Election Study 1983

Correspondence list of the study: ZA1275

Accompanying the federal election of Germany in 1983, the primary investigators Manfred Berger, Wolfgang Gibowski, Dieter Roth, and Wolfgang Schulte (Forschungsgruppe Wahlen, Mannheim) carried out the study 'Election Study 1983'. The trend survey comprised five waves, as well pre-electoral as post-electoral. The study covers judgements on parties and politicians, satisfaction with government as well as the existing party system and current policy issues. The study is part of the group 'German Election studies 1949-2009' in the Data Catalogue of the GESIS Data Archive for the Social Sciences.

The following correspondence list gives an overview on the variables and when they were asked, because some identical questions were posed in the five different waves.

In the first column, you find the question and variable number. In the following columns, the question number in the corresponding wave is listed.

Data access

Data for statistical analysis and related documentation (original questionnaires, Variable Reports) are made available by GESIS – Leibniz-Institute for the Social Sciences by the online platforms GESIS Data Catalogue (<https://dbk.gesis.org/dbksearch/home.asp?db=e>) or by ZACAT (<http://zacat.gesis.org>), the GESIS Online Study Catalogue. Access to the Data Catalogue and ZACAT is free of charge; download of data sets requires registration.

The [GESIS Data Catalogue](#) offers study descriptions of the German Election Studies 1949-2009, which comprise methodological information, version history and errata. In addition, the GESIS Data Catalogue provides datasets and related documentation for download.

[ZACAT](#) offers data and documentation for full-text search as well as for online analysis.
