Acknowledgements

Standard & Special Eurobarometer surveys are conducted on behalf of the European Commission, under the responsibility of the Directorate-General Communication and on occasion requested by other departments according to the policy they deal with. From the outset the European Commission is generously granting access to Eurobarometer primary data for re-use in social science research and training.

The integrated original datasets and related materials are delivered by the respective survey research institute in charge of survey implementation and fieldwork co-ordination.

Preparation and documentation of Eurobarometer primary data for long term preservation and usability happen in a cooperative arrangement between the teams at Inter-University Consortium for Political and Social Research (ICPSR) and GESIS Data Archive for the Social Sciences.

Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (<http://zacat.gesis.org>), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1.2 Content

1.2.1 Abstract

This round of Eurobarometer surveys queried respondents on standard Eurobarometer measures such as public awareness of and attitudes toward the European Union (EU), and also focused on modern biotechnology, the common European currency, and privacy on computer networks.

With respect to modern biotechnology issues, respondents were asked for their opinions regarding which organizations should regulate modern biotechnology, and the likelihood that in the next 20 years biotechnology would lead to events such as reducing environmental pollution and world hunger, creating dangerous new diseases, solving more crimes through genetic fingerprinting, curing genetic diseases, and producing designer babies.

Computer network privacy issues covered respondents' worries about leaving 'electronic tracks' of personal identifying information when using computer network services and concerns about the use of information collected from network services for advertising, or by shops, insurance companies, or public bodies. Other data protection questions probed for respondents' willingness to use new communication technologies and electronic services considering that someone else might use their personal information, awareness and concern about using a means of payment on networks that might leave tracks, awareness of laws that protect privacy, the importance of the EU trying to protect personal information, and the importance of worldwide privacy of personal information. Also covered were respondent interest in on-screen computer or television network technologies and in the capabilities these technologies provide, such as getting a medical opinion on a health issue, an on-line guided tour of a museum, receiving instant access to newspapers, taking part in a training program, making it easier to look for a job, taking part in discussion groups, receiving and sending electronic mail, managing bank and financial accounts, and organizing a trip.

Common European currency items included whether respondents were for or against one European currency in all member states and why, how well-informed they felt about the common European currency, their knowledge of the conditions member countries must meet in order to join the European Economic and Monetary Union, when notes and coins in the European currency would be introduced, their own country's ability to take part in the Single European Currency in 1999, the consequences for not participating, and what the rate of introduction should be for the common European currency. Please notice that identical questions on European Currency+ Please notice have also been asked in the framework of Eurobarometer 46.0. It is recommended to analyse both in combination.

Questions asked only in Sweden concerned attitudes toward expanding or reducing nuclear power, the respondent's three favourite activities, and highest level of education completed.

Demographic items include age, gender, marital status, household size, monthly income, age when stopped full-time education, and occupation.

1.2.2 Topic classification

- International Institutions, Relations
- Technology
- Communication, Public Opinion
- Political Attitudes and Behavior

1.2.3 Related publications

- INRA (Europe) for the European Commission, Directorate General "Internal Market and financial services": Information Technology and Data Privacy. Brussels, January 1997.

1.3 Universe

In all, Eurobarometer 46.1 interviewed 16.246 citizens of the 15 countries in the European Union (nationals and non-nationals but EU-citizens). Respondents were aged 15 and over. Separate samples were drawn for Northern Ireland and East Germany. In addition 966 citizens aged 15 and over.

1.4 Sampling procedure

A multi-stage sampling design was used for this Eurobarometer. In the first stage, primary sampling units (PSU) were selected from each of the administrative regions in every country (i.e., Statistical Office of the European Community, EUROSTAT regions). PSU selection was systematic with probability proportional to population size, from sampling frames stratified by the degree of urbanization. In the next stage, a cluster of addresses was selected from each sampled PSU. Addresses were chosen systematically using standard random route procedures, beginning with an initial address selected at random. In each household, a respondent was selected, by a random procedure. Up to three recalls were made to obtain an interview with the selected respondent. No more than one interview was conducted in each household. Interviews were conducted face-to-face in respondents' homes in the appropriate national language. Sweden is using a random sample bought at the government census bureau. The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

From October 18 to November 22, 1996, International Research Associates of Europe, INRA (Europe), carried out the fieldwork for this Eurobarometer, at the request of the "Survey, Research, Analysis" Unit of the Directorate General X, "Information, Communication and Culture", of the European Commission. INRA (Europe) is a European network of market and public opinion research agencies, co-ordinated by the European Co-ordination Office (ECO), Avenue R.Vandendriessche 18, B-1150 Brussels.

1.6 Mode of data collection

In all member-states, fieldwork was conducted on the basis of detailed and uniform instructions prepared by the ECO.

INRA (Europe) developed equivalent French and English basic questionnaires for this Eurobarometer. These questionnaires were translated into other languages by the firms responsible for interviewing in each country.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTS adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the

Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 3) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

Eurobarometer 46.1 provides four (post-stratification) NATION WEIGHTS: NATION WEIGHT IIa (WEIGHT RESULT FROM TARGET) and NATION WEIGHT IIb (WEIGHT ADJUSTED TO STANDARD SIZE) for separate analysis or comparison of individual samples (countries or regions on sub-national level), NATION WEIGHT I (WEIGHT SPECIAL UNITED KINGDOM adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and NATION WEIGHT III (WEIGHT SPECIAL GERMANY adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ZA from INRA (EUROPE) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machine-readable documentation was created for this dataset by ZA.

To facilitate analyses of the data, ZA created new variables which consolidate information dispersed over two or more variables in the original INRA dataset (D.29, P.6, P.7, and P.13). Three variables containing condensed information were created by ZA for this Eurobarometer: NATION I, NATION III, and D.8R.

ZA also added "Inappropriate" (Inap.) codes to indicate intentionally skipped questions when it could be determined that the appropriate skip instruction in the INRA questionnaire was adhered to for (almost) every respondent.

