## Acknowledgements

---

The fieldwork of the European Values Study during the four waves was financially supported by universities and research institutes, national science foundations, charitable trusts and foundations, companies and church organizations in the EVS member countries.

Detailed information on the history of the European Values Study (EVS) is given on the [EVS website](#). For information on the origin and study design of the EVS wave 1999, as well as data and documentation provided, please go to [www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000.html](http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000.html).

The datasets and related materials were delivered by the European Values Study group at Tilburg University. Preparation and documentation of European Values Study primary data for long term preservation and usability proceed in cooperation between the EVS teams at Tilburg University and GESIS Data Archive for the Social Sciences Cologne.

## Introduction and preliminary remarks

---

The data release (Version 3.0.0, 2011-11-20) includes data and documentation of the 33 participating countries/regions in European Values Study 1999. To make the data accessible in a user friendly way, the variable report on the Integrated Datasets of EVS 1999 is provided. It offers a comprehensive description of the data on study and variable level. In addition, the Variable Documentation in the present report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate weight.

The report is structured into seven sections:

- Section 1 provides brief information on the European Values Study.
- Section 2 gives an overview of all data and documentation available.
- Section 3 includes information about the dataset version and changes from previous release.
- Section 4 contains methodological information on origin and content of the data.
- Section 5 refers to the structure of the dataset and standardization efforts made.
- Section 6 provides an overview on the Variable Documentation and notes added.
- Section 7 provides the explanation of the variable documentation.
- The last section contains the Variable Documentation. It describes variables in the data file in terms of relevant metadata and frequency distribution.

### Data access

Primary data for statistical analysis and related documentation (English Master Questionnaire, national field questionnaires, and variable reports) are made available online by [GESIS Data Catalogue](#).

### Anonymized data

According to data regulations in participating countries, only anonymized data are made available to users. Each national team was responsible for checking their data confidentiality before depositing data.

### Citation requirements

Publications based on EVS data should acknowledge this by means of bibliographic citations as listed in the Study Description under item "Citation". To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

### Usage requirement

To provide funding agencies with essential information about the use of EVS data and to facilitate the exchange of information about the EVS, users of EVS data are required to send bibliographic citations and/or electronic copies of each completed report, article, conference paper or thesis abstract using EVS data to the EVS team. Then, these will be included in the EVS repository. For more information, see <http://www.europeanvaluesstudy.eu/evs/publications/>.

### Disclaimer

EVS, GESIS, and the producers bear no responsibility for the use of EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

### Bilingual variable reports on national datasets

The English and original language variable documentation is intended for assisting researchers who want to compare question texts in multilingual countries, across EVS member countries, and moreover, for the third and fourth EVS wave, across time.

The figure gives an overview of all languages fielded in the EVS 1999 member countries. To download bilingual variable documentation provided for every used language/language version, please go to the EVS website, Survey 1999.

Figure 1: Languages fielded in EVS 1999\*

Integrated Dataset English Master Questionnaire						
Austria German	Belarus Russian	Belgium Flemish/Dutch French	Bulgaria Bulgarian	Croatia Croatian	Czech Republic Czech	Denmark Danish
Estonia Estonian Russian	Finland Finnish	France French	Germany German	Great Britain English	Greece Greek	Hungary Hungarian
Iceland Icelandic	Ireland English	Italy Italian	Latvia Latvian Russian	Lithuania Lithuanian	Luxembourg Luxembourgish French Portuguese	Malta Maltese
Netherlands Dutch	Northern Ireland English	Poland Polish	Portugal Portuguese	Romania Romanian		Russian Russian
Slovenia Slovenian	Spain Spanish	Sweden Swedish	Slovak Republic Slovak	Turkey Turkish	Ukraine Ukrainian Russian	

\*The blue boxes indicate countries sharing one or more languages, shared languages are marked in red.

## 1 European Values Study 1981-2008

The European Values Study is the most comprehensive research project on human values in Europe. It is a large-scale, cross-national, and longitudinal survey research program on how Europeans think about family, work, religion, politics and society. Repeated every nine years in an increasing number of countries, the survey provides insights into the ideas, beliefs, preferences, attitudes, values, and opinions of citizens all over Europe.

The research program was initiated by the European Value System Study Group (EVSSG) in the late 1970s and has emerged as a well-established network of social and political scientists aiming at high standards in data creation and processing. From 1981 to 2008 four waves of survey were conducted in European and other countries. These surveys explore value differences, similarities, and value changes.

### Survey 1999

For the third EVS wave a new questionnaire was designed building on the experiences made with the first two waves conducted in 1981 and 1990. Administered in 33 countries, several new issues, such as solidarity, social capital, democracy, and work ethics were taken into account. Table 1 gives an overview of countries participating in EVS waves and year of fieldwork.

*Table 1: Participating countries in European Values Study 1981-2008*

Country/Region	1981	1990	1999	2008

Guidelines for data processing and documentation<sup>1</sup> on EVS 1999 were provided by the coordinating organisation at Tilburg University.

In order to get standardized information on the survey in the participating countries, the national representatives had to complete a methodological questionnaire. This questionnaire, developed by the EVS methodology group, provides detailed information on the translation of the questionnaire, the sampling procedures, fieldwork, weighting, national codes, the inclusion of optional and country-specific questions, etc.

More information on the 1999 Survey can be found in the Source book of the 1999/2000 European Values Study<sup>2</sup> and at [www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000.html](http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000.html).

## 2 Access to data and documentation

---

The data and documentation of the four EVS waves is publicly available at the EVS and GESIS websites.

**Data:** Besides the EVS 1999 Integrated Dataset, national datasets including additional country-specific variables are provided.

**Study Description:** The study description offers methodological information on origin and content of the data and overviews on dataset versions and errata.

**Variable Report:** The *EVS 1999 Variable Report* combines variable descriptions of the Integrated Dataset with question texts of the English Master Questionnaire, as well as frequency counts, by country (sample), for almost all variables.

**Questionnaires:** The English Master Questionnaire and the field questionnaires are downloadable.

### Access to EVS data and documentation

#### General study information

The EVS website ([www.europeanvaluesstudy.eu](http://www.europeanvaluesstudy.eu)) covers comprehensive information on the origin of the project and provides access to all data and documentation available for EVS surveys.

#### Data and documentation download

Data and documentation can be obtained at the GESIS Data Archive for the Social Sciences in Cologne through their online download facilities GESIS Data Catalogue (<http://gesis.org/data-catalogue/>) and ZACAT-Online Study Catalogue (<http://zacat.gesis.org/>).

**GESIS Data Catalogue** contains study descriptions for all datasets providing information on the origin of data, version history, and errata. It supports direct access to data and documentation for download.

**ZACAT** provides data and documentation for retrieval purposes and data exploration. It assists users in identifying trend variables of all EVS waves. Furthermore, it enables comparisons of original questions in survey languages of the third and fourth wave.

Data analyses and data downloads are possible after registration.

#### Online variable information

Online Variable Overview (<http://info1.gesis.org/EVS/Variables/>) allows for comparisons of trend variables of the four EVS waves 1981, 1990, 1999, and 2008. In addition, comparisons of original question texts across the waves 1999 and 2008 are supported.

#### Full-text retrieval

**Question text retrieval** is a facility for word/phrase searches in EVS text documents. It supports full-text searches in the master questionnaire and variable reports on the EVS integrated datasets and national datasets.

#### Publication

EVS Repository ([www.europeanvaluesstudy.eu/evs/publications/](http://www.europeanvaluesstudy.eu/evs/publications/)) contains direct links to publications based on the data of the European Values Study. A subset of the publications is

enhanced by additional information on the data, interview questions, and descriptions of variable construction.

#### Atlas of European Values "Trends and Traditions at the turn of the Century"

The Atlas of European Values ([www.atlasofeuropeanvalues.eu](http://www.atlasofeuropeanvalues.eu)) unlocks the results of the European Values Study project for the general public. It presents values, beliefs, attitudes, and opinions through graphs, charts, and maps.

#### Secondary education

For secondary education, an interactive website offers courses and modules in different languages to provide a better understanding of European values in the classroom (<http://www.europeanvaluesstudy.eu/evs/education.html>).

### 3 Dataset version and changes from previous release

In order to uniquely identify a dataset, each dataset version is assigned a GESIS Study No., a version no., and a Digital Object Identifier (doi). The doi is linked to the Study Description in the [Data Catalogue](#). Metadata entered in the Study Description of EVS 1999 data and associated with a doi are provided to the Registration agency for social science data ([da|ra](#)).

The [doi:10.4232/1.10789](#) is assigned to the EVS 1999 Integrated Dataset (v.3.0.0) including the 33 national datasets.

#### 3.1 Version of datasets

Variable **"version"** includes the GESIS archive version number of a dataset and the corresponding release date. It is composed of a sequence of three numbers (alphanumeric string).

- The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases).
- The minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels).
- The third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

In Table 2 the GESIS Study No. of the Integrated Dataset and the single national datasets, as well as the doi, dataset version and version date of the current release is listed.

Table 2: Digital Object Identifier (doi) and version of EVS 1999 datasets

Country/Region	Study No.	Digital Object Identifier	Version	Version date
Integrated Dataset	ZA3811	<a href="#">doi:10.4232/1.10789</a>	3.0.0	2011-11-20
Austria	ZA3779			
Belarus	ZA3807			
Belgium	ZA3784			
Bulgaria	ZA3799			
Croatia	ZA3800			
Czech Republic (-1991Czechoslovakia)	ZA3795			
Denmark	ZA3785			
Estonia	ZA3791			
Finland	ZA3787			
France	ZA3776			
Germany	ZA3778			
Great Britain	ZA3777			
Greece	ZA3801			
Hungary	ZA3797			
Iceland	ZA3788			
Ireland	ZA3790			
Northern Ireland	ZA3789			
Italy	ZA3780			
Latvia	ZA3792			
Lithuania	ZA3793			
Luxembourg	ZA3804			
Malta	ZA3803			
Netherlands	ZA3783			
Poland	ZA3794			
Portugal	ZA3782			

Romania	ZA3798			
Russian Federation	ZA3802			
Slovak Republic	ZA3796			
Slovenia	ZA3805			
Spain	ZA3781			
Sweden	ZA3786			
Turkey	ZA3808			
Ukraine	ZA3806			

## 3.2 Main changes and updates from previous data release

From edition 2.0.0 to 3.0.0

The third release of EVS 1999 contains additional variables, data and metadata updates, and improvements to the second release. The main changes are listed here.

### Variables added to the dataset

The following variables were added to the Integrated Dataset:

<i>Variable</i>	<i>Label</i>
version	GESIS archive version
versionc	GESIS archive version (EVS national datasets)
studynoc	GESIS study number (EVS national datasets)
cntry_y	country_year
cntry1_y	country_year [with split ups]
v191_4	post-materialist index 4-item
v303_r	age completed education respondent (Q93) (recoded in intervals)
v304_r	education level respondent (Q94) (recoded)
v308_r	number of supervised people (6 categories) (Q98) (recoded)
v309_r	number of others working in the organisation (Q99) (recoded)
v310_r	number of employees (6 categories) (Q100) (recoded)
v310_r2	how many employees do you have (4 categories) (Q100) (recoded)
v311_2	kind of job respondent - 2 digit ISCO88 code (Q101)
v311_3	kind of job respondent - 3 digit ISCO88 code (Q101)
v317_2	kind of job chief wage earner - 2 digit ISCO88 code (Q107) (recoded)
v317_3	kind of job chief wage earner - 3 digit ISCO88 code (Q107) (recoded)
v320_r	income household respondent (3 categories) (Q110) (recoded)
v320_ppp	monthly household income (x1000) – corrected for ppp in Euros
v324	year/month of start-fieldwork
v325	year/month of end-fieldwork
o5_lu	jobs scarce: giving locals priority (Q20D_LU)
o22_01	major changes in society (Q54J_LU)
o52_r	duration of interview in minutes (constructed)
age	age: respondent (constructed)
age_r	age (recoded)
age_r2	age (recoded into 3 intervals)
flag variables	for indicating inconsistencies (see table 7 and Appendix1)

The variables listed below were provided by ASEP/JDS Madrid and added to the Swedish dataset. They are based on questions originally designed for the World Values Survey (WVS) and included in the Swedish field questionnaire. In the Variable Documentation a reference to WVS is given for the respective variables.

v6_se	service to others important to life (Q7_SE)
v66_se	do you think most people try to take advantage of you (Q34_SE)
v99_se	TV most important entertainment (Q53_SE)
v161_se	men make better political leaders than women do (Q116_SE)
v162_se	university is more important for a boy than for a girl (Q117_SE)
v163_se	one of main goals in life has been to make my parents proud (Q118_SE)
v191_se	aims of country: first choice (Q137_SE)
v192_se	aims of country: second choice (Q138_SE)
v193_se	most important: first choice (Q139_SE)
v194_se	most important: second choice (Q140_SE)
v195_se	post materialist index 12-item (SE)
v212_se	who should decide: international peacekeeping (Q167_SE)
v213_se	who should decide: protection of the environment (Q168_SE)
v214_se	who should decide: aid to developing countries (Q169_SE)
v215_se	who should decide: refugees (Q170_SE)
v216_se	who should decide: human rights (Q171_SE)
v217_se	economic aid to poorer countries (Q172_SE)
v218_se	satisfaction with the people in national office (Q176_SE)
v280_se	protecting environment vs. economic growth (Q241_SE)
v281_se	human & nature (Q242_SE)
v282_se	good human relationships (Q243_SE)
v302_se	ideal number of children (Q257_SE)
v304_se	had formal education (Q259_SE)
v305_se	educational level respondent (country specific) (SE)
v320_se	family savings during past year (Q268_SE)
v321_se	social class (subjective) (Q269_SE)

#### Recoded/renamed variables

Naming of some variables was adjusted for consistency with EVS waves and the Longitudinal Data File. Variables are renamed to:

<i>Variable renamed</i>	<i>Label</i>
weight to weight_g	weight_g
weight1 to weight_s	weight [with split ups]
v103r to v103r_gb	did you belong to a religious denomination (Q23/Q24_GB) (recoded)
v104r to v104r_gb	which former religious denomination (Q23/Q24_GB) (recoded)

#### Variables coded according to ISO 3166-1

For standardization across EVS waves country identifiers according to ISO 3166-1 (3-digit or alphanumeric country code) were added to the following variables: id\_cocas, country, country1, cntry\_y, cntry1\_y, c\_abrv, c\_abrv1, language, v251\_mt, v252\_mt, v253\_mt, v256, v257, v320\_cs, v323, v305\_se.

For more information see section 5.1.2: Variables with country codes. An overview of ISO 3166-1 country codes and supplements for countries or (sub-national) areas is provided as well.

#### Changed country codes

Some codes of the alphanumerical country code (ISO 3166-1 alpha-2) in variables **c\_abrv** 'country abbreviation' and **c\_abrv1** 'country abbreviation [with split ups]' were modified.

East Germany	DEE to DE-E
West-Germany	DEW to DE-W
Great Britain	GB to GB-GBN
Northern Ireland	NIR to GB-NIR

#### Data checks and data corrections

The data was checked for filter inconsistency and contradictions between variables of item batteries:

- For the most common non-conformed interviewer instructions and illogic answer-patterns across the national datasets, flag variables were created (see section 5.2.1: Flag variables indicating inconsistencies).
- Variables with skip patterns deviating from Master Questionnaire and inconsistent filter, respectively were not corrected but marked by notes (see section 5.2.2: Notes indicating deviating filtering).

