**FAMILY AND CHANGING GENDER ROLES IV: 2012
ISSP MODULE**

Country: (IE) Republic of Ireland

Compiled by: Dr Brian Kearney

Dr Nanette Solan

Verified: Dr Anne Cleary (PI)

Dr Iarfhlaith Watson

Please name the **ISSP module** which the documentation refers to (e.g., “*Health and Health Care / ISSP2011*”):

Family and Changing Gender Roles IV / ISSP 2012

Please name your **country**:

(IE) Republic of Ireland

SEX - Sex of respondent

	National Language	English Translation
<i>Question no. and text</i>		#65. Are you...
<i>Codes/ Categories</i>		1. Male
		2. Female
		9. No answer*
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	Although the Irish language (Gaeilge) is the national and first official language of Ireland. The other official language, English, is the language in most common usage. Answer categories marked by an asterisk were not included in the questionnaire.	

Construction/Recoding:

Country Variable Codes (in translation)	→ SEX
If (#65=1)	1. Male
If (#65=2)	2. Female
Else	9. No answer

BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR „year of interview“ minus AGE „age of respondent“.

	National Language	English Translation
<i>Question no. and text</i>		#66. When were you born? (Please insert the year of your birth)
<i>Codes/ Categories</i>		1910. 1910
		1996. 1996
		9999. No answer*
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	Answer categories marked by an asterisk were not included in the questionnaire.	

Construction/Recoding: (list lowest, highest, and „missing“ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→BIRTH
<i>Construction</i>		
<i>Codes</i>	If(#66=1920)	[1920]
	If(#66=1994)	[1994]
	Else	9999. No answer

Optional: Recoding Syntax

--

AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR „year of interview“ minus BIRTH „year of birth“.

	National Language	English Translation
<i>Question no. and text</i>		#66. When were you born? (Please insert the year of your birth)
<i>Codes/ Categories</i>		...
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	The variable AGE was derived from the variable BIRTH (see above). R: Age was computed using DATEYR „year of interview“ minus BIRTH „year of birth“.	

Construction/Recoding: (list lowest, highest, and „missing“ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→AGE
<i>Construction</i>		
<i>Codes</i>	If(#66=1994)	[19]
	If(#66=1920)	[93]
	Else	999. No answer

Optional: Recoding Syntax

ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify. Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces). In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>		#77. What is/was your occupation, i.e. what is/was the name or title of your main job? #78. In your main job, what kind of activities do/did you do most of the time? #79. What does/did the firm/organisation you work/worked for mainly make or do, i.e. what kind of production/function is/was performed at your workplace?
<i>Codes/ Categories deviating from ISCO88 / ISCO88-COM</i>		None
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		
<i>Use of ISCO</i>	ISCO88 (ILO)	<input checked="" type="checkbox"/>
	ISCO88-COM (EU variant)	<input type="checkbox"/>
	Other ISCO88 variant	<input type="checkbox"/> → please specify

ISSP 2012 Ireland

PARTY_LR - Party voted for in last general election: left-right scale

	National Language	English Translation
<i>Question no. and text</i>		#108. Thinking back to these elections [Irish general election in February 2011], which party did you vote for?
<i>Codes/ Categories</i>		1. Fine Gael
		2. Labour Party
		3. Fianna Fáil
		4. Sinn Féin
		5. Socialist Party
		6. People Before Profit
		7. WUAG (Workers and Unemployed Action Group)
		8. Green Party
		9. South Kerry Independent Party
		10. Worker's Party
		11. Christian Solidarity
		12. Fís Nua
		13. Independent
		95. Other
		96. Invalid ballot*
		97. Refused*
	99. No answer*	
	0. NAP (0, 2, 7 in VOTE_LE)*	
<i>Interviewer Instructions</i>		
<i>Translation Note</i>		
<i>Note</i>	<p>Answer categories marked by an asterisk were not included in the questionnaire. The discussion on coding for the variable PARTY_LR was opened out to an international panel of experts (Professors David Farrell, Michael Gallagher, Eoin O'Malley, Richard Sinnott and John Coakley) who have expressed reservations about the scale itself. Herewith their comments: "There seems to be substantial agreement that the scale itself is problematic, and that the mid-point poses a particular difficulty. There, insertion of the word "liberal" confuses matters, in that especially in southern Europe this has implications of the right rather than the centre. However, the scale is probably an integral part of the ISSP approach and thus has to be left unaltered". Notwithstanding these comments, the variable PARTY_LR in the current datasets have been derived from IE_PRTY as recommended by the Demographics Methods Group in the "ISSP Background Variables Questionnaire (BVQ) Version of 2012-06-26".</p>

	0. NAP, no substitution in this survey
	1. Case from original sample
	2. Case substituted

Optional: Recoding Syntax

--

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No	[]
	Yes	[]
<i>Weight to adjust for non-response bias</i>	No	[]
	Yes	[✓] → please specify variables used for calculation of weight See Survey Monitoring Questionnaire (SMQ)
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No	[] → please specify target population represented by sum of all case weights
	Yes	[]
<i>Note</i>		

Construction/Recoding:

Country Variable Codes/Construction Rules	→ WEIGHT
	1. No weighting

MODE – Administrative mode of data-collection

<i>Note</i>	Mixed Mode: In the initial mailing, the respondents were given the choice of either filling in the enclosed questionnaire and returning it in the free-post envelope supplied or logging on to a dedicated website wherein they could access an online survey. The majority (96.5% n=1,173) opted for the mailed response compared to online responses (3.5% n=42).

	12. F2f/PAPI, respondent reading questionnaire
	13. F2f/PAPI, interpreter or translator – no visuals
	14. F2f/PAPI, interpreter or translator – visuals
	20. CAPI, no visuals
	21. CAPI, visuals
	22. CAPI, respondent reading questionnaire (paper or on monitor)
	23. CAPI, interpreter or translator – no visuals
	24. CAPI, interpreter or translator – visuals
	30. SC, arrives with interviewer, interviewer attending
	31. SC, arrives with interviewer, drops-off, picks up later
	32. SC, arrives with interviewer, drops off, mailed back by R
	33. SC, mailed to, completed by R and hold for pick up
If(MAILED RESPONSE)	34. SC, mailed to, mailed back by R
If(ONLINE RESPONSE)	40. CASI, self-completion, computer-assisted

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

] Already included in field questionnaire provided with the country data file.

] Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** source variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: YYYYYY.YYY.

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

] ISCO88 is used to code responses directly.

] Conversion of national coding scheme to ISCO88. Attached file: ZZZZZZ.ZZZ.