Users should note that INRA has occasionally represented answers to a question by a series of binary "dummy" variables (i.e. variables which take on values of one and zero only) creating separate "dummy" variables to explicitly represent "Don't know", "No answer" or other residual responses, such as "None of the above". ZA has recoded these residual responses in the case of inconsistencies with respect to the series of principal answers.

ZA has recoded the missing answers (NA) represented in the INRA data set by blanks.

Question text and contingency text appearing in this codebook and ZA's machine-readable documentation is taken from INRA's English language version of the basic bilingual questionnaire. Coding schemes and other documentation are based on INRA's English language version of the basic bilingual questionnaire, INRA's codebook (in English) and INRA's SPSS setup for its dataset as received by ZA. Whenever a discrepancy occurs between INRA's codebook, questionnaires, SPSS setup and dataset with respect to the coding scheme of a variable, ZA has carried out any correction in agreement with INRA.

If the documentation for country-specific questions or coding is provided by INRA in other languages than English, ZA documents the original language wording and supplies the English translation in brackets.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens' Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between

1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001–2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

| Topic | (Over-)Sample | Eurobarometer Survey |
|--------------------|--------------------------|-----------------------------------|
| Young Europeans | Youth aged 15-24 | 17, 28.1, 34.2, 47.20VR, 55.10VR |
| Elderly Europeans | Elderly aged 60+ | 37.2 |
| Consumer Behaviour | Responsible for shopping | 41.0 |
| Unemployment | Unemployed | 44.30VR |
| Working Conditions | Professionally active | 37.0+1, 39.0+1 |
| Drug Abuse | Youth aged 15-24 | 43.0+1, 57.20VR |
| Education Issues | Youth aged 15-24 | 44.0 / 44.1 (data not integrated) |

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 3).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 4) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

| Standard and trend surveys | Fieldwork Dates | GESIS ID | Standard Report | Special topic | Subset |
|----------------------------|-----------------|----------|-----------------|---------------|--------|
| Eurobarometer 34.0 | Oct-Nov 1990 | ZA1960 | X | | |
| Eurobarometer 35.0 | March 1991 | ZA2031 | X | | |

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: <http://www.gesis.org/eurobarometer>

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

| Category | | Party Family |
|----------|-----------|--|
| | | |
| 0 | (001-099) | not affiliated / electoral alliances across "families" |
| 1 | (100-199) | Communists |
| 2 | (200-299) | Socialists |
| 3 | (300-399) | Liberals |
| 4 | (400-499) | Christian Democrats |
| 5 | (500-599) | Conservatives |
| 6 | (600-699) | Extreme Rights / Nationalists |
| 7 | (700-799) | Regionalists / Ethnic |
| 8 | (800-899) | Environmental parties |
| 9 | (900-949) | Agricultural parties |
| 9 | (950-989) | other special issue parties (e.g. Eurosceptics) and independents |
| | | |
| | 990 | other (spontaneous) |
| | 994 | not voting age |
| | 995 | empty ballot (blank) or invalid vote |
| | 996 | not voted / would not vote |
| | 997 | Refused |
| | 998 | DK / DK+NA if NA not coded separately |
| | 999 | INAP (inappropriate) |

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

| | | | |
|--------|----------------------------|----|-------------------|
| AT | Austria | HR | Croatia |
| BE | Belgium | HU | Hungary |
| BG | Bulgaria | IE | Ireland |
| CY | Cyprus | IT | Italy |
| CY-TCC | Turkish Cypriote Community | LT | Lithuania |
| CZ | Czech Republic | LU | Luxembourg |
| DE | Germany (-1989) | LV | Latvia |
| DE-W | Germany West (1990 ff.) | MK | Macedonia (FYROM) |
| DE-E | Germany East (1990 ff.) | MT | Malta |
| EE | Estonia | NL | The Netherlands |
| ES | Spain | PL | Poland |
| FI | Finland | PT | Portugal |
| FR | France | RO | Romania |
| GB | United Kingdom | SE | Sweden |
| GB-GBN | Great Britain | SI | Slovenia |
| GB-NIR | Northern Ireland | SK | Slovakia |
| GR | Greece | TR | Turkey |

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

| <p>CROSS-TABULATION: The absolute frequencies of the occurrence of values (<i>absolute values</i>) refer to the number of cases in the weighted dataset as indicated, in this case <i>weighted by V8</i>. The relative frequencies (<i>row percent</i>) refer to the valid cases (<i>n valid sum</i>), i.e. the total number of cases (<i>n sum</i>) reduced by the number of cases defined as missing data (<i>M</i>). For display and place saving reasons excluded countries or areas may be completely dropped from the table.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (<i>M</i>), i.e. <i>percent</i> on the basis of all cases (<i>sum</i>) and <i>valid percent</i> on the basis of the <i>valid cases</i>.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

5 Variable Documentation

Variable, Label

Question Text (English Language)

v1 - STUDY NUMBER - DISTRIBUTOR

Distributor Archive Study Number

Study number of the distributing archive.

v1

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|-------------|---------|-------|---------|---------------|
| 2899 | | | 17212 | 100.0 | 100.0 |
| | Sum | | 17212 | 100.0 | 100.0 |
| | Valid Cases | | 17212 | | |

v2 - STUDY NUMBER - PRODUCER

ZA Study Number

Study number of the data set producer.

v2

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|-----------------|---------|-------|---------|---------------|
| 2899 | ZA STUDY NUMBER | | 17212 | 100.0 | 100.0 |
| | Sum | | 17212 | 100.0 | 100.0 |
| | Valid Cases | | 17212 | | |

v3 - EDITION NUMBER

ZA/ICPSR Edition Number

The number identifying the release edition of this dataset.

