#### ARCHIVE INFORMATION AND ERRATA

- UNIQID: Unique original case identification is not available. A unique serial id was appointed by the archive.
- REGION: Official NUTS classification in this variable has been completed by the archive in accordance with the corresponding official NUTS classification, former Flash EB waves, and the technical report. The 13 categories for GREECE could not be clearly specified in accordance with NUTS 2 and the original labels were not consistent with the data (e.g. 350 respondents from Crete). The four NUTS1 categories were reconstructed by the archive based on the corresponding frequency distribution documented in the technical evaluation report and in accordance with former waves. Variable NUTS1 also recodes NUTS1 levels for Belgium and the Netherlands.
