## **1 GENERAL INFORMATION**

### **1.1 Acknowledgement of Assistance**

All manuscripts utilizing the data documented in this codebook should identify the original collectors of the data. All users are urged to include some adaptation of the following statement in their publication (the brackets indicate items which can be inserted or deleted as appropriate):

The data (and tabulations) utilized in this (publication) were originally collected for the European Election Study research group and Eurobarometer, consisting of Roland Cayrol, Cees van der Eijk, Mark Franklin, Renato Mannheimer, Michael Marsh, Karlheinz Reif and Hermann Schmitt. Fieldwork was carried out by INRA Europe. This study has been made possible with grants from the German National Science Foundation (DFG), the Dutch National Science Foundation (NWO), the University of Amsterdam, the University of Mannheim, and with the cooperation of the Commission of the European Communities. The original collectors of the data do not bear any responsibility for the analyses or interpretations published here. The data are archived at the Zentralarchiv in Cologne with numbers S2866 (wave 1), S2867 (wave 2), S2868 (wave 3) and S2869 (wave 4) and are also distributed by the Zentralarchiv für Empirische Sozialforschung, Cologne, Germany.

In order to provide funding agencies with essential information about the use of the data that have been collected with their assistance, each user of the data is expected to send two copies of each completed manuscript to:

European Election Study research group  
Zentralarchiv für Empirische Sozialforschung  
Bachemerstrasse 40  
50931 Cologne  
Germany

## 1.2 Introduction and Study Design

The European Election Study 1994 is a survey study of the electorates of the member states of the European Community: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain and the United Kingdom. It focusses in particular on the fourth elections to the European Parliament, which were conducted in June 1994.

The study essentially consists of a survey conducted immediately after the European Parliament election of June 1994. Variables of three other surveys -- surrounding Eurobarometer surveys -- are documented and included in addition. The first two of these (Eurobarometers 40 and 41) took place before the European elections, in October-November 1993 and in April - May 1994 respectively. The third was (Eurobarometer 42) conducted in November - December 1994. The questionnaires of the study were identical in the various member states, apart from minor but unavoidable differences generated by differences in party names and country-specific institutions. As a consequence the study offers wide opportunities for comparative voting studies.

While the main wave is the postelectoral survey, the other three interviews have partially overlapping contents. Some of the questions have been included in two, a few in three or all four of the interviews, thus offering opportunities for longitudinal comparisons of voter behavior and voter orientations. The four waves of interviews constitute a repeated cross-section study, that is, they have been conducted on three independently drawn random samples of the populations of the member states of the European Community. Consequently, longitudinal comparisons can only be made for aggregates, not for individual respondents.

The contents of the four interviews is described in brief in the VARIABLE DESCRIPTION LIST, and verbatim (for the English version of the questionnaire) in the section containing the TEXT OF QUESTIONS IN QUESTIONNAIRES.

The number of interviews in the different countries was in each of the three waves approximately 1000. For Luxembourg this number was lower, approximately 500. Sample size in the United Kingdom was approximately 1300, of which approximately 300 interviews were conducted within Northern Ireland. The total number of interviews which has been conducted for this study (four waves in all member states of the Community numbers) amounts to almost 52.000.

The data of the study have been organized in a set of interconnected datafiles, one for each wave and each different political system. In view of the distinctiveness of Northern Ireland as a political system, apart from the rest of the United Kingdom, the interviews from Northern Ireland have been organized in a separate datafile. Consequently, the data of the study comprise 52 datafiles (four waves, 13 political systems).

### 1.3 Organization and Funding

The European Election Study 1994 was conducted as a separately funded part of the Eurobarometer surveys conducted for the European Community's Directorate-General Information, Communication and Culture, Unit Surveys, Research, Analyses. The EES-94 questions were included in Eurobarometer 41.1. In this particular post-electoral survey, a number of questions dealing with electoral participation were included on behalf of a research group made up by Jean Blondel, Richard Sinnott, and Palle Svenson. These data have been included in this documentation as well.

