were checked for completeness, missing and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. regions).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies with respect to and in favour of the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response, might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS Opinion & Social. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another languages than English, the archive documents the original language wording and supplies the English translation in brackets.

Please see the respective variable documentation (variable notes) for specific remarks on data inconsistencies or processing.

1.9 Further remarks

This wave does not include the standard Eurobarometer and trend questions.

The module on RADIOACTIVE WASTE (QB) replicates questions asked in the framework of Eurobarometer 63.2 (ZA4234).

The module on EU PURCHASES (QC) partly replicates or modifies questions asked in the framework of Eurobarometer 65.1 (ZA4505).

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 6: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001-099)	not affiliated / electoral alliances across "families"
1	(100-199)	Communists
2	(200-299)	Socialists
3	(300-399)	Liberals
4	(400-499)	Christian Democrats
5	(500-599)	Conservatives
6	(600-699)	Extreme Rights / Nationalists
7	(700-799)	Regionalists / Ethnic
8	(800-899)	Environmental parties
9	(900-949)	Agricultural parties
9	(950-989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION – ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (–1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded “real” values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission’s official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																																																																																																					
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																																																																																																					

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

ARCHIVE STUDY NUMBER - DISTRIBUTOR

Study number of the distributing data archive.

v1

Value	Label	Missing	Count	Percent	Valid Percent
4743			26746	100.0	100.0
	Sum		26746	100.0	100.0
	Valid Cases		26746		

v2 - ARCHIVE STUDY NUMBER - PUBLISHER

ARCHIVE STUDY NUMBER - PUBLISHER

Study number of the data archive which is publishing this data set version.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4743			26746	100.0	100.0
	Sum		26746	100.0	100.0
	Valid Cases		26746		

v3 - GESIS ARCHIVE VERSION**VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET**

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

v3

Value	Label	Missing	Count	Percent	Valid Percent
3.0.1 (2012-07-02)			26746	100.0	100.0
	Sum		26746	100.0	100.0
	Valid Cases		26746		

v4 - EUROBAROMETER NUMBER

EUROBAROMETER SURVEY NUMBER

The number identifying the Eurobarometer survey.

691 Eurobarometer 69.1

v4

Value	Label	Missing	Count	Percent	Valid Percent
691	Eurobarometer 69.1		26746	100.0	100.0
	Sum		26746	100.0	100.0
	Valid Cases		26746		

v5 - UNIQUE CASE ID (TNS COUNTRY ID + INTERVIEW ID)

UNIQUE CASE ID (TNS COUNTRY ID + TNS INTERVIEW ID)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

v6 - NATION - ALL SAMPLES

NATION - ALL SAMPLES

All samples including separate samples for East and West Germany and for Great Britain and Northern Ireland.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany West
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany East
- 15 Norway (not included)
- 16 Finland
- 17 Sweden
- 18 Austria
- 19 Cyprus (Republic)
- 20 Czech Republic
- 21 Estonia
- 22 Hungary
- 23 Latvia
- 24 Lithuania
- 25 Malta
- 26 Poland
- 27 Slovakia
- 28 Slovenia
- 29 Bulgaria
- 30 Romania

Note:

Use of weighting factor W1 (V8) is optional.

v6

	Sum		26746	100.0	100.0
	Valid Cases		26746		

v7 - NATION - ALL SAMPLES ISO 3166

NATION - ALL SAMPLES ISO 3166

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor W1 (V8) is optional.

v8 - W1 WEIGHT RESULT FROM TARGET

W1 WEIGHT RESULT FROM TARGET

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31).

v9 - NATION - UNITED KINGDOM

NATION - UNITED KINGDOM

Great Britain and Northern Ireland are coded together.

