This collection of documents concerns national classifications and their harmonization into cross-national comparable measures. The document EVS 2017 – NATIONAL CLASSIFICATIONS| Guidelines outlines the general rules for the construction of country-specific categories, and for the application of the related harmonization schemes. The Guidelines are enriched by Appendixes A, B, and C, which describe more in depth the harmonization scheme used, and contain the Official International Standards used. Appendix D contains a template of a file used for communications concerning classifications between the country team and the central team.

National classifications refer to the country-specific measurement of:

- Educational attainment (see also Appendix A: ESS education scheme 'EDULVLB')
- Political parties (left/right)
- Religious denomination
- Income (deciles)
- Occupations (ISCO08) (see also Appendix B: STRUCTURE OF THE INTERNATIONAL STANDARD CLASSIFICATION OF OCCUPATIONS (ISCO-08))
- Regions (NUTS-1-2-3) (see also Appendix C: Official Classifications)
- Nationality (ISO 3166-1 and ISO 3166-3) (see also Appendix C: Official Classifications)
- Language (ISO 639-1) (see also Appendix C: Official Classifications)

## EVS 2017 – NATIONAL CLASSIFICATIONS

### Guidelines

This document is intended to provide the general rules applying to the national classifications comprised in the EVS 2017 questionnaire.

By National classifications we mean all the questions that have to be adapted to the country's situation and later harmonized to provide a standardized measure, comparable across different contexts.

Each country team, once secured funding, will receive an excel sheet with the existing national classifications. When possible, the material from the EVS 2008 has been retrieved: it can serve as a basis for the 2017 classifications. In the case of Education, for most of the countries it has been possible to retrieve the material from the ESS (rounds 5,6,7)<sup>1</sup>.

**Please check everything carefully and update the information when needed.** Amendments to the existing classifications are possible: please highlight them in **yellow** and provide an explanation for the suggested change. Comments can be inserted in the provided Word template (see Appendix D).

Please also:

- provide translations and, when asked, description of the national categories;
- check and fill in missing information.

Any doubt or question can be discussed with the Methodology Group by sending an email to [evs2017mg@gmail.com](mailto:evs2017mg@gmail.com). Issues about education will be also discussed with Verena Ortmanns at GESIS, in Mannheim.

#### **A. National educational classification with main school types<sup>2</sup>**

To be used in questions:

- Q81. What is the highest educational level that you have attained?**
- Q89. What is the highest educational level that your spouse or partner has attained?**
- Q99. What is the highest educational level that your father has attained?**
- Q100. What is the highest educational level that your mother has attained?**

#### ***What is new in EVS 2017?***

Firstly, EVS wave 5 aims to optimize the comparability and analytic potential of its measures of educational attainment. Given the comprehensive overhaul of comparative education measurement in the European Social Survey 2010, EVS can benefit from those improvements at fairly low costs. This affects both the international target variables as well as the country-specific measurement instruments. Secondly, since

---

<sup>1</sup> The advantage in this case is that the harmonization for the available categories has been already done.

<sup>2</sup> Written with the contribution of Silke Schneider and Verena Ortmanns.

some countries will collect EVS data not using personal interviews but using web questionnaires or mixed modes, it may be necessary to adapt measurement instruments to this new requirement. This section describes all three aspects regarding the measurement of education in EVS wave 5.

### ***New detailed harmonized education variable and derived variables***

Survey data collected for many data users and research questions best collect data that do not only fit just one theoretical framework. For the measurement of educational attainment, this means that the internationally harmonized education variable best reflects various aspects of educational attainment, and not just the length of schooling.