The European Election Study 1994 was organized by an international group of researchers, consisting of Pilar del Castillo (UNED, Madrid), Roland Cayrol (CEVIPOF, Paris), Cees van der Eijk (University of Amsterdam), Mark Franklin (University of Houston), Renato Mannheimer (University of Genova), Michael Marsh (Trinity College, University of Dublin), Hermann Schmitt (University of Mannheim), and Colette Ysmal (CEVIPOF, Paris). Although various reasons prevented him from being a formal member of the group, Karlheinz Reif (Commission of the European Communities) has to be regarded as its continuing supporter. EES-94 is part of a larger study into "Political Representation and Legitimacy in the European Union". The other part is a series of interview studies among political elites, candidates standing for office in European Parliament elections, Members of the European Parliament, and Members of national parliaments. The design of the overall study, questionnaire contents and overlaps, and a strategy of funding has been worked out by this group and the members of the European Elite Study research group which includes Richard Katz (Baltimore), Pippa Norris (Harvard), Jacques Thomassen (Twente), Bernhard Wessels (Berlin). Soeren Holmberg (Gothenburg) joined this group in 1995. Hermann Schmitt participated in the meetings of this group to ensure comparability between the studies. The Mannheimer Zentrum fuer Europaeische Sozialforschung at the University of Mannheim served again as the communication and coordination centre for the study.

After completion of data-collection the datasets of the Voters Study have been processed into the special form which is described by this document. The aspects included in this are described below (see section on FIELDWORK AND DATAPROCESSING). The data sets produced by the European Elite Study research group are not yet finalised and will be made available to the scientific community in an anonymised form at a later point in time.

EES-94 would not have been possible without generous support from a variety of sources. Data-collection has been made possible first of all by the Commission of the European Communities which agreed to the use of the Eurobarometer as a vehicle on which to "piggy- back" the European Election Study. The costs of the questions added to the post-electoral survey were covered by a large grant from the Deutsche Forschungsgemeinschaft (DFG), and an additional grant from the Nederlandse Stichting for Wetenschapelik Onderzoek (NWO). Non-fieldwork costs for cleaning, datafile production and documentation were covered by the DFG again and by the Zentrum für Europäische Umfrageanalysen und Studien at the University of Mannheim. Costs for coordination of the project were absorbed by the Mannheimer Zentrum für Europäische Sozialforschung at the University of Mannheim. Costs for meetings of the international group of researchers which designed and carried out the study were met by the Feltrinelli Foundation (Italy), the Mannheimer Zentrum für Europäische Sozialforschung, the Centre d'Etude de la Vie Politique Contemporaine (Paris), Harvard University (Cambridge, Ma) and the University of the Basque Country (San Sebastian). In addition, regular research group meetings have been held in conjunction with the annual ECPR Joint Sessions of Workshops.

In addition to the variables which were commissioned by EES-94, this dataset contains also a number of other variables. They can be divided in two major blocs. First, a substantial number of these was commissioned by the Commission of the European Communities as part of the regular Eurobarometer information. All of 1PRS, 2PRS, and 2POS belongs to this category. Second, the 1POS, the main post-electoral survey contained a set of questions commissioned by the research group on electoral participation mentioned earlier. Richard Sinnott generously agreed to include these variables in the present data set. These variables are v14, v31 to v38, v90, v104, v160 to v177, v218 to v223, v250 to v257, v260, v265, v266, v272, and v273.

## 1.4 Fieldwork and Dataprocessing

### 1.4.1 Fieldwork and initial coding

The fieldwork for the study and initial coding has been conducted by INRA Europe. Coordination of fieldwork and coding was carried out by the European co-ordination office in Brussels. Details on sampling are provided in the section on sampling and response information "sampling information".