Further corrections are related to:

- Variable **v303 'age completed education respondent (Q721)'**: For Portugal, Romania, Russia, Spain, and Turkey data recoded from **-4 'not asked in survey'** to **-5 'other missing'**.
- Variables **o22/o22\_01 'major changes in life cautious vs. act boldly (Q54I)'**: For Luxembourg original question is not comparable to the English Master Questionnaire due to deviation in answer categories. Q.54J\_LU refers to major changes in 'society' not in 'life' as defined in master questionnaire. A new variable **o22\_01** has been created for Luxembourg. For original language question, please see the [Online Variable Overview](http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000/participatingcountries/) or the Field Questionnaire at <http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000/participatingcountries/>.
- Variable **o5/o5\_lu 'jobs scarce: giving locals priority (Q20C)'**: For Luxembourg original question is not comparable to master questionnaire due to deviation in question contents. A new variable **o5\_lu 'jobs scarce: giving locals priority (Q20D\_LU)'** has been created for Luxembourg. For original language question, please see the [Online Variable Overview](http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000/participatingcountries/) or the Field Questionnaire at <http://www.europeanvaluesstudy.eu/evs/surveys/survey-1999-2000/participatingcountries/>.
- Variable **o45 'do you trust other people in country (Q71a)'**: Data for Denmark is included in the current version of the Integrated Dataset.
- Variables **v311/v311\_3/v311\_2** and **v317/v317\_3/v317\_2 'profession/industry respondent or chief wage earner ISCO88 4-digits/3-digits/2-digits': value labels were added and/or corrected**. If a wild code could not be identified and recoded accordingly, it was recoded into the next identifiable higher level profession unit (source for recodes: International Standard Classification of Occupation (ISCO-88) provided by the International Labour Organization. 18 September 2004. Web: 10 December 2011 [www.ilo.org](http://www.ilo.org)).

*Value labels added/corrected for variables: v311/v317*

3400 other associate professionals

7120 building frame and related trades workers

7210 metal moulders, welders, sheet metal workers, structural-metal preparers and related trade workers

9120 shoe cleaning and other street services elementary occupations  
9320 manufacturing labourers.

*Value labels added/corrected for variables: v311 2-digits ISCO/v317 2-digits ISCO*

20 professionals  
30 technicians and related associate professionals  
40 clerks  
50 service workers and shop and market sales workers  
60 skilled agricultural and fishery workers  
70 craft and related trade workers  
80 plant & machine operators & assemblers  
90 elementary occupations.

#### Recodes for standardization across waves

Values/value labels of item batteries were standardized across the EVS waves:

- 1 'yes'/0 'no' (value code 2 'no' recoded to 0 'no')  
Variables: v107, v108, v109, v111, v112, v113, v114, v115, v116, v117, v118, v119, v120, v121.
- 1 'approve'/0 'disapprove' (value code 2 'disapprove' recoded to 0 'disapprove')  
Variables: v177, v178.
- 1 'MT: yes'/0 'MT: no' (value code 2 'no' recoded to 0 'MT: no')  
Variables: v281\_MT, v282\_MT, v283\_MT, v284\_MT, v285\_MT, v286\_MT, v287\_MT, v288\_MT, v289\_MT, v290\_MT.
- 1 'HU: yes'/0 'HU: no' (value code 2 'no' recoded to 0 'HU: no')  
Variables: v285\_HU, v290\_HU.

#### Updated (internal) metadata of the dataset

Variable labels were standardized across the EVS waves and the Longitudinal Data File. In addition, selected value labels were standardized for all EVS waves (for **definition of 'missing values'**, see section 5: Dataset structure and and variable definition).

- 1 'important'/0 'not mentioned' items  
Variables: v164, v165, v166, v167, v168, v169, v170, v171, v172, v173, v174.

#### Updated Variable Documentation

Variable documentation included in the Variable Report of EVS 1999 additionally covers weighted tables based on country variable c\_abrv 'country abbreviation'.

An overview of all variables included in EVS waves and Longitudinal Data File is given in Appendix 2.

### 3.3 New features

Section [Errata and Version](#) in the Study Description of the GESIS Data Catalogue provides errata detected to date and related to the last dataset version. For major problems, patches for solving the data problems will be provided.

---

The [Online Variable Overview](#) includes all variables of the four EVS waves 1981/1990/1999/2008 and the Longitudinal Data File 1981-2008. The variables of all waves are documented with the English question texts; for EVS 1999 and EVS 2008 the original question texts are provided additionally. This gives an overview of all comparable variables across waves and allows for comparisons of original question texts across the waves 1999 and 2008.

The web page [Compare question texts](#) serves users who want to check the translations of the English master questions, compare original questions across languages, countries, or waves (EVS 1999/EVS 2008), and report problems or peculiarities. Problems in original question texts spotted and reported to date are listed on this page.

The [EVS mailing list](#) is maintained by GESIS and the European Values Study team at Tilburg University. It provides a venue for researchers to interact with each other and to increase communication between the archive and the EVS user community. By subscribing to the list, you will be informed about events, publications, new data and documentation offers, data updates, and errata for EVS surveys.

For regular information about EVS Data and Documentation News, you can also subscribe to the [RSS Feed](#).

## 4 Study description

## 4.2 Study scope

**Abstract:** Moral, religious, societal, political, work, and family values of Europeans.

### Topics

1. **Common question program:** leisure time: importance of areas of life; feeling of happiness; memberships and honorary activities in clubs, parties, organizations, citizens' initiatives and occupation organizations; interactions in leisure time; tolerance regarding minorities, those of other beliefs and foreigners; interhuman trust; self-effectiveness (scale); general contentment with life (scale). working world: importance of selected characteristics of occupational work (scale); personal employment; general work satisfaction (scale); self-determination at work (scale); work ethic (scale); attitude to achievement-based pay and following work instructions without criticism; priority of nationals over foreigners as well as men over women with shortage of jobs; assumed priority of individual or social reasons for the situation of economic need of individuals; freedom of the unemployed to reject a job offer (scale). politics: party preference; attitude to foreign workers in one's country; fear of the future; assimilation and integration of immigrants; concept of a just society (more welfare state or liberalism, scale); interest in political news in the media; individualism and thinking of the community; interest in politics; political participation; self-assessment on a left-right continuum (scale); self-responsibility or governmental provision (scale); attitude to competition freedom and entrepreneur freedom (scale); satisfaction with democracy; attitude to the current political system of the country and judgement on the political system of the country ten years ago (scale); preference for a democratic political system or for strong leadership of an individual politician (scale); attitude to democracy (scale); loss of national characteristics through unification of Europe. religion: individual or general standard for good and evil; current and possibly earlier religious denomination; current frequency of church attendance and at the age of 12; importance of religious celebration at birth, marriage and funeral; self-assessment of religiousness; ability of the religious community in moral questions, with problems in family life, with spiritual needs and current social problems of the country; belief in God, life after death, hell, heaven, sin, telepathy and reincarnation; belief in God or nihilism (scale); importance of God in one's life (scale); comfort and strength through belief; prayer and Meditation; frequency of prayer; possession and belief in lucky charms or talisman (scale); reading

and observing horoscopes; attitude to separation of church (religion) and state (scale). family and marriage: most important criteria for a successful marriage (scale); attitude to marriage and traditional family structure (scale); attitude to one's own children (scale); attitude to traditional understanding of one's role of man and woman in occupation and family (scale); attitude to a traditional or liberal parent-child relation; importance of educational goals; attitude to abortion. society: preference for individual freedom or social equality; postmaterialism (scale); preferred social development (scale); attitude to technical progress; trust in institutions; observing individual human rights in the country; attitude to environmental protection (scale); closeness to family, neighborhood, the people in the region, countrymen, Europeans and humanity; closeness to older people, the unemployed, foreigners and handicapped as well as readiness to make an effort for these groups; personal reasons for assistance with older people as well as foreigners; identification with the city, region, the nation, Europe and the world; national pride. morals and sexuality: moral attitudes (tax evasion, theft, use of drugs, lying, bribe money, corruption, euthanasia, suicide, environmental pollution, alcohol at the wheel; scale); moral attitudes to partnership and sexuality (homosexuality, abortion, divorce, promiscuity; scale); assumed spreading of immoral behavior in the population of the country (scale); attitude to punishment dependent on the situation of culprit or victim (scale). Demography: sex; year of birth; marital status and living together with a partner; number of children; school education; age at termination of school training; employment; superior function and span of control; company size; occupation (ISCO88) and occupational position; length of unemployment; size of household; ages of children in household; head of household; characteristics of head of household; household income. Also encoded was: city size; region; country.

**2. Optional questions:** In some countries the following additional questions were posed: attitude to privatization of national companies (scale); readiness to go to war for one's country; attitude to equal income or income based on achievement (scale); preference for individual or government provision for pensions as well as for housing (scale); attitude to fundamental or only cautious changes in one's own life; attitude to revolutionary change of society; judgement on the solvability of environmental problems, crime and unemployment at national level; job security; thoughts about the meaning of life; belief in angels and supernatural powers; attitude to conducting religious practices in school; attitude to dealing with different religious traditions; attitude to prohibiting books and films hostile to religion; assessment of the influence of the churches on politics in the country; moral concepts about traveling without a ticket, political murder, embryo research, gene manipulation, prostitution, pedophilia (scale); trust in countrymen.

**Interviewer rating:** social class of respondent; willingness of respondent to cooperate.

**Also encoded:** date of interview; length of interview.

**Universe:** Adult population of the country 18 years and older (no upper age limit).

#### 4.3 Methodology and processing

##### Selection method

Representative multi-stage random sample respective quota sample of the adult population of the country 18 years old and older. In all countries representative national samples were asked this questionnaire, but the quality of the samples varies from country to country. With the exception of Greece, in all countries surveys were carried out by experienced professional survey organizations. For more information, see the Source book of the 1999/2000 EVS<sup>3</sup>.

---

<sup>3</sup> Halman, Loek, Source book EVS 1999. Loc. cit.

### Mode of data collection

Face-to-face interviews with standardized questionnaire. In Iceland about a quarter of the respondents were interviewed by telephone. These were respondents in remote areas of the country.

Number of units: 41.125

Number of variables: 513

### Fieldwork period

*Table 3: Fieldwork period 1999-2001*

Country/Region	1999 - 2001
Austria	1999-08-01 to 1999-10-31
Belarus	2000-03-01 to 2000-04-30
Belgium	1999-03-01 to 1999-06-30
Bulgaria	1999-06-01 to 1999-07-31
Croatia	1999-03-01 to 1999-04-30
Czech Republic	1999-03-01 to 1999-05-31
Denmark	1999-04-01 to 1999-11-30
Estonia	1999-10-01 to 1999-10-31
Finland	2000-09-01 to 2000-10-31
France	1999-03-23 to 1999-04-10
Germany East	1999-10-01 to 1999-12-31
Germany West	1999-10-01 to 1999-12-31
Great Britain	1999-10-01 to 1999-11-30
Greece	1999-03-01 to 1999-06-30
Hungary	1999-11-01 to 1999-12-31
Iceland	1999-06-01 to 1999-12-31
Ireland	1999-10-01 to 2000-02-28
Italy	1999-03-01 to 1999-05-31
Latvia	1999-03-01 to 1999-03-31
Lithuania	1999-11-01 to 1999-12-31
Luxembourg	1999-07-01 to 1999-10-31
Malta	1999-03-01 to 1999-05-31
Netherlands	1999-03-01 to 1999-08-31
Northern Ireland	1999-07-01 to 1999-11-30
Poland	1999-02-01 to 1999-03-31
Portugal	1999-10-01 to 1999-12-31
Romania	1999-07-01 to 1999-07-31
Russian Federation	1999-04-01 to 1999-06-30
Slovak Republic	1999-06-01 to 1999-07-31
Slovenia	1999-10-01 to 1999-10-31
Spain	1999-03-01 to 1999-04-30
Sweden	1999-11-15 to 2000-02-13
Turkey	2001-09-01 to 2001-10-01
Ukraine	1999-12-01 to 1999-12-31

### Usage regulations

Data and documents are released for academic research and teaching - Access category A.

## 5 Dataset structure and variable definition

The naming of variables follows several standards differentiated by type of variables. Although variable names are not harmonized across waves, all standard variables are built according to the scheme "xNNN" (e.g. v130 or o45). Exceptions are constructed variables, country-specific variables, and administrative variables (see section 5.1: Administrative and ID variables).

- Constructed variables are indicated with a respective suffixe (**\_r**).
- Country-specific variables, i.e. variables created for questions which could not be harmonized, or questions the country additionally included in the field questionnaire, are named by the alphanumerical country code (**\_fi** for Finland according to ISO 3166-1 alpha-2). Their positions in the datasets mirror their positions in the field questionnaires.
- Another type of variables are standardized country-specific variables indicated with a **respective suffix "\_cs"**. These are compiled variables constructed e.g. for religion and political party preference. They contain country identifier (ISO 3166-1) and the given order of country-specific categories in the field questionnaires. References to respective harmonized variables in Integrated Dataset are added as notes.

### Types of variables

- Core variables (vNNN) and optional variables (oNNN) which are part of the integrated dataset and the national dataset
- Country-specific variables which are part of the integrated dataset and the national dataset.  
Example: Variable v90\_AT is the original variable for Austria comprising 4 instead of 5 answer categories of the corresponding question in the English Master Questionnaire. It was additionally inserted in the integrated dataset for its recording was not possible.
- Country-specific variables which are only part of the national dataset.  
Example 1: Variable v304\_de is the original variable for Germany. It was recoded according to the master variable v304. To provide also the original information v304\_de is additionally included in the national dataset.  
Example 2: Variable v6a\_gb is an 'extra' country-specific question. It is a supplement to a group of questions used in the English Master Questionnaire. The name of the last variable of the respective question group has been used.
- Additional country-specific variables which are only part of the national dataset are indicated by a preceding '**c\_**'.

### Missing values

In general, the missing values are standardized across EVS waves. For all variables a set of negative missing values is defined:

- 1 **don't know**
- 2 **no answer**
- 3 **not applicable** (missing values which result from filter questions; missing values in administrative variables)
- 4 **question not asked** (i.e. question not included in country's field questionnaire or not provided for by National Program Director of the EVS member countries)
- 5 **other missing** (includes: system missing, wild codes, illogic answer-patterns in e.g. filters)

### Dummy variables

For questions that allow for multiple responses a dummy variable is created for each answer category. E.g. a question with four answer categories in an item battery has four dummy variables as final data. In general, a value "1" means that the respondent chose the particular category as an answer (mentioned, yes, ...). In case of a value "0" the respondent did not choose the particular category as answer (not mentioned, no, ...). Dummy variables are also created for "None of these", "Don't know" or other residual responses. Inconsistencies between choosing category 'none of these' and other mentioned items of a battery are flagged by flag variables (see section 5.2.1: Flag variables indicating inconsistencies).

## 5.1 Administrative and ID variables

Administrative variables are used mainly for identifying datasets with regard to version, wave, and country (see Table 4 below). They include different kinds of variables:

- Technical variables for identifying the dataset or cases
- Weighting variables to help adjust samples to the universe
- Cumulation specific variables combining the information of different variables
- Special compound variables for creating customized data files

Table 4: Overview of administrative variables

Variable	Variable label
studyNo	GESIS Study Number
studyNoC	GESIS Study Number (National datasets)
version	GESIS Archive Version
versionC	GESIS Archive Version (National datasets)
id_cocas	unified respondent number
caseno	original respondent number
year	survey year
country	country code
country1	country code [with split ups]
c_abrv	country abbreviation
c_abrv1	country abbreviation [with split ups]
weight_g	weight
weight_s	weight [with split ups]
cntry_y	country_year
cntry1_y	country_[with split ups]- year
intno	interviewer number
language	language in which the interview was taken
v324	year/month of start-fieldwork
v325	year/month of end-fieldwork

### 5.1.1 Identification variables

Each record in the Longitudinal Data File contains two identification variables:

Caseno: 'Original respondent number'

Id\_cocas: 'Unified respondent number' consisting of year/country/case\_id

### 5.1.2 Variables with country codes

The overview in Table 5 lists variables for which country identifiers (ISO 3166-1 numeric or alphanumeric) were added to values. Information about the composition of values is given as well.

Table 5: Variables with country codes ISO 3166-1

Variable	Variable Label	Composition of values (cc=country code)
country country1	country code country code [with split ups]	CC- ISO (3 digits)
cntry_y cntry1_y	country_year country_year – (with split ups)	CC-ISO (3 digits)+ YEAR (4 digits)
c_abrv c_abrv1	country abbreviation country abbreviation [with split ups]	CC- ISO 3166-1 alpha-2
language	language of interview	CC- ISO (3 digits)+VALUE (2 digits)
v251_MT v252_MT v253_MT	belong to geographic group: most (6 answer categories) (Q67_MT) belong to geographic group: next (6 answer categories) (Q68_MT) belong to geographic group: least (6 answer categories) (Q69_MT)	CC- ISO (3 digits)+VALUE (2 digits)
v256 v257	which political party would you vote for (Q72) which political party appeals to you most (Q73)	CC- ISO (3 digits)+VALUE (2 digits)
v320_cs	income household respondent (Q110) (country specific)	CC- ISO (3 digits)+VALUE (2 digits)
v305_se	educational level respondent (country specific) (SE)	CC- ISO (3 digits)+VALUE (2 digits)
v323	region where interview was conducted (Q113)	CC- ISO (3 digits)+VALUE (3 digits)

### Country variables with split ups

Country variables 'country', 'c\_abrv', and 'cntry\_y' each have a pendant of a country variable with split ups. In the split up variables 'country1', 'c\_abrv1', 'cntr1\_y', Germany is represented by two different codes, Germany West: 900 or DE-W and Germany East: 901 or DE-E. The same rule applies to the weight variable: 'weight\_g' corresponds to the weight variable with split ups for Germany: 'weight\_s'.