This can be achieved by employing a detailed yet flexible coding scheme going beyond broad educational levels. Two such detailed schemes are currently available: The ISCED 2011 classification, providing a three-digit coding scheme with 32 categories, and the ESS education coding scheme (variable 'EDULVLB'), which is closely related to but not identical with ISCED 2011, with 27 categories.<sup>3</sup> The ESS coding scheme relies on ISCED definitions of education levels (e.g. primary education, upper secondary education etc.). The latter scheme was specifically developed for cross-national surveys and for Social Science research rather than official statistics: it better reflects some institutional differentiations in education ignored by official ISCED, and aims to maximize comparability across countries, even when this implies some deviations from the official ISCED mappings (which sometimes result from a political process rather than strictly applying ISCED classification criteria). Given the experience from 3 rounds of ESS data collection since its implementation, it is also tried and tested, ready to be implemented in other surveys. It is thus the education coding scheme of choice for EVS.

Appendix A gives further details on the ESS education scheme. The following less detailed variables will be derived from ESS education scheme: ISCED 2011 main levels, ES-ISCED and EVS-specific educational levels.

### ***Build on comprehensive country consultations in the European Social Survey***

In order to implement the ESS coding scheme, the ESS has run a comprehensive consultation process in 2009 prior to 2010 data collection to develop (usually more detailed than previously) country-specific measurement instruments and mappings to the new ESS education scheme. Whenever a new country joins the ESS, the consultation is done also for this new country since then.

The easiest way to implement the detailed ESS education scheme in the EVS is therefore by adopting the country-specific measurement instruments from the ESS as much as possible. Since no instrument is ever perfect, the ESS country-specific response categories for education and their mapping to the ESS education scheme will be made available to EVS country teams by the EVS coordinators for checking. Country teams thus have the opportunity to provide feedback and suggest changes if they see ways for improving the instrument. This feedback will be reviewed centrally at GESIS, and either adopted or further discussed with EVS country teams. Like in the ESS, it is aimed for a consensual process, with final decision making power on the side of the EVS country team.

Country teams are required to provide the English translation of each response category. For countries having questionnaires in more than one language, categories have to be available in each language. If new

---

<sup>3</sup> Because ISCED 2011 was finalized after the ESS education scheme was developed, the codes are not the same even when the concepts are. This is also the reason why often ISCED 1997 category names such as "ISCED 5A" are found in the documentation of the ESS education scheme. Also, this means that ISCED 1997 mappings were applied for the development of the ESS education harmonization. While ISCED 2011 mappings are now available, applying these for the purposes of the EVS would be very costly (and imply inconsistencies between ESS and EVS education data).

categories are proposed in addition to the ones listed, please also provide a description of the educational level, indicating the length of the study, its features (vocational, general) selectivity and destination.

Country teams are also required to supply a concise description of the national educational system (and important historical changes); if already available in the methodological report from EVS 2008, country teams should make sure that the description is up-to-date.

### ***Adapt education items to web and mixed mode questionnaires***

During this process, countries intending to use web or mixed mode questionnaires should pay particular attention to potential adaptations to these new modes. The ESS runs as a personal interview survey in all countries, and the education items have not been implemented in web or mixed mode settings yet. We are aware that the long lists of response options may be suboptimal for administration in web mode since they will make vertical scrolling necessary. Potential improvements that EVS country teams could consider might entail:

- splitting the education response categories into two sets, thus using two rather than just one education question, each with shorter lists of response options. Depending on the educational system and the ways respondents think about education in the country, this may be quite straightforward (in Germany for example, surveys always have a separate questionnaire item for school-leaving certificates and another for post-school qualifications).
- If this is not feasible, education categories that are quite similar in the ESS instrument can be merged together, and the distinguishing element could be asked about in a subsequent question. This may make sense e.g. in countries where upper secondary school-leaving may happen with or without matura, so that only the second question would ask about matura.
- Further ideas by EVS country teams are very welcome!