0 Other

1 United Kingdom

Note:

Use of weighting factor W4 (V10) is mandatory.

v10 - W4 WEIGHT UNITED KINGDOM

W4 WEIGHT UNITED KINGDOM

This POPULATION SIZE WEIGHT adjusts the British and the Northern Irish (sub-national) samples to their share in the total population aged 15 and over in the United Kingdom. It must be applied whenever the United Kingdom is to be analyzed as a whole. The post-stratification weighting factors are included for both samples. All other samples are excluded from analysis. In terms of its general function the weight corresponds to former NATION WEIGHT I (until EUROBAROMETER 31).

v11 - NATION - UNITED GERMANY

NATION - UNITED GERMANY

East and West Germany are coded together.

0 Other

1 Germany

Note:

Use of weighting factor W3 (V12) is mandatory.

v26 - W11 WEIGHT EU15

W11 WEIGHT EU15

This POPULATION SIZE WEIGHT adds Austria, Finland and Sweden to the EU12+ countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EU15 must be applied whenever these 15 countries as of the 1995 enlargement are to be analyzed altogether as a group.

v27 - NATION GROUP EURO ZONE 2007

NATION GROUP EURO ZONE 2007

NATION GROUP EURO ZONE 2007 separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007.

0 Other

1 EURO ZONE 2007

Note:

Use of weighting factor W12 (V28) is mandatory.

v40 - W29 WEIGHT EURO ZONE 2008

W29 WEIGHT EURO ZONE 2008

This POPULATION SIZE WEIGHT separates the group of 12 countries which introduced the EURO as of January 1, 2002 (Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland) plus Slovenia which introduced the EURO as of January 1, 2007, plus Cyprus and Malta, which introduced the EURO as of January 1, 2008. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT EURO ZONE 2008 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

v41 - NATION GROUP NON EURO ZONE 2008

NATION GROUP NON EURO ZONE 2008

NATION GROUP NON EURO ZONE 2008 refers to the group of countries which did not introduce the EURO up to January 1, 2008 (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Bulgaria, Romania).

0 Other

1 NON EURO ZONE 2008

Note:

Use of weighting factor W30 (V42) is mandatory.

v42 - W30 WEIGHT NON EURO ZONE 2008

W30 WEIGHT NON EURO ZONE 2008

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Slovakia, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2008 . It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. WEIGHT NON EURO ZONE 2008 must be applied whenever these countries are to be analyzed altogether as a group.

v43 - WEX WEIGHT EXTRA POPULATION 15+

WEX WEIGHT EXTRA POPULATION 15+

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

v101 - QA5 MULTIPLE DISCRIMINATION

Q.A5

We have just been discussing discrimination based on ethnic origin, gender, sexual orientation, age, religion or belief, and\ or disability.

Some people may experience discrimination on the basis of more than only one of these characteristics. If they experience discrimination on several grounds, we call this 'multiple discrimination'. Could you please tell me whether, in your opinion, multiple discrimination is very widespread, fairly widespread, fairly rare or very rare in (OUR COUNTRY)?

(SHOW CARD – READ OUT)

- 1 Very widespread
- 2 Fairly widespread
- 3 Fairly rare
- 4 Very rare
- 5 Non-existent (SPONTANEOUS)

v103 - QA6 NEIGHBOUR: ROMA - REC

Q.A6 Feeling comfortable about neighbour - RECODED

Q.A6_1 Having a Roma as a neighbour

- 1 Uncomfortable (codes 1-3)
- 2 Fairly comfortable (codes 4-7)
- 3 Comfortable (codes 8-10)
- 4 Indifferent (SPONTANEOUS)
- 8 DK

Derivation:

This variable collapses answers to Q.A6 (V102) into three categories.

Note:

See Q.A6 (V102) for complete question text.

v105 - QA6 NEIGHBOUR: DISABLED PERSON - REC

Q.A6 Feeling comfortable about neighbour - RECODED

Q.A6_2 Having a disabled person as a neighbour

- 1 Uncomfortable (codes 1-3)
- 2 Fairly comfortable (codes 4-7)
- 3 Comfortable (codes 8-10)
- 4 Indifferent (SPONTANEOUS)
- 8 DK

Derivation:

This variable collapses answers to Q.A6 (V104) into three categories.