In Table 6 alphanumeric country abbreviations and numeric 3-digits country codes as used in EVS 1999 are compiled. All surveyed countries and regions, i.e. including separate samples for Great Britain/Northern Ireland, are coded in accordance with the ISO 3166-1 alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East/West subdivision of Germany.

Table 6: Country codes (ISO 3166-1)

Country/Region	Country abbreviation ISO 3166-1 alpha-2	ISO 3166-1 (3 digits)	ISO 3166-1 (3 digits with split ups)	EVS-specific country code used in previous dataset versions
Austria	AT	40	40	5
Belarus	BY	112	112	36
Belgium	BE	56	56	10
Bulgaria	BG	100	100	26
Croatia	HR	191	191	27
Czech Republic	CZ	203	203	22
Denmark	DK	208	208	11
Estonia	EE	233	233	18
Finland	FI	246	246	14
France	FR	250	250	1
Germany West	DE-E*	276	900*	3
Germany East	DE-W*	276	901*	4
Great Britain	GB-GBN	826*	826*	2
Greece	GR	300	300	28
Hungary	HU	348	348	24
Iceland	IS	352	352	15
Ireland	IE	372	372	17
Northern Ireland	GB-NIR	909*	909*	16
Italy	IT	380	380	6
Latvia	LV	428	428	19
Lithuania	LT	440	440	20
Luxembourg	LU	442	442	33
Malta	MT	470	470	32
Netherlands, The	NL	528	528	9
Poland	PL	616	616	21
Portugal	PT	620	620	8
Romania	RO	642	642	25
Russian Federation	RU	643	643	29
Slovak Republic	SK	703	703	23
Slovenia	SI	705	705	34
Spain	ES	724	724	7
Sweden	SE	752	752	13
Turkey	TR	792	792	44
Ukraine	UA	804	804	35

\*Nonofficial ISO 3166-1 or ISO 3166-1 alpha-2 code.

### 5.1.3 Weighting

Variable 'weight\_g' contains national weights. For most countries gender, age, and region were adjusted to the distribution in the national population. For Germany (united) additionally the disproportional East and West German samples have been adjusted.

Variable 'weight\_s' is based on 'weight\_g'. It weights East and West German samples separately and has to be applied whenever East or West Germany is analyzed separately.

For summarized information on weighting in EVS 1999, see the [Source book of the 1999/2000 EVS](#)<sup>4</sup>. Documentation on weight variables as delivered by the national representatives in the EVS member countries is provided along with the national datasets through [ZACAT](#) - GESIS Online Study Catalogue.

<sup>4</sup> Halman, Loek, Source book EVS 1999. Loc. cit.

## 5.2 Data quality checks

The data of the EVS 1999 was checked for wild codes, system missing, filter inconsistency, and contradictions between variables of item batteries.

### 5.2.1 Flag variables indicating inconsistencies

For the most common non-conformed interviewer instructions and illogic answer patterns across national datasets, flag variables were created which mark such non-conformities and leave decisions on correction up to the researcher.

Information about both flag and flagged variables is provided by notes in the Variable Documentation.

Flagged variable: v164 'learn children at home: good manners (Q453A)'

Note added: Please see flag variable f174 which indicates inconsistencies for variables v164 to v174.

**Flag variable f174 'flag variable: learn children at home (Q262)'**

Indicates inconsistencies for the variables v164 to v174.

If respondent named more than the allowed 5 qualities.

if v164 to v174=1 > 5 then f174=1

0 'Limitation followed; 1 'Limitation ignored'

There are three types of non-conformities which were flagged (see Appendix 1).

1. 'first/second choice' variables which were flagged in case the value of the variable for the first choice equaled to the value of the variable for the second choice.

Variables: v69 to v70 – f69; v191\_se to v192\_se – f192\_se; v193\_se to v194\_se – f194\_se

2. 'multiple response question' variables which were flagged in case respondents chose more than the 5 maximally permitted items.

Variables: v164 to v174 – f174

3. 'none-item battery' variables which were flagged in case the answer pattern of the 'none'-item variable and the other variables of the item battery of a question was illogic. As several illogic answer patterns are possible, the flag variables have nine categories.

Variables: v71 to v86 – f86

Flag variables introduced in EVS 1999 are listed in Table 7.

Table 7: Flag variables for indicating inconsistencies

Variable	Variable label
f69	flag variable: why do people live in need - most/second important (Q11/Q12)
f86	flag variable: important in a job: none of these (Q13)
f174	flag variable: learn children at home (Q49)
f192_se *	flag variable: aims of this country - most/second important (Q135)
f194_se*	flag variable: aims of this country - most/second important (Q137)

\* Flag variables apply to Sweden only (WVS questions).

### 5.2.2 Notes on deviating filtering

In case **filtering in countries'** field questionnaires systematically deviated from filtering in the Master Questionnaire (either by lacking filter or by adding country-specific filter) data were not corrected but marked by variable notes related to the affected countries.

Two cases of inconsistencies were additionally indicated by notes in the Variable Documentation of the current dataset version.

- Respondents who should have been asked questions following filter question but were set to -3 'not applicable'.
- Respondents who should not have been asked questions following the filter questions but have valid codes for these questions.

## 6 Variable Documentation and types of notes added

---

The variable documentation describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. It is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with the international metadata specification for the social and behavioural sciences, established by the Data Documentation Initiative (DDI-Codebook/XML).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire.

General remarks and comments referring to a certain variable are defined as variable notes. Notes could be references to trend/comparability information, international standards applied or EVS coding frames, problems in questionnaire translation, but also references to data problems or specific characteristics. A distinction between two types of variable notes can be made:

- Notes referring to the Integrated Dataset, which implies all national datasets,
- Notes referring to a single national dataset.

### 6.1 Notes with reference to the Integrated Dataset

- Standardized variables (income, region, parties) containing country identifier (ISO 3166-1) and the given order of country-specific categories in the field questionnaires.
- Standardized variables with reference to international standards (occupation – ISCO88 2, 3, and 4 digits code).
- Information on coding of open-ended questions and multiple response questions.
- Comparability of the variables in the Integrated Dataset: indication of trend variables between EVS 1999 and EVS 2008 and information on the comparability of questions/variables in other international surveys (ESS, ISSP, WVS).

### 6.2 Notes with reference to single national data

- Country-specific variables additionally added to dataset (e.g. v320\_dk, v190\_gb, etc.).
- Reference on deviations between the master and the field questionnaire.
- Information on data processing.
- Notes documenting translation problems.

## 7 Explanation of the variable documentation

The variable documentation part is set up by means of the GESIS Dataset Documentation Manager (DSDM) based on DDI-XML v.2).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire. Further, the Variable Documentation contains frequency counts, by country (sample).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable **"c\_abrv: country abbreviation"** and **"c\_abrv1: country abbreviation [with split ups]"**, respectively.

AL	Albania	ES	Spain	ME	Montenegro
AM	Armenia	FI	Finland	MK	Macedonia
AT	Austria	FR	France	MT	Malta
AZ	Azerbaijan	GB-GBN	Great Britain	NL	The Netherlands
BA	Bosnia-Herzegovina	GB-NIR	Northern Ireland	NO	Norway
BE	Belgium	GE	Georgia	PL	Poland
BG	Bulgaria	GR	Greece	PT	Portugal
BY	Belarus	HR	Croatia	RO	Romania
CY	Cyprus	HU	Hungary	RS	Serbia
CY-TCC	Turkish Cypriote Community	IE	Ireland	RS-KM	Kosovo
CZ	Czech Republic	IS	Iceland	RU	Russia
DK	Denmark	IT	Italy	SE	Sweden
DE	Germany (-1989)	LT	Lithuania	SI	Slovenia
DE-W	Germany West (1990 ff.)	LU	Luxembourg	SK	Slovakia
DE-E	Germany East (1990 ff.)	LV	Latvia	TR	Turkey
EE	Estonia	MD	Moldova	UA	Ukraine

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country-specific variables. In the case of variables with long lists of coded **"real values"** (e.g. age), results are only presented for the corresponding categorized variable if available. The content and construction of technical, administrative, or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table. Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English Master Questionnaire as provided by the European Values Study.

Digital Object Identifier (doi): Header with doi linked to the Study Description in the GESIS Data Catalogue.

**VARIABLE NAME** (serial number from questionnaire or assigned by the archive) and **VARIABLE LABEL** as defined in the dataset, including question number. The numbers or letters that may appear together with the variable name reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R), harmonized, or if asked only in a single country (country abbreviation).

**QUESTION NUMBER** and full **QUESTION TEXT** from the Master Questionnaire, including interviewer instructions.

**CODE VALUES** occurring in the data for this variable and complete **ANSWER TEXT** from the Master Questionnaire. Code values may differ from the questionnaire specification due to standardization/ harmonization.

**NOTES** delineate additional explanatory text subsuming trend information or archive remarks on data processing and other issues relevant for the understanding and application of the variable. **DERIVATION** information refers to the construction principle of indices or other derived variables (not in the example).

#### European Values Study 1999

GESIS Study No. 3811, v3.0.0, <http://dx.doi.org/doi:10.4232/1.10789>

v72 - important in a job: pleasant people (Q13B)

Q.13

<Show card 13>

Here are some aspects of a job that people say are important. Please look at them and tell me which ones you personally think are important in a job?

<Code all mentioned>

Q.13B Pleasant people to work with

-5 other missing  
-4 question not asked  
-3 not applicable  
-2 no answer  
-1 don't know  
0 not mentioned  
1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f96 which indicates inconsistencies for variables v71 to v86 and O2/O3.

Comparability:

Trend question: EVS 2008 and EVS 1999.

Modified trend: response categories.

**CROSS-TABULATION:** The absolute frequencies of the occurrence of values (absolute values) refer to the number of cases in the weighted dataset as indicated, in this case weighted by weight\_g. The relative frequencies (row percent) refer to the valid cases (n valid sum), i.e. the total number of cases (n sum) reduced by the number of cases defined as missing data (M).

**FREQUENCY COUNTS:** For country specific variables relative frequencies are calculated including and excluding missing data (M), i.e. percent on the basis of all cases (sum) and valid percent on the basis of the valid cases.

## Appendix 1: Overview of flag variables to identify inconsistencies

Variable	Label	N	total N	Values	Value Labels	Description
f174	Flag variable: learn children at home (Q49)	39754 1371	41125	0 1	Limitation followed Limitation ignored	If respondent named more than the allowed 5 qualities. if v164to v174=1 > 5 then f174=1
f69	Flag variable: why do people live in need - most/second important (Q11/Q12)	40503 622	41125	0 1	consistent inconsistent	If most important reason is identical with next important reason. if v69=v70 then f69=1
f86	Flag variable: important in a job: none of these (Q13)	40969	41125	0	consistent	
		0	41125	1	inconsistent1	If respondent mentions at least one aspect and "none". if v86=1 and any of v71to v85 and O2 to O3=1 then f86=1
		148	41125	2	inconsistent2	If respondent does not mention any aspect and does not mention "none". if v86=0 and all of v71to v85 and O2 to O3=0 then f86=2
		8	41125	3	inconsistent3	If respondent does not mention any aspect and "none" is missing. if v86=-5 and all of v71to v85 and O2 to O3=0 then f86=3
		0	41125	4	inconsistent4	If respondent mentions at least one aspect and "none" is missing. if v86=-5 and any of v71to v85 and O2 to O3=1 then f86=4
f192_se*	Flag variable: aims of this country - most/second important	41104 21	41125	0 1	consistent inconsistent	If most important aim is identical with next most important aim. if v191_se=e192_se then f192_se=1
f194_se*	Flag variable: aims of this country - most/second important	41115 10	41125	0 1	consistent inconsistent	If most important aim is identical with next most important aim. if v193_se=v194_se then f194_se=1

\* Flag variables apply to Sweden 1999 only (WVS questions).

## version - GESIS archive version

GESIS Archive Version:

3.0.0 '2011-11-20'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

id\_cocas - unified respondent number

Unified respondent number

Code comprises 12 digits: YYYY (year of wave), CCC (ISO-Code for country), and NNNNN (case number)

caseno - original respondent number

Original respondent number

intno - interviewer number

Interviewer number

Romania:

ID-Number assigned to every interview, not interviewer number.

year - survey year

Survey year: 1999

Note:

For detailed information, see variables cntry\_y, cntry1\_y.

#### weight\_g - weight

General weight factor

Variable 'weight\_g' contains national weights. For most countries gender, age, and region were adjusted to the distribution in the national population. For Germany (united) additionally the disproportional East and West German samples have been adjusted. For summarized information on weighting in EVS 1999, see the Source book of the 1999/2000 EVS.

Belarus, Denmark, Greece, Iceland, Italy, Latvia, Romania, Slovenia, Spain, and Turkey are weighted by 1.

weight\_s - weight [with split ups]

Weight - Germany East and West

Variable 'weight\_s' is based on 'weight\_g'. It weights East and West German samples separately and has to be applied whenever East or West Germany is analyzed separately.

Weight\_s includes the special weight factor for Germany and the national weight for each sample.

Belarus, Denmark, Greece, Iceland, Italy, Latvia, Romania, Slovenia, Spain, and Turkey are weighted by 1.

v1 - how important in your life: work (Q1A)

Q.1

<Show card 1>

Please say, for each of the following, how important it is in your life.

v6 - how important in your life: religion (Q1F)

Q.1

<Show card 1>

Please say, for each of the following, how important it is in your life.

Q.1F Religion

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very important
- 2 quite important
- 3 not important
- 4 not at all important

Comparability:

Trend question: EVS 2008 and EVS 1999.

Comparable questions: WVS 1995 (v9) and WVS 2000 (v9).

v6\_se - service to others important in life (Q7\_SE)

WVS question - Sweden (1999):

Q.7

Please say, for each of the following, how important it is in your life.

Service to others

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 SE: very important
- 2 SE: rather important
- 3 SE: not very important
- 4 SE: not at all important

Note:

Sweden: Field questionnaire for EVS 1999 contains 26 variables additionally implemented for World Value Survey.

v6\_se, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent
-4	question not asked	M	40110	97.5	
-1	don't know	M	5	0.0	
1	SE: very important		376	0.9	37.3
2	SE: rather important		548	1.3	54.3

v10 - environment: government should reduce environmental pollution (Q3C)

Q.3

<Show card 3>

I am now going to read out some statements about the environment. For each one read out, can you tell me whether you agree strongly, agree, disagree or strongly disagree?

<Read out each statement and code an answer for each>

Q.3C The Government has to reduce environmental pollution but it should not cost me any money

v12 - do you belong to: welfare organisation (Q5a\_A)

Q.5a

<Show card 5>

Please look carefully at the following list of voluntary organisations and activities and say ... a) which, if any, do you belong to?

<Code all mentioned under (a)>

Q.5a\_A Social welfare services for elderly, handicapped or deprived people

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 2000 (v39).

v14 - do you belong to: cultural activities (Q5a\_C)

Q.5a

<Show card 5>

Please look carefully at the following list of voluntary organisations and activities and say ... a) which, if any, do you belong to?

<Code all mentioned under (a)>

Q.5a\_C Education, arts, music or cultural activities

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 2000 (v41).

<Code all mentioned under (a)>

Q.5a\_L Women's groups

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 2000 (v50).

v30 - do you work unpaid for: welfare organisation (Q5b\_A)

Q.5b

<Show card 5>

Please look carefully at the following list of voluntary organisations and activities and say ...b) which, if any, are you currently doing unpaid voluntary work for?