1 1st codebook edition

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the corresponding release date.

v3

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|---|---------|-------|---------|---------------|
| 1 | 1ST CODEBOOK EDITION - release as of April 16, 2007 | | 17212 | 100.0 | 100.0 |
| | Sum | | 17212 | 100.0 | 100.0 |
| | Valid Cases | | 17212 | | |

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

| Value | Label | Missing | Count | Percent | Valid Percent |
|--------------------|-------------|---------|-------|---------|---------------|
| 1.1.0 (2012-07-01) | | | 17212 | 100.0 | 100.0 |
| | Sum | | 17212 | 100.0 | 100.0 |
| | Valid Cases | | 17212 | | |

v4 - EUROBAROMETER NUMBER

ZA/ICPSR Part Number

The number identifying the Eurobarometer sample.

- 1 Eurobarometer 46.0 (ZA study 2898)
- 2 Eurobarometer 46.1 (ZA study 2899)

v4

| Value | Label | Missing | Count | Percent | Valid Percent |
|-------|---------------|---------|-------|---------|---------------|
| 1 | EUROBARO 46.0 | 17212 | 100.0 | 100.0 | 100.0 |
| | Sum | | 17212 | 100.0 | 100.0 |
| | Valid Cases | | 17212 | | |

v5 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ZA

A unique serial number is assigned to each respondent.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

| Value | Label | Missing | Count | Percent | Valid Percent |

v6 - NATION I (UNITED KINGDOM)

Nation of interview I

15 EC countries including separate samples for East and West Germany

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 United Kingdom
- 10 Greece
- 11 Spain
- 12 Portugal
- 13 Germany (East)
- 14 Norway
- 15 Finland
- 16 Sweden
- 17 Austria

v6

| Value | Label | Missing | Count | Percent | Valid Percent |

| 17 | AUSTRIA | | 1009 | 5.9 | 5.9 |
| | Sum | | 17212 | 100.0 | 100.0 |
| | Valid Cases | | 17212 | | |

v7 - WEIGHT SPECIAL UNITED KINGDOM

Nation Weight I (WEIGHT SPECIAL UNITED KINGDOM)

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All nation weights are included.

Unlike the "Nation Weight I" in earlier Eurobarometer up to 31 this weight adjusts all samples to the standard size.

v8 - NATION II (GB AND NORTHERN IRELAND)

Nation of interview II

The two samples for the United Kingdom - Great Britain and Northern Ireland - are coded separately.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Germany (East)
- 15 Norway
- 16 Finland
- 17 Sweden
- 18 Austria

v8

v9 - WEIGHT RESULT FROM TARGET

Nation Weight IIa (WEIGHT RESULT FROM TARGET)

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EU country (NORWAY: real number of cases +39). Great Britain and Northern Ireland are treated as independent samples.

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometer up to 31.

v10 - WEIGHT ADJUSTED TO STANDARD SIZE

Nation Weight IIb (WEIGHT ADJUSTED TO STANDARD SIZE)

This variable corresponds to "Weight Result from Target" but adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 600 (Luxembourg). Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples.

v11 - NATION III (UNITED GERMANY)

Nation of interview III

East and West Germany are coded together: United Germany.

- 1 France
- 2 Belgium
- 3 The Netherlands
- 4 Germany (West+East)
- 5 Italy
- 6 Luxembourg
- 7 Denmark
- 8 Ireland
- 9 Great Britain
- 10 Northern Ireland
- 11 Greece
- 12 Spain
- 13 Portugal
- 14 Norway
- 15 Finland
- 16 Sweden
- 17 Austria

| | Valid Cases | | 17212 | | |

v12 - WEIGHT SPECIAL GERMANY

Nation Weight III (WEIGHT SPECIAL GERMANY)

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All nation weights are included and all samples adjusted to the standard size.

v13 - WEIGHT EURO 6

European Weight I (WEIGHT EURO 6)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 6 only refers to the six EC founder-members (France, Belgium, the Netherlands, West Germany, Italy and Luxembourg). This weight variable includes the national weights for each sample and contains the adjustment to the standard size. Norway is weighted by zero.

v14 - WEIGHT EURO 9

European Weight Ila (WEIGHT EURO 9)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 9 excludes Greece, Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size. Norway is weighted by zero.

v15 - WEIGHT EURO 10

European Weight IIb (WEIGHT EURO 10)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 10 excludes Spain, Portugal, East Germany, Finland, Sweden and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size. Norway is weighted by zero.

v16 - WEIGHT EURO 12

European Weight III (WEIGHT EURO 12)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12 excludes East Germany, Finland, Sweden, and Austria. This weight variable includes the national weights for each sample and contains the adjustment to the standard size. Norway is weighted by zero.

v17 - WEIGHT EURO 12 +

European Weight IV (WEIGHT EUROPE 12 +)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition:

EURO 12+ equals EURO 12 but includes East Germany.

v18 - WEIGHT EURO 15

European Weight Va (WEIGHT EUROPE 15)

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included.

Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometer up to 31 this weight contains the adjustment to the standard size. Norway is weighted by zero.

v19 - WEIGHT EURO + 3

European Weight Vb (WEIGHT EURO +3)

This variable contains weights that adjust each national sample of the three new member countries Finland, Sweden and Austria to it's nation's share in the total population of these three countries. The respective national weights and the adjustment to the standard size are included. All other countries are weighted by "zero".

v20 - Q1 NATIONALITY BELGIUM

Q.1

What is your nationality? Please tell me the country (or countries) that apply.

(MULTIPLE ANSWERS POSSIBLE)

v43 - Q6 TECHNOL CHANGE: NEW MATERIALS

Q.6

Science and technology change the way we live. I am going to read out a list of areas in which new technologies are currently developing.

For each of these areas, do you think it will improve our way of life in the next 20 years, it will have no effect, or it will make things worse?

(SHOW CARD)

Q.6e New materials or substances

0 NA

1 Will improve

2 No effect

3 Will make things worse

4 DK

v49 - Q8 KNOWL: VIRUS CONTAMINATED B BACTERIA

(READ OUT)

For the rest of the interview we are using the term "modern biotechnology" in a broad sense, that is including genetic engineering.

