Acknowledgements

The Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Long term access to and usability of Eurobarometer primary data and documentation is provided in a cooperative arrangement between the Inter-University Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive for the Social Sciences (DAS).

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Individual level micro data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS through the DBK data catalogue (<http://www.gesis.org/dbk>) and through the ZACAT online data portal (<http://zacat.gesis.org>). Access to the Eurobarometer primary data is also provided by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, as well as supported by the Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send bibliographic citations for each completed manuscript or thesis abstract to the providing data archive, GESIS or ICPSR. Please indicate in a cover letter which data (surveys and variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1 Study description – Eurobarometer 81.1

1.1 Bibliographic information

1.1.1 Archive study numbers

GESIS: ZA5878

ICPSR: 36654

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own archive study identification number and persistent URL. Apart from that the datasets are completely congruent as far as identified by the same release version.

1.1.2 Title and archive subtitle

Eurobarometer 81.1

Future of Europe, and E-Communications in the Household

January 2014

1.1.3 Principal investigator(s)

European Commission, Brussels;

Directorate-General for Communication (COMM.A.1 'Strategy, Corporate Communication Actions and Eurobarometer')

1.1.4 Bibliographic citation and DOI reference

Publications based on data collections which are made available through ICPSR or GESIS should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

European Commission, Brussels: Eurobarometer 81.1, January 2014.

TNS opinion, Brussels [Producer];

GESIS, Cologne [Publisher]: ZA5878, dataset version 2.0.0, DOI: [10.4232/1.12832](https://doi.org/10.4232/1.12832) (2017).

The registered Digital Object Identifier (DOI) persistently identifies this dataset version with reference to former (or more recent) versions and potential errata and update documentation in the GESIS data catalogue (DBK).

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys covers the following special topics: (1) The Future of Europe and (2) E-Communications in the Household. Respondents' opinions were collected regarding the state of the European Union, what important issues it currently faced, what they felt were the biggest assets of the EU, and how it should address global changes. Respondents were also questioned about ownership and use of communication devices such as mobile phones and computers. They were asked how these devices were provided with internet service, their data use and limits, difficulties with internet access, whether they had experienced blocking of content online, and the costs associated with internet service.

Demographic and other background information collected includes age, gender, nationality, marital status, occupation, age when stopped full-time education, household composition, ownership of a fixed or mobile telephone and other goods, difficulties in paying bills, level in society, and Internet use. In addition, country-specific data includes type and size of locality, region of residence, and language of interview (select countries).

1.2.2 Topic classification

Survey coordinated by the European Commission's Directorate-General for Communication (DG COMM "Strategy, Corporate Communication Actions and Eurobarometer" Unit). Brussels, March 2014.

1.3 Universe

In all, Eurobarometer 81.1 interviewed 27.739 citizens in the 28 countries of the European Union after the 2013 enlargement (accession of Croatia in July 2013). All respondents were residents in the respective country, nationals and non-national EU-citizens, and aged 15 and over. They were supposed to have sufficient command

of one of the respective national language(s) to answer the questionnaire. Separate samples were drawn for Great Britain and Northern Ireland as well as for East and West Germany.

1.4 Sampling procedure

A multi-stage, random (probability) sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regional units in every country (Statistical Office of the European Community, EUROSTAT NUTS 2 or equivalent). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of starting addresses was selected from each sampled PSU at random. Further addresses were chosen systematically using standard random route procedures as every Nth address from the initial address. In each household, a respondent was drawn, at random, following the closest birthday rule. No more than one interview was conducted in each household.

The regular sample size (in the sense of completed interviews) is 1000 respondents per country, except the United Kingdom with separate samples for Great Britain (1000) and Northern Ireland (300), Germany with separate samples for the Eastern (500) and the Western part (1000), and Luxembourg, Cyprus (Republic) and Malta with 500 interviews each. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From January 18 to January 27, 2014, TNS opinion carried out the fieldwork for this Eurobarometer, at the request of the European Commission, Directorate-General for Communication. TNS opinion is based in Brussels, Belgium, and co-ordinates the fieldwork carried out through its network of national institutes:

1.6 Mode of data collection

In all countries, fieldwork was conducted on the basis of detailed and uniform instructions prepared by TNS opinion. Interviews were conducted face-to-face in people's home in the respective national language. As far as the data capture is concerned, CAPI (Computer Assisted Personal Interview) was used in those countries where this technique was available.

Equivalent French and English basic questionnaires were developed for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country. Back-translation procedures were applied for controlling semantic equivalence. Multi-language questionnaires are applied if appropriate (Belgium, Luxembourg, Spain, Finland, Estonia, Latvia and Malta).

In each country only the national language version(s) of the questionnaire is (are) used; in countries with more than one official language, the language version is selected at the beginning of the interview.

1.7 Weighting

In general, the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis, a national weighting procedure, using marginal and intercellular weighting, is applied. As such, in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factors correct for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country or lower level area sample (Great Britain and Northern Ireland, East and West Germany) is represented in proportion to its population size within different groupings according to the historical states of European unification (e.g. founder members, new members, Euro zone countries) in the case of the EUROPEAN WEIGHTS, as well as within the United Kingdom (WEIGHT UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31) or Germany as a whole (WEIGHT GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European

Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general, all countries or samples which do not belong to the respective group under consideration are excluded from calculation. The special weights for the United Kingdom and Germany do exclude all other countries from calculation starting with Eurobarometer 62. The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2, a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately, as documented in the respective study and weight variable description. In some surveys, special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 81.1 provides three (post-stratification) NATION WEIGHTS: W1 (WEIGHT RESULT FROM TARGET) for separate analysis or comparison of individual samples (countries or regions on sub-national level), W4 (WEIGHT UNITED KINGDOM ONLY) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole, and W3 (WEIGHT GERMANY ONLY), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. W3 and W4 exclude all other countries from calculation, but include the post-stratification factors for the United Kingdom and Germany respectively.

Starting with Eurobarometer 75.4 and in accordance with former practice up to Eurobarometer 61, the archive started to derive (see 1.8. Data preparation) three additional weights W3A, W4A, W3A_W4A in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (samples). W3A (WEIGHT RESULT FROM TARGET – UNITED GERMANY) combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). W4A (WEIGHT RESULT FROM TARGET – UNITED KINGDOM) combines the weighting factors for the United Kingdom as a whole (redressment factors plus populations size factors) and the redressment factors for all other countries (Germany East and West separated). W3A_W4A (WEIGHT RESULT FROM TARGET – NATION) combines the weighting factors for the United Kingdom as a whole, the weighting factors for Germany as a whole), and the redressment factors for all other countries. Unlike the originating weights, W4 (WEIGHT UNITED KINGDOM ONLY) and W3 (WEIGHT GERMANY ONLY), all countries are included in calculations.

Additional HOUSEHOLD WEIGHTS (W31 to W79, WEX_HH) are provided for questions informing about the respondent's household in the E-COMMUNICATIONS module and for these data on household level. Their general function is equivalent to the in each case corresponding standard weight, as for example the post-stratification weights W1 (individual level) and W31 (household level).

The EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries, of accession or candidate countries, and of Euro zone countries, representing different historical states of European integration (e.g. EU6 = six founder members) . All post-stratification factors are included.

Table 2: Overview of population size weights on European level

European Weights in Eurobarometer 81.1	Function
W5 to W9, W11, W14, W22, W23; HH: w35-w39, w41, w44, w52, w53	grouping EU member countries
W10, W13, W18, W24, W94; HH: w40, w43, w48, w54, w74	grouping new member countries
-	grouping candidate/accession countries
w15, HH: w45	grouping member + candidate/accession countries
w29 (no HH), w30 (no HH), w81, w82, w84, w89, w90, w93, w98, w83; HH: w42 (only HH), w61, w62, w64, w69, w70, w73, w78, w63, w79 (only HH)	grouping (non-)Eurozone countries
wextra / HH: wex_hh	extrapolating population size (15+) for each country

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by GESIS from TNS opinion were checked for completeness, missing data and duplicate records, for illegal (wild) codes and for (formal) consistency of response patterns and question routing. Errors discovered by these procedures are documented or corrected, as a general rule after consulting related additional documentation (e.g. tabular reports) or the data provider. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable DDI-XML compliant documentation was created for this dataset by GESIS.

Starting with Eurobarometer 76.1, the traditional variable naming by serial V-numbers (V1 to Vn) has been replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals. The dot used in the original TNS variable names for multiple response dummy variables is replaced by underscore in view of potential software incompatibilities.

The archive identification variables comprise the archive study identification number ('studyno'), the digital object identifier ('doi') of the present dataset version, the version number and date ('version') and the edition type ('edition'). A unique case id ('uniqid') for the complete dataset has been constructed from the TNS country id (digits 1-2) and the TNS case/respondent id (digits 3-8).

Three country/sample identification variables are supplied, maintaining the original country/sample codes ('tscntry'), applying the established archive standard codes for the Eurobarometer series ('country'), and an alphanumerical variable applying the ISO 3166-1 alpha-2 codes ('isocntry') with adaptations for Great Britain and Northern Ireland (ISO 3166-2), for East and West Germany, and for Northern Cyprus (Turkish Cypriot Community).

GESIS added 'Inappropriate' (INAP) codes to indicate intentionally skipped questions when it could be

determined that the appropriate skip instruction in the original questionnaire was adhered to for (almost) every respondent. An additional INAP category was defined whenever a question or group of questions were not surveyed in one or more countries, or if variables refer to country specific items (e.g. region variable P7).

Users should note that answers to multiple-response questions are (originally) represented by a series of binary 'dummy' variables (i.e. variables which take on values of one and zero only), creating separate 'dummy' variables also to explicitly represent 'Don't know', 'No answer/refusal' or other residual responses, such as 'None of the above'. The archive has recoded these residual responses in the case of uncommon minor inconsistencies in accordance with the series of substantial answers.

GESIS has recoded the missing answers (NA) represented in the original data set by blanks (system missing) to standard values. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

Question text and contingency text appearing in the variable description is taken from the English language version of the basic (bilingual) questionnaire (master questionnaire). Coding schemes and other documentation are based on the English language version of the basic questionnaire or on the respective SPSS data definition statements as provided by TNS opinion. In case of any discrepancy between questionnaires, SPSS definitions and data regarding the coding scheme of a variable, the archive, as a general rule, carried out any correction in agreement with the data provider.

If the documentation for country-specific questions or answer categories is provided in another language than English, the archive documents the original language wording and supplies the English translation in brackets.