<Code all mentioned under (b)>

Q.5b\_A Social welfare services for elderly, handicapped or deprived people

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Netherlands:

v30-v44 -1 and -2 were not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 2000 (v54).

v35 - do you work unpaid for: local community action (Q5b\_F)

Q.5b

<Show card 5>

Please look carefully at the following list of voluntary organisations and activities and say ...b) which, if any, are you currently doing unpaid voluntary work for?

<Code all mentioned under (b)>

Q.5b\_F Local community action on issues like poverty, employment, housing, racial equality

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Netherlands:

v30-v44 -1 and -2 were not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 2000 (v59).

v40 - do you work unpaid for: sports/recreation (Q5b\_K)

Q.5b

<Show card 5>

Please look carefully at the following list of voluntary organisations and activities and say ...b) which, if any, are you currently doing unpaid voluntary work for?

<Code all mentioned under (b)>

Q.5b\_K Sports or recreation

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Netherlands:

v30-v44 -1 and -2 were not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 2000 (v64).

v45 - do you work unpaid for: none (Q5b\_P)

Q.5b

<Show card 5>

Please look carefully at the following list of voluntary organisations and activities and say ...b) which, if any, are you currently doing unpaid voluntary work for?

<Code all mentioned under (b)>

Q.5b\_P None

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

v12 - v45

The questionnaire contains two additional subquestions: 'I don't know' (v28) and 'No answer' (v29). They were recoded to -1 and -2 for each item of the question battery; because the missing values -1, -2, and -3 were used differently, they were recoded into 0 ('not belonging to a voluntary organization' and 'not doing voluntary work for those organizations').

Denmark:

Additional filter: an additional answer category 'not member of any organisation' (ingen) has been implemented. Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Poland:

For v12-v26 and v30-v44 -1 and -2 were not included.

Malta and Sweden:

For v12-v26 and v30-v44 -2 was not included.

Netherlands:

v30-v44 -1 and -2 were not included.

Turkey:

For v12-v26 and v30-v44 -2 was not included.

Additional filter question (c1) before Q5 (v12-v46). Respondents who are not member of any organisation have been filtered to v48 (coded as 0 'not mentioned').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

v51 - how often spend time in clubs+voluntary associations (Q6D)

Q.6

<Show card 6>

I'm going to ask how often you do certain things. For each activity, would you say you do them every week or nearly every week; once or twice a month; only a few times a year; or not at all?

<Interviewer: Code 'Not applicable' when respondent is not involved in work, church or club>

Q.6D Spend time with people in clubs and voluntary associations (sport, culture, communal)

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 every week
- 2 once or twice a month
- 3 a few times a year
- 4 not at all

Hungary, Latvia, Luxembourg, Poland, and Slovak Republic: -3 'not applicable' is not included in the country questionnaire. In variable v51\_filt category -3 'not applicable' was reconstructed. Furthermore inconsistencies between filtering of other countries were corrected in v51\_filt.

v49\_filt - how often spend time with colleagues (Q6B) (category -3 'nap' reconstructed with filter)

Q.6

<Show card 6>

I'm going to ask how often you do certain things. For each activity, would you say you do them every week or nearly every week; once or twice a month; only a few times a year; or not at all?

<Interviewer: Code 'Not applicable' when respondent is not involved in work, church or club>

Q.6B Spend time with colleagues from work or your profession outside the workplace

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 every week
- 2 once or twice a month
- 3 a few times a year
- 4 not at all

Variable constructed on basis of v87 and v306 to correct for inconsistencies between filter instructions of countries. For Hungary, Latvia, Luxembourg, Poland, and Slovak Republic category -3 'not applicable' was reconstructed according to this filter (v87 respondent is employed or v306 has paid employment. If v87=1 or range (v306=1,3)). For all other countries filter was corrected accordingly. In case of no deviation v49\_filt=v49.

v50\_filt - how often spend time in church (Q6C) (category -3 'nap' reconstructed with filter)

Q.6

<Show card 6>

I'm going to ask how often you do certain things. For each activity, would you say you do them every week or nearly every week; once or twice a month; only a few times a year; or not at all?

<Interviewer: Code 'Not applicable' when respondent is not involved in work, church or club>

Q.6C Spend time with people at your church, mosque or synagogue

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 every week
- 2 once or twice a month
- 3 a few times a year
- 4 not at all

Variable constructed on basis of v13 and v101 to correct for inconsistencies between filter instructions of countries. For Hungary, Latvia, Luxembourg, Poland, and Slovak Republic category -3 'not applicable' was reconstructed according to this filter (v101 belonging to a religious denomination or v13 belonging to religious or church organisations: If any (1,v101,v13)). For all other countries filter was corrected accordingly. In case of no deviation v50\_filt=v50).

Turkey:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

v51\_filt - how often spend time in clubs+voluntary associations (Q6D) (category -3 'nap' reconstructed with filter)

Q.6

<Show card 6>

I'm going to ask how often you do certain things. For each activity, would you say you do them every week or nearly every week; once or twice a month; only a few times a year; or not at all?

<Interviewer: Code 'Not applicable' when respondent is not involved in work, church or club>

Q.6D Spend time with people in clubs and voluntary associations (sport, culture, communal)

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 every week
- 2 once or twice a month
- 3 a few times a year
- 4 not at all

Variable constructed on basis of v27 and v45 to correct for inconsistencies between filter instructions of countries. For Hungary, Latvia, Luxembourg, Poland, and Slovak Republic category -3 'not applicable' was reconstructed according to this filter (v27 belonging to voluntary organisations and activities or v45 doing unpaid voluntary work: If any (0,v27,v45)). For all other countries filter was corrected accordingly. In case of no deviation v51\_filt=v51.

v51\_filt by c\_abrv, Absolute Values (Row Percent), weighted by weight\_g

v52 - don't like as neighbours: people with criminal record (Q7A)

Q.7

<Show card 7>

On this list are various groups of people. Could you please sort out any that you would not like to have as neighbours?

<Code an answer for each>

Q.7A People with a criminal record

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

0 not mentioned

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Belarus, Romania:

Since no show card was used in the field questionnaire it seems that they have asked the battery item by item, and not as block.

Hungary:

See v52\_HU

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 1995 (v51), WVS 2000 (v68).

v52\_hu - don't like as neighbours: people with criminal record (Q7A\_HU)

Q.7\_hu

On this list are various groups of people. Could you please sort out any that you would not like to have as neighbours?

Q.7A\_hu People with a criminal record

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 HU: not mentioned
- 1 HU: mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Hungary:

Variables v52\_hu to v65\_hu are not comparable to the Master Questionnaire variables v52-v65. In the Hungarian field questionnaire each item was read to the respondent, so the respondent had to decide in each case (and did not choose from a list as is the case in the other countries).

v52\_hu, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent
-4	question not asked	M	40124	97.6	
0	HU: not mentioned		115	0.3	11.5
1	HU: mentioned		885	2.2	88.5
	Sum		41124	100.0	100.0
	Valid Cases		1000		

v53\_hu - don't like as neighbours: people of different race (Q7B\_HU)

Q.7\_hu

On this list are various groups of people. Could you please sort out any that you would not like to have as neighbours?

Q.7B\_hu People of different race

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 HU: not mentioned
- 1 HU: mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Hungary:

Variables v52\_hu to v65\_hu are not comparable to the Master Questionnaire variables v52-v65. In the Hungarian field questionnaire each item was read to the respondent, so the respondent had to decide in each case (and did not choose from a list as is the case in the other countries).

v53\_hu, weighted by weight\_g

v68 - how satisfied are you with your life (Q10)

Q.10

<Show card 10>

All things considered, how satisfied are you with your life as a whole these days? Please use this card to help with your answer.

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 dissatisfied
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 satisfied

Comparability:

Trend question: EVS 2008 and EVS 1999.

Comparable questions: WVS 1995 (v65), WVS 2000 (v81).

f69 - flag variable: why do people live in need - most/second important (Q11/Q12)

Flag variable:

Indicates inconsistencies for the variables v69/v70.

If most important reason is identical with next important reason.

if v69=v70 then f69=1

0 consistent

1 inconsistent

Note:

For detailed information, see EVS 1999 variable report.

v69 - why do people live in need: most important (Q11)

Q.11

<Show card 11>

Why are there people in this country who live in need? Here are four possible reasons. Which one reason do you consider to be most important?

<Code one under (a) below>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 because they are unlucky
- 2 because of laziness and lack of willpower
- 3 because of injustice in our society
- 4 it's an inevitable part of modern progress
- 5 none of these

Note:

Please see flag variable f69 which indicates inconsistencies for variables v69/v70.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v73 - important in a job: not too much pressure (Q13C)

Q.13

<Show card 13>

Here are some aspects of a job that people say are important. Please look at them and tell me which ones you personally think are important in a job?

<Code all mentioned>

Q.13C Not too much pressure

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 not mentioned
- 1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f86 which indicates inconsistencies for variables v71 to v86 and O2/O3.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 1995 (v76), WVS 2000 (v87).

v83 - important in a job: responsible job (Q13M)

Q.13

<Show card 13>

Here are some aspects of a job that people say are important. Please look at them and tell me which ones you personally think are important in a job?

<Code all mentioned>

Q.13M A responsible job

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 not mentioned
- 1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Please see flag variable f86 which indicates inconsistencies for variables v71 to v86 and O2/O3.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 1995 (v83), WVS 2000 (v94).

f86 - flag variable: important in a job: none of these (Q13)

Flag variable:

Indicates inconsistencies for the variables v71 to v86 and O2/O3.

Inconsistent 1

If respondent mentions at least one aspect and "none".

if v86=1 and any of v71 to v85 and O2 to O3=1 then f86=1

Inconsistent 2

If respondent does not mention any aspect and does not mention "none".

if v86=0 and all of v71 to v85 and O2 to O3=0 then f86=2

Inconsistent 3

If respondent does not mention any aspect and "none" is missing.

if v86=-5 and all of v71 to v85 and O2 to O3=0 then f86=3

Inconsistent 4

If respondent mentions at least one aspect and "none" is missing.

if v86=-5 and any of v71 to v85 and O2 to O3=1 then f86=4

0 consistent

1 inconsistent 1

2 inconsistent 2

3 inconsistent 3

4 inconsistent 4

Note:

For detailed information, see EVS 1999 variable report.

v96 - fair/unfair: quicker secretary is paid more (Q18)

Q.18

Imagine two secretaries, of the same age, doing practically the same job. One finds out that the other earns £ 30 (Countries other than UK: Please use own currency) a week more than she does. The better paid secretary, however, is quicker, more efficient and more reliable at her job.

In your opinion is it fair or not fair that one secretary is paid more than the other?

v97 - follow instructions at work/must be convinced first (Q19)

Q.19

<Show card 19>

People have different ideas about following instruction at work. Some say that one should follow instructions of one's superiors even when one does not fully agree with them. Others say that one should follow one's superior's instructions only when one is convinced that they are right. Which of these two opinions do you agree with?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 should follow instructions
- 2 must be convinced first
- 3 depends

## v99\_se - TV most important entertainment (Q53\_SE)

WVS question - Sweden (1999):

Do you agree strongly, agree, disagree or disagree strongly with the following statement: 'Television is my most important form of entertainment.'

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 SE: strongly agree
- 2 SE: agree
- 3 SE: disagree
- 4 SE: strongly disagree

Note:

Sweden: Field questionnaire for EVS 1999 contains 26 variables additionally implemented for World Value Survey.

v100 - good and evil: clear/no clear guidelines (Q21)

Q.21

<Show card 21>

Here are two statements which people sometimes make when discussing good and evil. Which one comes closest to your own point of view?

A: There are absolutely clear guidelines about what is good and evil. These always apply to everyone, whatever the circumstances.

B: There can never be absolutely clear guidelines about what is good and evil. What is good and evil depends entirely upon the circumstances at the time.

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 agree with statement A

2 agree with statement B

3 disagree with both

v101 - do you belong to a religious denomination (Q22)

Q.22

Do you belong to a religious denomination?

<if "no" - go to Q.24a>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 yes

2 no

Great Britain:

Question dropped from British questionnaire; variable reconstructed on the basis of v102 (answer category "none" added in the field questionnaire has been recoded to -3 'nap' in v102).

Romania:

Answer categories in field questionnaire: 1 'No'; 2 'yes'. Categories have been recoded according to Master Questionnaire.

Comparability:

Trend question: EVS 2008 and EVS 1999.

Comparable questions: WVS 1995 (v\*179), WVS 2000 (v\*184).

v102 - which religious denomination (Q23)

RELIGIOUS DENOMINATION - HARMONIZED VARIABLE

[Q.22 Do you belong to a religious denomination?]

Q.23

<Show card 23>

Which one?

<NB: PRESENT COUNTRY SPECIFIC LIST! RECODE INTO:>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Roman Catholic
- 2 Protestant
- 3 Free Church/ Non-Conformist/ Evangelical
- 4 Jew
- 5 Muslim
- 6 Hindu
- 7 Buddhist
- 8 Orthodox
- 9 other

Belarus and Romania:

Code 1 includes Roman and Greek Catholics.

Denmark, Hungary, Ireland, Northern Ireland, Poland, and Romania:

Additional filter: respondents belonging to a religious denomination are filtered to v105 (how often attend religious services) instead of v103 (were you ever a member of [another] religious denomination).

Great Britain:

Different question wording: 'What religious denomination do you consider yourself to be, whether you currently practise that religion or not' - adapted to the Master Questionnaire.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v179), WVS 2000 (v184).

v103 - did you belong to a religious denomination (Q24a\_r) (recoded)

Q.24a

Were you ever a member of a religious denomination?

<Interviewer instruction: if respondent is currently a member, please ask: Were you ever a member of another religious denomination?>

<if "no" - go to Q.25>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 yes

2 no

Austria:

Different question structure: variable split into two separate questions (Q24a 'ever a member of a religious denomination' and Q24b 'ever a member of another religious denomination'). In the field questionnaire there is no filter hint leading from v102 to Q24b. This fact may explain the high percentage of respondents who did not answer Q24b (ever member of another religious denomination).

Denmark, Hungary, Ireland, Northern Ireland, and Poland:

Different question format: question part "ever member of another religious denomination" dropped. Due to additional filter on v102, respondents belonging to a religious denomination (v101=1) have not been asked v103, v104.

Finland, Greece, Italy, and Lithuania:

Different question format: question part "ever member of another religious denomination" dropped; all respondents have been asked whether they were ever a member of a religious denomination; empirical consequence: members of a denomination (v101=1) who did not change their denomination gave the same answer to v102 and v104. Answers have been adapted to Master Questionnaire by comparing v102 and v104.

France:

Many interviewers did probably ignore the filter structure in the second part of v103 (ever member of another religious denomination), so that most of the respondents have been only asked if they were ever a member of a religious denomination. Empirical consequence: respondents with v101=1, who did not change their denomination gave the same answer to v102 and v104. Answers have been adapted to Master Questionnaire by comparing v102 and v104: cases that obviously did not change their religious denomination (Catholics and Jews) have been recoded to v103=2 and v104=-3; cases that did probably not change their denomination, but that could have changed from one protestant/free/orthodox church to another were not recoded.

Great Britain:

For Great Britain see v103r\_gb; different question wording: Do or did you ever practise any religion? That is, attend religious ceremonies of meetings on a regular basis?; v103r\_gb as far as possible adapted to the Master Questionnaire by comparing v102 with v104 (more detailed information from original unrecoded British variable used).

Iceland:

Different question structure (only one question used for v103 and v104) and answer categories (no, always member of religious affiliation; no, never member of religious affiliation; yes, National church; yes, Catholic Church; yes, other, which?). Variables v103 and v104 adapted to Master Questionnaire.

Luxembourg, Malta, and Slovakia:

Different question format: question part "ever member of another religious denomination" dropped. Although no additional filter has been used

in the field questionnaire, most of the respondents who are members of a religious denomination (v101=1) have not been asked if they were ever member of a religious denomination.

Romania:

Different question format: question part "ever member of another religious denomination" dropped.

Due to additional filter on v102 respondents members of a religious denomination (v101=1) should not have been asked v103 and v104.

However, two respondents with v101=1 have valid codes in v103 and v104.

Turkey:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

v104 - which former religious denomination (Q24b\_r)

(FORMER) RELIGIOUS DENOMINATION - HARMONIZED VARIABLE

[Q.24a Were you ever a member of a religious denomination?