Note:

See Q.A6 (V104) for complete question text.

v106 - QA6 NEIGHBOUR: HOMOSEXUAL

Q.A6

For each of the following situations, please tell me using this scale from 1 to 10 how you would personally feel about it. On this scale, '1' means that you would be "very uncomfortable" and '10' means that you would be "totally comfortable" with this situation.

(SHOW CARD WITH SCALE - ONE ANSWER PER LINE)

(IF RESPONDENT EXPERIENCES ANY DIFFICULTY IN UNDERSTANDING THE TERM 'ROMA', EXPLAIN AS INSTRUCTED IN BRIEFING)

Q.A6_3 Having a homosexual (gay man or lesbian woman) as a neighbour

- 1 Box 1 - Very uncomfortable
- 2 Box 2
- 3 Box 3
- 4 Box 4
- 5 Box 5
- 6 Box 6
- 7 Box 7
- 8 Box 8
- 9 Box 9
- 10 Box 10 - Totally comfortable
- 11 Indifferent (SPONTANEOUS)
- 12 DK

v107 - QA6 NEIGHBOUR: HOMOSEXUAL - REC

Q.A6 Feeling comfortable about neighbour - RECODED

Q.A6_3 Having a homosexual (gay man or lesbian woman) as a neighbour

- 1 Uncomfortable (codes 1-3)
- 2 Fairly comfortable (codes 4-7)
- 3 Comfortable (codes 8-10)
- 4 Indifferent (SPONTANEOUS)
- 8 DK

Derivation:

This variable collapses answers to Q.A6 (V106) into three categories.

Note:

See Q.A6 (V106) for complete question text.

v132 - QA8 ELECTED POLITICIAN: DIFF ETHNIC ORIG - REC

Q.A8 Feeling comfortable about political position - RECODED

Q.A8_3 A person from a different ethnic origin than the majority of the population

- 1 Uncomfortable (codes 1-3)
- 2 Fairly comfortable (codes 4-7)
- 3 Comfortable (codes 8-10)
- 4 Indifferent (SPONTANEOUS)
- 8 DK

Derivation:

This variable collapses answers to Q.A8 (V131) into three categories.

Note:

See Q.A8 (V131) for complete question text.

v140 - QA8 ELECTED POLITICIAN: AGED OVER 75 - REC

Q.A8 Feeling comfortable about political position - RECODED

Q.A8_7 A person aged over 75

- 1 Uncomfortable (codes 1-3)
- 2 Fairly comfortable (codes 4-7)
- 3 Comfortable (codes 8-10)
- 4 Indifferent (SPONTANEOUS)
- 8 DK

Derivation:

This variable collapses answers to Q.A8 (V139) into three categories.

Note:

See Q.A8 (V139) for complete question text.

v152 - QB2 NUCLEAR ENERGY - APPROVAL

Q.B2

Are you totally in favour, fairly in favour, fairly opposed or totally opposed to energy production by nuclear power stations?

(READ OUT – ONE ANSWER ONLY)

- 1 Totally in favour
- 2 Fairly in favour
- 3 Fairly opposed
- 4 Totally opposed
- 5 DK

Note:

v153 - QB3 NUCLEAR ENERGY - IF WASTE PRB SOLVED

Q.B3

ASK Q.B3 IF "OPPOSED TO THE ENERGY PRODUCTION BY NUCLEAR POWER STATIONS", CODE 3 or 4 in Q.B2 - OTHERS

GO TO Q.B4

And if there was a permanent and safe solution for the management of radioactive waste, would you then be totally in favour, fairly in favour, fairly opposed or totally opposed to energy

production by nuclear power stations?