### 1.4.2 Cleaning and datapreparation

The structure of the final datasets and the cleaning tasks to be performed were defined by Michael Klein, Evi Scholz und Hermann Schmitt. Angelika Scheuer was also involve in some steps. The entire process entailed the following:

Cleaning: identifying and correcting incorrect codes in the dataset. This involved a number of different aspects.

First, all non-documented codes were traced. To the extent that such was unequivocally possible, they were altered into correct and documented codes. To the extent that non-documented codes could not unequivocally be corrected, they were recoded to missing data.

Second, all incorrect codes have been corrected which surfaced as a result of extensive substantive analyses by the various members of the EES-research group, or from a large series of consistency checks which were part of the cleaning. Here again, to the extent that the correct codes could be established or re-traced unequivocally, corrections have been made. Unequivocal errors which could not be corrected unequivocally were recoded to missing datacodes.

Third: where possible, different causes of missing data have been distinguished by the use of several missing data codes such as "don't know", "not ascertained", and ""inappropriate".

Systematization of variable names: where the same questions were included in more than one wave of interviews, the resulting information has been stored with the same variable name, such in contrast to the "normal" Eurobarometer files. V126, for example, refers to information from one and the same interview-question. This systematization, in combination with a wave-identification variable in the files (survey), allows easy construction of multi-wave datafiles according to user- specifications.

Systematization of coding: as much as possible and where this was originally not the case, the same numerical value has been assigned to categories of different variables which have the same meaning. For example, in all three waves a large number of questions involves coding of political parties. Obviously, the values for these variables are largely the same, although differences may exist owing to disappearance of formerly existing or emergence of new parties. In regular Eurobarometer datafiles the coding of such variables is not systematized, not between variables, and not between waves: a specific party may, in different variables, have been coded alternatively 1, 2, 5, etc. In the EES-94 datasets categories which are identical in different variables

have been assigned identical values (codes) in those variables. A special case is systematization of missing data codes, which facilitates their uniform handling by the analyst.

Adding of summary variables and analysis tools: the data file contains a series of variables that have been added for the convenience of users. They comprise variables such as weighting factors, categorization of parties according to party-groupings in the European Parliament, etc. The construction of these additional variables is documented in separate appendices.

Deletion of irrelevant variables: the interviews of Eurobarometers 40, 41, 41.1 and 42 contained, in addition to the questions included in the data files of the EES-94, large numbers of other questions. Most of these are, for all practical purposes, of no relevance to analysts of the elections to the European Parliament, but instead render the data files of the Eurobarometer into unwieldy and cumbersome low-grade ore. The deletion of irrelevant variables has transformed the data into leaner, more manageable and enriched structures.

Increased efficiency of data storage: in comparison with Eurobarometer files the efficiency of the way in which information from multi-response questions has been included in the datafile has been greatly improved. In addition to smaller and more manageable files this yields also better control over data handling and analysis.

Ordering of variables into coherent blocks: the ordering of the variables in the files has been arranged in such a way that identification of relevant information and navigation through the files is greatly facilitated. Quick reviews of the contents of the EES-94 data files can be attained by scanning the VARIABLE DESCRIPTION LIST.

#### 1.4.3 Sampling Information

The samples of all Eurobarometer surveys are designed as multi-stage probability samples in the single countries. Sample points were drawn with probability proportional to population size and population density in each EU country. Face-to-face interviews in the appropriate national language were carried out in the people's home. Target was the population of each of the EU-member countries, aged 15 years and above. In the first pre-election study the sample was restricted to people of the respective nationality of each country, while the other three waves also cover residents from any member state of the EU living in the respective EU-country. Field work of all Eurobarometer studies was organised by INRA / Europe (International Research Associates) in Brussels and its European network of market- and public opinion research agencies.

## 2 VARIABLE DESCRIPTION LIST

The variable description list shows the contents of the datafiles of the European Election Study 1994 by listing for each variable its name (Vxyz), its presence (indicated by the presence or absence of questions numbers in the respective column) in each of the waves, and the label assigned to it in the dataset (a summary description of its content in no more than 40 characters). The codes and meanings of the values of each of these variables are documented in detail in the DOCUMENTATION OF VARIABLES part of this codebook.

