

## ERRATA NOTE

ZA3671

Flash Eurobarometer 124

„Enlargement Communication Strategy“

United Kingdom only (n=6001)

The data file includes equal numbers of respondents for each region of the country (n=500). Weighted results for the United Kingdom as a whole as documented in the corresponding reports (FLASH EB 124 EU enlargement results) can not be reproduced. The available **weighting variable** (wf) does not weight the nuts regions to their respective population proportions within the United Kingdom. This weight seems to deal with some internal weighting within each region but reproducing the complete sample sizes for each of them. The data producer (EOS Gallup) have been informed; an equivalent weight has not been supplied.

**Please notice, that the data can be analyzed by region but not for the U.K. as a whole.**