Q.8

Here are some statements. For each of them, please tell me whether you think it is true or false. If you don't know say so and we will skip to the next statement.

(READ OUT TOP/BOTTOM AND BOTTOM/TOP ALTERNATELY)

Q.8e Viruses can be contaminated by bacteria.

0 NA

1 True (correct answer)

2 False

3 DK

v68 - Q10 BIOTEC FOOD PRODUCTION: ENCOUR

Q.10

And now, some questions about various applications which are coming out of modern biotechnology.

(SHOW CARD WITH ITEM 1, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d)

(CODE "1" IF RESPONDENT SAYS "DEFINITELY AGREE", CODE "2" IF "TEND TO AGREE", CODE "3" IF "TEND TO DISAGREE", CODE "4" IF "DEFINITELY DISAGREE", AND CODE "5" IF "DK")

(SHOW CARD WITH ITEM 2, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d; THEN GO TO ITEM 3, ETC.)

Q.10_1a

First of all, could you please tell me whether you definitely agree, tend to agree, tend to disagree, or definitely disagree, that it is useful for society to ...

Use modern biotechnology in the production of foods, for example to make them higher in protein, keep longer or change the taste

Q.10_1d And to what extent do you agree or disagree that this application should be encouraged?

0 NA

1 Definitely agree

2 Tend to agree

3 Tend to disagree

4 Definitely disagree

v69 - Q10 BIOTEC GENES TO CROP PLANTS: USEFUL

Q.10

And now, some questions about various applications which are coming out of modern biotechnology.

(SHOW CARD WITH ITEM 1, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d)

(CODE "1" IF RESPONDENT SAYS "DEFINITELY AGREE", CODE "2" IF "TEND TO AGREE", CODE "3" IF "TEND TO DISAGREE", CODE "4" IF "DEFINITELY DISAGREE", AND CODE "5" IF "DK")

(SHOW CARD WITH ITEM 2, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d; THEN GO TO ITEM 3, ETC.)

Q.10_2a

And what do you think of taking genes from plant species and transferring them into crop plants, to make them more resistant to insect pests?

To what extent do you agree or disagree that this application is useful for society?

0 NA

1 Definitely agree

2 Tend to agree

3 Tend to disagree

4 Definitely disagree

v72 - Q10 BIOTEC GENES TO CROP PLANTS: ENCOUR

Q.10

And now, some questions about various applications which are coming out of modern biotechnology.

(SHOW CARD WITH ITEM 1, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d)

(CODE "1" IF RESPONDENT SAYS "DEFINITELY AGREE", CODE "2" IF "TEND TO AGREE", CODE "3" IF "TEND TO DISAGREE", CODE "4" IF "DEFINITELY DISAGREE", AND CODE "5" IF "DK")

(SHOW CARD WITH ITEM 2, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d; THEN GO TO ITEM 3, ETC.)

Q.10_2a

And what do you think of taking genes from plant species and transferring them into crop plants, to make them more resistant to insect pests?

To what extent do you agree or disagree that this application is useful for society?

Q.10_2d To what extent do you agree or disagree that this application should be encouraged?

0 NA

1 Definitely agree

2 Tend to agree

3 Tend to disagree

4 Definitely disagree

v77 - Q10 BIOTEC GENETIC MODIF ANIMALS: USEFUL

Q.10

And now, some questions about various applications which are coming out of modern biotechnology.

(SHOW CARD WITH ITEM 1, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d)

(CODE "1" IF RESPONDENT SAYS "DEFINITELY AGREE", CODE "2" IF "TEND TO AGREE", CODE "3" IF "TEND TO DISAGREE", CODE "4" IF "DEFINITELY DISAGREE", AND CODE "5" IF "DK")

(SHOW CARD WITH ITEM 2, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d; THEN GO TO ITEM 3, ETC.)

Q.10_4a

And what do you think of developing genetically modified animals for laboratory research studies, such as a mouse that has genes which causes it to develop cancer?

To what extent do you agree or disagree that this application is useful for society?

0 NA

1 Definitely agree

2 Tend to agree

3 Tend to disagree

4 Definitely disagree

5 DK

(SHOW CARD WITH ITEM 2, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d; THEN GO TO ITEM 3, ETC.)

Q.10_5a

And what do you think of introducing human genes into animals to produce organs for human transplants, such as into pigs for human heart transplants?

To what extent do you agree or disagree that this application is useful for society?

0 NA

1 Definitely agree

2 Tend to agree

3 Tend to disagree

4 Definitely disagree

v86 - Q10 BIOTEC DETECT INHER DISEASES: RISKY

Q.10

And now, some questions about various applications which are coming out of modern biotechnology.

(SHOW CARD WITH ITEM 1, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d)

(CODE "1" IF RESPONDENT SAYS "DEFINITELY AGREE", CODE "2" IF "TEND TO AGREE", CODE "3" IF "TEND TO DISAGREE", CODE "4" IF "DEFINITELY DISAGREE", AND CODE "5" IF "DK")

(SHOW CARD WITH ITEM 2, 4 DIMENSIONS AND SCALE: ASK a, THEN b, THEN c, THEN d; THEN GO TO ITEM 3, ETC.)

Q.10_6a

And what do you think of using genetic testing to detect diseases we might have inherited from our parents such as cystic fibrosis, mucoviscidosis, thalassaemia (USE THE BEST KNOWN EXAMPLE IN EACH COUNTRY)?

To what extent do you agree or disagree that this application is useful for society?

Q.10_6b To what extent do you agree or disagree that this application is risky for society?