In order to summarize the contents of a variable in no more than 40 characters, words have frequently been abbreviated. Most of these abbreviations are rather obvious, and consist of deleting one or more vowels of a word. A number of frequently used abbreviations, however, may not be entirely self-evident. Their meanings are:

### abbreviations of study names

1PRS	= first pre-election survey (EB40, October/November 1993)
2PRS	= second pre-election survey (EB41, April/May 1994)
1POS	= first post-election survey (EB41.1, June/July 1994)
2POS	= second post-election survey (EB42, November/December 1994)
EES89	= European Election Study 1989
EES94	= European Election Study 1994

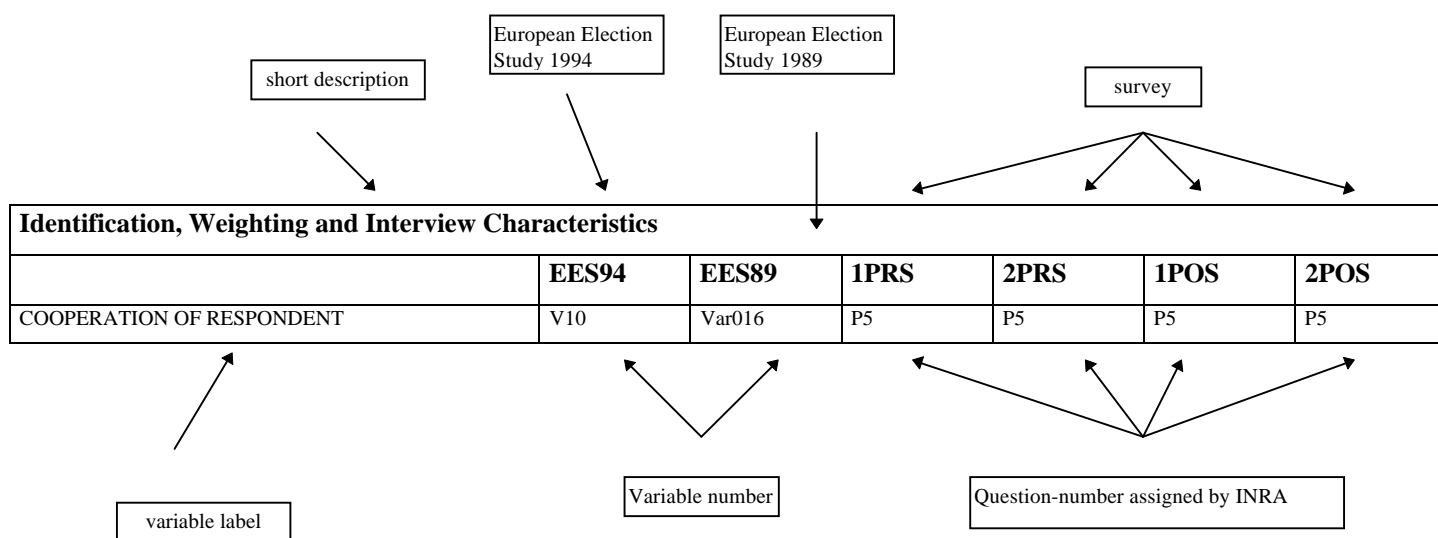

### abbreviations used in variable labels

COM	= European Commission
EC	= European Community
EE	= European Election
EP	= European Parliament
EU	= European Union
hh	= head of household
HH	= household
MAT/PMAT	= materialism/postmaterialism
NAT. GOV.	= national government
NE	= national Election
NP	= national parliament
R	= respondent
SEM	= single European market