<if respondent is currently a member, please ask: Where you ever a member of another religious denomination?>]

Q.24b

<Show card 24>

Which one?

<NB: PRESENT COUNTRY SPECIFIC LIST! RECODE INTO:>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 Roman Catholic
- 2 Protestant
- 3 Free Church/ Non-Conformist/ Evangelical
- 4 Jew
- 5 Muslim
- 6 Hindu
- 7 Buddhist
- 8 Orthodox
- 9 other

Austria:

Different question format (multiple response question: 2 respondents with 2 former religious denominations have been recoded into 'no answer'); correct question number in field questionnaire should have been 24c instead of 24b.

Denmark, Hungary, Ireland, Northern Ireland, and Poland:

Due to additional filter on v102 and different question wording on v103, respondents belonging to a religious denomination have not been asked whether they were ever a member of another religious denomination (v103) and 'which one' (v104). Therefore change from one to another denomination has not been captured.

Finland, Greece, Italy, and Lithuania:

Due to the different question format of v103 all respondents have been asked whether they were ever a member of a religious denomination. Empirical consequence: members of a denomination (v101=1) who did not change their denomination gave the same answer to v102 and v104. Answers have been corrected by comparison with v102.

France:

Due to ignoring the filter on v103 most of the respondents have been only asked if they were ever a member of a religious denomination and which one. Empirical consequence: respondents with v101=1, who did not change their denomination gave the same answer to v102 and v104. Answers have been adapted to Master Questionnaire by comparing v102 and v104: cases that obviously did not change their religious denomination (Catholics and Jews) have been recoded to v103=2 and v104=-3; cases that did probably not change their denomination, but that could have changed from one protestant/free/orthodox church to another were not recoded.

Great Britain:

For Great Britain see v104r\_gb; due to the different question format of v103 it was necessary to adapt V104r\_gb as far as possible to the

Master Questionnaire by comparing v102 with v104.

Iceland:

Different question structure (only one question used for v103 and v104) and answer categories (no, always member of religious affiliation; no, never member of religious affiliation; yes, National church; yes, Catholic Church; yes, other, which?). Variables v103 and v104 adapted to Master Questionnaire.

Luxembourg, Malta, and Slovak Republic:

Due to different question wording on v103, most of the respondents in Luxembourg and all respondents in Malta and Slovak Republic belonging to a religious denomination have not been asked whether they were ever a member of another religious denomination (v103) and 'which one' (v104). Therefore change from one to another denomination has not been captured.

Romania:

Due to additional filter on v102 and different question wording on v103, respondents belonging to a religious denomination have not been asked whether they were ever a member of another religious denomination (v103) and 'which one' (v104). Therefore change from one to another denomination has not been captured.

Empirically two respondents with v101=1 have valid codes in v103 and v104 indicating change of religious denomination.

Code 1 includes Roman and Greek Catholics.

Turkey:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v105 - how often attend religious services (Q25)

Q.25

<Show card 25>

Apart from weddings, funerals and christenings, about how often do you attend religious services these days?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 more than once week
- 2 once a week
- 3 once a month
- 4 Christmas/ Easter day
- 5 other specific holy days
- 6 once a year
- 7 less often
- 8 never, practically never

Sweden:

In the Swedish field questionnaire answer categories 4 and 5 ("Christmas/Easter day" and "other specific holy days") have been merged into category 4 "special holy days".

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories, interviewer instruction).

Comparable questions: WVS 1995 (v181), WVS 2000 (v185).

v106 - how often attended religious services 12 years old (Q26)

Q.26

<Show card 26>

Apart from weddings, funerals and christenings, about how often did you attend religious services when you were 12 years old?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 more than once week
- 2 once a week
- 3 once a month
- 4 Christmas/ Easter day
- 5 other specific holy days
- 6 once a year
- 7 less often
- 8 never, practically never

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories, interviewer instruction).

v124 - do you get comfort and strength from religion (Q34)

Q.34

Do you find that you get comfort and strength from religion or not?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Germany:

Additional answer category: not applicable/don't believe. Variable adapted to Master Questionnaire by recoding -3 'nap/don't believe' into 2 'no', assuming that non believers get no comfort and strength from religion.

Comparability:

Trend question: EVS 2008 and EVS 1999.

Comparable questions: WVS 1995 (v191), WVS 2000 (v197).

v126 - how often do you pray to god outside religious services (Q36)

Q.36

<Show card 36>

How often do you pray to God outside of religious services? Would you say ....

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 every day
- 2 more than once a week
- 3 once a week
- 4 at least once a month
- 5 several times a year
- 6 less often
- 7 never

Sweden:

Question not asked in field questionnaire. Computed and coded as -4 'question not asked'.

Slovenia:

See v126\_SI

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 2000 (v199).

Q.46

<Show card 46>

People talk about the changing roles of men and women today. For each of the following statements I read out, can you tell me how much you agree with each. Please use the responses on this card.

Q.46H Men are less able to handle emotions in relationships than women

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 strongly agree
- 2 agree
- 3 disagree
- 4 strongly disagree

Austria, Ireland, and Northern Ireland:

See v161\_5C (5 answer categories)

Turkey:

v154-v161: In the Turkish questionnaire answering category 3 and 4 were switched. Some interviewers noticed, and others didn't, so they dealt in different manners with this question. Therefore these variables have been deleted.

v167 - learn children at home: feeling of responsibility (Q49D)

Q.49

<Show card 49>

Here is a list of qualities which children can be encouraged to learn at home. Which, if any, do you consider to be especially important?

Please choose up to five?

<Code five only>

Q.49D Feeling of responsibility

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 not mentioned
- 1 important

Note:

Multiple response questions are split into a set of dichotomized variables (1 important, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

The questionnaire contains two additional subquestions: 'I don't know' (v175) and 'No answer' (v176). They were recoded to -1 and -2 for each item of the question battery.

Please see flag variable f174 which indicates inconsistencies for variables v164 to v174.

Croatia:

Data not available, question not comparable to the Master Questionnaire (<Code five only> was not mentioned).

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, response categories).

Comparable questions: WVS 1995 (v17), WVS 2000 (v17).

v172 - learn children at home: religious faith (Q49I)

Q.49

<Show card 49>

Here is a list of qualities which children can be encouraged to learn at home. Which, if any, do you consider to be especially important?

Please choose up to five?

<Code five only>

Q.49I Religious faith

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 not mentioned
- 1 important

Note:

Multiple response questions are split into a set of dichotomized variables (1 important, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

The questionnaire contains two additional subquestions: 'I don't know' (v175) and 'No answer' (v176). They were recoded to -1 and -2 for each item of the question battery.

Please see flag variable f174 which indicates inconsistencies for variables v164 to v174.

Croatia:

Data not available, question not comparable to the Master Questionnaire (<Code five only> was not mentioned).

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, response categories).

Comparable questions: WVS 1995 (v22), WVS 2000 (v22).

f174 - flag variable: learn children at home (Q49)

Flag variable:

Indicates inconsistencies for the variables v164 to v174.

If respondent named more than the allowed 5 qualities.

if v164 to v174=1 > 5 then f174=1

0 Limitation followed

1 Limitation ignored

Note:

For detailed information, see EVS 1999 variable report.

v178 - abortion if couple doesn't want more children (Q50B)

Q.50

<Show card 50>

Do you approve or disapprove of abortion under the following circumstances?

Q.50B Where a married couple does not want to have any more children

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 disapprove
- 1 approve

Response categories documented according to dataset. In Master Questionnaire response categories are:

1. approve
2. disapprove

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v182 - political action: joining unofficial strikes (Q51D)

Q.51

<Show card 51>

Now I'd like you to look at this card. I'm going to read out some different forms of political action that people can take, and I'd like you to tell me, for each one, whether you have actually done any of these things, whether you might do it or would never, under any circumstances, do it.

Q.51D Joining unofficial strikes

v184 - more important: freedom or equality (Q52)

Q.52

<Show card 52>

Which of these two statements comes closest to your own opinion?

A: I find that both freedom and equality are important. But if I were to choose one or the other, I would consider personal freedom more important, that is, everyone can live in freedom and develop without hindrance;

B: Certainly both freedom and equality are important. But if I were to choose one or the other, I would consider equality more important, that is, that nobody is underprivileged and that social class differences are not so strong

v186 - individual vs. state responsibility for providing (Q54A)

Q.54A

<Show card 54>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 individuals should take more responsibility for providing for themselves

2

3

4

5

6

7

8

9

10 the state should take more responsibility to ensure that everyone is provided for

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

Comparable questions: WVS 1995 (v127), WVS 2000 (v143).

(Differences: Statements are turned around)

v188 - competition good vs. harmful for people (Q54C)

Q.54C

<Show card 54>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 competition is good. It stimulates people to work hard and develop new ideas
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 competition is harmful, it brings out the worst in people

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

Comparable questions: WVS 1995 (v128), WVS 2000 (v144).

v190 - aims of respondent: first choice (Q55)

Q.55

<Show card 55>

There is a lot of talk these days about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. If you had to choose, which of the things on this card would you say is most important?

<Code one answer only>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 maintaining order in the nation
- 2 giving people more say in important government decisions
- 3 fighting rising prices
- 4 protecting freedom of speech

Great Britain:

See v190\_GB

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v106), WVS 2000 (v122).

v191\_4 - post-materialist index 4-item

Post-materialist index (4-item) - Constructed variable

Source variables: v190, v191

[There is a lot of talk these days about what the aims of this country should be for the next ten years. On this card are listed some of the goals which different people would give top priority. If you had to choose, which of the things on this card would you say is most/second most important?]

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 materialist
- 2 mixed
- 3 post-materialist

Note:

According to the choice of materialistic (1/1 or 3/3) or post-materialistic (2/2 or 4/4) aims in v190 and v191 respondents were coded as materialistic or post-materialistic persons.

Great Britain:

Data not available due to deviant number of response categories in v190 and v191 (5 answer categories instead of 4 categories: 5 'GB: improving the standard of living').

Comparability:

Trend question: EVS 2008 and EVS 1999.

v200 - how much confidence in: church (Q58A)

Q.58

<Show card 58>

Please look at this card and tell me, for each item listed, how much confidence you have in them, is it a great deal, quite a lot, not very much or none at all?

<Code one answer for each item>

Q.58A The church

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 a great deal
- 2 quite a lot
- 3 not very much
- 4 none at all

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v135), WVS 2000 (v147).

(Differences: In WVS "churches" instead of "Church")

## v212\_se - who should decide: international peacekeeping (Q167\_SE)

WVS question - Sweden (1999):

Q.167

Some people believe that certain kinds of problems could be better handled by the United Nations than by the various national governments. Others think that these problems should be left entirely to the respective national governments; while others think they would be handled best by the national governments working together with co-ordination by the United Nations. I'm going to mention some problems. For each one, would you tell me whether you think that policies in this area should be decided by the national governments, by the United Nations, or by the national governments with UN co-ordination?

## International peacekeeping

v216 - political system: strong leader (Q62A)

Q.62

<Show card 62>

I'm going to describe various types of political systems and ask what you think about each as a way of governing this country. For each one, would you say it is a very good, fairly good, fairly bad or very bad way of governing this country?

Q.62A Having a strong leader who does not have to bother with parliament and elections

- 5 other missing

- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very good
- 2 fairly good
- 3 fairly bad
- 4 very bad

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v154), WVS 2000 (v164).

v217 - political system: experts making decisions (Q62B)

Q.62

<Show card 62>

I'm going to describe various types of political systems and ask what you think about each as a way of governing this country. For each one, would you say it is a very good, fairly good, fairly bad or very bad way of governing this country?

Q.62B Having experts, not government, make decisions according to what they think is best for the country

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very good
- 2 fairly good
- 3 fairly bad
- 4 very bad

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v155), WVS 2000 (v165).

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

Comparable questions: WVS 1995 (v201), WVS 2000 (v212).

(Differences: In WVS it is "ending the life" instead of "terminating")

v251 - belong to geographic group - most (Q67)

Q.67

<Show card 67>

Which of these geographical groups would you say you belong to first of all?

<Countries other than UK: Please put in corresponding explanations if necessary>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 locality or town where you live
- 2 region of country where you live
- 3 your country as a whole
- 4 Europe
- 5 the world as a whole

Denmark:

Different answer category: the item 'your country as a whole', is translated as 'My country, which is\_\_\_' in the Danish field questionnaire.

Adapted to Master Questionnaire (respondents that did not write 'Denmark' were recoded into -2 'No Answer').

Malta:

See v251\_MT.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v203), WVS 2000 (v214).

v252 - belong to geographic group: next (Q68)

Q.68

<Show card 67>

And the next?

<Countries other than UK: Please put in corresponding explanations if necessary>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 locality or town where you live
- 2 region of country where you live
- 3 your country as a whole
- 4 Europe
- 5 the world as a whole

Denmark:

Different answer category: the item 'your country as a whole', is translated as 'My country, which is\_\_\_' in the Dänish field questionnaire.

Adapted to Master Questionnaire (respondents that did not write 'Denmark' were recoded into -2 'No Answer').

Malta:

See v252\_MT

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

Comparable questions: WVS 1995 (v204), WVS 2000 (v215).

v253 - belong to geographic group: least (Q69)

Q.69

<Show card 67>

And which do you belong to least of all?

<Countries other than UK: Please put in corresponding explanations if necessary>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 locality or town where you live
- 2 region of country where you live
- 3 your country as a whole
- 4 Europe
- 5 the world as a whole

Denmark:

Different answer category: the item 'your country as a whole', is translated as 'My country, which is\_\_\_' in the Dänish field questionnaire.

Adapted to Master Questionnaire (respondents that did not write 'Denmark' were recoded into -2 'No Answer').

Malta:

See v253\_MT

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

v254 - are you a citizen of ... (country) (Q70)

Q.70

Are you a citizen of [Britain]?

<Countries other than UK: Please substitute your nation for 'Britain'!>

<if "yes" - go to Q.71;

if "no" - go to Q.72>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 yes

2 no

Czech Republic and Slovakia:

Different filter instruction: respondents with v254=2 are filtered to Q.71b (o46) instead of Q.72 (v256).

Germany and Lithuania:

Different filter instruction: respondents with v254=2 are filtered to Q.71a (o45) instead of Q.72 (v256).

Latvia:

Different question and filter structure: v254 is placed right before v256. Respondents with Latvian citizenship (v254=1) are filtered to v256 (which political party would you vote); respondents who are not citizen of Latvia (v254=2) are filtered to v257 (which political party appeals to you most).

Luxembourg:

Different question wording: Interviewers asked for the 'actual nationality' (instead of 'Are you a citizen of ...?'). Respondents could choose out of 8 answer categories. Variable adapted to Master Questionnaire recoding code 1=1 and else=2. Filter instruction has not been implemented in the field questionnaire.

Malta:

Different filter structure: respondents who are not citizen of Malta (v254=2) are filtered to v258 (work: people from less developed countries) instead of v256 (which political party would you vote for).

Northern Ireland:

Different question wording and answer categories: "do you regard yourself as a citizen of Britain, the Republic of Ireland, or both Britain and the Republic of Ireland?". Variable adapted to Master Questionnaire.

Romania:

Question not asked in Romania. This question was not included in the Romanian field questionnaire, because the sampling procedure allowed only Romanian citizens (all cases coded as 1'yes').

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v255 - how proud are you to be a ... (country) citizen (Q71)

Q.71

How proud are you to be a [British] citizen?

<Countries other than UK: Please substitute your nationality for 'British'!>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very proud
- 2 quite proud
- 3 not very proud
- 4 not at all proud

Bulgaria, Czech Republic, France, and Italy:

According to filter instruction on v254, respondents with v254=1 should have been asked v255. Empirically some respondents with v254=1 have not been asked v255 and are coded as -3 'nap'.

Luxembourg:

Deviating question text and filter rules: Interviewers asked 'how proud are you of your nationality?'; due to missing filter instructions on v254 all respondents have been asked v255. Variable adapted to Master Questionnaire by comparing v254 and v255 and recoding accordingly.

Comparability:

Trend question: EVS 2008 and EVS 1999.

Comparable questions: WVS 1995 (v205), WVS 2000 (v216).

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties).

