ISSP Study Description Form

Please use this form for reporting on Module 2006 and later!

Study title: **ISSP 2017 (Name of study in the Slovak Archive of Social data: ISSP Slovakia 2017)**

Fieldwork dates: Start: 2017-09-11
End: 2017-10-18

Principal investigators: Miloslav Bahna, Institute for Sociology of Slovak Academy of Sciences

Sample type: Two stage sampling procedure was used: 1) 200 primary sampling units (PSU) were chosen according to population characteristics, 2) in each PSU households were selected with a random walk procedure, one interview per household was conducted using the last birthday method.

Fieldwork institute: MEDIAN SK, s.r.o.

Fieldwork methods: Face to face interviews - CAPI

N. of respondents: number of respondents in the final ISSP file: 1404

Details about issued sample:

Please follow the standards laid down in AAPOR Standard Definitions:

http://www.aapor.org/AAPOR_Main/media/publications/Standard-Definitions20169theditionfinal.pdf

The numbers in the parentheses are those used in Tables 2 and 3 of Standard Definitions.

1. Total number of starting or issued names/addresses (gross sample size) *	2759
2. Interviews (1.0)	1404
3. Eligible, Non-Interview	
A. Refusal/Break-off (2.10)	296
B. Non-Contact (2.20)	690
C. Other	
i. Language Problems (2.33)	40
ii. Miscellaneous Other (2.31, 2.32, 2.35)	21
4. Unknown Eligibility, Non-Interview (3.0)
5. Not Eligible	
A. Not a Residence (4.50)	308
B. Vacant Residence (4.60)
C. No Eligible Respondent (4.70)
D. Other (4.10,4.90)

* When new sample units are added during the field period via a new dwelling units list or other standard updating procedure, these additional issued units are added to the starting number of units to make up the total gross sample size. Also, when substitution is used, the total must include the originally drawn cases plus all substitute cases.

Language(s): Slovak

Weight present: yes

Weighting procedure: Weight was constructed according to the stratification criteria (8 counties and 3 community / municipality categories by size) following demography characteristics: age group (7 categories), education (4 categories) and sex. No characteristics were combined in the procedure. An internal program of the fieldwork agency was used for weighting. Weight was limited to the interval 0,5 to 2.

Known systematic properties of sample: Respondents not speaking Slovak language and those living in non-private accommodation were not included. People from the lowest and from the highest educational group were under-represented.