0 NA

1 Definitely agree

2 Tend to agree

3 Tend to disagree

4 Definitely disagree

v99 - Q12 BIOTEC REGULATIONS - BEST BODY

Q.12

Which one of the following bodies do you think is best placed to regulate modern biotechnology?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

0 NA

1 International organisations such as the United Nations (UN), the World Health Organisation (WHO)

2 Public bodies in (OUR COUNTRY)

3 Ethics committees

4 Our national parliament

5 The European Union, public bodies in the European Union

6 Scientific organisations

7 None of these (SPONTANEOUS)

8 DK

v123 - Q14C BIOTEC INFO CONF - TRANSPLANTS

Q.14a

SPLIT BALLOT B

Now, I would like to know which one of the following organisations you have confidence in, to tell you the truth about modern biotechnology.

(SHOW CARD - ONE ANSWER ONLY)

Q.14c And to tell you the truth about introducing human genes into animals to produce organs for human transplants?

0 NA

1 Consumer organisations

2 Environmental organisations

3 Animal welfare organisations

4 The medical profession

5 Farmer's organisations

6 Religious organisations

7 National public bodies

8 International public bodies

9 Industry

10 Universities

11 Political parties

12 Television and newspapers

13 None of these (SPONTANEOUS)

14 DK

99 INAP., Split ballot A (coded 1 in V320)

Note:

See V320 for split ballot

v124 - Q15 BIOTECHNOLOGY ISSUES - IMPORTANCE

Q.15

We've been discussing several issues to do with modern biotechnology. Some people think these issues are very important whilst others don't. How important are these issues to you personally?

(SHOW CARD - READ OUT)

If you think this is not at all important, you give a score of 1. The scores between 1 and 10 allow you to say how close to either side you are.

1 Not at all important

2 ...

3 ...

4 ...

5 ...

6 ...

7 ...

8 ...

9 ...

10 Extremely important

97 Refusal

v173 - Q26 EU MONETARY UNION CONDITIONS KNOWN

Q.26

The "European Union Treaty" which was signed and ratified by all member states, says that European Economic and Monetary Union will start fully by January 1999 at the latest. From then on exchange rates will be locked between the countries which meet the relevant conditions of the Treaty. After that, one European currency, the Euro, will replace national currencies. Do you know any of the conditions member countries must meet in order to join the European Economic and Monetary Union?

(IF YES)

Please tell me which ones.

v176 - Q26 EU MONETARY UNION COND - DEFICIT

Q.26

The "European Union Treaty" which was signed and ratified by all member states, says that European Economic and Monetary Union will start fully by January 1999 at the latest. From then on exchange rates will be locked between the countries which meet the relevant conditions of the Treaty. After that, one European currency, the Euro, will replace national currencies. Do you know any of the conditions member countries must meet in order to join the European Economic and Monetary Union?

(IF YES)

Please tell me which ones.

v182 - Q28 COMMON CURRENCY - PART COUNTRY 1999

Q.28

1999 will be the year when member states participating in the European Single Currency will be selected and 2002, the year when the euro will actually be introduced. Selection of the participating member states will be made on the basis of a number of criteria such as a low inflation rate, limited interest rates, limited public budget deficit, etc.

Do you think that (OUR COUNTRY) will certainly, probably, probably not or certainly not be ready to take part in the Single European Currency in 1999?

v228 - Q41 EURO SINGLE MARKET NEED - 2ND REACT

Q.41a

And what about this message: "A SINGLE MARKET NEEDS A SINGLE CURRENCY"

Which of the following sentences best describes your first reaction?

(SHOW CARD - ONE ANSWER ONLY)

Q.41b

Is there possibly a second one?

(SHOW CARD - ONE ANSWER ONLY)

- 1 It tells me something new
- 2 It makes me enthusiastic
- 3 It is convincing for me
- 4 It is attractive but it seems rather difficult
- 5 It leaves me cold
- 6 It's been talked about for a long time, but nothing seems to happen
- 7 It's impossible, it's just a dream
- 8 It irritates me because I am against the Euro
- 9 Other (SPONTANEOUS)
- 10 DK/NO/NA

v245 - Q44 NETWORK SERVICES: MEDICAL OPINION

Now, let's talk about another topic, information technology and data privacy. Information and communication technologies are becoming more and more prominent in our private and professional lives. It is now possible to link computers, telephones, televisions, video recorders and communication satellites. These so-called "information super-highways" provide access to the information society. So, for example, you can get in contact with different people, different service suppliers, etc. all over the world from your computer, your television or your phone.

Q.44

By using communication network such as Internet from your computer, teletext (EQUIVALENT IN EACH COUNTRY) from your television, etc. you can get access to different services. For each of the services I read out, could you please tell me if it interests you, or not.

(SHOW CARD - READ OUT TOP/BOTTOM AND BOTTOM/TOP ALTERNATELY)

Q.44_1 Getting a medical opinion on a health issue, on line on your computer or television screen, for example, getting an explanation of an X-ray or a blood test

v247 - Q44 NETWORK SERVICES: DEBATE POLITICIAN

Now, let's talk about another topic, information technology and data privacy. Information and communication technologies are becoming more and more prominent in our private and professional lives. It is now possible to link computers, telephones, televisions, video recorders and communication satellites. These so-called "information super-highways" provide access to the information society. So, for example, you can get in contact with different people, different service suppliers, etc. all over the world from your computer, your television or your phone.

Q.44

By using communication network such as Internet from your computer, teletext (EQUIVALENT IN EACH COUNTRY) from your television, etc. you can get access to different services. For each of the services I read out, could you please tell me if it interests you, or not.

(SHOW CARD - READ OUT TOP/BOTTOM AND BOTTOM/TOP ALTERNATELY)

v253 - Q44 NETWORK SERVICES: DISCUSSION GROUPS

Now, let's talk about another topic, information technology and data privacy. Information and communication technologies are becoming more and more prominent in our private and professional lives. It is now possible to link computers, telephones, televisions, video recorders and communication satellites. These so-called "information super-highways" provide access to the information society. So, for example, you can get in contact with different people, different service suppliers, etc. all over the world from your computer, your television or your phone.

Q.44

By using communication network such as Internet from your computer, teletext (EQUIVALENT IN EACH COUNTRY) from your television, etc. you can get access to different services. For each of the services I read out, could you please tell me if it interests you, or not.