## abbreviations used in variable names

NAT	= national abbreviations
BEL	= Belgium
DEN	= Denmark
EGE	= East Germany (new Bundesländer)
FRA	= France
GB	= Great Britain
GRE	= Greece
IRL	= Ireland
ITA	= Italy
LUX	= Luxembourg
NET	= Netherlands
NIR	= Northern Ireland
POR	= Portugal
SPA	= Spain
WGE	= West Germany (old Bundesländer)

The structure of the following list can be visualised as follows:

Identification, Weighting and Interview Characteristics						
	EES94	EES89	1PRS	2PRS	1POS	2POS
RESPONDENTS IDENTIFICATION	ID	Var002	ID	ID	ID	ID
SURVEY	SURVEY	Var004	SURVEY	SURVEY	SURVEY	SURVEY

### 3 DOCUMENTATION OF VARIABLES

This section contains for each included variable the following information:

- Variable name (Vxyz)
- Variable label (as reflected also in the VARIABLE DESCRIPTION LIST, above)
- Listing of all precoded response options presented to the respondent
- Value labels
- Values which have been defined in the datafiles as missing data
- If applicable: additional information concerning fieldwork or construction of the variable, or alternatively a reference to appendices containing such information
- Frequency distributions (unweighted) of the variable for each of the political systems of the EU for which a different datafile have been computed. These distributions are provided in a tabular fashion, allowing rapid visual comparison of the response distributions across the various political systems.

## 4 QUESTION WORDINGS

This part of the codebook contains for each of the variables of the European Election Study 1994 (EES-94) the text of the questions in the interviews. For some variables no question text is given but the variable label. These variables are not based on responses at all but on interviewer observations or fieldwork information.

The following remarks pertain to this information:

The question texts listed here are those of the English version of the generic questionnaire. From this generic questionnaire specific questionnaires were produced for each of the languages and each of the countries where interviews were conducted. Consequently, some of the question texts listed below contain elements which have been specified in each of the languages or countries of the European Community. These are indicated between { } marks. For example, text such as "citizens of countries belonging to the European Community, including the {nationality} will be asked to vote" therefore indicates that in the various countries {nationality} was replaced by specifics such as "Danes", "Portuguese", "Irish", etc.

Notes, references to appendices etc. which were not part of the questionnaire are provided within [ ] marks. Instructions to interviewers which were included in the questionnaire are presented within ( ) marks. Filter instructions originally numeric but verbal expressed here are marked in italics.

In the preliminary documentation it is possible that for a few questions an adequate understanding of its contents and meaning requires cross-referencing between the VARIABLE DESCRIPTION LIST, the labelling of values as included in the file, and the question texts listed below. In the final documentation the need for such cross-referencing will be eliminated.

Information presented below is in the following sequence:

first line: variable name;

second line: variable label in capital letters;

question text with answering categories, values in front are codings of the attached datasets.

EUROPEAN ELECTION: REASON FOR VOTING: 1ST

*(IF RESPONDENT WILL CERTAINLY GO AND VOTE OR WILL PROBABLY GO AND VOTE)* When voting at the European elections, what will be most important to you?

- 1 THE INDIVIDUAL CANDIDATES
- 2 THE PARTIES
- 3 THE CONTENT OF THE PROPOSED POLICIES
- 4 NONE OF THESE (SPONTANEOUS)
- 5 DK
- 9 NA/INAPP

V20

EUROPEAN ELECTION: REASON FOR VOTING: 2ND

*(IF RESPONDENT WILL CERTAINLY GO AND VOTE OR WILL PROBABLY GO AND VOTE)* When voting at the European elections, what will be most important to you? And what will be next most important? (SHOW CARD \*\*)

- 1 THE INDIVIDUAL CANDIDATES
- 2 THE PARTIES
- 3 THE CONTENT OF THE PROPOSED POLICIES
- 4 NONE OF THESE (SPONTANEOUS)
- 5 DK
- 9 NA/INAPP

V21

ABSTENTION IN EE: DID NOT KNOW SUBJECT

(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

I didn't really know what it was about.