### ***Next steps and procedures***

1. EVS coordinators to supply EVS country teams with country-specific ESS education categories in Excel format, together with this document.
2. EVS country teams to check country-specific ESS education categories and provide feedback to the EVS coordinators (evs2017mg@gmail.com). Comments on specific education categories are best made directly in the Word template<sup>4</sup> (see Appendix D) and will be forwarded to GESIS.
3. GESIS to respond to country feedback either signing off suggestions or discussing problematic cases further with EVS country team until a consensual solution is found (with EVS coordinators in cc)
4. EVS country teams to derive education response list and show card (if using CAPI/PAPI mode) from Excel file. Make sure to use the country-specific response codes indicated in the Excel file to ensure consistency between measurement and harmonization. Formatting requirements will be communicated later.

## **B. List of national political parties**

To be used in questions:

**Q49 Which (political) party appeals to you most?**

**Q49a Is there another party that appeals to you?**

Please note: the wording of the question has changed since 2008.

---

<sup>4</sup> Country teams who also would like to check the mapping to official ISCED are invited to do so. You can find them here: <http://uis.unesco.org/en/isced-mappings>. Often ISCED 2011 mappings will still contain the ISCED 1997 information used for developing the mapping for the ESS, but minor differences are quite possible because these files are not versioned. The specific mappings used in the consultation for the ESS have unfortunately disappeared from the Eurostat and UNESCO websites.

Please check the classifications retrieved from the material of EVS 2008 (see sheet “Geographical codes” in the Excel classifications package) and inform us if any amendment has to be made. The most recently updated version of NUTS-classification (2016) is available in Appendix C.

When no NUTS-codes are available for your country, please create your own code based on the regional classifications approved by the Methodology Group. The code should resemble NUTS as much as possible.

- The CODE should start with the ISO-code for your country, e.g. RU for Russia.
- Zip and postal codes should be made available (but these will not be published in the data) and then recoded in regions resembling NUTS-1-2-3 (see official classifications in Appendix C).
- Please also provide us with national statistics regional codes that resemble NUTS as much as possible.

If already available, please check the classifications retrieved from the material of EVS 2008 (see sheet “Geographical codes” in the Excel classifications package) and inform us if any amendment has to be made.

**Other harmonized classifications** which are not country-specific are:

#### **F. Nationality (ISO 3166-1 and ISO 3166-3)**

To be used in questions:

**Q66 In which country were you born?**

**Q69 In which country was your father born?**

**Q71 In which country was your mother born?**

**Q88a In which country was your spouse/partner born?**

- See Appendix C

#### **G. Languages (ISO 639-1)**

To be used in questions:

**Q110 In which language was the interview conducted?**

- See Appendix C

#### **H. Occupations (ISCO08)**

To be used to recode the open field in questions:

**Q84a In your main job, what kind of work do/did you do most of the time?**

**Q92a In his or her main job, what kind of work do/did your partner most of the time?**

- See Appendix B

## Appendix A: ESS education scheme 'EDULVLB'

EDULVLB has a 3-digit hierarchical coding scheme which is closely linked to ISCED 2011.

### EDULVLB digit 1: duration of educational career in levels

The first digit of EDULVLB indicates the highest ISCED 2011 level successfully completed. These levels mostly reflect the duration of the educational career and can thus be regarded as ordinal. Table 1 shows how ISCED 2011 main levels relate to ISCED 1997 main levels.

Table 1: ISCED 2011 first digit and correspondence with ISCED 1997

First digit ISCED 2011	ISCED 2011 Label	Corresponds to ISCED 1997 level...	ISCED 1997 Label
0	Less than primary	0	Pre-primary
1	Primary	1	Primary
2	Lower secondary	2	Lower secondary
3	Upper secondary	3	Upper secondary
4	Post-secondary non-tertiary	4	Post-secondary non-tertiary
5	Short-cycle tertiary	5	First stage of tertiary
6	Bachelor level or equivalent	5	First stage of tertiary
7	Master level or equivalent	5	First stage of tertiary
8	Doctoral or equivalent	6	Second stage of tertiary

### EDULVLB digit 2: vocational and general orientation

The second (categorical) digit reflects programme orientation from ISCED 2011 levels 2 (lower secondary education) to 5 (below the degree level).

