C.3 Sample Specifications

Between the 16th of June and the 18th of July 2003, The Gallup Organization Hungary carried out wave 2003.3 of the Candidate Countries Eurobarometer, at the common request of the EUROPEAN COMMISSION, Directorate-Generals Press and Communication and DG ICT and Gender, DG Justice and Home Affairs and DG Health and Consumer Protection.

The Candidate Countries Eurobarometer 2003.3 covers citizens of each of the countries that are applying for European Union membership aged 15 and over, with the exception of Estonia, Latvia and Cyprus. In Estonia and Latvia, the survey covered permanent residents aged 15 and over. In Cyprus, the sample covered the territory of the Republic of Cyprus only. The basic sample design applied in all Candidate Countries is a multi-stage, random (probability) one. In each country, a number of sampling points were drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Candidate Countries Region according to the EUROSTAT NUTS 2 (or equivalent; if there are no such regions, we used NUTS 3 or equivalent regions for sampling) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language. In countries with significant minorities the respondents had a chance to respond in their mother tongue (in Estonia, Latvia and Lithuania in Russian, and in Romania in Hungarian).

| Slovenia | CATI D.O.O. | 1000 | 18-June – 16-July | 1,980 |
| Turkey | KONSENSUS RESEARCH & CONSULTANCY | 1000 | 18-June – 30-June | 67,803 |
| Total number of interviews | | 12126 | | 172,748 |

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from population data from national statistics. For all Candidate Countries a weighting procedure, using marginal and intercellular weighting, was carried out, based on this Universe description. As such in all countries, gender, age, region NUTS 2, settlement size, household size, and education level were introduced in the iteration procedure. For international weighting (i.e. CC-13 averages), Gallup applies the official population figures as provided by national statistics. The total population figures for input in this post-weighting procedure are listed above.

The results of the Candidate Countries Eurobarometer studies are reported in the form of tables, data files and analyses. Per question a Table of results is given with the full question text in English. The results are expressed as a percentage of the total. The results of the Eurobarometer surveys are analysed and made available through the Directorate-General Press and Communication, Opinion Polls of the European Commission, Office: Brey 7/41, B-1049 Brussels. The results are published on the Internet server of the European Commission: http://europa.eu.int/comm/public_opinion/. All Eurobarometer datafiles are stored at the "Zentral Archiv" (Universität Köln, Bachemer Strasse, 40, D-50869 Köln-Lindenthal), available through the CESSDA Database <http://www.nsd.uib.no/cessda/europe.html>. They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits (in case of a sample of 1000 people – confidence intervals for N=500 sample are larger):

| | | | | | |
|----------------------|------------|------------|------------|------------|--------|
| Observed percentages | 10% or 90% | 20% or 80% | 30% or 70% | 40% or 60% | 50% |
| Confidence intervals | ± 1.9% | ± 2.5% | ± 2.7% | ± 3.0% | ± 3.2% |

C.4 Definition and weighted distribution of the socio-demographic and other variables used in cross-tabulations

C.4.1 Gender

The sample consists of the following breakdown by gender:

| | |
|-----------|------|
| (1) Men | 48 % |
| (2) Women | 52 % |

C.4.2 Age bands

On the basis of their age, respondents are grouped into the following four age bands:

| | |
|-----------------|------|
| (1) Aged 15 -24 | 21 % |
| (2) Aged 25 -39 | 29 % |
| (3) Aged 40 -54 | 25 % |
| (4) Aged 55+ | 25 % |

C.4.3 Terminal education age

Terminal education age represents recoded categories of answers to the following question :

"How old were you when you stopped full-time education?"

Respondents are grouped into the following 4 categories :

| | |
|---|------|
| (1) respondents who left school at age fifteen or younger | 40 % |
| (2) respondents who left school at ages 16 to 19 | 34 % |
| (3) respondents who stayed in school until they were aged 20 or older | 15 % |
| (4) respondents who are still studying | 11 % |

C.4.4 Main economic activity scale

The main economic activity scale represents recoded answers to the following question:

"What is your current occupation?"

The original question shows the following distribution:

Self – employed

| | |
|---|-----|
| (1) Farmer | 6 % |
| (2) Fisherman | 0 % |
| (3) Professional (lawyer, medical practitioner, accountant, etc.) | 1 % |
| (4) Owner of a shop, craftsman, self -employed person | 6 % |
| (5) Business proprietor, owner (full or partner) of a company | 1 % |

Employed

| | |
|---|-----|
| (6) Employed professional (employed doctor, lawyer, practitioner, accountant, architect) | 2 % |
| (7) General management, director or top management (managing director, director general, other director) | 1 % |
| (8) Middle management, other management (department head, junior manager, teacher, technician) | 4 % |
| (9) Employed position, working mainly at a desk | 4 % |
| (10) Employed position, not at a desk but travelling (salesman, driver, etc.) | 2 % |
| (11) Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc.) | 3 % |
| (12) Supervisor | 0 % |
| (13) Skilled manual worker | 8 % |
| (14) Other (unskilled) manual worker, servant | 3 % |

Non-active

| | |
|---|------|
| (15) Responsible for ordinary shopping and looking after the home, or without any current occupation, not working | 16 % |
| (16) Student | 11 % |
| (17) Unemployed or temporarily not working | 9 % |
| (18) Retired or unable to work through illness | 23 % |

The recoded categories and their distribution for the main economic activity scale are as follows:

| | |
|--|------|
| (1) Self employed = Farmer + Fisherman + Professional (lawyer, medical practitioner, accountant, architect, etc.) + Owner of a shop, craftsman, other self employed person + Business proprietor, owner (full or partner) of a company | 14 % |
| (2) Managers = Employed professional (employed doctor, lawyer, accountant, architect, etc.) + General management, director or top management (managing director, director general, other director) + Middle management, other management (department head, junior manager, teacher, technician) | 7 % |
| (3) Other white collars = Employed position, working mainly at a desk + Employed position, not at a desk but travelling (salesmen, driver, etc.) | 6 % |
| (4) Manual Workers = Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman, etc) + Supervisor + Skilled manual worker + Other (unskilled) manual worker, servant | 14 % |
| (5) House persons = Responsible for ordinary shopping and looking after the home, or without any current occupation, not working | 16 % |
| (6) Unemployed = Unemployed + temporarily not working | 9 % |
| (7) Retired = Retired + unable to work through illness | 23 % |
| (8) Still studying = Student | 11 % |

In the tables, the category "Still studying" is displayed as part of the Terminal Education Age variable

C.4.5 Size of locality

On the basis of their own evaluation, respondents are grouped into the following groups according to the size of their settlement:

| | |
|--------------------------------|------|
| (1) rural area or village | 40 % |
| (2) small or middle sized town | 32 % |
| (3) large town | 28 % |