Region NUTS 2 categories for Portugal have been edited and adapted to changes as of 2002 (NUTS version 2003) which are reflected in Eurobarometer starting with wave 62 (confirmed by TNS). Region NUTS 1 categories for Greece have been edited correcting for the non-coverage of Ionian and Aegean Islands starting with Eurobarometer 62 (confirmed by TNS).

P7 (REGION – NUTS CODES) – variables 'nuts' and 'nutslvl': The integrated NUTS variable has been derived by the archive from the original TNS country-wise P7 variables in accordance with NUTS units and (alphanumeric) codes defined in the Nomenclature of Territorial Units for Statistics. For each country the lowest subdivision level has been considered insofar consistent with or clearly mappable to one of the NUTS levels as valid for the relevant time period (<http://ec.europa.eu/eurostat/web/nuts/history>).

Original coding for p13be (LANGUAGE OF INTERVIEW – BELGIUM) is reversed, coding almost all respondents from NUTS 1 regions Wallonia and Brussels as 'Dutch' and almost all respondents in the Flemish region as 'French'. The coding has been corrected by the archive.

W3A/W4A (NATION WEIGHTS) – variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation': Starting with Eurobarometer 62 the original SPECIAL WEIGHTS for the UNITED GERMANY (East + West) and the UNITED KINGDOM (Great Britain + Northern Ireland) automatically exclude all other samples/countries from the calculation. In accordance with former practice up to Eurobarometer 61, the archive now started to derive three additional weights (W3A, W4A, W3A_W4A) in order to provide for the analysis of the United Kingdom and/or Germany as a whole together with all other samples, as separate countries (nations). They combine the weights W3 (population size + redressment factor for Germany) or/and W4 (population size + redressment factor for the United Kingdom) with W1 (redressment factor for all other countries).

All INDEX and TOTAL variables have been checked and documented accordingly.

More detailed information on data preparation, harmonization or regarding inconsistencies is noted on variable level, if applicable.

1.9 Further remarks

Module QA (Future of Europe) partly replicates questions asked in the context of Eurobarometer 78.2; module QB (E-Communications) largely replicates questions asked in the context of Eurobarometer 79.1, adding question on telecommunication services in the Single Market.

Please note that interview dates in protocol variable P1 „DATE OF INTERVIEW“ differ from the fieldwork dates declared in official reports. According to official documents the survey was carried out between January 18 and January 27, 2014. Variable P1 indicates January 14 to 28 as fieldwork period.

No data are available for protocol items p8 (postal code), p9 (sample point number), p10 (interviewer number) and p11.

2 Eurobarometer series description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general, they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; 'Attitudes towards Europe' (GESIS study ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He had the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999, the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papacostas as head of unit between 2003 and 2010.

At present, the Eurobarometer surveys are carried out on the general responsibility of the European Commission Directorate-General Communication, COMM.A.1 'Strategic Communication', with Tina Zournatzi as head of the unit and David Voidies as head of the Eurobarometer sector.

The special topic modules are requested by the respectively responsible EC Directorate General, as regards the content. Since 2007, the European Parliament is commissioning its own survey ("Parlemeter") through the Public Opinion Monitoring Unit of the European Parliament, in close cooperation with the DG COMM unit and within the same survey framework.

The main survey results are regularly published on the European Commission's Public Opinion website

(<http://ec.europa.eu/COMMFrontOffice/PublicOpinion/index.cfm>) in official standard and special topic reports; detailed tabular reports are published through the European Union Open Data Portal (<https://open-data.europa.eu/en/data/>).

2.4 Development of geographical and population coverage

In all European Union (formerly European Communities) member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics, starting in 1999 (EB51.1). Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the Standard Eurobarometer series, even before starting the accession process (e.g. Turkey or Macedonia). Further countries are continuously added in accordance with the EU membership application and accession process.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriot Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 4: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24, 16-30	17, 28.1, 34.2, 47.20VR, 55.10VR, 85.20VR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.30VR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.20VR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)
Sampling experiment	Non-Nationals	41.0

2.5 Standard question program and special topics

The Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently, Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990), additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues (table 5). Selected subsets of standard trend questions appear in the context of related special topics (e.g. "The Future of Europe" or "European Parliament Eurobarometer").

Table 5: Overview of Eurobarometer surveys with standard EU and trend question modules

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Archive processing and documentation of the Standard and Special Eurobarometer are based on standards agreed upon between the Inter-university Consortium for Political and Social Research (ICPSR) and the GESIS Data Archive department (formerly Zentralarchiv für Empirische Sozialforschung), which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable, it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structures

In general, the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of administrative/technical variables. These comprise the ARCHIVE and dataset ID variables (studyno1, studyno2, doi, version, edition, survey, split (if applicable), caseid, uniqid), the COUNTRY ID variables with several standard variables identifying the different countries (or sub-national samples) and relevant groups of countries (or sub-national samples) in the dataset, arranged in pairs with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric variable ('isocntry') is provided based on the ISO 3166 country code standard (see 1.8).

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). Starting with Eurobarometer 76.1, the traditional variables naming by serial V-numbers (V1 to Vn) is replaced by a system based on question and item numbers in the questionnaire and elsewhere on standard mnemo-technicals (see 1.8). Likewise, from survey 76.1 onwards, constructed total or index variables, usually as provided by the fieldwork institute, are listed right after the question variables on which they are based. The dataset is concluded by three additional weights and their corresponding NATION country variables 'w3a'/'cntry_de', 'w4a'/'cntry_gb', 'w3a4a'/'nation' (see 1.8).

Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 und up to wave 75 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except for multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49, the integrated variables are retained but complemented by completely labeled country specific variables. The country

specific coding schemes and categories are maintained as a standard over time as long as the category schemes provided in the questionnaire remain comparable.

Starting with Eurobarometer 74.1, an additional standardized REGION variable 'nuts' (REGION – NUTS CODES) is constructed, integrating all participating countries with regional units defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS). For each country the lowest available NUTS subdivision level is considered, whereby the hierarchical structure always implies all higher subdivision levels. The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version as documented in the official EUROSTAT classification history (History of NUTS). A second variable indicates the lowest coded NUTS LEVEL 'nutslvl' for each country. All original regional subdivisions and categories remain coded separately and unchanged in the country-wise P7 variables. Details are documented with the respective country specific and/or integrated variable.

3.2.2 Missing values

In general, missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

As noted in chapter 1.8, missing answers (NA) represented in the original data set by blanks (system missing) have been recoded to standard values by GESIS. Their practically complete absence suggests that eventual cases of any not explicitly coded item non-response might be collapsed with the DK (don't know) category.

3.3 International documentation standard (DDI)

The study and variable level documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The variable level documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (COUNTRY CODE - ISO 3166). In the case of Greece the non-ISO abbreviation EL* is used in parallel, as introduced by EUROSTAT as of NUTS version 2010.

AT	Austria	IE	Ireland
BE	Belgium	IT	Italy
BG	Bulgaria	IS	Iceland
CY	Cyprus	LT	Lithuania
CY-TCC	Turkish Cypriote Community	LU	Luxembourg
CZ	Czech Republic	LV	Latvia
DE	Germany (-1989)	ME	Montenegro
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	NO	Norway
FI	Finland	PL	Poland
FR	France	PT	Portugal
GB	United Kingdom	RO	Romania
GB-GBN	Great Britain	RS	Serbia
GB-NIR	Northern Ireland	SE	Sweden
GR / EL*	Greece	SI	Slovenia
HR	Croatia	SK	Slovakia
HU	Hungary	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.																																																																																																																																																																																																																																																																															
CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i> . The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.																																																																																																																																																																																																																																																																															
FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i> .																																																																																																																																																																																																																																																																															

5 Variable documentation

Variable, Label

Question Text (English Language)

studyno1 - ARCHIVE STUDY NUMBER - DISTRIBUTOR

Archive study number – distributor

Study Number of the distributing data archive.

5878 GESIS STUDY ID ZA5878

studyno1

Value	Label	Missing	Count	Percent	Valid Percent
5878	GESIS STUDY ID ZA5878		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

studyno2 - ARCHIVE STUDY NUMBER - PUBLISHER

Archive study number – publisher

Study number of the data archive which is publishing this data set version.

5878 GESIS STUDY ID ZA5878

studyno2

Value	Label	Missing	Count	Percent	Valid Percent
5878	GESIS STUDY ID ZA5878		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

doi - DIGITAL OBJECT IDENTIFIER

Digital object identifier

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.12832>

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

doi

Value	Label	Missing	Count	Percent	Valid Percent
doi:10.4232/1.12832			27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

version - GESIS ARCHIVE VERSION & DATE

GESIS archive version & date

2.0.0 '2017-08-16'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

version

Value	Label	Missing	Count	Percent	Valid Percent
2.0.0 (2017-08-16)			27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

edition - DATASET EDITION

Dataset edition

This variable identifies the type of archive release for the dataset at hand.

1 Archive pre-release

2 Archive edition

edition

Value	Label	Missing	Count	Percent	Valid Percent
2	ARCHIVE EDITION		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

survey - SURVEY IDENTIFICATION

Survey identification

The number identifying the Eurobarometer survey.

811 Eurobarometer 81.1 (January 2014)

survey

Value	Label	Missing	Count	Percent	Valid Percent
811	Eurobarometer 81.1 (January 2014)		27739	100.0	100.0
	Sum		27739	100.0	100.0
	Valid Cases		27739		

caseid - TNS CASE ID

TNS case ID

The original non-unique case (interview) identification numbers as provided by the fieldwork institute (TNS). The unique respondent identification variable uniqid adds the original country identification codes (tnscntry) as a prefix to the original case ID numbers in order to make them unique.

Note:

Actual number is coded.

uniqid - UNIQUE RESPONDENT ID (CASEID BY TNS COUNTRY CODE)

Unique respondent ID (caseid by tnsctntry)

This unique respondent identification is composed of the original TNS country code and the original TNS interview number. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 04: Greece; 05: Spain; 06: Finland; 07: France; 08: Ireland; 09: Italy; 10: Luxembourg; 11: Netherlands; 12: Austria; 13: Portugal; 14: Sweden; 20: Germany West; 21: Germany East; 22: Great Britain; 23: Northern Ireland; 31: Bulgaria; 32: Cyprus (Republic); 33: Czech Republic; 34: Estonia; 35: Hungary; 36: Latvia; 37: Lithuania; 38: Malta; 39: Poland; 40: Romania; 41: Slovakia; 42: Slovenia; 46: Croatia). The remaining digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded.

serialid - SERIAL CASE ID (APPOINTED BY THE ARCHIVE)

Serial case ID (appointed by the archive)

This unique respondent identification number has been initially appointed by the archive for version 1.0.0 of Eurobarometer survey 81.1. It shows the position of the cases in the dataset, starting with 1 and ending with 27739 (total number of cases).

Note:

Actual number is coded.

tnscntry - ORIGINAL TNS COUNTRY/SAMPLE ID

Original TNS country/sample ID

The original country identification codes as applied by the fieldwork institute (TNS).

isocntry - COUNTRY CODE - ISO 3166

Country code - in accordance with ISO 3166-1-alpha-2 country code

All surveyed countries and regions, i.e. including separate samples for East-/West-Germany, Great Britain/Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

Note:

Use of weighting factor w1 is optional.

w1 - WEIGHT RESULT FROM TARGET

w1 Weight result from target

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description. As such in all countries, gender, age, region and size of locality are introduced in the iteration procedure carried out by the fieldwork institutes.

British and Northern Irish as well as East and West German samples are weighted separately. The weight reproduces the real number of cases for each country. In terms of its general function it corresponds to former NATION WEIGHT II (until EUROBAROMETER 31 (March-April 1989)).

w7 - WEIGHT EU10

w7 Weight EU10

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w7 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

w9 - WEIGHT EU12+DE-E

w9 Weight EU12 + DE-E

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34 (October-November 1990)). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w9 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

w13 - WEIGHT EU NMS 10

w13 Weight EU NMS 10

This POPULATION SIZE WEIGHT only refers to the group of the ten new members as of the enlargement in 2004: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w13 must be applied whenever these ten countries are to be analyzed altogether as a group.

w14 - WEIGHT EU25

w14 Weight EU25

This POPULATION SIZE WEIGHT adds Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia to the EU15 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) group of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w14 must be applied whenever these 25 countries as of the 2004 enlargement are to be analyzed altogether as a group.

w23 - WEIGHT EU28 (EU27 + HR)

w23 Weight EU28 (EU27 + HR)

WEIGHT EU28 (EU27 + HR) includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the new member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). The post-stratification weighting factors are included. Weight w23 must be applied whenever these countries are to be analyzed altogether as a group.

w24 - WEIGHT EU NMS 12

w24 Weight EU NMS 12

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w24 must be applied whenever these 12 countries are to be analyzed altogether as a group.

w29 - WEIGHT EURO ZONE 15 (EU27)

w29 Weight EURO ZONE 15 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2008. These are 15 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w29 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w81 - WEIGHT EURO ZONE 16 (EU27)

w81 Weight EURO ZONE 16 (EU27)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2009. These are 16 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), and Slovakia (introduction as of January 1, 2009). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w81 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w98 - WEIGHT EURO ZONE 18 (EU28)

w98 Weight EURO ZONE 18 (EU28)

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. The post-stratification weighting factors are included. All other samples are excluded from calculation. Weight w98 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

w31 - WEIGHT RESULT FROM TARGET - HH

w31 WEIGHT RESULT FROM TARGET – HOUSEHOLD WEIGHT

This POST-STRATIFICATION WEIGHT is based on a comparison for each sample with the respective universe description in terms of households. British and Northern Irish as well as East and West German samples are weighted separately.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w35 - WEIGHT EU6 - HH

w35 WEIGHT EU6 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the six EC founder members: France, Belgium, Netherlands, West Germany, Italy, and Luxembourg. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w35 must be applied whenever these six EC founder countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w36 - WEIGHT EU9 - HH

w36 WEIGHT EU9 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Denmark, Ireland, Great Britain and Northern Ireland to the EU6 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w36 must be applied whenever these nine countries as of the 1973 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w37 WEIGHT EU10 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT adds Greece to the EU9 countries. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w37 must be applied whenever these ten countries as of the 1981 enlargement are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. w39 - WEIGHT EU12+DE-E - HH

w39 WEIGHT EU12 + DE-E – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT equals WEIGHT EU12 but in addition including East Germany (former German Democratic Republic) after the unification of Germany on October 3, 1990 (Eurobarometer 34). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w39 must be applied whenever these twelve member countries are to be analyzed altogether as a group including the Eastern part of Germany (new German federal states).

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w45 - WEIGHT EU AC2+CC1 (BG RO HR) - HH

w45 Weight EU AC2 + CC1 (BG RO HR) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of (former) EU accession countries Bulgaria and Romania (membership in 2007) and candidate country Croatia. All other countries are excluded from calculation. Weight w45 must be applied whenever these three countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w45

w48 - WEIGHT EU AC2 (BG RO) - HH

w48 WEIGHT AC2 (BG RO) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of future EU accession countries. All other countries are excluded from calculation. Weight w48 must be applied whenever these two countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w54 - WEIGHT EU NMS 12 - HH

w54 WEIGHT EU NMS 12 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 12 new member countries as of the enlargement in January 2007: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria and Romania. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w54 must be applied whenever these 12 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w52 - WEIGHT EU27 - HH

w52 WEIGHT EU27 – HOUSEHOLD WEIGHT

WEIGHT EU27 includes all 25 member countries after the 2004 enlargement, plus the remaining Accession Countries Bulgaria and Romania. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of the European Union plus Bulgaria and Romania. Weight w52 must be applied whenever these 27 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w53 - WEIGHT EU28 (EU27 + HR) - HH

w53 Weight EU28 (EU27 + HR) – HOUSEHOLD WEIGHT

WEIGHT EU27 + HR includes all 25 member countries after the 2004 enlargement, the new members as of 2007 Romania and Bulgaria, and Croatia as the forthcoming member as of July 2013. This POPULATION SIZE WEIGHT adjusts each national sample in proportion to its share in the total population aged 15 and over, of NATION GROUP EU28 (EU27 + HR). Weight w53 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w42 - WEIGHT EURO ZONE 13 - HH

w42 WEIGHT EURO ZONE 13 – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2007. These are 13 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), and Slovenia (introduction as of January 1, 2007). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w42 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

WEIGHT EURO ZONE 13 only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w62 - WEIGHT NON-EURO ZONE 16 (EU27) - HH

w62 WEIGHT NON-EURO ZONE 16 (EU27) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2009. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. Weight w62 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w69 - WEIGHT EURO ZONE 17 (EU27) - HH

w69 WEIGHT EURO ZONE 17 (EU27) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2011. These are 17 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), and Estonia (introduction as of January 1, 2011). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this (historical) subgroup of countries. All other samples are excluded from calculation. Weight w69 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w70 - WEIGHT NON-EURO ZONE 17 (EU27) - HH

w70 WEIGHT NON-EURO ZONE 17 (EU27) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania) which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w70 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w73 - WEIGHT NON-EURO ZONE 17 (EU28) - HH

w73 WEIGHT NON-EURO ZONE 17 (EU28) – HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU27 countries including Croatia. Weight w73 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w74 - WEIGHT EU NMS 13 - HH

w74 Weight EU NMS 13 - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT refers to the group of the 13 new member countries as of the enlargement in January 2007 and the accession of Croatia in July 2013: Republic of Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, Slovenia, Bulgaria, Romania, and Croatia. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. Weight w74 must be applied whenever these 13 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w78 - WEIGHT EURO ZONE 18 (EU28) - HH

w78 Weight EURO ZONE 18 (EU28) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries which have adopted the EURO as their currency until 2014. These are 18 member states: Belgium, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal and Finland (introduction as of January 1, 2002), Slovenia (introduction as of January 1, 2007), Cyprus and Malta (introduction as of January 1, 2008), Slovakia (introduction as of January 1, 2009), Estonia (introduction as of January 1, 2011), and Latvia (introduction as of January 1, 2014). It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w78 must be applied whenever these countries are to be analyzed altogether as a group, e.g. when questions related to the introduction of the common European currency are concerned.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w64 - WEIGHT NON-EURO ZONE 18 - EU NMS 12 (EU27) - HH

w64 WEIGHT NON-EURO ZONE 17 – EU NMS 12 (EU27) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Czech Republic, Hungary, Latvia, Lithuania, Poland, Bulgaria, and Romania) belonging to the 12 new members after the enlargement of January 2007 which did not introduce the EURO up to January 1, 2011. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this group of new member countries. All other samples are excluded from calculation. It refers to the group of the EU27 countries excluding Croatia. Weight w64 must be applied whenever these 7 countries are to be analyzed altogether as a group.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

w79 - WEIGHT NON-EURO ZONE 18 (EU28) - HH

w79 Weight NON-EURO ZONE 18 (EU28) - HOUSEHOLD WEIGHT

This POPULATION SIZE WEIGHT separates the group of countries (Denmark, United Kingdom, Sweden, Czech Republic, Hungary, Lithuania, Poland, Bulgaria, Romania, Croatia) which did not introduce the EURO up to January 1, 2014. It adjusts each national sample in proportion to its share in the total population aged 15 and over, of this subgroup of countries. All other samples are excluded from calculation. It refers to the group of the EU28 countries including Croatia. Weight w79 must be applied whenever these countries are to be analyzed altogether as a group.

Note:

WEIGHT NON-EURO ZONE 18 (EU28) only available as household version.

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

wex_hh - WEIGHT EXTRAPOLATED POPULATION 15+ - HH

wex_hh WEIGHT EXTRA POPULATION – HOUSEHOLD WEIGHT

WEIGHT EXTRA extrapolates the actual universe (population aged 15 or more) for each country (sample), i.e. this weight variable integrates all other available weights, but does not reproduce the number of cases in the data set.

Note:

For the parts of the questionnaire for which respondents were asked to answer for their household (QB), an additional national weighting criterion was introduced in the marginal and intercellular weighting procedure. In addition to gender, age, region and size of locality all country samples were made representative of the universe description of number of individuals in each household. After that the representative samples of individuals aged 15 and more were converted into household samples. For international weighting (i.e. EU averages), TNS opinion applied the official household figures as provided by EUROSTAT or national statistic offices.

d43t - PHONE AVAILABLE (SUMMARIZED)

Availability of mobile and/or landline phones - summarized

- 1 Mobile only (coded 1 in d43b and 2 in d43a)
- 2 Landline only (coded 1 in d43a and 2 in d43b)
- 3 Landline and mobile (coded 1 in d43a and 1 in d43b)
- 4 No telephone (coded 2 in d43a and 2 in d43b)

Derivation:

This variable summarizes answers to question d43a and d43b.

[d43a Do you own a fixed telephone in your household?

d43b Do you own a personal mobile telephone?]