(READ OUT – ONE ANSWER ONLY)

- 1 Totally in favour
- 2 Fairly in favour
- 3 Fairly opposed
- 4 Totally opposed
- 5 I do not think there is a solution (SPONTANEOUS)
- 6 DK
- 9 Inap. in favour of energy production by nuclear power stations or DK (not coded 3 or 4 in V152)

v156 - QB4 NUCL ENERGY: LESS GREENH GAS EMISS

Q.B4

ASK ALL

For each of the following statements, please tell me if you totally agree, tend to agree, tend to disagree or totally disagree with it.
(SHOW CARD WITH SCALE – ONE ANSWER PER LINE - READ OUT)

Q.B4_3 An advantage of nuclear power is that it emits less greenhouse gases than other energy sources such as oil or coal

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 DK

v162 - QB5 RADIOACT WASTE: OTH DANGEROUS WASTE

Q.B5

For each of the following statements, please tell me whether you think it is true or false.

(SHOW CARD - READ OUT)

Q.B5_6 Radioactive waste is produced in similar quantities to other waste such as chemical waste

- 1 True
- 2 False (correct)
- 3 DK

v183 - QB9 RADIOACT W UNDERGROUND DISP - WORRY

Q.B9

If a deep underground disposal site for radioactive waste were to be built near your home, what would worry you most?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 Transport of waste to the disposal site
- 2 The risk of radioactive leaks while the site is in operation
- 3 The risk due to a terrorist attack
- 4 The possible effects on the environment and health
- 5 A major drop in local property prices
- 6 None of these (SPONTANEOUS)
- 7 Other (SPONTANEOUS)
- 8 DK

v184 - QB10 RADIOACT W UNDERGROUND DISP - NEARBY

Q.B10

Thinking about the hypothetical construction of an underground disposal site for radioactive waste near your home, with which of the following do you agree the most?

(SHOW CARD – READ OUT – ONE ANSWER ONLY)

- 1 You would like to be directly consulted and to participate in the decision making process
- 2 You would like local non-governmental organisations to be consulted and to participate in the decision making process
- 3 You would leave the responsible authorities to decide on this matter
- 4 None of these (SPONTANEOUS)
- 5 DK

v213 - QC3 EU PURCHASE LAST 12 M - TOTAL VALUE

Q.C3

ASK Q.C3 IF "HAS MADE AT LEAST ONE EU CROSS-BORDER PURCHASE", CODE 2 in Q.C1.1, Q.C1.2, Q.C1.3 or Q.C1.4 or CODE 1 or 2 in Q.C2.1 or Q.C2.2 – OTHERS GO TO Q.C4

THIS INCLUDES PURCHASES FROM QC1 OR QC2

In the last 12 months, approximately what was the total value of the goods or services you said you have purchased from sellers\ providers located in other European Union countries? Please tell me how much you spent, even if it's an approximate amount.

(CODE THE EXACT VALUE - PLEASE WRITE DOWN NNNNNNN - IF "REFUSAL", CODE '9999998' - IF "DK", CODE '9999999')

1 1 euro

233000 233000 euro

999997 Refusal

999998 DK

999999 Inap. no EU cross-border purchase in last 12 months or DK (not coded 1 in V190/V195/V200/V205; not coded 1 or 2 in V209/V210)

Note:

Original code "9999998" recoded to "999997".

Original code "9999999" recoded to "999998".

Actual number is coded.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Last trend modified: EB65.1, Q.B3

v214 - QC3 EU PURCHASE LAST 12 M - TOTAL VALUE - RECODED

QC3 EU PURCHASE LAST 12 M - TOTAL VALUE - RECODED

- 1 1-50 euro
- 2 51-100 euro
- 3 101-500 euro
- 4 501-1000 euro
- 5 1001-5000 euro
- 6 5000+ euro
- 7 Refusal
- 8 DK
- 9 Inap. no EU cross-border purchase in last 12 months or DK (not coded 1 in V190/V195/V200/V205; not coded 1 or 2 in V209/V210)

Derivation:

This variable collapses answers to Q.C3 (V213) into six categories.