(SHOW CARD - READ OUT TOP/BOTTOM AND BOTTOM/TOP ALTERNATELY)

v259 - Q47 NETWORK SERVICE USAGE - CONDITIONS

Q.47

Which of the following opinions comes closest to your own?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

0 NA

- 1 I would not use the new communication technologies and new services they offer, because the risk that someone could use my personal information in a way I do not agree with seems to me to be too great
- 2 I would not hesitate to use these new technologies and new services if there was a way to guarantee that I could control how my personal information would be used
- 3 I would use these technologies and services anyway, because when you use a bank or credit card, for instance, you also leave personal information tracks
- 4 I would use these new technologies and services, but as little as possible so as to leave the least possible personal information
- 5 I already use these new technologies and services, but as little as I can so as to leave the least possible personal information
(SPONTANEOUS)
- 6 I already use these new technologies and services (SPONTANEOUS)
- 7 None of these (SPONTANEOUS)
- 8 DK

v260 - Q48 NETWORK SERV PURCHASE - CONDITIONS

Q.44

By using communication network such as Internet from your computer, teletext (EQUIVALENT IN EACH COUNTRY) from your television, etc. you can get access to different services. For each of the services I read out, could you please tell me if it interests you, or not.

Q.48

Thinking about the ways of paying for goods and services which can be bought on these networks, which of the following opinions comes closest to your own?

(SHOW CARD - READ OUT - ONE ANSWER ONLY)

0 NA

- 1 I would be prepared to use any means of payments, even those leaving tracks
- 2 I would be prepared to use any means of payments, even those leaving tracks, provided this information is used only to enable me to control and check my expenses
- 3 I would not be prepared to use means of payments which leave tracks
- 4 It depends, I want a choice (SPONTANEOUS)
- 5 I wouldn't buy any products or services on these networks (SPONTANEOUS)
- 6 None of these (SPONTANEOUS)
- 7 DK

v269 - Q50 DATA PROTECTION - EU LAWS KNOWN

Q.50

In the European Union, there are laws which aim to protect your private life and to set rules about the use of information about you. These laws, for instance, make it compulsory to have your agreement to use the information and to give you the right to oppose some uses that you do not want, or do not want anymore. Before today, had you heard about these laws, or not?

v278 - D8B TRAINING IN: ENGENEERING

D.8b

IF RESPONDENT'S SCHOOL LEAVING AGE IS 19 OR OVER, OR STILL STUDYING

Since the age of 19, have you or have you not had any training in:

D.8b1 Physical sciences/engineering

- 0 NA
- 1 YES
- 2 NO
- 3 DK
- 6 NO for all items
- 7 DK for all items
- 8 Not applicable
- 9 INAP., left school before aged 19 (coded 6-18 in V276)

Note:

Filter was not correctly applied in all countries and has subsequently been corrected by the archive. A maximum of 27 substantial responses ("YES") have been overwritten (V278 n=24, V279 n=16, V280 n=23, V281 n=27, V282 n=16, V283 n=19, V284 n=17, V285 n=27, V286 n=4, V287 n=5, V288 n=14, V289 n=15). The additional non-specific category NOT APPLICABLE (partly with different specifications in the national field questionnaires) has only been recoded to '8' for each item variable if no responses ("YES", "NO", oder "DK") were coded for any of the variables. Categories 6 ("NO for all items") and 7 ("DK for all items") have been added by the archive.

v282 - D8B TRAINING IN: CHEMISTRY

D.8b

IF RESPONDENT'S SCHOOL LEAVING AGE IS 19 OR OVER, OR STILL STUDYING

Since the age of 19, have you or have you not had any training in:

D.8b5 Chemistry

- 0 NA
- 1 YES
- 2 NO
- 3 DK
- 6 NO for all items
- 7 DK for all items
- 8 Not applicable
- 9 INAP., left school before aged 19 (coded 6-18 in V276)

Note:

Filter was not correctly applied in all countries and has subsequently been corrected by the archive. A maximum of 27 substantial responses ("YES") have been overwritten (V278 n=24, V279 n=16, V280 n=23, V281 n=27, V282 n=16, V283 n=19, V284 n=17, V285 n=27, V286 n=4, V287 n=5, V288 n=14, V289 n=15). The additional non-specific category NOT APPLICABLE (partly with different specifications in the national field questionnaires) has only been recoded to '8' for each item variable if no responses ("YES", "NO", oder "DK") were coded for any of the variables. Categories 6 ("NO for all items") and 7 ("DK for all items") have been added by the archive.

v287 - D8B TRAINING IN: ECOLOGY

D.8b

IF RESPONDENT'S SCHOOL LEAVING AGE IS 19 OR OVER, OR STILL STUDYING

Since the age of 19, have you or have you not had any training in:

D.8b10 Ecology

- 0 NA
- 1 YES
- 2 NO
- 3 DK
- 6 NO for all items
- 7 DK for all items
- 8 Not applicable
- 9 INAP., left school before aged 19 (coded 6-18 in V276)

Note:

Filter was not correctly applied in all countries and has subsequently been corrected by the archive. A maximum of 27 substantial responses ("YES") have been overwritten (V278 n=24, V279 n=16, V280 n=23, V281 n=27, V282 n=16, V283 n=19, V284 n=17, V285 n=27, V286 n=4, V287 n=5, V288 n=14, V289 n=15). The additional non-specific category NOT APPLICABLE (partly with different specifications in the national field questionnaires) has only been recoded to '8' for each item variable if no responses ("YES", "NO", oder "DK") were coded for any of the variables. Categories 6 ("NO for all items") and 7 ("DK for all items") have been added by the archive.

v305 - D29 INCOME HH

D.29

We also need some information about the income of this household to be able to analyse the survey results for different types of households. Here is a list of income groups.