Respondents coded 2 in d43a and 1 in d43b are coded 1 ("Mobile only") in d43t. Respondents coded 1 in d43a and 2 in d43b are coded 2 ("Landline only") in d43t. Respondents coded 1 in d43a and d43b are coded 3 ("Landline and mobile") in d43t. Respondents coded 2 in d43a and d43b are coded 4 ("No telephone") in d43t.

Note:

Categories 1 and 2 have been recoded by the Archive to make consistent with former surveys.

See d43a and d43b for complete question text.

d46t - OWNERSHIP APPARTM/HOUSE (D46_10+D46_11)

Ownership of an apartment or house - summarized

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to d46_10 and d46_11.

[d46 Which of the following goods do you have?

d46_10 An apartment / a house which you have finished paying for

d46_11 An apartment / a house which you are paying for]

Note:

See variable d46 for complete question text.

Variable d46t was named d46t1011 in former versions of this dataset.

qb1t - MOBILE PHONES HH (TOTAL QB1_1+QB1_2)

Respondents who indicate access to mobile phones (contract and/or pre-paid) in the household - summarized

- 1 Households with mobile phone access only contract
- 2 Households with mobile phone access only pre-paid
- 3 Households with mobile phone access on both (contract and pre-paid)
- 4 Households without mobile phone access

Derivation:

Respondents coded 1 to 4 in qb1_1 and coded '0' ("None") or '8' ("DK") in qb1_2 are coded '1' ("Households with mobile phone access only contract"). Respondents coded 1 to 4 in qb1_2 and coded '0' ("None") or '8' ("DK") in qb1_1 are coded '2' ("Households with mobile phone access only pre-paid"). Respondents coded 1 to 4 in both qb1_1 and qb1_2 are coded '3' ("Households with mobile phone access on both (contract and pre-paid)"). Respondents coded '0' ("None") or '8' ("DK") in both qb1_1 and qb1_2 are summarized in category '4' ("Households without mobile phone access").

[QB1

And thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

QB1_1 Mobile phone accesses on a contract (billed)

QB1_2 Mobile phone accesses on a prepaid arrangement (pre-paid cards)]

Note:

See qb1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb5_1 - TV RECEPTION VIA: AERIAL

QB5

ASK QB5 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D46 – OTHERS GO TO QB6

Does your household receive the television via...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QB5_1 An aerial (for example on the roof or on the top of the TV set)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in d46_1)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb5_4 - TV RECEPTION VIA: CABLE NETWORK DIGITAL

QB5

ASK QB5 IF "TELEVISION IN THE HOUSEHOLD", CODE 1 IN D46 – OTHERS GO TO QB6

Does your household receive the television via...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QB5_4 A cable TV network + decoder (digital TV)

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in d46_1)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb5t - TV RECEPTION - TV CABLE (SUM)

Respondents who indicate a cable TV network for their household - summarized

0 Not mentioned

1 Mentioned

9 Inap. No television in household (not coded 1 in d46_1)

Derivation:

This variable summarizes answers to qb5_3 and qb5_4.

[Does your household receive television via...?

qb5_3 A cable TV network (analogue = directly connected to the TV set)

qb5_4 A cable TV network + decoder (digital TV)]

Note:

See qb5 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb6_1 - INTERNET ACCESS HH: DIAL UP / ISDN

QB6

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

How does your household access the Internet at home?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QB6_1 Via a dial-up connection using a standard telephone line or an ISDN line (Narrowband Internet)

0 Not mentioned

1 Mentioned

9 Inap. No internet in household (not coded 1 in d46_8)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb6_7 - INTERNET ACCESS HH: POWER LINE (SPONT)

QB6

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

How does your household access the Internet at home?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QB6_7 Via an electrical power line (Broadband Internet) (SPONTANEOUS)

0 Not mentioned

1 Mentioned

9 Inap. No internet in household (not coded 1 in d46_8)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb6r_2 - INTERNET ACCESS HH: FIXED AND MOBILE (REC)

Respondents who indicate a mobile phone network and at least one other fixed internet access for their household

0 Not mentioned

1 Mentioned

9 Inap. No internet via mobile phone network (broadband) (coded 0 in qb6_4)

99 Inap. No internet in household (not coded 1 in d46_8)

Derivation:

This variable summarizes respondents who mentioned a mobile phone access (code 1 in qb6_4) and at least indicated one other item in qb6 (code 1 in qb6_1-qb6_3/qb6_5-qb6_8).

[qb6 How does your household access the Internet from home?

qb6_1 Via a dial-up connection using a standard telephone line or an ISDN line (Narrowband Internet)

qb6_2 Via ADSL, XDSL or similar type of connection on a fixed telephone line using a modem, a box or a router (Broadband Internet)

qb6_3 Via the cable TV network using a cable modem, box or router (Broadband Internet)

qb6_4 Via a mobile phone network (Broadband Internet)

qb6_5 Via the satellite network (Broadband Internet)

qb6_6 Via an optical fibre line (Broadband Internet)

qb6_7 Via an electrical power line (Broadband Internet) (SPONTANEOUS)

qb6_8 Other (SPONTANEOUS)]

Note:

See qb6 for complete question text.

Variable qb6r_2 was named qb6.r2 in former versions of this dataset.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb6r_3 - INTERNET ACCESS HH: MOBILE BROADBAND (REC)

Respondents who indicate a mobile phone network for their household

0 Not mentioned (not coded)

1 Mentioned

9 Inap. No internet via mobile phone network (broadband) (coded 0 in qb6_4)

99 Inap. No internet in household (not coded 1 in d46_8)

Derivation:

This variable repeats answers to qb6_4 (all respondents coded 1 in qb6_4).

[qb6 How does your household access the Internet from home?

qb6_4 Via a mobile phone network (Broadband Internet)]

Note:

See qb6 for complete question text.

Variable qb6r_3 was named qb6.r3 in former versions of this dataset.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb7a - INTERNET SUBSCRIPTION - MAIN FACTOR

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

QB7A

When subscribing to an Internet connection what are the main factors you consider? Firstly?

(SHOW CARD – ONE ANSWER ONLY – READ OUT – ROTATE)

- 1 The maximum download speed
- 2 The maximum amount of data (MB, GB) you can download/ upload
- 3 The price of the Internet subscription
- 4 The fact that the Internet subscription is part of a bundle (INT.: IF NEEDED: By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price)
- 5 The customer service offered
- 6 The cost of the equipment
- 7 The cost of installation
- 8 Other (SPONTANEOUS)
- 9 DK
- 99 Inap. No internet in household (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb7b_1 - INTERNET SUBSCRIP FACTORS: DOWNLOAD SPEED

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

[QB7A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB7B

And then?

(SHOW CARD – MAX. 3 ANSWERS – READ OUT – ROTATE)

QB7B_1 The maximum download speed

0 Not mentioned

1 Mentioned

9 Inap. No internet in household or DK in qb7a (not coded 1 in d46_8 or coded 9 in qb7a)

Note:

Please note that the non-appearance of answer category (DK) for question QB7B in the basic questionnaire does not coincide with the national field questionnaires. According to the dataset and the official tables both categories have been surveyed.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb7b_2 - INTERNET SUBSCRIP FACTORS: DOWNLOAD AMOUNT

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

[QB7A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB7B

And then?

(SHOW CARD – MAX. 3 ANSWERS – READ OUT – ROTATE)

QB7B_2 The maximum amount of data (MB, GB) you can download/ upload

0 Not mentioned

1 Mentioned

9 Inap. No internet in household or DK in qb7a (not coded 1 in d46_8 or coded 9 in qb7a)

Note:

Please note that the non-appearance of answer category (DK) for question QB7B in the basic questionnaire does not coincide with the national field questionnaires. According to the dataset and the official tables both categories have been surveyed.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb7b_7 - INTERNET SUBSCRIP FACTORS: INSTALLATION COSTS

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

[QB7A

When subscribing to an Internet connection what are the main factors you consider? Firstly?]

QB7B

And then?

(SHOW CARD – MAX. 3 ANSWERS – READ OUT – ROTATE)

QB7B_7 The cost of installation

0 Not mentioned

1 Mentioned

9 Inap. No internet in household or DK in qb7a (not coded 1 in d46_8 or coded 9 in qb7a)

Note:

Please note that the non-appearance of answer category (DK) for question QB7B in the basic questionnaire does not coincide with the national field questionnaires. According to the dataset and the official tables both categories have been surveyed.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb8 - INTERNET USE FOR PHONE CALLS IN HH

ASK QB6 TO QB8 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB9

QB8

Does any household member, including yourself, use a PC or a wifi connected device, at home to make phone calls over the Internet?

(READ OUT – ONE ANSWER ONLY)

- 1 No
- 2 Yes, you or a member of your household call users who have subscribed to the same Internet phone service as you, for free (INT.: Internet call sites such as SKYPE)
- 3 Yes, you or a member of your household make cheaper international calls to landlines or mobile phones by means of an Internet phone service
- 4 Yes, both options (SPONTANEOUS)
- 5 DK
- 9 Inap. No internet in household (not coded 1 in d46_8)

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb9 - MAXIMUM DOWNLOAD SPEED CONTRACTED (RECODED)

QB9

ASK QB9 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QB6 – OTHERS GO TO QB10

What is the maximum download speed under the terms of your contract?

(If respondent gives an answer in a different unit than 'Mbps', please recode it as a wrong answer, code "998" - IF "DK", PLEASE CODE "999")

- 1 Less than 2 Mbps
- 2 2 - 6 Mbps
- 3 7-15 Mbps
- 4 16-30 Mbps
- 5 More than 30 Mbps
- 6 Incorrect answers (different unit than Mbps)
- 8 DK
- 9 Inap. No broadband internet access at home (not coded 1 in qb6_2 to qb6_7)

Note:

Variable only provided in categorized form.

Original code "7" recoded to "8".

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb10_3 - INTERNET: EASILY CONTACT PROVIDER

QB10

ASK QB10 IF "INTERNET IN THE HOUSEHOLD", CODE 8 IN D46 – OTHERS GO TO QB11

Please tell me whether you agree or disagree with each of the following.