Belgium:

Different filter structure: not only respondents who don't know (v256=-1) are filtered to v257 (which political party appeals to you most), but also respondents who would not vote (v256=96) and who did not name a party (v256=-2).

Bulgaria, Denmark, Greece, and Portugal:

Filter on v256 has not been implemented in the field questionnaire.

Estonia:

Different filter structure: only respondents who do not name a party (v256=-2) are filtered to v257 (which political party appeals to you most).

France and Great Britain:

Different filter structure: not only respondents who don't know (v256=-1) are filtered to v257 (which political party appeals to you most), but also respondents who did not name a party (v256=-2).

Germany:

Filter on v256 has not been implemented in the field questionnaire.

Additional answer category: 'not entitled to vote' has been coded as -3 (not applicable, not entitled to vote). This category concerns respondents without German citizenship.

Latvia:

Due to different filter on v254 respondents without citizenship of Latvia (v254=2) have not been asked v256.

Luxembourg, Poland, Slovakia, and Sweden:

Different filter structure: not only respondents who don't know (v256=-1) are filtered to v257 (which political party appeals to you most), but also respondents who would not vote (v256=96), who would cast a blank ballot (v256=97), or who did not name a party (v296=-2).

Malta:

Due to different filter on v254 respondents without citizenship of Malta (v254=2) have not been asked v256.

Different filter structure: not only respondents who don't know (v256=-1) are filtered to v257 (which political party appeals to you most), but also respondents who would not vote (v256=96) or who would cast a blank ballot (v256=97).

Romania:

Different filter structure: not only respondents who don't know (v256=-1) are filtered to v257 (which political party appeals to you most), but also respondents who would not vote (v256=96), who would cast a blank ballot (v256=97), who did not name a party (v296=-2), or who answered 'any party' (v256=64211).

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording, response categories).

v257 - which political party appeals to you most (Q73)

Q.73

If don't know in (a): And which party appeals to you most?

<Code one answer under (b) below>

<COUNTRY SPECIFIC LIST OF POLITICAL PARTIES!>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties).

Belgium:

Due to different filter structure on v256 respondents who would not vote (v256=96) or who did not name a party (v256=-2) have also been asked v257.

Bulgaria, Denmark, Germany, Greece, and Portugal:

Due to missing filter on v256 all respondents have been asked v257.

Estonia:

Due to different filter structure on v256 only respondents who did not name a party (v256=-2) have been asked v257.

France and Great Britain:

Due to different filter structure on v256 respondents who did not name a party (v256=-2) have also been asked v257.

Hungary:

Data not available.

Italy, Netherlands, and Slovenia:

According to filter on v256 only respondents who don't know (v256=-1) should have been asked v257. The filter has been frequently ignored by the interviewers.

Latvia:

Due to different filter on v254 only respondents without citizenship of Latvia (v254=2) have valid answers on v257.

According to filter on v256, respondents who don't know which party they would vote (v256=-1) should have also been asked v257.

Empirically all these cases are coded as -2 'no answer'.

Luxembourg, Poland, Slovak Republic, and Sweden:

Due to different filter structure on v256 respondents who would not vote (v256=96), who cast a blank ballot (v256=97), or who did not name a party (v256=-2) have also been asked v257.

Malta:

Due to different filter structure on v256 respondents who would not vote (v256=96) or who cast a blank ballot (v256=97) have also been asked v257.

Romania:

Due to different filter structure on v256 respondents who would not vote (v256=96), who cast a blank ballot (v256=97), who did not name a party (v256=-2), or who would vote 'any party' (v256=64211) have also been asked v257.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording, response categories).

v258 - work: people from less developed countries (Q74)

Q.74

<Show card 74>

How about people from less developed countries coming here to work. Which one of the following do you think the government should do?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 let anyone come who wants to
- 2 let people come as long as there are jobs available
- 3 put strict limits on the number of foreigners who can come here
- 4 prohibit people coming here from other countries

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

Comparable questions: WVS 1995 (v134), WVS 2000 (v146).

v267 - are you concerned with: people in neighbourhood (Q79B)

Q.79

<Show card 79>

To what extent do you feel concerned about the living conditions of:

Q.79B People in your neighbourhood

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very much
- 2 much
- 3 to a certain extent
- 4 not so much
- 5 not at all

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v270 - are you concerned with: europeans (Q79E)

Q.79

<Show card 79>

To what extent do you feel concerned about the living conditions of:

Q.79E Europeans

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very much
- 2 much
- 3 to a certain extent
- 4 not so much
- 5 not at all

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v273 - are you concerned with: unemployed people (Q80B)

Q.80

<Show card 80>

To what extent do you feel concerned about the living conditions of:

Q.80B unemployed people in your country

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very much
- 2 much
- 3 to a certain extent
- 4 not so much
- 5 not at all

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

v276 - are you prepared to help: immediate family (Q81A)

Q.81

<Show card 81>

Would you be prepared to actually do something to improve the conditions of:

Q.81A your immediate family

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 absolutely yes
- 2 yes
- 3 maybe yes/maybe no
- 4 no
- 5 absolutely no

Germany:

Additional answer category: -3 "nap" for respondents without immediate family.

Turkey:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

## v280\_se - protecting environment vs. economic growth (Q241\_SE)

WVS question - Sweden (1999):

Q.241

Here are two statements people sometimes make when discussing the environment and economic growth. Which of them comes closer to your own point of view?

A. Protecting the environment should be given priority, even if it causes slower economic growth and some loss of jobs

B. Economic growth and creating jobs should be the top priority, even if the environment suffers to some extent

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 SE: protecting environment

2 SE: economy growth and creating jobs

3 SE: other answer

Note:

Sweden: Field questionnaire for EVS 1999 contains 26 variables additionally implemented for World Value Survey.

v280\_se, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent
-4	question not asked	M	40110	97.5	
-1	don't know	M	48	0.1	
1	SE: protecting environment		704	1.7	72.9
2	SE: economy growth and creating jobs		196	0.5	20.3

v293 - having steady relationship (Q86)

Q.86

Whether you are married or not: Do you live in a stable relationship with a partner?

<if "no" - go to 88>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Iceland:

In the Icelandic questionnaire v293, v294 and v296 were grouped into one question as follows: 'Are you now: 1 - Married, 2 - Living with a partner (but not married), 3 - Divorced, 4 - Separated, 5 - Widowed, 6 - Single (never been married)'. V293 and v294 were reconstructed from original v296, v297.

Ireland and Northern Ireland:

In the Irish and Northern Irish field questionnaire v293, v294 and v295 were not included. V296 was modified to give most of the information asked for in the Master Questionnaire and a country-specific question was added to establish whether married couples had lived with their spouses prior to marriage. V293 and v294 were reconstructed from original v296, v297. Information for v295 could not be reconstituted.

Turkey:

In the Turkish questionnaire v293, v294 and v295 were not included to avoid possible offences. V296 was modified to give most of the information asked for in the Master Questionnaire. V293 and v294 were reconstructed from original v296, v297. V295 could not be reconstructed.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

v294 - are you legally married to partner (Q87)

Q.87

Are you legally married to this partner?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Croatia:

Additional filter on both answer categories: respondents with v294=1 were not asked v295 to v297; respondents with v294=2 were not asked v295 and v296. Many interviewers ignored this filter instruction.

Finland, Great Britain, Luxembourg, Netherlands, Portugal and Slovakia:

Additional filter on both answer categories: respondents with v294=1 are filtered to v297; respondents with v294=2 to v296.

Greece and Italy:

Additional filter on both answer categories in the field questionnaire (v294=1 go to v297; v294=2 go to v296). Most of the interviewers obviously ignored this filter instruction.

Hungary:

Additional filter on both answer categories in the field questionnaire (v294=1 go to v297; v294=2 go to v296). Empirically only filter on v294=2 has been applied. All respondents with v294=1 have been asked v295.

Iceland:

In the Icelandic questionnaire v293, v294 and v296 were grouped into one question as follows: 'Are you now: 1 - Married, 2 - Living with a partner (but not married), 3 - Divorced, 4 - Separated, 5 - Widowed, 6 - Single (never been married)'. V293 and v294 were reconstructed from original v296, v297.

Ireland and Northern Ireland:

In the Irish and Northern Irish field questionnaire v293, v294 and v295 were not included. V296 was modified to give most of the information asked for in the Master Questionnaire and a country-specific question was added to establish whether married couples had lived with their spouses prior to marriage. V293 and v294 were reconstructed from original v296, v297. Information for v295 could not be reconstituted.

Romania:

Empirically an additional filter on both categories has been used, although skip instructions are not included in the field questionnaire. Most of the respondents with valid answer on v294 have not been asked v295.

Turkey:

In the Turkish questionnaire v293, v294 and v295 were not included to avoid possible offences. V296 was modified to give most of the information asked for in the Master Questionnaire. V293 and v294 were reconstructed from original v296, v297. V295 could not be reconstructed.

v295 - did you live with a partner before (Q88)

Q.88

Did you ever live in a stable relationship before, i.e. without being married?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Croatia:

According to the additional filter on v294 respondents living in a steady relationship (v293,1) should not have been asked v295. Many interviewers ignored this filter structure. Data as far as possible adapted to Master Questionnaire.

Finland, Great Britain, Luxembourg, Netherlands, Portugal, and Slovakia:

Due to the additional filter on v294 none of the respondents with a valid code on v294 has been asked v295.

Greece and Italy:

By following the additional filter from v294 of the country's questionnaire none of the respondents with a valid code on v294 should have been asked v295; but: empirically the vast majority of interviewers obviously ignored the additional filter.

Hungary:

According to the additional filter on v294 none of the respondents with v294=2 has been asked v295. Filter on v294=1 has been obviously ignored: all respondents with v294=1 have valid answers on v295.

Ireland and Turkey:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Latvia:

Though no additional filter has been implemented in the Latvian field questionnaire, empirically no respondent with v293=1 (having a steady relationship) and v294=1 (legally married) has been asked v295.

Northern Ireland:

In the Northern Irish field questionnaire v293, v294 and v295 were not included. V296 was modified to give most of the information asked for in the Master Questionnaire and a country-specific question was added to establish whether married couples had lived with their spouses prior to marriage. V293 and v294 were reconstructed from original v296, v297. Information for v295 could not be reconstituted, thus computed and coded as -4 'question not asked'.

Romania:

Most of the respondents with a valid code on v294 have not been asked v295.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

v296 - current legal marital status respondent (Q89)

Q.89

What is your current legal marital status?

<if "divorced" or "never married"- go to Q.91>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 married
- 2 widowed
- 3 divorced
- 4 separated
- 5 never married
- 6 cohabiting
- 7 single

Note:

Response categories 6 and 7 were not included in Master Questionnaire but in several national data sets: 6 "cohabiting" included in FI, IS, IE, GB-NIR, SE, and TR; 7 'single' included in SE and TR. Thus, for the integrated data set these additional response categories were adopted.

Croatia:

According to the additional filter on v294 none of the respondents with v293=1 and v294=1,2 should have been asked v296. Empirically, many interviewers ignored this filter structure. Data as far as possible adapted to Master Questionnaire by taking into account the information from v294 and v297. In two cases information on v294 and v296 contradicts each other: v294=married and v296= widowed.

Finland:

Due to the additional filter on v294 none of the respondents with v293=1 and v294=1 has been asked v296; additional answer category: 'living with a partner' (treated as disjunct from other categories: only one answer was possible). Therefore v296 has been adapted as far as possible to Master Questionnaire by taking into account the information from v293, v294, and v297.

Great Britain, Luxembourg, Netherlands, Portugal, and Slovak Republic:

Due to the additional filter on v294 none of the respondents with v293=1 and v294=1 has been asked v296; hence, for these respondents the legal marital status has been inferred from v294.

Greece and Italy:

Due to the additional filter on v294 none of the respondents with v293=1 and v294=1 should have been asked v296; hence, for these respondents the legal marital status has been inferred from v294. In 12 cases (Greece) and 4 cases (Italy) information on v294 and v296 contradicts each other: v294=married and v296= widowed.

Hungary:

According to the additional filter on v294 none of the respondents with v294=1 should have been asked v296. Filter has been obviously ignored: all respondents with v294=1 have valid cases on v296.

Iceland:

Different filter structure and additional answer category 'living with a partner (but not married)'. Since this category is not disjunct from other answer categories, respondents were as far as possible recoded to Master Questionnaire's categories by taking into account the information

from v297 (respondents who were 'living with a partner' and 'divorced' according to v297, were recoded into 'divorced' in v296).

Ireland and Northern Ireland:

Since v293, v294 and v295 were not included in the Irish and Northern Irish questionnaire, v296 was modified to give most of the information asked for in the Master Questionnaire by adding the answer category 'Living as married'. Since this category is not disjunctive from other answer categories, respondents were as far as possible recoded to Master Questionnaire categories by taking into account the information from v297 (respondents who were 'living as married' and 'divorced' according to v297, were recoded into 'divorced' in v296).

Romania:

Deviating filter instruction: only 'divorced' respondents (v296=3), but not 'never married' (v296=5) should skip v297. Empirically the filter is conform with Master Questionnaire.

In 9 cases information on v294 and v296 contradicts each other: v294=married and v296= widowed.

Sweden:

Partly different answer categories (additionally included: cohabiting/ stable relation, but not living together/ living alone, no stable relation; dropped: separated/never married; categories treated as disjunct from each other: only one answer was possible), adapted as far as possible to the Master Questionnaire by taking into account the information from v293/v294/v297; remaining additional answer categories: cohabiting and single; category 'never married' could not be reconstructed.

Turkey:

Partly different answer categories: 'never married' replaced by 'single'; additionally included: 'not married but living together'. Since these categories are not disjunctive from other answer categories, respondents were as far as possible recoded to Master Questionnaire categories by taking into account the information from v297 (respondents who were 'single' or 'living with a partner' and 'divorced' according to v297, were recoded into 'divorced' in v296).

No filter used.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories, interviewer instruction).

Comparable questions: WVS 1995 (v89), WVS 2000 (v106).

(Differences: question text and response categories).

v297 - have you ever been divorced (Q90)

Q.90

Have you ever been divorced?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Croatia:

According to the additional filter on v294 none of the respondents with v294=1 should have been asked v297. According to the filter structure on v296 none of the respondents with codes 3 or 5 on v296 should have been asked v297. Empirically, many interviewers ignored these filter structures. Data as far as possible adapted to Master Questionnaire.

Denmark:

Question was not included in the Danish field questionnaire. V297 has been reconstructed from v296 and the country-specific question 'How many times have you been married?' which was posed instead of Q90.

Iceland:

Due to different filter structure in v296, none of the respondents with v296=2 (widowed) or v296=4 (separated) has been asked v297.

Romania:

According to deviating filter instruction, respondents who have never been married (v296=5) should have been asked v297. Empirically data is conform with Master Questionnaire: none of the respondents with v296=3,5 have been asked v297.

Turkey:

Due to missing filter instruction on v296 all respondents answered v297. In order to adapt v297 as far as possible to the Master Questionnaire, respondents with v296=3 (divorced) were recoded into -3 on v297.

v298 - how many children have you yourself ever had (Q91)

Q.91

How many children, including deceased children, have you yourself ever had?

....

<write in>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

Croatia:

v298: 8 answer categories ranging from 0 to 7 offered to respondents: code 7 means 'more than 6 children' (empty category).

France, Hungary, Luxembourg, and Poland:

v298: 8 answer categories ranging from 0 to 7 offered to respondents: code 7 means 'more than 6 children'.

Malta:

v298: 8 answer categories ranging from 1 to 8 offered to respondents: original 8 means 'more than 6 children'; question adapted to Master Questionnaire (range: 0 to 7).

v299 - number of people in household aged 18+ (Q92A)

Q.92

How many people, including yourself, are currently living in your household?

Q.92A Aged 18 and over

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know

Note:

Inconsistencies between v299 (persons, including yourself, aged over 18 living in household=1) and v305 (do you live with your parents=1 'yes'). Affected cases: n=128.

Greece:

See v299\_GR

v300 - number of people in household aged 13-17 (Q92B)

Q.92

How many people, including yourself, are currently living in your household?

Q.92B Aged between 13 and 17

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know

v301 - number of people in household aged 5-12 (Q92C)

Q.92

How many people, including yourself, are currently living in your household?