0 NO

1 YES

9 NA

V22

ABSTENTION IN EE: EP TOO UNIMPORTANT

(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

As the European Parliament has so little power, I didn't think it was worth the effort.

0 NO

1 YES

9 NA

V23

ABSTENTION IN EE: FAR F. PEOPLE'S PROBL.

(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

The problems talked about were not the ones people are really interested in.

0 NO

1 YES

9 NA

V24

ABSTENTION IN EE: TOO NATIONALLY SHAPED

(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

Too much about national problems and not enough about Europe.

0 NO

1 YES

9 NA

V25

ABSTENTION IN EE: TOO COMPLICATED

*(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)*

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

You couldn't tell any more who was for or against the unification of Europe.

0 NO

1 YES

9 NA

V26

ABSTENTION IN EE: EU WILL NEVER WORK

*(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)*

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

Whatever is done, the European Union (European Community) will never work.

0 NO

1 YES

9 NA

V27

ABSTENTION IN EE: TOO LESS FEMALE CAND.

*(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)*

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

Parties did not put forward a sufficiently balanced number of women and men as candidates.

0 NO

1 YES

9 NA

V28

ABSTENTION IN EE DUE TO OWN GENDER

*(IF NOT VOTED in European election - INTERVIEWER PLEASE CHECK BACK)*

You did not vote in these European elections. Among the following, what are the two main reasons why you did not vote? (SHOW CARD \*\*)

As a woman, I didn't feel represented by the candidates put forward.

0 NO

1 YES

9 NA

V29

#### FAMILY INCOME

We also need some information about the income of the household to be able to analyse the survey results for different types of households. Here is a list of income groups. (SHOW INCOME CARD \*\*) Please count the total wages and salaries PER MONTH of all members of this household; all pensions and social insurance benefits; child allowances and any other income like rents, etc. ... Of course, your answer as all other replies in this interview will be treated confidentially and referring back to you or your household will be impossible. Please give me the letter of the income group your household falls into before tax and other deductions.

[see appendix 5]

## APPENDICES

### Appendix 1: Weighting Factors

#### 1.1. Sample Weight (V4)

V4 is used to weight all cases to build 14 European samples representative in comparison to the concerning sample population. Weighting procedures are based on sample specific frequency distributions of a set of demographic variables (age, sex, region, size of community, size of household, marital status, and occupation) drawn from the Eurostat statistics.

#### 1.2. Nation Weight (V3)

The nation weight variable produces representativeness with regard to the above mentioned basic variables in the twelve European nations. In nations where only one sample was drawn, sample and nation weight variable are identical. In each Germany and the United Kingdom two samples are carried out. The sample size of the two subsamples (Germany-West and Germany-East / Great Britain and Northern Ireland) is corrected by the nation weight variable to build a representative German and United Kingdom sample.

If representative results based on nations are desired, aside from using the nation weight, the variable containing the information to which country respondents belong (here variable country) must be regrouped for Germany and the United Kingdom.

please use:

```
recode country(3,14=3)(9,13=9).
```

```
add value labels country 3 'GERMANY' 9 'UNITED KINGDOM'.
```

#### 1.3 European Weight (V5)

Similar to the nation weight variable where the proportion of East- and West Germany inside of Germany and the proportion of the Northern Ireland and the British population inside the United Kingdom is fixed, the European weight variable contains the proportions all all countries inside the European Union and produces results representative for the European Union as a whole.

## Appendix 4: Construction of Indices

### 4.1. EE Party Preference Index (V30)

constructed by INRA; based on intended party choice in EE94.

