ISSP 2016 Suriname

Please name the **ISSP module** which the documentation refers to (e.g., “*Health and Health Care / ISSP2011*”):

***Role of Government V / ISSP2016***

Please name your **country**:

**Suriname**

**SEX - Sex of respondent**

	<b>National Language</b>	<b>English Translation</b>
<i>Question no. and text</i>	A01 Bent u man of vrouw?	A01. Are you male or female?
<i>Codes/ Categories</i>	1 Man	1. Male
	2 Vrouw	2. Female
<i>Interviewer Instruction</i>	--	
<i>Translation Note</i>	--	
<i>Note</i>	--	

**Construction/Recoding:**

<b>Country Variable Codes (in translation)</b>	<b>→ SEX</b>
	1. Male
	2. Female
	9. No answer

**BIRTH – Year of birth**

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	A02. Wanneer bent u geboren?	A02. When were you born?
<i>Codes/ Categories</i>	Maand	Month
	Jaartal	Year
<i>Interviewer Instruction</i>	--	
<i>Translation Note</i>	--	
<i>Note</i>		

**Construction/Recoding:** (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→BIRTH
<i>Construction</i>		
<i>Codes</i>	See descriptives	[MIN BIRTH]
		[HIGH BIRTH]
		9999. No answer

### ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	C03. Welk beroep had u <b>in uw eerste baan</b> ? C11. Welk beroep hebt u momenteel? Als u nu niet werkt, welk beroep had u in uw laatste baan?	C03. What was your first occupation? C11. What is/was your current/last occupation?
<i>Codes/ Categories deviating from ISCO08</i>		Occupations initially coded in ISCO-88, then converted into ISCO-08.
		If no answer to open questions, the answer to the showcard question was taken.

### SPISCO08 – Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the respondent's spouse occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	H07. Welk beroep heeft/had uw partner?	H07. What is/was your partner's occupation?
<i>Codes/ Categories deviating from ISCO08</i>		Open question, verbatim answers were coded into ISCO-88, then transferred into ISCO-88.
	1. Hoger of middelbaar intellectueel of vrij beroep 2. Hoger of middelbaar leidinggevend 3. Administratief 4. Commercieel 5. Zorg en dienstverlening 6. Geschoolde handarbeid 7.