Note:

See Q.C3 (V213) for complete question text.

v216 - QC5 RECVD UNSOLIC ADVERTISEMENT: CTRY

We're now going to talk about advertisements which are either unsolicited, misleading or even fraudulent. Misleading or deceptive advertisements are those which contain false information or present factually correct information in a misleading manner about the goods or services to be sold, whereas fraudulent advertisements actually attempt to obtain money without selling anything, for example a lottery scam.

Q.C5_1

Have any of the following happened to you in the last 12 months in (OUR COUNTRY) or elsewhere?

You came across unsolicited commercial advertisements or offers (cold calls, spam emails, etc.)

(SHOW CARD WITH SCALE – MULTIPLE ANSWERS POSSIBLE PER LINE - READ OUT)

Q.C5_1_1 Yes, from a seller/provider located in OUR COUNTRY)

v217 - QC5 RECVD UNSOLIC ADVERTISEMENT: EU

We're now going to talk about advertisements which are either unsolicited, misleading or even fraudulent. Misleading or deceptive advertisements are those which contain false information or present factually correct information in a misleading manner about the goods or services to be sold, whereas fraudulent advertisements actually attempt to obtain money without selling anything, for example a lottery scam.

Q.C5_1

Have any of the following happened to you in the last 12 months in (OUR COUNTRY) or elsewhere?

You came across unsolicited commercial advertisements or offers (cold calls, spam emails, etc.)

(SHOW CARD WITH SCALE – MULTIPLE ANSWERS POSSIBLE PER LINE - READ OUT)

Q.C5_1_2 Yes, from a seller/provider located in another EU country

v223 - QC5 RECVD MISLEAD ADVERTISEMENT: EU

We're now going to talk about advertisements which are either unsolicited, misleading or even fraudulent. Misleading or deceptive advertisements are those which contain false information or present factually correct information in a misleading manner about the goods or services to be sold, whereas fraudulent advertisements actually attempt to obtain money without selling anything, for example a lottery scam.

Q.C5_2

Have any of the following happened to you in the last 12 months in (OUR COUNTRY) or elsewhere?

You came across misleading or deceptive advertisements or offers

(SHOW CARD WITH SCALE – MULTIPLE ANSWERS POSSIBLE PER LINE - READ OUT)

Q.C5_2_2 Yes, from a seller/provider located in another EU country

v230 - QC5 RESPND MISLEAD ADVERTISEMENT: NON-EU

We're now going to talk about advertisements which are either unsolicited, misleading or even fraudulent. Misleading or deceptive advertisements are those which contain false information or present factually correct information in a misleading manner about the goods or services to be sold, whereas fraudulent advertisements actually attempt to obtain money without selling anything, for example a lottery scam.

Q.C5_3

Have any of the following happened to you in the last 12 months in (OUR COUNTRY) or elsewhere?

You responded to an advertisement or offer that turned out to be misleading or deceptive

(SHOW CARD WITH SCALE – MULTIPLE ANSWERS POSSIBLE PER LINE - READ OUT)

Q.C5_3_3 Yes, from a seller/provider located outside the EU

v237 - QC5 RECVD FRAUDUL ADVERTISEMENT: UNKNOWN

We're now going to talk about advertisements which are either unsolicited, misleading or even fraudulent. Misleading or deceptive advertisements are those which contain false information or present factually correct information in a misleading manner about the goods or services to be sold, whereas fraudulent advertisements actually attempt to obtain money without selling anything, for example a lottery scam.

Q.C5_4

Have any of the following happened to you in the last 12 months in (OUR COUNTRY) or elsewhere?

You came across fraudulent advertisements or offers

(SHOW CARD WITH SCALE – MULTIPLE ANSWERS POSSIBLE PER LINE - READ OUT)

Q.C5_4_4 Yes, but you do not know where a seller/provider was located

v243 - QC5 RESPND FRAUDUL ADVERTISEMENT: UNKNOWN

We're now going to talk about advertisements which are either unsolicited, misleading or even fraudulent. Misleading or deceptive advertisements are those which contain false information or present factually correct information in a misleading manner about the goods or services to be sold, whereas fraudulent advertisements actually attempt to obtain money without selling anything, for example a lottery scam.

Q.C5_5

Have any of the following happened to you in the last 12 months in (OUR COUNTRY) or elsewhere?

You responded to an advertisement or offer that turned out to be fraudulent

(SHOW CARD WITH SCALE – MULTIPLE ANSWERS POSSIBLE PER LINE - READ OUT)

Q.C5_5_4 Yes, but you do not know where a seller/provider was located

v250 - QC7 UNFAIR CONSUMER CONTRACT: DK

"Unfair contract terms" are terms by which the seller\ provider imposes unreasonable demands on the consumer, e.g. allowing the seller\ provider to change the contract terms without informing the consumer.

Q.C7

In the past 12 months, have you come across what you regard as unfair consumer contract terms, in (OUR COUNTRY) or in other EU countries?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

v251 - QC8 DISTANT PURCHASE CTRY: DELAYED

Let's now talk about shopping at a distance. By this we mean purchasing for example via the Internet, by phone or by post.

Q.C8

ASK Q.C8 IF "HAS MADE AT LEAST ONE PURCHASE VIA INTERNET OR PHONE OR POST", CODE 1 to 3 in Q.C1.1, Q.C1.2 or Q.C1.3 – OTHERS GO TO Q.C9

During the past 12 months have any of the following situations happened to you when purchasing something at a distance in (OUR COUNTRY) or elsewhere?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C8_1 (IF '1' IN Q.C1.1 or Q.C1.2 or Q.C1.3) A delay in the delivery of something purchased from a seller\ provider located in (OUR COUNTRY)

0 Not mentioned

1 Mentioned

7 None

8 DK

9 Inap. no purchase via internet, phone or post in (OUR COUNTRY) (not coded 1 in V189/V194/V199)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v255 - QC8 DISTANT PURCHASE NON-EU: DELAYED

Let's now talk about shopping at a distance. By this we mean purchasing for example via the Internet, by phone or by post.

Q.C8

ASK Q.C8 IF "HAS MADE AT LEAST ONE PURCHASE VIA INTERNET OR PHONE OR POST", CODE 1 to 3 in Q.C1.1, Q.C1.2 or Q.C1.3 – OTHERS GO TO Q.C9

During the past 12 months have any of the following situations happened to you when purchasing something at a distance in (OUR COUNTRY) or elsewhere?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

Q.C8_5 (IF '3' IN Q.C1.1 or Q.C1.2 or Q.C1.3) A delay in the delivery of something purchased from a seller\ provider located outside the EU

0 Not mentioned

1 Mentioned

7 None

8 DK

9 Inap. no purchase via internet, phone or post outside the EU (not coded 1 in V191/V196/V201)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v260 - QC9 DISTANT SALE RETURNED CTRY: NOT ACCEPTED

Q.C9

ASK Q.C9 IF "HAS MADE AT LEAST ONE PURCHASE VIA INTERNET OR PHONE OR POST WITHIN THE EU", CODE 1 or 2 in Q.C1.1, Q.C1.2 or Q.C1.3 – OTHERS GO TO Q.C10

You have the legal right to return a product or cancel a contract for a purchase made on the Internet, phone or post within ... (ADAPT NATIONALLY) days without paying a penalty. This is

known as the cooling-off period. Have you tried to do this in the last 12 months?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE – ONE ANSWER PER SET OF ITEMS '1-2' AND '3-4')

Q.C9_2 (IF '1' IN Q.C1.1 or Q.C1.2 or Q.C1.3) Yes, from a seller\ provider located in (OUR COUNTRY) and he did not accept this

0 Not mentioned

1 Mentioned

7 None

8 DK

9 Inap. no purchase via internet, phone or post in (OUR COUNTRY) (not coded 1 in V189/V194/V199)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v265 - QC10 DOORSTEP SALE RETURNED CTRY: ALW ACCEPTED

Now thinking about any purchase you have made from someone visiting your home or work (known as doorstep selling).