1. *General education* represents educational programmes that are designed to develop learners' general knowledge, capabilities and literacy and numeracy skills, often to prepare participants for further education at the same or a higher level. These programmes are typically school-based. (ISCED 2011 uses code 4 for this rather than 1.)
2. *Vocational programmes* are designed for learners to acquire the practical skills, know-how and understanding necessary for employment in a particular occupation or trade or class of occupations or trades. Vocational educational programmes may be school- and/or work-based. Successful completion of such programmes leads to a labour-market relevant vocational qualification. Vocational programmes may involve substantial amounts of content also taught in general programmes. Therefore, programmes that combine general and vocational education would be considered vocational if they conclude with a labor-market relevant qualification. (ISCED 2011 uses code 5 for this rather than 2.)

A similar kind of differentiation is more difficult to achieve within tertiary education (ISCED 5A in ISCED 1997 and ISCED levels 6 and 7 in ISCED 2011) and thus not reflected in ISCED.<sup>1</sup> From a social science research perspective, it is however important to reflect differentiation in higher education (see e.g. Arum et al. 2007). The ESS education scheme EDULVLB thus makes this additional distinction:

1. In those countries that have a binary or diversified system of higher education with different tertiary education institutions providing more selective academic or research oriented

---

<sup>1</sup> The available distinction in ISCED 1997 between 5A and 5B has not been well implemented by OECD countries (which largely overlap with ESS countries) since 5B is only used for post-secondary 2-3 year vocational programmes, but not for longer applied university/polytechnic programmes. These latter were equalised with research oriented university programmes despite the fact that they often prepare for specific occupations and usually do not give access to ISCED 1997 level 6. ISCED 2011 has not attempted to remedy this situation.

programmes on the one hand and less selective vocational or application oriented programmes on the other, code 1 on the second digit is used to denote vocationally oriented or applied programmes and degrees/qualifications ('lower tier'),

2. Code 2 to denote academically oriented degrees/qualifications ('upper tier'), awarded by universities 'strictly speaking'. In countries with a unified system of higher education, i.e. where all tertiary education is provided by the same kind of institution, all programmes are coded 2 on the second digit ('single tier'); code 1 is irrelevant in those countries.

### EDULVLB digit 3: selectivity and destination

The third digit reflects combinations of the complementary dimensions 'programme destination' and 'programme duration' at ISCED levels 2 to 4. This to some degree reflects selectivity in the educational system.

1. Qualifications from educational programmes that do not give access to a higher ISCED level, but are sufficiently long to be considered as completion of this level (terminal or dead-end programmes). (ISCED 2011 uses code 3 for this rather than 1.)
2. Qualifications from educational programmes that give access to vocational (technical/applied/lower tier<sup>2</sup>) programmes at a higher ISCED level, but not to general (academic/upper tier) programmes (e.g. pre-vocational programmes).
3. Qualifications from educational programmes that give access to general (academic/upper tier) *or all*, i.e. vocational *and* general or single tier programmes at a higher ISCED level (academically oriented or comprehensive programmes). (ISCED 2011 uses code 4 for this rather than 2 and 3.)
9. Qualifications from short educational programmes classified at the next higher level that are however too short for the resulting qualification to be considered as completion of that level. For example, a qualification from a vocational one-year programme following completion of ISCED level 2 is not advanced enough to be considered as completion of ISCED level 3 and thus classified at ISCED level 2, despite the fact that it requires completion of ISCED level 2 for entry.

