Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No <input checked="" type="checkbox"/> Yes <input type="checkbox"/>
<i>Weight to adjust for non-response bias</i>	No <input checked="" type="checkbox"/> Yes <input type="checkbox"/> → please specify variables used for calculation of weight

MODE – Administrative mode of data-collection (OR Data collection method)

<i>Note</i>	We don't have "mode" variable in questionnaire. All interviews are done the same way – "face-to-face, paper, pencil, no visuals", so variable MODE with value 10 is computed at the end of the research.
