About this Supplement to the ALLBUS/GGSS 1980-2018 Variable Report

The Variable Report for ALLBUS/GGSS 1980-2018 contains frequency tables by year for Germany as a whole. The data in these tables is weighted by the person-related East-West weight *wghtptew*. This weight adjusts for the oversample of respondents from the new federal states. Therefore, the numbers in these tables are directly interpretable for Germany as a whole. One consequence of weighting is that the numbers in the Variable Report do not correspond directly to the data in the unweighted data set. To address this issue, this document contains unweighted frequency tables by year and region of interview. The numbers in these tables correspond directly to the data. However, please note that they only allow separate analyses for East and West Germany.

Total Population and Sample:

Universe sampled: Federal Republic of Germany (until 1990: West Germany including West Berlin).

Household samples: From 1980 to 1992 and in 1998, a multi-stage random sample of private households was conducted addressing all persons who were at least 18 years of age (ADM Sample Design).

Person Samples: In 1994, 1996, and from 2000 a two-stage, disproportionate random sample was conducted in West Germany (including West Berlin) and East Germany (including East Berlin), comprising all persons living in private households who were at least 18 years old on 1 January of the year of the survey. In the first sample stage municipalities (Gemeinden) in western Germany and municipalities in eastern Germany were selected with a probability proportional to their number of adult residents; in the second sample stage individual persons were selected at random from the municipal registers of residents.

As of 1991 the ALLBUS sample also includes foreigners living in Germany. Targeted individuals who did not have adequate knowledge of German to conduct the interview were treated as systematic unit non-responses.

Method of Data Collection:

Personal interview with standardized questionnaire (PAPI – Paper and Pencil Interviewing; since 2000: CAPI – Computer Assisted Personal Interviewing), supplementary data from accompanying ISSP surveys (self-completion questionnaires, drop off).

Primary Sampling Units / Sample-Points:

See survey descriptions of individual ALLBUS surveys.

Response Rate:

See survey descriptions of individual ALLBUS surveys.

Data Set:
