WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No Yes	[] [X]
<i>Weight to adjust for non-response bias</i>	No Yes	[X] [X] → please specify variables used for calculation of weight Age group by gender Age by gender by marital status Gender by economic status Gender by level of education Household size Geographic region
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No Yes	[] → please specify target population represented by sum of all case weights [X]
<i>Note</i>	<p>The sample for the ISSP 2007 was selected from the GeoDirectory, a listing of all addresses in Ireland which allows residential addresses to be identified.</p> <p>The design is such that the sample selected is epsem (equal probability) in dwellings. When used to select a sample of individuals, the completed sample is biased in favour of individuals in smaller households as individual selection probability is be inversely proportional to household size¹. This, as well as any other deviations from the population distribution, is adjusted at the weighting</p>	

¹ The relevant measure of household size for this purpose is number of persons age 18 and over, rather than number of persons of any age.

	stage of the analysis.

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

[X] Already included in field questionnaire provided with the country data file.

[] Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all source variables**. *Source variables* are the country-specific variables before recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

[Separate attachment]

Attached file: YYYYYY.YYY.

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

[X] ISCO88 is used to code responses directly.

[] Conversion of national coding scheme to ISCO88. Attached file: ZZZZZZ.ZZZ.