(SHOW CARD WITH SCALE – READ OUT – ONE ANSWER PER LINE)

QB10_3 You can easily contact your provider in case of Internet connection problems

- 1 Totally agree
- 2 Tend to agree
- 3 Tend to disagree
- 4 Totally disagree
- 5 Not applicable (SPONTANEOUS)
- 6 DK
- 9 Inap. No internet in household (not coded 1 in d46_8)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

Comparability:

Last trend: EB79.1, QA9 (items 1-2) + EB72.5 (items 3-4)

qb11 - HH INTERNET DATA LIMITS - AWARENESS

QB11

ASK QB11 AND QB12 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QB6 – OTHERS GO TO QB13

How much do you know about your data consumption limits or any other data volume limitation under the terms of your contract for your household Internet connection?

(READ OUT – ONE ANSWER ONLY)

- 1 You know what the data consumption limits are under the terms of your contract
- 2 You know there are data consumption limits under the terms of your contract, but you do not really know what they are
- 3 You are not aware of any data consumption limits under the terms of your contract
- 4 DK
- 9 Inap. No broadband internet access at home (not coded 1 in qb6_2 to qb6_7)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb12 - HH INTERNET DATA LIMITS - EVER PAID EXTRA

ASK QB11 AND QB12 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QB6 – OTHERS GO TO QB13

QB12

Have you ever had to pay extra money, on top of your regular monthly bill for additional data consumption by your household Internet connection?

(READ OUT – ONE ANSWER ONLY)

- 1 Yes, often
- 2 Yes, sometimes
- 3 No, never
- 4 DK
- 9 Inap. No broadband internet access at home (not coded 1 in qb6_2 to qb6_7)

Note:

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

0 Not mentioned

1 Mentioned

9 Inap. No broadband internet access at home or no blocking experienced or DK in qb14 (not coded 1 in qb6_2 to qb6_7 or not coded 1 or 2 in qb14)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb15_9 - INTERNET BLOCKING EXPERIENCE: CONTENT UPLOAD

ASK QB14 AND QB15 IF "BROADBAND INTERNET ACCESS AT HOME", CODES 2 TO 7 IN QB6 - OTHERS GO TO QB16

QB15

ASK QB15 IF "EXPERIENCED BLOCKING", CODES 1 OR 2 IN QB14 – OTHERS GO TO QB16

In which of the following cases have you experienced the blocking of online content or applications at home using your household Internet subscription? When trying to...

(SHOW CARD – READ OUT – ROTATE – MULTIPLE ANSWERS POSSIBLE)

QB15_9 Upload content on social networks, blogs and forums

0 Not mentioned

1 Mentioned

9 Inap. No broadband internet access at home or no blocking experienced or DK in qb14 (not coded 1 in qb6_2 to qb6_7 or not coded 1 or 2 in qb14)

Note:

Nested question routing: the quoted filter reference (INAP) includes one or more preceding filter (or other) conditions for the exclusion of respondents.

Multiple response questions are split into a set of dichotomized dummy variables (0 NOT MENTIONED / 1 MENTIONED) which represent each of the original categories and which are identified by the respective original category code as question number suffix. As a result the references to specific categories in the question text or in interviewer instructions should now be read as referring to the respective dummy variable if selected (code 1).

qb19_1 - COMMUNICATION PACKAGE HH: NONE

QB19

ASK ALL

By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price. Has your household subscribed to two or more of the following services as part of a bundle?

(READ OUT – MIN. 2 ANSWERS)

QB19_1 No, we have not bought services as part of a bundle

0 Not mentioned

1 Mentioned

Note:

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb19t_1 - COMMUNICATION PACKAGE HH - COMBINATIONS (SUM)

Different compositions of communication packages in a household (summarized)

1 2+3+4+5

2 2+3+4

3 2+3+5

4 2+4+5

5 3+4+5

6 2+3

7 2+4

8 2+5

9 3+4

10 3+5

11 4+5

98 No combination (coded 1 in qb19_2 to qb19_5 only once and coded 1 in qb19_6)

99 Inap. No service mentioned (not coded 1 in qb19_2 to qb19_5)

Derivation:

This variable summarizes answers to qb19 by categorizing the different combinations of services (coded 1 in qb19_2 to qb19_5) contracted in communication packages. All respondents coded 1 only in qb19_1, qb19_6 or to qb19_7 ("No", "Other" and "DK" answers) are coded 99 (No service mentioned). The numbering of the services are based on the numaration of the subquestions (2 "TV channels", 3 "Fixed phone", 4 "Mobile phone", 5 "Internet").

[qb19 By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price. Did your household buy two or more of the following services as part of a bundle?

qb19_1 No, we did not buy services as part of a bundle

qb19_2 Yes, television channels

qb19_3 Yes, fixed line telephone

qb19_4 Yes, mobile telephone

qb19_5 Yes, Internet access

qb19_6 Other (SPONTANEOUS)

qb19_7 DK]

Note:

See qb19 for complete question text.

Variable qb19t_1 was named qb19t1 in former versions of this dataset.

Derived variable qb19t_1 has been slightly corrected by the Archive. 45 cases coded 98 („Inap. (1 in qb19_2 to qb19_5 only once and 1 in qb19_6)“) in former versions have been recoded to substantial values in accordance with the input variables qb19_1 to qb19_7.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made

available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb19t_1 by isocntry, Absolute Values (Row Percent), weighted by w31

qb19t_2 - COMMUNICATION PACKAGE HH - YES (SUM)

Respondents who mention one or more services as part of a bundle - summarized

0 Not mentioned

1 Total 'Yes'

Derivation:

This variable summarizes answers to qb19_2 to qb19_5.

[qb19 By bundle, we mean a combined package offering more than one communication service from the same provider at an overall price. Did your household buy two or more of the following services as part of a bundle?

qb19_2 Yes, television channels

qb19_3 Yes, fixed line telephone

qb19_4 Yes, mobile telephone

qb19_5 Yes, Internet access]

Note:

See qb19 for complete question text.

Variable qb19t_2 was named qb19t2 in former versions of this dataset.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb23t - BUNDLE PROVIDER CHANGE: YES CONSIDERED (TOTAL)

Respondents who considered to change the bundle provider (summarized)

0 Not mentioned

1 Total 'Yes'

9 Inap. No service mentioned or bundle provider changed or DK in qb21_5 (not 1 in qb19_2 to qb19_5 or not coded 5 in qb21_5)

Derivation:

This variable summarizes responses to qb23_2 to qb23_12.

[qb23 Have you or someone in your household ever considered changing your bundle provider?

qb23_2 Yes, but you are satisfied with the service you currently get

qb23_3 Yes, but there are no other bundle providers in the area where you live

qb23_4 Yes, but there are no other bundle providers which would provide good value for money

qb23_5 Yes, but you are currently bound by your contract with your current provider

qb23_6 Yes, but eventually your provider offered you better conditions and you decided not to switch

qb23_7 Yes, but you don't want to take the risk of a temporary loss of service during the switching process

qb23_8 Yes, but you don't want to take the risk of having to pay more than one provider during the switching process

qb23_9 Yes, but it is not clear what steps you would need to take to switch

qb23_10 Yes, but you do not want to lose your current e-mail address(es) or web page(s) hosted on the provider's server

qb23_11 Yes, but it takes too much effort and time to do it

qb23_12 Yes, but some services of the bundle could not be cancelled at the same time]

Note:

See qb23 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb23t_2 - BUNDLE PROVIDER CHANGE: ACTIVE SWITCHERS (QB21_5)

Group of active switchers with regard to changing bundle providers in qb21_5

0 Not mentioned

1 Mentioned

9 Inap. No service mentioned or DK in qb21_5 or only Other/DK in qb23 (not coded 1 in qb19_2 to qb19_5 or coded 6 in qb21_5 or not coded 1 in qb23_1 to qb23_12)

Derivation:

This variable shows the number of respondents who were coded 1 to 4 in qb21_5.

[qb21

Have you or someone in your household changed service provider for the following services?

qb21_5 (IF HAVE A BUNDLE) Bundles

1 Yes, within the last year

2 Yes, between more than one and two years ago

3 Yes, between more than two and five years ago

4 Yes, more than five years ago]

Note:

See qb21 for complete question text.

Due to modified answer categories and filter instructions constructed variable qb23t_2 ("BUNDLE PROVIDER CHANGE: ACTIVE SWITCHERS (QB21_5)") is not identical with variable qa22t_2 ("BUNDLE PROVIDER CHANGE: ACTIVE SWITCHERS") from previous survey EB 79.1. Variable qb23t_2 refers to variable q21_5, which is expressed in the variable label. Please note that results for qb23t_2 are not available in the official report (see Eurobarometer Report "Special Eurobarometer 414 – E-communications household survey and Telecom Single Market survey" (page 90)), but are listed in the official tabular reports (e.g. VolumeAEB811CNECTecomm_v3.xls"). Constructed variable qb23t_2 has been part of the original dataset and therefore had been kept in the Archive versions.

Percent values in the dataset might differ from the results in official reports and tables due to different bases, but absolute values are consistent.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb23t_3 - BUNDLE PROVIDER CHANGE: HINDERED SWITCHERS

Group of hindered switchers with regard to changing bundle providers

0 Not mentioned

1 Mentioned

9 Inap. No service mentioned or DK in qb21_5 or only Other/DK in qb23 (not coded 1 in qb19_2 to qb19_5 or coded 6 in qb21_5 or not coded 1 in qb23_1 to qb23_12)

Derivation:

This variable shows the number of respondents who were coded 1 at least once for the following items of qb23: qb23_3-qb23_5, qb23_7-qb23_10, and qb23_12.

[qb23 Have you or someone in your household ever considered changing your bundle provider?

qb23_3 Yes, but there are no other bundle providers in the area where you live

qb23_4 Yes, but there are no other bundle providers which would provide good value for money

qb23_5 Yes, but you are currently bound by your contract with your current provider

qb23_7 Yes, but you don't want to take the risk of a temporary loss of service during the switching process

qb23_8 Yes, but you don't want to take the risk of having to pay more than one provider during the switching process

qb23_9 Yes, but it is not clear what steps you would need to take to switch

qb23_10 Yes, but you do not want to lose your current e-mail address(es) or web page(s) hosted on the provider's server

qb23_12 Yes, but some services of the bundle could not be cancelled at the same time]

Note:

See qb23 for complete question text.

Percent values in the dataset might differ from the results in official reports and tables due to different bases, but absolute values are consistent.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

qb24_1 - TRAVELLING ABROAD: TO OTHER EU COUNTRIES

QB24

ASK ALL

How often do you travel abroad...?

(SHOW CARD WITH SCALE – ONE ANSWER PER LINE – READ OUT)

QB24_1 To other countries within the EU

- 1 Several times a month
- 2 Once a month
- 3 Several times a year
- 4 Once a year
- 5 Once over the last 2 years
- 6 Once over the last 3 to 5 years
- 7 Less often
- 8 Never
- 9 DK

Note:

Please note that the wording of answer category 6 of qb24 in the basic questionnaire is slightly erroneous ("Once over the last 4 to 5 years" instead of "Once over the last 3 to 5 years") in comparison to the national field questionnaires, the original dataset and the official reports.

qb24_1r - TRAVELLING ABROAD TO EU COUNTRIES (RECODED)

Travel to other countries within the European Union - recoded

- 1 Regularly (coded 1 to 2 in qb24_1)
- 2 Occasionally (coded 3 to 4 in qb24_1)
- 3 Rarely (coded 5 to 7 in qb24_1)
- 4 Never (coded 8 in qb24_1)
- 8 DK (coded 9 in qb24_1)

Derivation:

This variable collapses answers to qb24_1 into four categories.

[qb24 How often do you travel abroad...?

qb24_1 To other countries within the EU]

Note:

See qb24 for complete question text.

qb25a_3 - MOBILE USE TRAVELLING IN EU: SPECIAL DATA ROAMING

QB25A

ASK QB25A AND QB25B IF "HAS VISITED ANOTHER EU COUNTRY", CODES 1 TO 6 IN QB24.1 AND IF "OWNS A PERSONAL MOBILE PHONE", CODE 1 IN D43B – OTHERS GO TO QB26

When visiting another EU country, you generally...?

(SHOW CARD – READ OUT – MULTIPLE ANSWERS POSSIBLE)

QB25A_3 (IF DOES NOT SWITCH OFF DATA ROAMING CAPABILITIES) Activate a special data roaming plan offered by your network operator

0 Not mentioned

1 Mentioned

9 Inap. (No or very rare travel to other EU countries or DK in qb24_1 or no personal mobile phone) or does switch of data roaming capabilities ((coded 7 to 9 in qb24_1 or coded 2 in d43b) or coded 1 in qb25a_2)

Note:

In accordance to the filter instruction and the official report (see "Special Eurobarometer 414 – E-communications household survey and Telecom Single Market survey" (page 133)) code 9 ("Inap. ((coded 7 to 9 in qb24_1 or coded 2 in d43b) or coded 1 in qb25a_2)") in variable qb25_3 has been adjusted. Percent values in the dataset might differ from the results in official reports and tables due to different bases, but absolute values are consistent. Please note that besides seven respondents indicate that they activate a special data roaming plan (coded 1 (Mentioned) in qb25a_3 "MOBILE USE TRAVELLING IN EU: SPECIAL DATA ROAMING") and at the same are coded 1 (Mentioned) in qb25a_2 ("MOBILE USE TRAVELLING IN EU: SWITCH OFF DATA").

qb27t - EMERGENCY PHONE NUMBER - CORRECT ANSWERS (SUM)

Knowledge of emergency phone number anywhere in the European Union - correct answers summarized

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes answers to q27_1 and qb27_2. It resumes respondents who are coded correct answers: coded 1 (Mentioned) in qb27_1 and coded 0 (Not mentioned) in qb27_2.

[qb27 Can you tell me what telephone number enables you to call emergency services anywhere in the EU?

qb27_1 112

qb27_2 Other number(s)]

Note:

See qb27 for complete question text.

ecom_t5 - E-COMM EQUIPMENT HH: NARROWBAND INTERNET (QB6_1 ONLY)

E-Communication equipment in the household: narrowband internet (qb6_1 only)

ecom_t5 Narrowband internet

0 Not mentioned

1 Mentioned

Derivation:

This variable repeats answers to this item in qb6_1, but only for respondents who did not indicate any other item in qb6_2 to qb6_7.

[qb6 How does your household access the Internet at home?

qb6_1 Via a dial-up connection using a standard telephone line or an ISDN line (Narrowband Internet)]

Note:

See qb6 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

ecom_t6 - E-COMM EQUIPMENT HH: BROADBAND INTERNET (QB6_2-7)

E-Communication equipment in the household: broadband internet (qb6_2 to qb6_7)

ecom_t6 Broadband internet

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes responses to qb6_2 to qb6_7.

[qb6 How does your household access the Internet at home?

qb6_2 Via ADSL, XDSL or similar type of connection on a fixed telephone line using a modem, a box or a router (Broadband Internet)

qb6_3 Via the cable TV network using a cable modem, box or router (Broadband Internet)

qb6_4 Via a mobile phone network (Broadband Internet)

qb6_5 Via the satellite network (Broadband Internet)

qb6_6 Via an optical fibre line (Broadband Internet)

qb6_7 Via an electrical power line (Broadband Internet) (SPONTANEOUS)

Note:

See qb6 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. ecom_t15 - E-COMM EQUIPMENT HH: MOBILE PHONE ONLY (D43A & QB1T)

E-Communication equipment in the household: mobile phone only (d43a & qb1t)

ecom_t15 Mobile phone only

0 Not mentioned

1 Mentioned

Derivation:

This variable summarizes respondents with a mobile telephone and no fixed telephone in the household (code 2 in d43a and codes 1 to 3 in qb1t).

[d43a Do you own a fixed telephone in your household?

qb1 And thinking about all household members, including yourself, please indicate for each of the following how many of them are available in your household.

qb1_1 Mobile phone accesses on a contract (billed)

qb1_2 Mobile phone accesses on a prepaid arrangement (pre-paid cards)

qb1t Respondents who indicate access to mobile phones (contract and/or pre-paid) in the household - summarized]

Note:

See d43 & qb1 for complete question text.

For the analysis of questions where the respondents are asked to answer for their households, special HOUSEHOLD WEIGHTS are made available for making samples representative in accordance with the universe description of number of individuals in each household. For more information see w31 to wex_hh.

d7r1 - MARITAL STATUS: 5 CAT (RECODED)

Marital status recoded to five categories with focus on partnership

- 1 (Re-)Married (coded 1 to 4 in d7)
- 2 Single living with partner (coded 5 to 8 in d7)
- 3 Single (coded 9 to 10 in d7)
- 4 Divorced or separated (coded 11 to 12 in d7)
- 5 Widow (coded 13 to 14 in d7)
- 6 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into five categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d7r2 - MARITAL STATUS: 4 CAT (RECODED)

Marital status recoded to four categories with focus on marriage

- 1 Unmarried (coded 9 to 10 in d7)
- 2 (Re)Married/Single with partner (coded 1 to 8 in d7)
- 3 Divorced or separated (coded 11 to 12 in d7)
- 4 Widow (coded 13 to 14 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d7r3 - MARITAL STATUS: HH&CHILDREN (RECODED)

Marital status recoded to four categories with focus on children (family status)

- 1 Single household without children (coded 9, 11, and 13 in d7)
- 2 Single household with children (coded 10, 12, and 14 in d7)
- 3 Multiple occupancy household without children (coded 1 and 5 in d7)
- 4 Multiple occupancy household with children (coded 2 to 4 and 6 to 8 in d7)
- 5 Other (SPONTANEOUS)
- 7 Refusal (SPONTANEOUS)

Derivation:

This variable collapses answers to d7 into four categories.

[d7 Could you give me the letter which corresponds best to your own current situation?]

Note:

See d7 for complete question text.

d8 - AGE EDUCATION

D8

How old were you when you stopped full-time education?

(IF "STILL STUDYING", CODE '00' – IF "NO EDUCATION" CODE '01' – IF "REFUSAL" CODE '98' – IF "DK" CODE '99')

0 Refusal

3 3 years

65 65 years

97 No full-time education

98 Still studying

99 DK

Note:

Original code "00" recoded to "98".

Original code "01" recoded to "97".

Original code "98" recoded to "0".

Please note that pre-school ages (outliers) might be considered as with "no full-time education" or be excluded from valid answers.

Actual number is coded.

Comparability:

Last trend: EB80.2, D8

d8r1 - AGE EDUCATION: 11 CAT (RECODED)

Age when finished full-time education - recoded to 11 categories

- 1 Up to 14 years
- 2 15 years
- 3 16 years
- 4 17 years
- 5 18 years
- 6 19 years
- 7 20 years
- 8 21 years
- 9 22 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 for indicated ages lowest (3) to 14 and 22 to highest (65).

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d8r2 - AGE EDUCATION: 5 CAT (RECODED)

Age when finished full-time education - recoded to five categories

- 1 Up to 15 years
- 2 16-19 years
- 3 20 years and older
- 10 Still studying
- 11 No full-time education
- 97 Refusal
- 98 DK

Derivation:

This variable collapses answers to question d8 to three age groups.

[d8 How old were you when you stopped full-time education?]

Note:

See d8 for complete question text.

d11r2 - AGE: 6 GROUPS (RECODED)

Age of respondent - recoded to six categories

- 1 15 - 24 years
- 2 25 - 34 years
- 3 35 - 44 years
- 4 45 - 54 years
- 5 55 - 64 years
- 6 65 years and older

Derivation:

This variable collapses answers to d11 into six categories.

[d11 How old are you?]

Note:

See d11 for complete question text.

d15a - OCCUPATION OF RESPONDENT

D15A

What is your current occupation?

(DO NOT SHOW CARD – DO NOT READ OUT – CODE AT THE OFFICE – ONE ANSWER ONLY)

NON-ACTIVE

- 1 Responsible for ordinary shopping and looking after the home, or without any current occupation, not working
- 2 Student
- 3 Unemployed or temporarily not working
- 4 Retired or unable to work through illness

SELF EMPLOYED

- 5 Farmer
- 6 Fisherman
- 7 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 8 Owner of a shop, craftsmen, other self-employed person
- 9 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 10 Employed professional (employed doctor, lawyer, accountant, architect)
- 11 General management, director or top management (managing directors, director general, other director)
- 12 Middle management, other management (department head, junior manager, teacher, technician)
- 13 Employed position, working mainly at a desk
- 14 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 15 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 16 Supervisor
- 17 Skilled manual worker
- 18 Other (unskilled) manual worker, servant

d15a_r1 - OCCUPATION OF RESPONDENT (RECODED)

Occupation of respondent - recoded to employment status

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Employed (coded 10 to 18 in d15a)
- 3 Not working (coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15a into three categories.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15a_r2 - RESPONDENT OCCUPATION SCALE (C14)

Occupation of respondent - scale (C14)

- 1 Self-employed (coded 5 to 9 in d15a)
- 2 Managers (coded 10 to 12 in d15a)
- 3 Other white collars (coded 13 or 14 in d15a)
- 4 Manual workers (coded 15 to 18 in d15a)
- 5 House persons (coded 1 in d15a)
- 6 Unemployed (coded 3 in d15a)
- 7 Retired (coded 4 in d15a)
- 8 Students (coded 2 in d15a)

Derivation:

This scale is based on a combination/selection of answers to variable d15a.