Q.92C Aged between 5 and 12

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know

v302 - number of people in household under age of 5 (Q92D)

Q.92

How many people, including yourself, are currently living in your household?

Q.92D Under 5

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know

v299\_gr - number of people in household aged 18+ (Q92A\_GR)

Q.92\_gr

How many people, including yourself, are currently living in your household?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know

Greece:

Question not comparable to Master Questionnaire (in Master Questionnaire: 'How many children live in the same house with you?').

v299\_gr, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent

## v302\_se - ideal size of a family (Q257\_SE)

WVS question - Sweden (1999):

Q.257

What do you think is the ideal size of a family - how many children, if any?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 0 SE: none
- 1 SE: 1 child
- 2 SE: 2 children
- 3 SE: 3 children
- 4 SE: 4 children
- 5 SE: 5 children
- 6 SE: 6 children
- 7 SE: 7 children
- 8 SE: 8 or more children

Note:

Sweden: Field questionnaire for EVS 1999 contains 26 variables additionally implemented for World Value Survey.

v302\_se, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent

v303 - age completed education respondent (Q93)

Q.93

At what age did you (or will you) complete your full time education, either at school or at an institution of higher education? Please exclude apprenticeships.

<If respondent is still at school, ask: at what age do you expect you will have completed your education?>

<(Write in age)...>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

Great Britain:

Additional filter question placed before v303 (respondents currently in education have not been asked v303); slightly different question wording: What age were you when your education finished? (education instead of full time education).

Croatia, Portugal, Romania, Russia, Spain, and Turkey:

National data sets include additional code -4 for respondents without full time education. For the integrated data set these have been recoded to -5 'other missing'.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 1995 (v218), WVS 2000 (v227).

v303\_r - age completed education respondent (Q93) (recoded in intervals)

Age completed education - recoded in intervals

Source variable: v303

[At what age did you (or will you) complete your full time education, either at school or at an institution of higher education? Please exclude apprenticeships.]

v304 - highest educational level attained respondent (8 categories) (Q94)

Q.94

What is the highest level you have reached in your education?

<To be measured as detailed as possible on national level and to be transformed into this variable>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 inadequately completed elementary education
- 2 completed (compulsory) elementary education
- 3 (compulsory) elementary education and basic vocational qualification
- 4 secondary, intermediate vocational qualification
- 5 secondary, intermediate general qualification
- 6 full secondary, maturity level certificate
- 7 higher education - lower-level tertiary certificate
- 8 higher education - upper-level tertiary certificate

Belgium:

Different question format: 12 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Denmark:

Different question structure: three questions on educational level (school/vocational education) have been used instead of one. Adapted to Master Questionnaire's educational levels by country.

Estonia:

Different question format: 7 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Germany:

Different question format: 10 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Great Britain:

Different question format: 12 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Romania:

Different question format: 13 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Slovenia:

Different question format: 7 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Spain:

Different question format: 15 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Turkey:

Different question format: 11 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Ukraine:

Different question format: 10 categories instead of 8. Adapted to Master Questionnaire's educational levels by country.

Comparability:

Trend question: EVS 2008 and EVS 1999.

v306 - employment status (Q96)

Q.96

Are you yourself employed now or not? If yes: About how many hours a week?

<If more than one job: only for the main job>

<if "self-employed" - go to Q.100;

if "retired/pensioned" - go to Q.101;

if "housewife not otherwise employed" , "student" or "other" - go to Q.105;

if "unemployed" - go to Q.104>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 has paid employment: 30h a week or more

2 has paid employment: less than 30h a week

3 has paid employment: self employed

4 if no paid employment: retired/pensioned

5 if no paid employment: housewife not otherwise employed

6 if no paid employment: student

7 if no paid employment: unemployed

8 if no paid employment: other (please specify)...

Austria:

Answer category 4 (retired/pensioned) originally split into 2 subcategories: retired/pensioned and widowed women getting deceased husbands pension. In the data file both categories are already combined again.

Different filter structure: housewives, unemployed and others are filtered to v311 (Q.101) instead of v315 (Q.105) and v314 (Q.104) respectively. Widowed women coded as 'retired/pensioned' were filtered to v315 instead of v311.

Belgium and Poland:

Different filter structure: housewives and unemployed are filtered to v311 (Q.101) instead of v315 (Q.105) and v314 (Q.104) respectively.

France:

Different filter structure: unemployed are filtered to v311 (Q.101) instead of v314 (Q.104).

Hungary:

Different filter structure: housewives, students, unemployed and others have also been asked v311 and v312.

Ireland and Northern Ireland:

Slightly different answer categories, question and filter structure: self-employed and retired are filtered to v307 instead of v310 and v311 respectively. For reasons of comparability data has been adapted as far as possible to Master Questionnaire.

Malta:

Different filter structure: self-employed and unemployed are filtered to v307 instead of v310 and v314 respectively. Due to different order of the questions unemployed have been further asked v312. For reasons of comparability data has been adapted as far as possible to Master Questionnaire.

Portugal:

Different filter structure: unemployed are filtered to v311 (Q.101) instead of v314 (Q.104).

Slovakia:

Different filter structure: unemployed are filtered to v311 (Q.101) instead of v314 (Q.104). Empirically unemployed respondents have not valid codes on v311 and v312.

Sweden:

Different question and filter structure: retired/pensioned are filtered to v315 instead of v312.

Variables v307 to v311 and v314 have not been implemented in the Swedish field questionnaire.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: question wording, response categories, interviewer instruction).

Comparable questions: WVS 1995 (v220), WVS 2000 (v229).

(Differences: response categories).

v307 - do you supervise someone (Q97)

Q.97

In your present job, do you supervise anyone who is directly responsible to you?

<if "no" - go to Q.101>

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Denmark:

Due to different question structure (v314 placed between v306 and v307), unemployed respondents (v306=7) have also been asked v307.

Therefore slightly different question wording ('Do you or did you supervise anyone?'). For reasons of comparability and conform to the Master Questionnaire these cases have been recoded into -3 'nap'.

Different filter structure: respondents that do not supervise anyone (v307=2) are filtered to v309 (Q.99) instead of v311 (Q.101).

Germany, Poland, and Portugal:

Different filter structure: respondents that do not supervise anyone (v307=2) are filtered to v309 (Q.99) instead of v311 (Q.101).

Hungary:

Hungarian field questionnaire's version available in the Data Archive does not include any question to this variable. However, valid data was delivered by the country.

Ireland and Northern Ireland:

Slightly different question wording ('Do you or did you supervise anyone?') due to filter on v306.

Different filter structure: respondents that do not supervise anyone (v307=2) are filtered to v309 (Q.99) instead of v311 (Q.101).

According to filter on v306 and question structure for v314, respondents with v306=3,4,7 have also been asked v307. For reasons of comparability and conform to the Master Questionnaire these cases have been recoded into -3 'nap'.

Malta:

According to filter on v306 respondents with v306=3,7,8 have also been asked v307. For reasons of comparability and conform to the Master Questionnaire these cases have been recoded into -3 'nap'.

Romania:

Filter for v307=2 has not been implemented in the field questionnaire. Empirically only one respondent with v307=2 has a valid code on v308.

Slovenia:

Filter for v307=2 has not been implemented in the Slovenian field questionnaire. Empirically none of the respondents with v307=2 have been asked v308.

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Turkey:

Different filter structure: respondents that do not supervise anyone (v307=2) are filtered to v309 (Q.99) instead of v311 (Q.101).

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: question wording, response categories, interviewer instruction).

v309 - how many others work for organisation (Q99)

Q.99

How many other people usually work for the organization?

.....

<(write in number)>

<go to Q.101>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

Austria:

Correct filter for v307 obviously ignored by the interviewers: most of the respondents with v307=2 have also valid answers on v309.

Denmark, Germany, Ireland, Northern Ireland, Poland, Portugal, and Turkey:

Due to different filter on v307 respondents with v307=2 have also valid answers on v309.

Finland:

Correct filter for v307 obviously ignored by the interviewers: most of the respondents with v307=2 have also valid answers on v309.

Hungary and Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Lithuania:

Filter instructions on v306 and v307=2 have been obviously ignored by the interviewers: Self-employed respondents (v306=3) have also been asked v309; for reasons of comparability these cases (n=22) have been recoded according to Master Questionnaire to -3 'nap'. Most of the respondents with v307=2 have also valid values for v309; these cases have not been recoded.

Malta:

According to filter on v306 and v307 respondents with v306=3,7,8 and v307=1 have also been asked v309. For reasons of comparability and conform to the Master Questionnaire these cases have been recoded into -3 'nap'.

Romania and Slovenia:

Due to missing filter on v307 respondents with v307=2 have also valid answers on v309.

v310 - how many employees do you have (Q100)

Q.100

How many employees do you have?

.....

<(write in number)>

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

Hungary:

Hungarian field questionnaire's version available in the Data Archive does not include any question to this variable. However, valid data was delivered by the country.

Ireland and Northern Ireland:

Question not included in the Irish and Northern Irish field questionnaire. Variable reconstructed on basis of v306, v307, and v309.

Lithuania:

Though self-employed (v306=3) are correctly filtered to v310 in the field questionnaire, empirically none of them have valid data on v310. Cases have been recoded to -4 'not asked'. Therefore no valid data is available for this variable.

Luxembourg:

Correct filter for v306=3; but: empirically none of the respondents with v306=3 has been asked v310. Therefore data not available.

Malta:

According to filter on v306 self-employed have been first asked v307 (do you supervise someone). According to filter on v307 self-employed respondents that do not supervise anyone (v307=2) skipped v310.

For reasons of comparability v310 has been reconstructed on the basis of v307, v308, and v309 according to the Master Questionnaire.

Spain:

According to filter on v306 only self-employed (v306=3) have been asked v310. Empirically 4 respondents with v306=1 (paid employment) have valid answers on v310.

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Turkey:

Turkish field questionnaire's version available in the Data Archive does not include any question to this variable. However, valid data was delivered by the country.

Note:

Open-ended question

If a wild code could not be identified, it was recoded into the next identifiable higher level profession unit (starting with minor group, sub major group then major group). 144 cases were recoded and 42 cases could have been identified. Source for recodes: International Standard Classification of Occupations (ISCO-88) provided by the International Labour Organization. 18 September 2004. Web: 10 December 2011 [www.ilo.org](http://www.ilo.org).

Austria:

Due to different filter structure on v306 housewives (v306=5), unemployed (v306=7) and others (v306=8) have also valid ISCO-codes; 34 widowed women coded as 'retired/pensioned' (v306=4) have not been asked v311.

Belgium:

Due to different filter structure on v306 housewives (v306=5) and unemployed (v306=7) have also valid ISCO-codes.

2-digit ISCO code has been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the second highest profession level.

Croatia:

3-digit ISCO code has been adapted to the 4-digit ISCO-88 by adding the missing zero to the code. Data only available on the third highest profession level.

Czech Republic:

Despite the correct filter on v306, one unemployed (v306=7) and one 'other' respondent (v306=8) have valid ISCO codes.

Denmark :

Due to different question structure (v314 placed directly after v306), unemployed respondents (v306=7) have also valid ISCO-codes.

Unemployed who have never had a job have not been asked v311.

2-digit ISCO code has been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the second highest profession level.

Finland:

2-digit ISCO code has been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the second highest profession level.

Respondents that according to filter on v306 skip v311 are coded as -2 'no answer' instead of -3 'nap'.

France and Malta:

Due to different filter structure on v306 unemployed (v306=7) have also valid ISCO-codes.

2-digit ISCO code has been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the second highest profession level.

Greece:

Filter on v306 has been ignored in some cases: housewives, students, unemployed and other (v306=5-8) have valid ISCO-codes (n=18).

Germany:

Filter on v306=8 'other' leads to v315. Empirically the filter has been ignored for 6 cases with valid ISCO codes.

Hungary:

Due to different filter structure on v306 housewives, students, unemployed and others (v306=3-8) have also valid ISCO-codes.

Ireland, Northern Ireland, and Portugal:

Due to different question and filter structure on v306 unemployed (v306=7) have also valid ISCO-codes.

Latvia and Spain:

2-digit ISCO code have been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the second highest profession level.

Luxembourg and Netherlands:

Correct filter for v306=4; but: empirically none of the retired has a valid ISCO-code.

Poland:

Due to different filter structure on v306 housewives (v306=5) and unemployed (v306=7) have also valid ISCO-codes.

Filter on v306=8 'other' leads to v315. Empirically the filter has been ignored for 12 cases with valid ISCO codes.

Romania:

1- and 2-digit ISCO codes have been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the first and second highest profession levels.

Slovak Republic:

According to different filter structure on v306, unemployed respondents (v306=7) should have been asked v311. Empirically none of them has valid codes on v311.

Although filter on v306=8 leads to v315, respondents with 'other' employment status have valid ISCO-codes.

Slovenia:

According to filter on v306, respondents with v306=5-8 (housewives, students, unemployed, and others) should not have been asked v311.

Empirically filter has been ignored by some interviewers.

2-digit ISCO code has been adapted to the 4-digit ISCO-88 by adding the missing zeros to the code. Data only available on the second highest profession level.

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Turkey:

Open ended questions set in the field questionnaire to give additional information on occupation did not work as intended. Therefore all cases are coded as -4 'not asked'.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: question wording, interviewer instruction).

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Comparability:

Trend question: EVS 2008 and EVS 1999.

v312 - kind of job respondent (Q 102/Q103)

Q.102

What is/was your job there?

.....

<Write in and code below>

Q. 103

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 employer/manager of establ with 10 or more employees
- 2 employer/manager of establ with less than 10 employees
- 3 professional worker (lawyer, accountant, teacher etc)
- 4 middle level non-manual -office worker etc
- 5 junior level non-manual -office worker etc
- 6 foreman and supervisor
- 7 skilled manual worker
- 8 semi-skilled manual worker
- 9 unskilled manual worker
- 10 farmer: employer, manager or own account
- 11 agricultural worker
- 12 member of armed forces
- 13 never had a job

Q. 102 Open-ended question

Austria:

Due to different filter structure on v306 housewives (v306=5), unemployed (v306=7) and others (v306=8) have also valid codes on v312; 34 widowed women coded as 'retired/pensioned' (v306=4) have not been asked v312.

Belgium:

Due to different filter structure on v306 housewives (v306=5) and unemployed (v306=7) have also valid codes on v312.

Czech Republic:

Despite the correct filter on v306, one unemployed (v306=7) and one 'other' respondent (v306=8) have valid codes on v312.

Denmark:

Due to different question structure (v314 placed directly after v306), unemployed respondents (v306=7) have also valid codes on v312. Unemployed who have never had a job (v314\_dk=7) have not been asked v312.

Finland:

Question not fielded in the Finnish field questionnaire, information already collected in a register maintained by the data collector.

France and Portugal:

Due to different filter structure on v306 unemployed (v306=7) have also valid codes on v312.

Hungary:

Due to different filter structure on v306 housewives, students, unemployed and others (v306=3-8) have also valid codes on v312.

Ireland and Northern Ireland:

Question not included in the Irish and Northern Irish field questionnaire. Information reconstructed by Ireland on the basis of v309 and v311; unemployed (v306=7) have also valid codes on v312.

Luxembourg and Netherlands:

Correct filter for v306=4; but: empirically none of the retired respondents has a valid code on v312.

Malta:

Due to filter on v306 and different order of variables in field questionnaire unemployed (v306=7) have also valid codes on v312, and retired (v306=4) have not been asked v312.

Poland:

Due to different filter structure on v306 housewives (v306=5) and unemployed (v306=7) have also valid codes on v312.

Slovak Republic:

According to different filter structure on v306, unemployed respondents (v306=7) should have been asked v312. Empirically only one respondent with v306=7 has been asked v312, and it is coded as 13 'never had a job'.

Although filter on v306=8 leads to v315, respondents with 'other' employment status are coded as -2 'no answer' instead of -3 'nap'.

Slovenia:

According to filter on v306, respondents with v306=5-8 (housewives, students, unemployed, and others) should not have been asked v312.

Empirically filter has been ignored by some interviewers.

Sweden:

Due to different filter on v306, retired/pensioned have not been asked v312.

v314 - how long are you unemployed (Q104)

Q.104

And for how long are you unemployed?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 less than half a year
- 2 between half a year and one year
- 3 one year
- 4 between one and two years
- 5 two years
- 6 more than two years

Austria:

To make sure that only unemployed respondents will be asked v314 the Austrian questionnaire uses an additional filter (Q103a respondent is unemployed) before asking v314 (Q104).