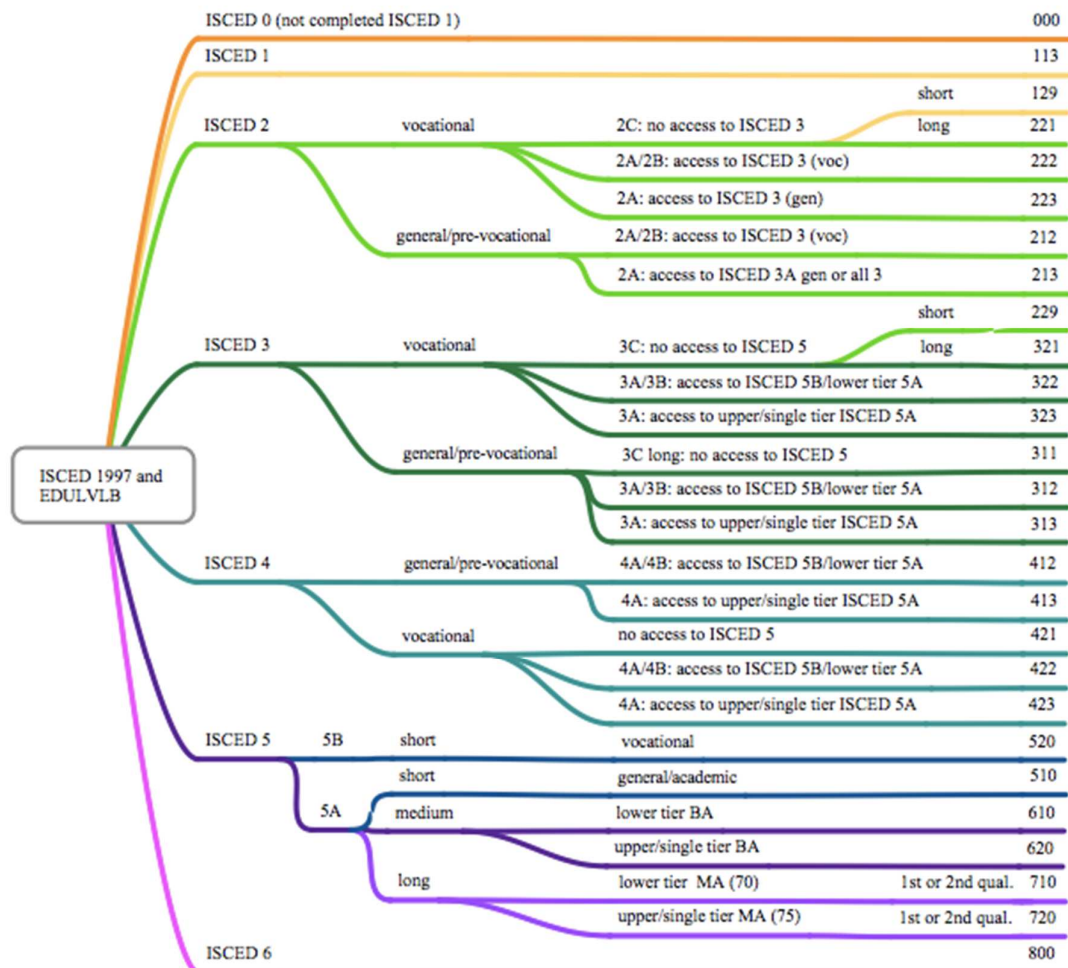

Although this looks like a large number of possible codes, many of them are implausible and do in fact not exist at all. At ISCED 1997 levels 1, 5 and 6 (levels 1 and 5 to 8 in ISCED 2011 and EDULVLB), the third digit is not used. Trailing zeroes are added to complete the three-digit code. The scheme only uses 27 different codes for educational qualifications. Also, not all types of qualifications exist in all countries, resulting in empty categories. To illustrate, Figure shows the 'classification tree' and associated codes for coding educational certificates into the ESS education scheme EDULVLB.

---

<sup>2</sup> Because the upper secondary level is sometimes differentiated by access to the different tiers of higher education (but both classified as ISCED 3A in ISCED 97), this additional distinction needs to be reflected in the destination criteria of upper secondary education, too. Countries with a unified system of higher education use the respective 'upper/single tier' category (code 3 on the third digit) in secondary education; code 2 is irrelevant in those countries.