[d15a What is your current occupation?]

Note:

See d15a for complete question text.

d15b - OCCUPATION OF RESPONDENT - LAST JOB

D15B

ASK D15B IF "NOT DOING ANY PAID WORK CURRENTLY", CODES 1 to 4 in D15A

Did you do any paid work in the past? What was your last occupation?

(DO NOT SHOW CARD – DO NOT READ OUT – CODE AT THE OFFICE – ONE ANSWER ONLY)

SELF EMPLOYED

- 1 Farmer
- 2 Fisherman
- 3 Professional (lawyer, medical practitioner, accountant, architect, etc.)
- 4 Owner of a shop, craftsmen, other self-employed person
- 5 Business proprietors, owner (full or partner) of a company

EMPLOYED

- 6 Employed professional (employed doctor, lawyer, accountant, architect)
- 7 General management, director or top management (managing directors, director general, other director)
- 8 Middle management, other management (department head, junior manager, teacher, technician)
- 9 Employed position, working mainly at a desk
- 10 Employed position, not at a desk but travelling (salesmen, driver, etc.)
- 11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.)
- 12 Supervisor
- 13 Skilled manual worker
- 14 Other (unskilled) manual worker, servant

15 Never did any paid work

97 Refusal

99 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Note:

In accordance with former waves coding has been (correctly) shifted compared to the questionnaire.

One respondent from Germany is coded "Refusal", while this answer category is neither included in the basic questionnaire nor in the field questionnaire for Germany.

Comparability:

Last trend: EB80.2, D15B

d15b_r - OCCUPATION OF RESPONDENT - LAST JOB (RECODED)

Occupation of respondent: last job - recoded to employment status

- 1 Self-employed (coded 1 to 5 in d15b)
- 2 Employed (coded 6 to 14 in d15b)
- 3 Never paid work (coded 15 in d15b)
- 7 Refusal
- 9 Inap. Currently doing paid work (not coded 1 to 4 in d15a)

Derivation:

This variable collapses answers to d15b into three categories.

[d15b Did you do any paid work in the past? What was your last occupation?]

Note:

See d15b for complete question text.

One respondent from Germany is coded "Refusal" in d15b, while this answer category is neither included in the basic questionnaire nor in the field questionnaire for Germany.

NO QUESTIONS D16 TO D24

d40a_r - HOUSEHOLD COMPOSITION: AGED 15+ (RECODED)

n of people in household aged 15 years or more - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40a.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?]

Note:

See d40a for complete question text.

d40c_r - HOUSEHOLD COMPOSITION: AGED 10-14 (RECODED)

n of people in household aged 10 to 14 years - recoded to five categories

- 0 None
- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups answers to question d40c.

[d40c Could you tell me how many children aged 10 to 14 years old live in your household?]

Note:

See d40c for complete question text.

d40t - HOUSEHOLD COMPOSITION: SIZE (SUMMARIZED)

n of people in household - summarized

- 1 One
- 2 Two
- 3 Three
- 4 Four
- 5 Five
- 6 Six
- 7 Seven
- 8 Eight
- 9 Nine
- 10 Ten
- 11 Eleven
- 12 Twelve
- 13 Thirteen
- 14 Fourteen
- 15 Fifteen
- 18 Eighteen
- 19 Nineteen
- 20 Twenty

Derivation:

This variable summarizes d40a, d40b, and d40c.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Comparability:

See d40a, d40b, and d40c for complete question text.

Variable d40t was named d40abc in former versions of this dataset.

Generated by the Archive in accordance with former surveys.

d40t by isocntry, Absolute Values (Row Percent), weighted by w1

d40t_r - HOUSEHOLD COMPOSITION: SIZE A+B+C (RECODED)

n of people in household - recoded to four categories

- 1 One
- 2 Two
- 3 Three
- 4 Four or more

Derivation:

This variable groups the summarized variable d40t.

[d40a Could you tell me how many people aged 15 years or more live in your household, yourself included?

d40b Could you tell me how many children aged 10 to 14 years old live in your household?

d40c Could you tell me how many children less than 10 years old live in your household?]

Note:

See d40a, d40b, and d40c for complete question text.

Variable d40t_r was named d40abc_r in former versions of this dataset.

NO QUESTIONS D41 AND D42

D43A&B ARE ASKED BEFORE QB1

NO QUESTIONS D44 AND D45

D46 IS ASKED BEFORE QB1

NO QUESTIONS D47 TO D59

d62_1 - INTERNET USE FREQ: AT HOME

D62

Could you tell me if...?

(SHOW CARD WITH SCALE – READ OUT – ONE ANSWER PER LINE)

D62_1 You use the Internet at home, in your home

- 1 Everyday/Almost everyday
- 2 Two or three times a week
- 3 About once a week
- 4 Two or three times a month
- 5 Less often
- 6 Never
- 7 No Internet access (SPONTANEOUS)

d62t1 - INTERNET USE - INDEX 1 (3 CAT)

Frequency of internet use - index with three categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_3)
- 2 Often/sometimes (at least once coded 2 to 5 in d62_1 to d62_3)
- 3 Never to all (coded 6 in d62_1 to d62_3)
- 9 Inap. Never and/or no access (codes 6 and/or 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62 in three categories.

[d62 Could you tell me if...?

d62_1 You use the Internet at home

d62_2 You use the Internet at your place of work

d62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t1 ("Everyday/Almost everyday"). Respondents coded 2, 3, 4 or 5 in each variable d62_1 to d62_3 are coded 2 ("Often/sometimes") in d62t1. Respondents coded 6 ("Never") in each variable d62_1 to d62_3 are coded 3 ("Never to all") in d62t1. Respondents coded 6 at least once in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), or respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 9 ("Inap. Never and/or no access (codes 6 and/or 7 in d62_1 to d62_3)") in d62t1.

Note:

See d62 for complete question text.

Variable d62t1 was named d62t in former versions of this dataset.

d62t2 - INTERNET USE - INDEX 2 (7 CAT)

Frequency of internet use - index with seven categories

- 1 Everyday/Almost everyday (at least once coded 1 in d62_1 to d62_3)
- 2 Two or three times a week (not coded 1 and at least once coded 2 in d62_1 to d62_3)
- 3 About once a week (not coded 1 to 2 and at least once coded 3 in d62_1 to d62_3)
- 4 Two or three times a month (not coded 1 to 3 and at least once coded 4 in d62_1 to d62_3)
- 5 Less often (not coded 1 to 4 and at least once coded 5 in d62_1 to d62_3)
- 6 Never/No access (coded 6/7 or coded 6 in d62_1 to d62_3)
- 7 No Internet access at all (coded 7 in d62_1 to d62_3)

Derivation:

This variable summarizes responses to d62.

[d62 Could you tell me if...?

d62_1 You use the Internet at home

d62_2 You use the Internet at your place of work

d62_3 You use the Internet somewhere else (school, university, cyber-café, etc.)]

Respondents coded 1 at least once in d62_1 to d62_3 are coded 1 in d62t2 ("Everyday/Almost everyday"). Respondents coded 2 at least once in d62_1 to d62_3 and not coded 1, are coded 2 in d62t2 ("Two or three times a week"). Respondents coded 3 at least once in d62_1 to d62_3 and not coded 1 or 2, are coded 3 in d62t2 ("About once a week"). Respondents coded 4 at least once in d62_1 to d62_3 and not coded 1 to 3, are coded 4 in d62t2 ("Two or three times a month"). Respondents coded 5 at least once in d62_1 to d62_3 and not coded 1 to 4, are coded 5 in d62t2 ("Less often"). Respondents coded 6 ("Never") in each variable d62_1 to d62_3, or at least once coded 6 in d62_1 to d62_3 and coded 7 ("No internet access") in the other variable(s), are coded 6 ("Never/No access") in d62t2. Respondents coded 7 ("No internet access") in each variable d62_1 to d62_3 are coded 7 ("No internet access at all") in d62t2.

Note:

See d62 for complete question text.

Generated by the Archive in accordance with former surveys.

Variable d62t2 was named netuse in former versions of this dataset.

polintr - POLITICAL INTEREST INDEX (D71_1/2/3)

Index of interest in politics

- 0 DK (coded 4 in d71_1, d71_2 and d71_3)
- 1 Not at all interested in politics
- 2 Slightly interested in politics
- 3 Moderately interested in politics
- 4 Strongly interested in politics

Derivation:

The POLITICAL INTEREST INDEX is based on the answers to the following question: "When you get together with friends or relatives, would you say you discuss frequently, occasionally or never about (national/European/local) political matters?" (d71_1, d71_2, and d71_3).

According to former studies the index was constructed by first attributing a score to each item in d71 ("Never" = 0; "Occasionally" = 1; "Frequently" = 2) and then adding together the three political dimensions (national/European/local). This procedure results in four different index levels ("Not at all interested in politics" if added up score = 0; "Slightly" if added up score = 1 or 2; "Moderately" if added up score = 3 or 4; "Strongly" if added up score = 5 or 6) which have been coded accordingly into the categories 1 to 4. Furthermore combinations with DK responses in maximum two variables (d71_1, d71_2, and d71_3) have been coded as follows: "DK" and "Never" = "Not at all"; "DK" and "Never" and "Occasionally" or "Frequently" = "Slightly"; "DK" and "Occasionally" and at least one "Frequently" = "Moderately".

Note:

This new POLITICAL INTEREST INDEX is introduced as C2 starting with EB 73.4. Please notice that in former waves up to EB 69.2 the VALUE ORIENTATION - POST-MATERIALISM index was named C2.

Compared to the original variable the scale has been inversed by the archive in accordance with former practice. Furthermore responses coded 'DK' to all source variables (d71_1, d71_2, and d71_3) have been recoded to '0' (DK).

Modified by the Archive.

See d71 for complete question text.

p1 - DATE OF INTERVIEW

INTERVIEW PROTOCOLE

p1 Date of the interview

- 1 Tuesday 14th January 2014
- 2 Wednesday 15th January 2014
- 3 Thursday 16th January 2014
- 4 Friday 17th January 2014
- 5 Saturday 18th January 2014
- 6 Sunday 19th January 2014
- 7 Monday 20th January 2014
- 8 Tuesday 21st January 2014
- 9 Wednesday 22nd January 2014
- 10 Thursday 23rd January 2014
- 11 Friday 24th January 2014
- 12 Saturday 25th January 2014
- 13 Sunday 26th January 2014
- 14 Monday 27th January 2014
- 15 Tuesday 28th January 2014

Note:

Please note that interview dates in protocol variable P1 „DATE OF INTERVIEW“ differ from the fieldwork dates declared in official reports.