- 1 (S) SOCIALISTS
- 2 (PPE) CHRISTIAN DEMOCRATS
- 3 (LDR) LIBERALS
- 4 (V) GREENS
- 5 (RDE) GAULLIST/FF (IRL)
- 6 (DR) EURORIGHT
- 7 (CG) (COMM.) LEFT UNITY
- 8 (ARC) RAINBOW (ARC)
- 9 (NI) NON ATTACHED
- 10 OTHER PARTY
- 11 OTHER ANSWERS
- 99 NA, INAPP

### 4.2. Inglehart's Postmaterialism Index (V133)

- 1 MATERIALIST
- 2 MIXED
- 3 POSTMATERIALIST
- 8 DK
- 9 NA

constructed out of V131 (mat-pmat value priorities: 1st choice) and V132 (mat-pmat value priorities: 2nd choice)

	V131 (mat-pmat value priorities: 1st choice)				
V132 (mat-pmat value priorities: 2nd choice)	maintaing order in the nation	giving the people more say in important government decisions	fighting rising prices	protecting freedom of speech	DK
maintaing order in the nation	-	mixed	materialist	mixed	DK
giving the people more say in important government decisions	mixed	-	mixed	postmaterialist	DK
fighting rising prices	materialist	mixed	-	mixed	DK
protecting freedom of speech	mixed	postmaterialist	mixed	-	DK
DK	DK	DK	DK	DK	NA

#### 4.3. Opinion Leadership Index (V142)

++ high  
 + medium high  
 - medium low  
 -- low

constructed out of V137 (frequency of political discussion) and V138 (frequency trying to persuade others)

	V138 (frequency trying to persuade others)				
V137 (frequency of political discussion)	often	from time to time	rarely	never	don't know
frequently	++	++	+	+	DK
occasionally	+	+	-	-	DK
never	-	-	--	--	DK
don't know	DK	DK	DK	DK	NA

#### 4.4. Frequency of Mediause Index (V143)

constructed out of V139 (frequency of watching TV-news), V140 (frequency of reading newspapers), and V141 (frequency of listening news on radio)

If TV, newspaper, and radio as well is used at least several times a week then mediause index is high (++).

If two of three media are used at least several times a week and the third is used only once or twice a week then mediause index is medium high (+).

If two of three media are used only once or twice a week and the third is used several times a week then mediause index is medium low (-).

If TV, newspaper, and radio as well are only used once or twice a week then mediause index is low (--).

#### 4.5. Index of Attitudes Towards EU (V294)

constructed out of V261 (Is r for/against European unification) and V262 (Membership of EC/EU is good/bad)

1 positive  
 2 ambivalent  
 3 negative  
 8 DK  
 9 NA

	V261 (Is r for/against European unification)

## Appendix 9: Example of Adding Files of One Wave with SPSS

In the following example the 13 files of the first wave of EES-94 are brought together in one major SPSS-systemfile. The resulting systemfile will be checked by calculating a frequency distribution of one of the basic variables and displaying the dictionary.

To create major files of the second the third, or the fourth wave, the filenames in this example have to be changed in "S2867\*\*\*" (wave 2), in "S2868\*\*\*" (wave 3), or in "S2869\*\*\*" (wave 4).

## Appendix 10: Example of Adding Files of One Country with SPSS

In the following example the four files of Belgium in EES-94 are brought together in one major SPSS-systemfile. The resulting systemfile will be checked by calculating a frequency distribution of one of the basic variables and displaying the dictionary.

To create major files of the the other countries in the filenames of this example the abbreviations of Belgium have to be changed into the abbreviation of the country of interest.

```
(set listing='add.lst'.)
(set header off.)
(set width=80.)
(set length=none.)

imp fil='s2866bel.por'.
save outfile 's2866bel.sys'.
imp fil='s2867bel.por'.
save outfile 's2867bel.sys'.
imp fil='s2868bel.por'.
save outfile 's2868bel.sys'.
imp fil='s2869bel.por'.
save outfile 's2869bel.sys'.
add files file='s2866bel.sys'
      /file='s2867bel.sys'
      /file='s2868bel.sys'
      /file='s2869bel.sys'.
fre var survey.
display labels/variables=all.
save outfile='ees94bel.sys'.
```
