ISSP 2016 Germany

**ISSP Background Variable Documentation for
German ISSP 2016**

by

**Evi Scholz, Katharina Schmidt, and Regina Jutz
GESIS**

August 2017

General Note

In general, translations for the German background questions are taken from the ALLBUS 2002 translation where wording for most of the background questions was identical to the ALLBUS 2016 (Harkness and Blohm 2004). Where wording was not identical to the ALLBUS 2016 questions, translation was done by the German ISSP team itself (marked by two asterisks).

Answer categories marked by one asterisk are not read aloud.

The German ISSP 2016 data file is based on the final but GESIS inhouse version of ALLBUS 2016. Thus, variable names used in the “Construction/Recoding” part of the following documentation will differ from the variable names in the ALLBUS 2016 data file distributed by GESIS, Cologne.

ISSP 2016 Germany

Please name the **ISSP module** which the documentation refers to (e.g., “*Environment III / ISSP2010*”):

Role of Government V / ISSP 2016

Please name your **country**:

Germany

SEX - Sex of respondent

	National Language	English Translation
<i>Question no. and text</i>	—	—
<i>Interviewer Instruction</i>	F011 <i>Geschlecht der befragten Person ohne Befragen eintragen!</i>	F011 <i>Enter sex of respondent without asking. **</i>
<i>Codes/ Categories</i>	1. Männlich	1. Male
	2. Weiblich	2. Female
<i>Translation Note</i>	—	—
<i>Note</i>	Sex taken from ALLBUS 2016 where question was not asked; face-to-face interview; sex coded by interviewer	

Construction/Recoding:

Country Variable Codes (in translation) F011	→ SEX
1	1. Male
2	2. Female
—	9. No answer

** Translated by the German ISSP team.

BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	F012 Sagen Sie mir bitte, in welchem Monat und in welchem Jahr Sie geboren sind?	F012 Please tell me what month and year you were born in.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>	<i>Achtung: Wichtige Angabe für das weitere Interview! Bitte besonders auf korrekte Angabe achten!</i>	<i>Attention: Important information for the further interview. Please take care of correct information.**</i>
<i>Translation Note</i>	—	
<i>Note</i>	Year of birth (F017A_2) taken from ALLBUS 2016.	

Construction/Recoding: (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→BIRTH
<i>Construction</i>	F012A_2	
<i>Codes</i>	1918	[MIN BIRTH]
	1997	[HIGH BIRTH]
	-9	9999. No answer

Optional: Recoding Syntax

compute birth= F012A_2.

** Translated by the German ISSP team.

AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR 'year of interview' minus BIRTH 'year of birth'.

	National Language	English Translation
<i>Question no. and text</i>	F012 Sagen Sie mir bitte, in welchem Monat und welchem Jahr Sie geboren sind?	F012 Please tell me what month and year you were born in.
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>	<i>Achtung: Wichtige Angabe für das weitere Interview! Bitte besonders auf korrekte Angabe achten!</i>	<i>Attention: Important information for the further interview. Please take care of correct information.**</i>
<i>Translation Note</i>	—	
<i>Note</i>	Month (F012A_1) and year of birth (F012A_2) taken from ALLBUS 2016; in order to calculate age, the month of interview was used (as reported by interviewer; intmon(Allbus) – datemo(ISSP))	

Construction/Recoding: (list lowest, highest, and 'missing' codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→AGE
<i>Construction</i>		
<i>Codes</i>	18	[MIN AGE]
	97	[HIGH AGE]
	-9	999. No answer

Optional: Recoding Syntax

```
do if (f012a_2 ne -9).
compute age=2016-f012a_2.
end if.
EXECUTE.
do if (f012a_1 ne -9).
if (intmon le f012a_1)age=age-1.
end if.
recode age(sysmis=999).
```

** Translated by the German ISSP team.

EDUCYRS - Education I: years of schooling

	National Language	English Translation
<i>Question no. and text</i>	S01 Wie viele Jahre waren Sie insgesamt in Schule, Hochschule, oder anderer schulischer Ausbildung, ohne betriebliche Ausbildung? Sollten Sie ein Schuljahr wiederholt haben, zählen dieses bitte NICHT mit. Wenn Sie noch Schüler(in) oder Student(in) sind, zählen Sie bitte die Jahre, die Sie bereits in Schule oder Hochschule verbracht haben.	S01 How many full years of schooling or education have you had in total, including primary and secondary schooling, university and full-time vocational training at school, but not including in-firm training. If you have ever repeated a year, please do NOT include these years. If you are currently at school or university, please count the number of years you have already completed at school or university.**
<i>Interviewer Instruction</i>	<i>Bitte Anzahl eintragen! Runden Sie auf volle Jahre. Bitte KEINE Altersangabe. Bitte Kindergartenzeit NICHT mitzählen!</i>	<i>Please enter number of years. Round to full years. Please do not enter your age. Please do not count number of years in kindergarden!**</i>
<i>Codes/ Categories</i>	_____ Jahre	_____ years
<i>Translation Note</i>	—	
<i>Note</i>	Probe added in ISSP 2013/2014 if respondents' answer equals respondent's age to reduce misunderstanding on question meaning. <i>Haben Sie Ihr Alter angegeben? Wir sind bei dieser Frage an den Jahren interessiert, die Sie in Schule, Hochschule oder anderer schulischer Ausbildung verbracht haben.</i> <i>Did you state your age? With this question, we would like to know the years that you spent in school, university, or other schooling.**</i>	

Filter Variable(s) and Conditions:

--

Country Variable Codes/Construction Rules S01	→ EDUCYRS
-	0. No formal schooling
1	1. One year
4-27	...
-	98. Don't know
-9, -41	99. No answer

Optional: Recoding Syntax

recode s01 (-9, -41=99) (else=copy) into educyrs.

** Translated by the German ISSP team.

ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

SPISCO08 – Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the respondent's spouse occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes attached as a separate file. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do not enter standard ISCO08 codes here, but report any deviations. However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

Applies for German ISSP 2016 interviews: CASI interview with interviewer attending (issp_c=1)	40. CASI, self-completion, computer-assisted

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

Already included in field questionnaire provided with the country data file.

Attached file: 2016_q_de.pdf.

BV partly included in the German ISSP 2016 field quex, partly taken from ALLBUS 2016 (<https://dbk.gesis.org/DBKSearch/download.asp?db=D&id=61471>).

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all source** variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: 2016_bvfreq_de.spv

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

ISCO08 is used to code responses directly.

Conversion of national coding scheme to ISCO88. Attached file:
