ISSP Study Description Form

Please use this form for reporting on Module 2006 and later!

Study title: "Health Study-Turkey (Türkiye Sağlık Araştırması)"

Fieldwork dates: **2011-11-26 to 2012-01-22**

Principal investigators: Istanbul Policy Center-IPC

Sample type: Sample observations are distributed across 26 NUT-2 regions according to population distribution. Then urban and rural population shares are applied to each region and urban and rural observations are obtained. From each region Statistical Institute of Turkey (SIT) was contacted to provide address blocks for urban settlements.

Each block contained 300 household addresses and 10 addresses were selected from each block on a simple random selection basis. For rural areas all rural settlements in every NUT region all villages were used to randomly select villages according to population weights of the villages. In every village the pre allotted number of interviews was 10 and thus villages are treated as city blocks. The number of villages to be contacted is determined accordingly.

Since no replacement was to be used we selected approximately twice the number of targeted interview household addresses. Every address is contacted at most 4 times to obtain a completed interview. Within the households all residents above the age of 18 are listed and a respondent from within this list is randomly selected. No quotas of any kind was applied.

Fieldwork institute: Infakto Research Workshop

Fieldwork methods: Face-to-Face with visuals

N. of respondents: 1559

Details about issued sample:

Please follow the standards laid down in AAPOR/WAPOR, Standard Definitions: http://www.aapor.org/uploads/standarddefs_4.pdf. The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	3510
2. Interviews (1.0)	1559
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	772
B. Non-Contact (2.20)	451
C. Other	
i. Language Problems (2.33)	0
ii. Miscellaneous Other (2.31, 2.32, 2.35)	19
3. Unknown Eligibility, Non-Interview (3.0)	306
4. Not Eligible	
A. Not a Residence (4.50)	15
B. Vacant Residence (4.60)	66
C. No Eligible Respondent (4.70)	43
D. Other (4.10,4.90)	279

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases. See AAPOR/WAPOR Standard Definitions, pp. 9-10 for further clarification.