Q.C10

ASK Q.C10 IF "HAS MADE AT LEAST ONE PURCHASE FROM A SALES REPRESENTATIVE WITHIN THE EU", CODE 1 or 2 in

Q.C1.4 – OTHERS GO TO Q.C11

You have the legal right to return a product or cancel a contract from a purchase made at your home or work within (ADAPT NATIONALLY) days without paying a penalty. This is known

as the cooling-off period. Now, thinking about anything you have bought from a sales representative at home or work, in the last 12 months, have you tried to return a product or cancel a contract within the cooling-off period?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE – ONE ANSWER PER SET OF ITEMS '1-2' AND '3-4')

Q.C10_1 (IF '1' IN Q.C1.4) Yes, from a seller\ provider located in (OUR COUNTRY) and it was accepted

0 Not mentioned

1 Mentioned

7 No

8 DK

9 Inap. no purchase from a sales representative in (OUR COUNTRY) (not coded 1 in V204)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix.

As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v271 - QC11 PRODUCT RETURN CTRY: COMPLIED

Q.C11

ASK ALL

When you buy goods which do not conform to the original sales contract or which show a defect within two years of delivery, you have the right to ask for the goods to be replaced, repaired, reduced in price or for the contract to be canceled. Have you tried to do any of these in the last 12 months?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE – ONE ANSWER PER SET OF ITEMS '1-2' AND '3-4')

Q.C11_1 Yes, and the seller\ provider located in (OUR COUNTRY) complied

v384 - D1 LEFT-RIGHT PLACEMENT - RECODED 3 CAT

D.1R1 Left - right scale (RECODED)

- 1 (1 - 4) Left
- 2 (5 - 6) Centre
- 3 (7 -10) Right
- 9 DK/Refusal

Derivation:

This variable collapses answers to D.1 into three categories.

Note:

See D.1 for complete question text.

v386 - D7 MARITAL STATUS

D.7

Could you give me the letter which corresponds best to your own current situation?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

- 1 Married
- 2 Remarried
- 3 Unmarried, currently living with partner
- 4 Unmarried, having never lived with a partner
- 5 Unmarried, having previously lived with a partner, but now on my own
- 6 Divorced
- 7 Separated
- 8 Widowed
- 9 Other (SPONTANEOUS)
- 97 Refusal (SPONTANEOUS)

Note:

Original code "10" recoded to "97".

Last trend: EB68.2, D.7

v387 - D8 AGE EDUCATION

D.8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' - IF "NO EDUCATION" CODE '01' - IF "REFUSAL" CODE '98' - IF "DK" CODE '99')

0 Refusal

2 2 years

65 65 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Please notice that starting with Eurobarometer 67.2 data for SPAIN and PORTUGAL show noticeable high frequencies for REFUSAL (newly introduced category) and not any response for NO FULL-TIME EDUCATION. This is not plausible if comparing with results from former waves. Data for both categories have possibly been collapsed. Inconsistent specifications for residual categories (no full-time education, DK, refusal) in some national field questionnaires over time and across countries might support this argument.

Relevant data should be analysed with caution.

For Portugal: Original code "00" recoded to "97".

Last trend: EB68.2, D.8

v388 - D8 AGE EDUCATION - RECODED

D.8R Age when finished full-time education - RECODED

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Note:

See D.8 for complete question text.

Please notice that starting with Eurobarometer 67.2 data for SPAIN and PORTUGAL show noticeable high frequencies for REFUSAL (newly introduced category) and not any response for NO FULL-TIME EDUCATION. This is not plausible if comparing with results from former waves. Data for both categories have possibly been collapsed. Inconsistent specifications for residual categories (no full-time education, DK, refusal) in some national field questionnaires over time and across countries might support this argument.

Relevant data should be analysed with caution.