Denmark:

Different question structure: additional answer category (7 'never had a job').

Finland:

Different question wording: 'how long have you ever been unemployed'; different filter structure: respondents in paid employment and pensioned have also been asked v314. Variable adapted to Master Questionnaire taking into account v306 (employment status) and v87 (employed).

Greece:

Although correct filter on v306, some retired/pensioned respondents (v306=4) have valid answers on v314 (n=8).

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

v316 - is the chief wage earner employed (Q106)

Q.106

Is the chief wage earner employed now or not?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 yes
- 2 no

Denmark:

Additional filter: none of the respondents with v316=2/-1 has been asked v317 and v318.

Germany:

Variable has been replaced by the same question format as v306 (Is the chief wage earner currently employed or what else on the list applies to him/her?); as a consequence, v316 follows the same filter logic as v306, i.e., in contrast to the Master Questionnaire housewives, students, unemployed, 'other', and 'na' have not been asked v317 and v318.

v316 by c\_abrv, Absolute Values (Row Percent), weighted by weight\_g

Note:

Open-ended question

If a wild code could not be identified, it was recoded into the next identifiable higher level profession unit (starting with minor group, sub major group then major group). 84 cases were recoded and 26 cases could have been identified. Source for recodes: International Standard Classification of Occupations (ISCO-88) provided by the International Labour Organization. 18 September 2004. Web: 10 December 2011 [www.ilo.org](http://www.ilo.org).

Belgium, Denmark, Finland, France, Latvia, Slovenia, and Spain:

2 digit ISCO-codes.

Croatia:

3 digit ISCO-code.

Denmark:

Respondents with code 2 on v315 should have been asked v317.

Germany:

Some chief wage earners (housewives, students, unemployed, 'other', 'na' according to v316) have not been asked v317.

Malta:

ISCO-codes of chief wage earner dropped from the questionnaire of Malta.

Netherlands:

Correct filter for v315 and v316; but: empirically none of the respondents with v315=2 and v316=2/-2 has a valid ISCO-code.

Romania:

1 or 2 digit ISCO-codes.

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

Turkey:

Open ended questions set in the field questionnaire to give additional information on occupation did not work as intended. Therefore all cases are coded as -4 'not asked'.

v317\_2 - kind of job chief wage earner - 2 digit ISCO88 code (Q107) (recoded)

Sweden:

Question not asked in Field Questionnaire. Computed and coded as -4 'question not asked'.

v318 - kind of job chief wage earner (Q108/Q109)

Q.108

What is/was his/her job?

.....

<Write in and code below>

Q. 109

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 employer/manager of establ with 10 or more employees
- 2 employer/manager of establ with less than 10 employees
- 3 professional worker (lawyer, accountant, teacher etc)
- 4 middle level non-manual -office worker etc
- 5 junior level non-manual -office worker etc
- 6 foreman and supervisor
- 7 skilled manual worker
- 8 semi-skilled manual worker
- 9 unskilled manual worker
- 10 farmer: employer, manager or own account
- 11 agricultural worker
- 12 member of armed forces
- 13 never had a job

Note:

Q. 108 Open-ended question

Denmark, Turkey:

None of the respondents with v316=2 has been asked v318.

Finland:

Question dropped; information came from a register maintained by the data collector.

Germany:

Some chief wage earners (housewives, students, unemployed, 'other', 'na' according to v316) have not been asked v318.

Ireland and Northern Ireland:

dropped from questionnaire; information reconstituted.

Italy:

additional answer category 13 collapsed with category 2; category 14 recoded into code 13 of the Master Questionnaire.

Netherlands:

Correct filter for v315 and v316; but: empirically none of the respondents with v315=2 and v316=2/-2 has a valid code on v318.

v320 - income household respondent (Q110)

Q.110

<Ask all; show income card>

Here is a scale of incomes and we would like to know in what group your household is, counting all wages, salaries, pensions and other incomes that come in. Just give the letter of the group your household falls into, after taxes and other deductions.

-5 other missing

-4 question not asked

-2 no answer

-1 don't know

1 low

2

3

4

5

6

7

8

9

10 high

Note:

Incomes in ten categories from 10% lowest to 10% highest income category.

Income was measured on different scales labelled by national currency, the distributions have been adapted to the 10 categories of the Master Questionnaire; for the original income variables of the national data sets see v320\_CS;

Austria:

Different question format (Austrian questionnaire offers 25 by currency labelled income categories); question adapted to the Master Questionnaire.

Bulgaria, Croatia, Estonia, Iceland, Ireland, Italy, Latvia, Netherlands, Northern Ireland, Slovakia, and Turkey:

Categories labelled by national currency.

Denmark:

Income was measured on an open scale; the distribution has been adapted to the 10 categories of the Master Questionnaire by taking into account the income distribution of Denmark.

Germany:

Income was measured on an 11 point scale offering 1000 DM intervals; the upper 2 categories have been collapsed (together less than 20 respondents).

Lithuania:

Income was measured on an 20 point scale offering different by national currency labelled income intervals; the distribution has been adapted to the 10 categories of the Master Questionnaire by Lithuania.

Luxembourg:

Income was measured on an 25 point scale offering different by national currency labelled income intervals; categories have been adapted to

the Master Questionnaire by Luxembourg.

Malta:

Additional filter question placed before v320 (respondents with difficulties to answer v320 have not been asked for their income); fixed values instead of value ranges offered.

Portugal:

Income was measured on a 6 point scale labelled by national currency. Therefore it is not harmonized (coded as -5 'other missing'). For country specific information and original categories see v320\_cs.

Romania:

Income was measured on an open scale; the distribution has been adapted to the 10 categories of the Master Questionnaire by Romania.

Slovenia:

Income was measured on an open scale; the distribution has been adapted to the 10 categories of the Master Questionnaire by taking into account the income distribution of Slovenia.

Sweden:

Income was measured on an 11 point scale offering 5000 kr intervals.

v320\_ppp - Monthly household income (x1000), corrected for ppp in euros

Monthly household income in Euros corrected for purchasing power parity

For each country, the national currency is converted into Euros and corrected for purchasing power parity (PPP). PPP is derived from the IMF World Economic Outlook Database (October 2008 Edition).

The mean exchange rate was calculated over the survey period. The exchange rates were taken from OANDA - Forex Trading and Exchange Rates Services (we used the 'bid' interbank exchange rate) for the countries Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, France, Germany, Greece, Iceland, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Portugal, Russia, Slovakia, Slovenia, Spain, Sweden, and Turkey. For Northern Ireland the exchange rates came from the European Central Bank. Information on income was missing for the countries Belarus, Finland, Hungary, Luxembourg, Poland, Romania, Great Britain, Ukraine.

To construct a linear income variable, the mid-points of the country specific categories were taken; for the first category, the mid-point is its upper bound minus half the range of the second category, e.g., if (1) <500 Euro and (2) 500-800 Euro, then the mid-point of the first category is:  $500 - (800 - 500) / 2 = 350$  Euro. To compute the mid-point of the last category, an equal range for the last and the penultimate category was assumed, e.g., if (one but last category) 7.500-10.000 Euro and (last category) >10.000 Euro, then the mid-point of the last category is:  $10.000 + (2.500 / 2) = 11.250$  Euro.

Note:

Sources GDP (purchasing power parity):

<http://www.imf.org/external/ns/cs.aspx?id=28>

<http://data.worldbank.org/>

Sources Exchange rates:

<http://www.ecb.int/home/html/index.en.html>

<http://www.oanda.com/>

Date: Calculation of the PPP rates and the exchange rates is based on the year of the fieldwork.

Comparability:

Trend question: EVS 2008 and EVS 1999.

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (income).

Original income variable of the national data sets.

Belarus, Finland, Hungary, Luxembourg, Poland, Romania, and Ukraine:

No detailed information on country specific income (in respective country currency) available. For information on income for these countries please use v320 (variable for standardized income: 1=low to 10=high).

## v320\_se - family savings during past year (Q268\_SE)

WVS question - Sweden (1999):

Q.268

During the past year, did your family:

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 SE: save money
- 2 SE: just get by
- 3 SE: spent some savings and borrowed money
- 4 SE: spent savings and borrowed money

Note:

Sweden: Field questionnaire for EVS 1999 contains 26 variables additionally implemented for World Value Survey.

v320\_se, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent
-4	question not asked	M	40110	97.5	
-1	don't know	M	15	0.0	
1	SE: save money		547	1.3	54.8
2	SE: just get by		313	0.8	31.3
3	SE: spent some savings and borrowed money		83	0.2	8.3
4	SE: spent savings and borrowed money		56	0.1	5.6
	Sum		41124	100.0	100.0
	Valid Cases		999		

## v321\_se - social class (Q269\_SE) (subjective)

WVS question - Sweden (1999):

Q.269

People sometimes describe themselves as belonging to the working class, the middle class, or the upper or lower class. Would you describe yourself as belonging to the:

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 SE: upper class
- 2 SE: upper middle class
- 3 SE: lower middle class
- 4 SE: working class
- 5 SE: lower class

Sweden: Original variable provided by the World Value Survey.

In the Swedish questionnaire the upper and the upper-middle class have been distinguished; in variable o49 both categories have been collapsed to adapt the Swedish question to the Master Questionnaire.

v321\_se, weighted by weight\_g

Value	Label	Missing	Count	Percent	Valid Percent
-4	question not asked	M	40110	97.5	
-1	don't know	M	172	0.4	
1	SE: upper class		10	0.0	1.2
2	SE: upper middle class		240	0.6	28.5
3	SE: lower middle class		328	0.8	39.0
4	SE: working class		185	0.4	22.0
5	SE: lower class		79	0.2	9.4
	Sum		41124	100.0	100.0
	Valid Cases		842		

v322 - size of town where interview was conducted (Q112)

Q.112

Size of town

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 under 2000
- 2 2-5000
- 3 5-10000
- 4 10-20000
- 5 20-50000
- 6 50-100000
- 7 100-500000
- 8 500.000 and more

Ireland and Northern Ireland:

Additional answer category 'open countryside' collapsed with the first answer category of the Master Questionnaire.

Ukraine:

Different question format (type of settlement). Adapted to Master Questionnaire for integration.

Comparability:

Trend question: EVS 2008 and EVS 1999.

Comparable questions: WVS 1995 (v232), WVS 2000 (v241).

1 mentioned

Note:

Multiple response questions are split into a set of dichotomized variables (1 mentioned, 0 not mentioned) which represent each of the original categories and are identified by the respective original category code as question number suffix.

Optional question asked in:

Belarus and Great Britain.

Belarus:

Since no show card was used in the field questionnaire it seems that they have asked the battery item by item, and not as block.

o5\_lu - jobs scarce: giving locals priority (Q20D\_LU)

Q.20

Do you agree or disagree with the following statements?

Q.20D\_LU When jobs are scarce, residents rather than cross-border commuters (Grenzgänger) should be employed.

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 agree
- 2 disagree
- 3 neither

Luxembourg:

Question not comparable to Master Questionnaire due to deviation in question content (giving priority to "residents over crossborder commuters" instead of "local people over people from other parts of the country").

o17 - how interested in politics (Q51a)

Q.51a

How interested would you say you are in politics?

- 5 other missing
- 4 question not asked
- 3 not applicable
- 2 no answer
- 1 don't know
- 1 very interested
- 2 somewhat interested
- 3 not very interested
- 4 not at all interested

Note:

Optional question asked in:

Austria, Belarus, Belgium, Bulgaria, Czech Republic, Denmark, Finland, France, Germany, Great Britain, Greece, Iceland, Ireland, Italy, Lithuania, Luxembourg, Northern Ireland, Poland, Portugal, Russia, Slovenia, Spain, Netherlands, and Ukraine.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction).

o18 - equalize incomes vs. incentives for individual effort (Q54E)

Q.54E

<Show card 54>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 incomes should be made more equal

2

3

4

5

6

7

8

9

10 there should be greater incentives for individual effort

Note:

Optional question asked in:

Austria, Belarus, Belgium, Bulgaria, Croatia, Czech Republic, Estonia, Finland, France, Great Britain, Iceland, Ireland, Italy, Lithuania, Luxembourg, Northern Ireland, Poland, Romania, Russia, Slovenia, Netherlands, Turkey, and Ukraine.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: interviewer instruction, question wording).

Comparable questions: WVS 1995 (v125), WVS 2000 (v141).

o20 - individual vs. state responsible for pension (Q54G)

Q.54G

<Show card 54>

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 each individual should be responsible for arranging his or her own pension

2

3

4

5

6

7

8

9

10 the state should be responsible for everyone's pension

Note:

Optional question asked in:

Austria, Belarus, Belgium, Croatia, Czech Republic, Estonia, Finland, Great Britain, Iceland, Lithuania, Luxembourg, Portugal, Romania, Russia, Slovenia, Turkey, and Ukraine.

## o22\_01 - major changes in society (Q54J\_LU)

Q.54J\_lu

&lt;Show card 54&gt;

Now I'd like you to tell me your views on various issues. How would you place your views on this scale?

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 important changes in society need to be made gradually without pushing people

2

3

4

5

6

7

8

9

10 important changes in society cannot be achieved without being radical and pushing people

Luxembourg:

Question not comparable to Master Questionnaire due to deviation in response categories. Q.54J\_LU refers to major changes in 'society' not in 'life' as defined in Master Questionnaire.

## o22\_01, weighted by weight\_g

## o23 - opinion on society (Q54a)

Q.54a

&lt;Show card 54a&gt;

On this card are three basic kinds of attitudes vis à vis the society we live in. Please choose the one which best describes your own opinion.

&lt;Code one only&gt;

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 the entire way our society is organised must be radically changed by revolutionary action

2 our society must be gradually improved by reforms

3 our present society must be valiantly defended against all subversive forces

Note:

Optional question asked in:

Austria, Belarus, Czech Republic, Italy, Lithuania, Russia, Slovenia, and Ukraine.

Comparability:

Trend question: EVS 2008 and EVS 1999.

(Modified trend: response categories).

Comparable questions: WVS 1995 (v124), WVS 2000 (v140).

o46 - opinion on European Union (Q71b)

Q.71b

<Show card 71b>

There is much talk about what the individual member states of the European Community Union have in common and what makes each one distinct.

<Interviewer presents illustration with responses and scale from 1 to 7>

A: Some people say: If the European member states were truly to be united, this would mean the end of their national, historical and cultural identities. Their national economic interests would also be sacrificed.

B: Others say: Only a truly united Europe can protect its states' national, historical and cultural identities and their national economic interests from the challenges of the superpowers.

Which opinion is closest to your own opinion, the first one or the second one? Please use the scale listed. 1 would mean that you agree completely with A and 7 would mean that you agree completely with B. The numbers in between allow you to show which of the opinions you tend to agree with, whether you tend to agree more with the one or with the other.

o48\_ua - important: equal chance education (Q76D\_UA) (4 answer categories)

Q.76\_ua

&lt;Show card 76&gt;

In order to be considered "just", what should a society provide? Please tell me for each statement if it is important or unimportant to you. 1 means very important; 5 means not important at all.

Q.76D\_ua Giving young people equal opportunity to pursue their education irrespective of family income

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 UA: very important

2

3

4 UA: not at all important

Ukraine:

Question not comparable to Master Questionnaire (4-point-scale instead of the 5-point-scale).

## o49 - socio-economic status respondent (Q110a)

Q.110a

&lt;Interviewer code by yourself&gt;

Socio-economic status of respondent

-5 other missing

-4 question not asked

-3 not applicable

-2 no answer

-1 don't know

1 AB (upper, upper-middle class)

2 C1 (middle, non-manual workers)

3 C2 (manual workers -skilled, semi-skilled)

4 DE (manual workers -unskilled, unemployed)

Note:

Optional question asked in:

Austria, Belgium, Croatia, Czech Republic, France, Germany, Great Britain, Hungary, Italy, Luxembourg, Malta, Poland, Slovak Republic, Spain, Sweden, and Turkey.

Sweden:

In the Swedish questionnaire the upper and the upper-middle class have been distinguished; both categories have been collapsed to adapt the Swedish question to the Master Questionnaire. Original Swedish variable, see v321\_se.