(SHOW CARD)

Please count the total wages and salaries per month of all members of this household; all pensions and all social insurance benefits; child allowances and any other income like rents, etc... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter (non-alphabetical, irregular order) of the income group your household falls into before tax and other deductions.

in France (FR):

French francs per month

- 1 Less than 4.000
- 2 4.000 to 4.999
- 3 5.000 to 5.999
- 4 6.000 to 6.999
- 5 7.000 to 7.999
- 6 8.000 to 8.999
- 7 9.000 to 9.999
- 8 10.000 to 10.999
- 9 11.000 to 12.499
- 10 12.500 to 14.999
- 11 15.000 to 17.499
- 12 17.500 or more
- 97 Refusal
- 98 DK

in Belgium (BE):

Belgian francs per month

v306 - D29 INCOME HH QUARTILES

D.29R Household income (HARMONISED)

- 1 -- (Lowest income quartile)
- 2 - (Next to lowest income quartile)
- 3 + (Next to highest income quartile)
- 4 ++ (Highest income quartile)
- 5 DK / refusal
- 9 INAP., not asked in Norway (coded 15 on V8)

Derivation:

This variable collapses answers to D.29 into four groups representing approximate quartiles.

Note:

See D.29 for complete question text

v312 - P6 SIZE OF COMMUNITY

P.6 (Objective) Size of locality

in France (FR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants
- 5 Paris

in Belgium (BE):

- 1 Grands centres
- 2 Localites urbaine
- 3 Localites secondaire
- 4 Autres localites

in Netherlands (NL):

- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 400.000
- 7 400.000 and more inhabitants

in Germany (DE):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 20.000
- 4 20.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 500.000
- 7 500.000 and more inhabitants

in Italy (IT):

- 1 less than 10.000
- 2 10.000 - less than 100.000
- 3 100.000 - less than 250.000
- 4 250.000 and more inhabitants

in Luxembourg (LU):

- 1 less than 2.500
- 2 2.500 - less than 5.000
- 3 5.000 - less than 10.000

- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 and more inhabitants (Luxembourg ville)

in Denmark (DK):

- 1 less than 2.000
- 2 2.000 - less than 5.000
- 3 5.000 - less than 10.000
- 4 10.000 - less than 20.000
- 5 20.000 - less than 50.000
- 6 50.000 - less than 100.000
- 7 100.000 and more inhabitants

in Ireland (IE):

- 1 less than 2.000
- 2 2.000 less than 20.000
- 3 20.000 less than 100.000
- 4 100.000 and more inhabitants

in Great Britain (GB_GBN):

- 1 Metropolitan
- 2 Other 100 % urban
- 3 Mixed urban/rural
- 4 Rural

in Northern Ireland (GB_NIR):

- 1 less than 2.000
- 2 2.000 - less than 20.000
- 3 20.000 - less than 100.000
- 4 100.000 and more inhabitants

in Greece (GR):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 1.000.000
- 5 1.000.000 and more inhabitants

in Spain (ES):

- 1 less than 2.000
- 2 2.000 - less than 10.000
- 3 10.000 - less than 50.000
- 4 50.000 - less than 100.000
- 5 100.000 - less than 300.000
- 6 300.000 - less than 500.000
- 7 500.000 - less than 1.000.000
- 8 1.000.000 and more inhabitants

in Portugal (PT):

- 1 less than 100
- 2 100 - less than 200
- 3 200 - less than 500
- 4 500 - less than 1.000
- 5 1.000 - less than 2.000
- 6 2.000 - less than 5.000
- 7 5.000 - less than 10.000
- 8 10.000 - less than 20.000
- 9 20.000 - less than 100.000
- 10 100.000 - less than 500.000
- 11 500.000 and more inhabitants

in Norway (NO):

- 99 INAP., not asked in Norway (coded 15 in V8)

in Finland (FI):

- 1 Helsinki area
- 2 Turku/Tampere
- 3 Other cities
- 4 Rural centre

in Sweden (SE):

- 0 NA
- 1 less than 5.000
- 2 5.000 - less than 10.000
- 3 10.000 - less than 30.000
- 4 30.000 - less than 50.000
- 5 50.000 - less than 100.000
- 6 100.000 - less than 150.000
- 7 150.000 and more inhabitants

in Austria (AT):

- 1 Rural
- 2 Mixed urban/rural
- 3 Urban
- 4 Metropolitan

- 2 Tirol
- 3 Salzburg
- 4 Ober-Österreich (Upper Austria)
- 5 Steiermark (Styria)
- 6 Kärnten (Carinthia)
- 7 Nieder-Österreich (Lower Austria)
- 8 Burgenland
- 9 Wien (Vienna)

Note:

In the cases of France, West Germany, Italy, Ireland and the United Kingdom "Region I" corresponds to the variable labelled "Province" in earlier Eurobarometer up to number 31. If indicated, "Region I" units are consistent with the EUROSTAT nomenclature

for regional statistics (NUTS).

East Germany: Starting with Eurobarometer 44.2bis the Eurobarometer are considering the new East German regional units as resulting from the regional reforms 1992-94. The new regional units on NUTS II level (Regierungsbezirke) for Sachsen-Anhalt are Dessau, Halle, and Magdeburg; the new units for Sachsen (Chemnitz, Dresden, Leipzig) are only considered starting with Eurobarometer 48. REGION I categories used in former surveys up to number 44.1 are based on ex-GDR administrative units (Bezirke) and are not comparable to the new categories even if identical names are used. The almost unchanged NUTS I unit (Bundesland) Sachsen-Anhalt in Eurobarometer REGION II for example was formerly only composed of Halle and Magdeburg. The East German federal units (Neue Bundesländer) Brandenburg, Mecklenburg-Vorpommern, and Thüringen are not subdivided on NUTS II level.

- 4 Wales
- 5 South East
- 6 South West
- 7 Northern Ireland

in Spain (ES):

Agrupacion de comunidades autonomas

- 1 Galicia
- 2 North
- 3 North-East
- 4 Aragon, Rioja
- 5 Madrid
- 6 Centre
- 7 Cataluna
- 8 East
- 9 South
- 10 Canarias

in Germany - East (DE_E):

Bundesländer (EUROSTAT NUTS I LEVEL)

- 11 Berlin (Ost)
- 12 Brandenburg
- 13 Mecklenburg-Vorpommern

- 14 Sachsen
- 15 Sachsen-Anhalt
- 16 Thüringen

in Finland (FI):

Suuralueet (EUROSTAT NUTS II LEVEL)

- 1 Uusimaa
- 2 Etelä-Suomi
- 3 Itä-Suomi
- 4 Väli-Suomi
- 5 Pohjois-Suomi

Note:

Only in the case of West Germany "Region II" corresponds to the variable labelled "Region" in earlier Eurobarometers up to 31. If indicated, "Region II" units are consistent with the EUROSTAT nomenclature for regional statistics (NUTS).

East Germany: Starting with Eurobarometer 44.2bis the East German federal units (Neue Bundesländer) are not any more constructed from the ex-GDR administrative regional units (Bezirke). There may be minor changes in the real territorial outline of each unit in comparison with the categories as constructed in former Eurobarometer up to survey number 44.1.

Starting with Eurobarometer 34 and up to survey 61, NUTS 1 level data (REGION II) for the NETHERLANDS are not (re-)coded in accordance with the official EUROSTAT nomenclature of territorial unit statistics. The NUTS 2 level province ZEELAND should be decoded as belonging to NUTS 1 region (landsdel) WEST instead of SOUTH Netherlands. Archive releases have been corrected from EB 51 onwards.

v317 - C1 OPINION LEADERSHIP INDEX

C.1 OPINION LEADERSHIP INDEX

Cognitive Mobilisation Index 1

0 DK / NA

1 -- low

2 -

3 +

4 ++ high

Derivation:

This index is based on the answers to the following two questions: "When you, yourself hold a strong opinion, do you ever find yourself persuading your friends, relatives or fellow workers to share your views? If so, does this happen often, from time to time or rarely?" (Q.3) and "When you get together with your friends, would you say you discuss political matters frequently, occasionally or never?" (Q.2). Interviewees giving affirmative answers to both questions are labelled ++. Interviewees giving negative answers to both questions are labelled --. Middle categories (+ and -) are constituted correspondingly.

CODE 0: coded 0 or 5 for V36 and 0 or 4 for V35

CODE 1: coded 3, 4, 5 or 0 for V36 and 3 for V35; or coded 3 or 4 for V36 and 3, 4 or 0 for V35

CODE 2: coded 3, 4, 5 or 0 for V36 and 2 for V35; or coded 1 or 2 for V36 and 3, 4 or 0 for V35

CODE 3: coded 3, 4, 5 or 0 for V36 and 1 for V35; or coded 1 or 2 for V36 and 2 for V35

CODE 4: coded 1 or 2 for V36 and 1 for V35

This variable forms an indicator of the individual's potential to take an active role in the political process. For a complete discussion of this variable and its correlates see Ronald Inglehart, *The Silent Revolution: Changing Values and Political Styles among Western Publics* (Princeton University Press, 1977).

v318 - C4 SOCIO PROF STATUS

C.4 SOCIO PROFESSIONAL STATUS

- 0 Other answers (never any paid work, NA)
- 1 Farmer and fisher
- 2 Professionals
- 3 Owner of a shop, craftsmen, other self employed position
- 4 Business proprietors, owner of a company
- 5 Employed professional
- 6 General management
- 7 Middle management
- 8 Employed position, working mainly at a desk
- 9 Employed position , not at a desk but travelling
- 10 Employed position, not at a desk but in a service job
- 11 Supervisors
- 12 Skilled manual workers
- 13 Other (unskilled) manual worker

Derivation:

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative is to base analyses on (non-marxist) concept of "objective social class" using "occupation of the head of household" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called "socio-professional status" of the main income earner (MIE). The following standard was used if the respondent is the MIE: For those in paid work it is based on the respondents' own present occupation (D.15A). For those not in paid work, "former occupation" (D.15B) was used, if applicable. If the respondent is not the MIE, the occupation of the "person who contributes most to the household income" (D.21A) was used and if the head of household was not performing paid works at the time of the interview, his or her "former occupation" (D.21B) was used, if applicable.

Consequently, socio-professional status is a classification "that comes as close to the respondent himself/herself as possible" but that draws upon additional background information to the extent necessary and available, in order to avoid a single measure of interviewees' socio-professional setting and to include the maximum number of respondents in the respective analyses. See also standard report EURO-BAROMETER 46, May 1997, Brussels, C.7

v319 - C14 OCCUPATION OF RESPONDENT - SCALE

C.14 Respondent Occupation Scale

0 Other answers (Coded 2, 4 or 0 for V297)

1 Self employed (Coded 5 to 9 for V297)

2 Managers (Coded 10 to 12 for V297)

3 Other white collars (Coded 13 or 14 for V297)

4 Manual workers (Coded 15 to 18 for V297)

5 House persons (Coded 1 for V297)

6 Unemployed (Coded 3 for V297)

Derivation:

This scale is based on a combination / selection of the current respondent occupation variable D.15a; see also standard report EUROBAROMETER 46, May 1997, Brussels, C.7.

v321 - ORIGINAL RESPONDENT ID

Original Respondent Identification Number

This is the original respondent identification number as supplied by INRA. The first two digits identify the country of interview (01: Belgium; 02: Denmark; 03: West Germany; 04: Greece; 05: Italy; 06: Spain; 07: France; 08: Ireland; 09: Northern Ireland; 10: Luxembourg; 11: Netherlands; 12: Portugal; 13: Great Britain; 14: East Germany; 15: Norway; 16: Finland; 17: Sweden; 18: Austria). The remaining four digits contain the country-specific questionnaire numbers.

Note:

Actual number is coded