For Portugal: Original code "97" recoded to "11".

v390 - D11 AGE EXACT

D.11

How old are you?

15 15 years

95 95 years

Note:

Actual number is coded.

Last trend: EB68.2, D.11

v391 - D11 AGE RECODED - FOUR GROUPS

D.11R1 AGE - RECODED IN FOUR GROUPS

- 1 15 - 24 years
- 2 25 - 39 years
- 3 40 - 54 years
- 4 55 years and older

Derivation:

This variable collapses answers to D.11 into four categories.

Note:

See D.11 for complete question text.

v394 - D15B OCCUPATION OF RESPONDENT - LAST JOB

D.15B

ASK D.15B ONLY IF NOT DOING ANY PAID WORK CURRENTLY - CODES 1 TO 4 IN D.15A

Did you do any paid work in the past? What was your last occupation?

EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

SELF EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

0 NA

15 Never did any paid work

99 Inap. currently doing paid work (not coded 1 to 4 in V393)

Note:

In accordance with former waves coding results to be (correctly) shifted compared to the questionnaire.

All cases in code "0" (NA) from Slovenia.

Last trend: EB68.2, D.15B

v400 - D40C HOUSEHOLD COMPOSITION: AGED 10-14

D.40C

Could you tell me how many children aged 10 to 14 years old live in your household?

(READ OUT - WRITE DOWN)

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 9 Nine
- 14 Fourteen

Note:

Last trend: EB68.2, D.40C

v403 - D40 HOUSEHOLD COMPOSITION: SIZE A+B+C (REC)

D.40 HOUSEHOLD COMPOSITION: SIZE (A+B+C)

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven or more

Derivation:

This variable groups the summarized variable V402.

Note:

See V396, V398 and V400 for complete question text.

Generated by the Archive in accordance with former surveys.

v420 - D51 OUTGROUP MEMBERSHIP: OTHER 1

[D.51

Where you live, do you consider yourself to be part of any of the following? Please tell me all that apply.]

D.51O

ASK D.51O IF "ANY OTHER MINORITY GROUP", CODE 6 IN D.51 - OTHERS GO TO D.44

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE)

D.51O_1 Other 1 (not documented)

0 Not mentioned

1 Mentioned

9 Inap. not any others in D.51 (not coded 1 in V418)

Note:

No documentation was supplied for respondents to open specifications of "Other" items.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v423 - D51 OUTGROUP MEMBERSHIP: OTHER 4

[D.51

Where you live, do you consider yourself to be part of any of the following? Please tell me all that apply.]

D.51O

ASK D.51O IF "ANY OTHER MINORITY GROUP", CODE 6 IN D.51 - OTHERS GO TO D.44

Which other(s)?

(WRITE DOWN - CODE AT THE OFFICE)

D.51O_4 Other 4 (not documented)

0 Not mentioned

1 Mentioned

9 Inap. not any others in D.51 (not coded 1 in V418)

Note:

No documentation was supplied for respondents to open specifications of "Other" items.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

v454 - P6 SIZE OF COMMUNITY - UNITED KINGDOM

P.6_GB (Objective) Size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. not GB (not coded 9 or 10 in V6)

Note:

The original variable integrated data for Northern Ireland (codes 1-2, 6) and Great Britain (codes 3-5). The original categories (value label) were corrected after consultation with TNS OPINION & SOCIAL. In order to facilitate the analysis for the United Kingdom as a whole, identical categories have been combined. For Northern Ireland code 3 ("Metropolitan") has been recoded from code 6 (DK) in accordance with P7 Region I for the United Kingdom (if coded 1 = "Belfast"). In Eurobarometer 62 to 66 "Belfast" is coded as "Urban" together with other communities; former Eurobarometer have different categories for community size in Northern Ireland.

For meaningful results this variable needs to be weighted by W4 WEIGHT UNITED KINGDOM (V10) or be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in V6).

Last trend: EB68.2, P.6