According to official documents the survey was carried out between January 18 and January 27, 2014. Variable P1 indicates January 14 to 28 as fieldwork period.

p3 - DURATION OF INTERVIEW (MINUTES)

p3 Duration of interview - number of minutes the interview lasted

3 3 minutes

284 284 minutes

443 443 minutes

499 499 minutes

508 508 minutes

999 DK/NA

Note:

Actual number is coded.

For four respondents an interview duration of more than four hours (284, 443, 499, and 508 minutes) is coded.

Comparability:

Last trend: EB80.2, P3

p3r - DURATION OF INTERVIEW (RECODED)

p3r Duration of interview - number of minutes the interview lasted (recoded)

- 1 Up to 14 minutes
- 2 15 - 29 minutes
- 3 30 - 44 minutes
- 4 45 - 59 minutes
- 5 60 - 74 minutes
- 6 75 - 89 minutes
- 7 90 minutes and more
- 9 DK/NA

Derivation:

This variable collapses codes in p3 into seven categories.

For four respondents an interview duration of more than four hours (284, 443, 499, and 508 minutes) is coded.

p6gb - SIZE OF COMMUNITY - UNITED KINGDOM

p6gb Objective size of community: United Kingdom

- 1 Rural
- 2 Urban
- 3 Metropolitan
- 99 Inap. (not GB-GBN/GB-NIR in isocntry)

Note:

The original variable separates data for Northern Ireland (codes 1-3) and Great Britain (codes 4-6). In order to facilitate analysis for the United Kingdom (GB) as a whole, corresponding categories have been coded together (matched).

For meaningful (descriptive) results this variable needs to be used for Great Britain and Northern Ireland separately (select if '9' OR '10' in country) or be weighted by special weighting variables for the UNITED KINGDOM (GB) w4 or w4a.

Comparability:

Last trend: EB80.2, P6

p6gb, weighted by w4

Value	Label	Missing	Count	Percent	Valid Percent
1	Rural		220	16.6	16.6

p7ie - REGION - IRELAND

p7ie Ireland – Non-NUTS subdivisions

- 1 Dublin [part of Leinster]
- 2 Rest of Leinster [part of South-East, Mid-East, Midlands, part of Border]
- 3 Munster [Mid-West, South-West, part of Sout-East]
- 4 Connacht / Connaught & Ulster [part of Border, West]
- 99 Inap. (not IE in isocntry)

Note:

This variable is based on four historical provinces in Ireland, however separating Dublin (NUTS 3: IE021) from the rest of Leinster and combining Connacht / Connaught and Ulster. The relation to the NUTS 2 regions for Ireland is indicated in brackets.

Comparability:

Last trend: EB80.2, P7

p7pt - REGION - PORTUGAL NUTS 2

p7pt Portugal (EUROSTAT NUTS 2 LEVEL) – Comissaoes de Coordenação regional + Regioes autonomas

- 1 Norte (North) [PT]
- 2 Centro (Center) [PT]
- 3 Lisboa (Lisbon)
- 4 Alentejo (Alentejo Region)
- 5 Algarve
- 99 Inap. (not PT in isocntry)

Note:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Since 2002 the region “Lisboa e vale do tejo” is split up and the subregion “Lezíria do Tejo” reinstated to the “Alentejo” Region and the “Médio Tejo” and “Oeste” reinstated to the “Centro” Region. The relative frequencies for each region indicate that this is reflected in the Eurobarometer P.7 regions starting with Eurobarometer 62.0. The original label for category ‘3’ (“Lisboa e vale do Tejo”) has been edited accordingly. According to the NUTS 2 specifications for Portugal this now only includes “Grande Lisboa” and “Península de Setúbal”.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

p7fi - REGION - FINLAND NUTS 3

p7fi Finland (EUROSTAT NUTS 3 LEVEL 2010) – Maakunnat / Landskap

- 1 Helsinki-Uusimaa
- 2 Varsinais-Suomi (Southwest Finland)
- 3 Satakunta
- 4 Kanta-Häme (Tavastia Proper)
- 5 Pirkanmaa (Tampere Region)
- 6 Päijät-Häme (Paijanne Tavastia)
- 7 Kymenlaakso (Kymi Valley)
- 8 Etelä-Karjala (South Karelia)
- 9 Etelä-Savo (Southern Savonia)
- 10 Pohjois-Savo (Northern Savonia)
- 11 Pohjois-Karjala (North Karelia)
- 12 Keski-Suomi (Central Finland)
- 13 Etelä-Pohjanmaa (Southern Ostrobothnia)
- 14 Pohjanmaa (Ostrobothnia)
- 15 Keski-Pohjanmaa (Central Ostrobothnia)
- 16 Pohjois-Pohjanmaa (Northern Ostrobothnia)
- 17 Kainuu
- 18 Lappi (Lapland)
- 99 Inap. (not FI in isocntry)

Note:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' is already coded in accordance with NUTS version 2010.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that the NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

Please notice that weighted relative frequencies may vary considerably over time (compared across surveys). Weighted frequencies for NUTS2 are adjusted.

The official NUTS categories are coded and documented in the integrated alphanumeric NUTS CODES variable 'nuts'.

in Croatia (HR):

Non-NUTS subdivisions

HR Croatia

Derivation:

This additional alphanumeric NUTS CODES variable is produced by the archive. It integrates all country specific p7 variables given that the regional units are defined in accordance with the EUROSTAT Nomenclature of Territorial Units for Statistics (NUTS) respectively in accordance with the Statistical Regions for Candidate and EFTA Countries 2010. For each country the lowest available NUTS subdivision level is considered.

Eurostat: RAMON Eurostat Metadata Server. Statistical Regions for Candidate countries and EFTA countries, by country. Webdownload: 2017-07-18

http://ec.europa.eu/eurostat/ramon/documents/nuts/Statistical_Regions.zip

Note:

The official NUTS codes are coded verbatim in accordance with the in each case valid (applicable) NUTS version. All version details and changes are documented in the official EUROSTAT classification history (History of NUTS). A second variable (regunit) indicates the coded NUTS LEVEL for each country.

France:

The territorial unit of Corse (FR83) and the Oversea departments (Départements d'outre-mer: FR9) are not covered.

Italy:

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) NUTS 1 codes for Italy have changed for North-East (ITH instead of ITD) and Center (ITI instead of ITE). The reason for this are minor boundary shifts on NUTS 2 and 3 level (ITI3: Marche and ITH5: Emilia Romagna).

Greece:

The Aegean Islands (EL41 - Βόρειο Αιγαίο/Voreio Aigaio and EL42 - Νότιο Αιγαίο/Notio Aigaio) as well as the Ionian Islands (EL22 - Ιόνια Νησιά/Ionia Nisia) are not covered.

Starting with Eurobarometer wave 77 (NUTS version 2010 with regular amendment as of January 1, 2012) the standard country prefix 'GR' is replaced by 'EL'. The remaining numerical part of the codes remains unaffected.

Spain:

The autonomous cities of Ceuta (ES63 - Ciudad Autónoma de Ceuta) and Melilla (ES64 - Ciudad Autónoma de Melilla) are not covered.

Portugal:

The autonomous regions of the Azores (PT20 - Região Autónoma dos Açores) and of Madeira (PT30 - Região Autónoma da Madeira) are not covered.

Finland:

The Åland Islands (FI200 - Landskapet Åland / Avenanmaan maakunta) are not covered.

Former regions of "Uusimaa" (FI181) and "Itä-Uusimaa" (FI182) have been consolidated to the region of "Helsinki-Uusimaa" (FI1B1) on January 1, 2011. The official NUTS codes have changed accordingly starting with NUTS version 2010 (regular amendment as of January 1, 2012). Eurobarometer did never code "Itä-Uusimaa" (East Uusimaa) separately. "Uusimaa" always included the capital area of Helsinki. For this reason the NUTS CODES variable 'nuts' for Finland is already coded in accordance with NUTS version 2010. Only the country specific NUTS 2 variable (p7fi_r) is still coded in accordance with NUTS version 2003/2006 in order to remain consistent with former Eurobarometer waves.

The NUTS version history documents a minor boundary shift between "Satakunta" (NUTS 2003: FI191; NUTS 2006/2010: FI196) and "Pirkanmaa" (NUTS 2003: FI192; NUTS 2006/2010: FI197). One municipality has been transferred between these NUTS level 3 regions. Please notice that NUTS CODES variable 'nuts' is based on the NUTS 2006/2010 codes for "Satakunta" and "Pirkanmaa" although it could not be verified if and when the boundary shift is actually reflected in Eurobarometer data.

p13be - LANGUAGE OF INTERVIEW - BELGIUM

p13be Language of interview: Belgium

- 1 French
- 2 Dutch
- 9 Inap. (not BE in isocntry)

Note:

Starting with Eurobarometer 73.5 (June 2010) the original data for p13be (LANGUAGE OF INTERVIEW - BELGIUM) are usually reversed, i.e. (almost) all respondents in NUTS 1 regions Wallonia and Brussels are coded as "Dutch" and (almost) all respondents in the Flemish Region as "French" in p13be. This is true for EB 81.1 and the data have been corrected by the Archive.

Comparability:

Last trend: EB80.2, P13

p13be

Value	Label	Missing	Count	Percent	Valid Percent
1	French		440	1.6	43.3

w3a - WEIGHT RESULT FROM TARGET - UNITED GERMANY

w3a Weight result from target - United Germany

This weight combines the weighting factors for Germany as a whole (redressment factors plus populations size factors East/West) and the redressment factors for all other countries (Great Britain and Northern Ireland separated). This weight has been derived by the archive from original TNS weights w1 and w3. Unlike weighting variable w3 (WEIGHT UNITED GERMANY (ONLY)) the other countries/samples are not excluded from calculation.

Note:

Starting with Eurobarometer 75.4 and according to available weights up to Eurobarometer 61, the archive is deriving three additional weights (w3a, w4a, w3a4a) in order to provide for the analysis of the United Kingdom and/or Germany, each as a whole and together with all other countries. Minimal deviations in frequencies for weighted data are possible due to rounding differences.

w3a
