

Candidate Countries EB 2002.1 Mar-Apr 2002 ZA 4153

Good morning / afternoon, I'm _____ from COMPANY. I would like to ask you to participate in a survey about the social situation in the 13 countries that are applying for European Union membership. Please help me with your answers.

The questionnaire is anonymous; your responses will be used to generate statistics for our country. You can refuse to answer to any of the questions if you wish so.

Let me ask three questions about the European Union first.

(ACEB 2001 Q22.)

Q1. Generally speaking, do you think that (COUNTRY)'s membership of the European Union would be...?

(READ OUT)

- 1 - a good thing
 - 2 - a bad thing
 - 3 - neither good nor bad
-
- 9 - DK / no opinion (spontaneous)
 - X - Refusal (spontaneous)

(ACEB 2001 Q23.)

Q2. And, if there were to be a referendum tomorrow on the question of (country)'s membership of the European Union, would you personally vote for or against it?

- 1 - for
 - 2 - against
-
- 3 - I would not go to vote (spontaneous)
 - 9 - DK / no opinion (spontaneous)
 - X - Refusal (spontaneous)

(ACEB 2001 Q24.)

Q3. Taking everything into consideration, would you say that (COUNTRY) could get advantages or not from being a member of the European Union?

- 1 - yes, it could
 - 2 - no, it couldn't
-
- 9 - DK / no opinion (spontaneous)
 - X - Refusal (spontaneous)

Indicators for QL in general

(52. Q.13)

Q4. Please tell me whether you are very satisfied, fairly satisfied, not very satisfied or not at all satisfied with each of the following?

(READ OUT - SHOW CARD)

C.3 Sample Specifications

Between the 1st of March and the 5th of April 2002, The Gallup Organization Hungary carried out wave 2002.1 of the Candidate Countries Eurobarometer, at the request of the EUROPEAN COMMISSION, Directorate-General Employment and Social Affairs.

The Candidate Countries Eurobarometer 2002.1 covers citizens of each of the countries that are applying for European Union membership aged 15 and over, with the exception of Estonia and Cyprus. In Estonia, the survey covered permanent residents aged 15 and over. In Cyprus, the survey only covers citizens living on the southern part of the island. The basic sample design applied in all Candidate Countries is a multi-stage, random (probability) one. In each country, a number of sampling points were drawn with probability proportional to population size (for a total coverage of the country) and to population density.

For doing so, the points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the Candidate Countries Region according to the EUROSTAT NUTS 2 (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random. All interviews were face-to-face in people's home and in the appropriate national language. In countries with significant minorities the respondents had a chance to respond in their mother tongue (in Estonia, Latvia and Lithuania in Russian, and in Romania in Hungarian).

Countries	Institutes	Number of Interviews	Field Work Dates	Population (x 000)
Bulgaria	VITOSHA RESEARCH	1000	10-March – 29-March	8,487
Cyprus	CYMAR MARKET RESEARCH	500	4-March – 26-March	663
Czech Republic	THE GALLUP ORGANIZATION, CZECH REP.	1000	9-March – 2-April	10,229
Estonia	SAAR POLL	1010	8-March – 21-March	1,446
Hungary	THE GALLUP ORGANIZATION, HUNGARY	1020	14-March – 4-April	10,198
Latvia	LATVIAN FACTS LTD.	1000	8-March – 24-March	2,439
Lithuania	BALTIC SURVEYS	1015	7-March – 20-March	3,701
Malta	MISCO	500	5-March – 4-April	379
Poland	THE GALLUP ORGANIZATION, POLAND	2000	8-March – 5-April	38,666
Romania	THE GALLUP ORGANIZATION, ROMANIA	1049	6-March – 28-March	22,546
Slovakia	FOCUS CENTER FOR SOCIAL AND MARKET ANALYSIS	1067	12-March – 2-April	5,391
Slovenia	CATI CENTER	1002	2-March – 29-March	1,986
Turkey	KONSENSUS RESEARCH & CONSULTANCY	2000	1-March – 3-April	56,473
Total number of interviews		14163		162,604

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from population data from national statistics. For all Candidate Countries a weighting procedure, using marginal and intercellular weighting, was carried out, based on this Universe description. As such in all countries, gender, age, region NUTS 2, settlement size, household size, and education level were introduced in the iteration procedure. For international weighting (i.e. CC-13 averages), Gallup applies the official population figures as provided by national statistics. The total population figures for input in this post-weighting procedure are listed above.

The results of the Candidate Countries Eurobarometer studies are reported in the form of tables, datafiles and analyses. Per question a table of results is given with the full question text in English. The results are expressed as a percentage of the total. The results of the Eurobarometer surveys are analysed and made available through the Directorate-General Press and Communication, Opinion Polls of the European Commission, rue de la Loi 200, B-1049 Brussels. The results are published on the Internet server of the European Commission: http://europa.eu.int/comm/public_opinion/. All Eurobarometer datafiles are stored at the "Zentral Archiv" (Universität Köln, Bachemer Strasse, 40, D-50869 Köln-Lindenthal), available through the CESSDA Database <http://www.nsd.uib.no/cessda/europe.html>. They are at the disposal of all institutes members of the European Consortium for Political Research (Essex), of the Inter-University Consortium for Political and Social Research (Michigan) and of all those interested in social science research.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits (in case of a sample of 1000 people – confidence intervals for N=500 sample are larger; and smaller for a N=2000 sample):

Observed percentages	10% or 90%	20% or 80%	30% or 70%	40% or 60%	50%
Confidence intervals	± 1.9%	± 2.5%	± 2.7%	± 3.0%	± 3.2%
