SPISCO88 – S-P: Occupation ISCO

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file.* Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Translation Note		
Note	We constructed URBRURAL by using XNORCSIZ and SRCBELT in US GSS. The XNORCSIZ indicates NORC size of place and SRCBELT stands for Survey Research Center New Belt Code. Below are the codes for both variables. XNORCSIZ 1 Within an SMSA and a large central city (over 250,000) 2 a medium size central city (50,000 to 250,000) 3 a suburb of a large central city 4 a suburb of a medium size central city 5 an unincorporated area of a large central city (division, township, etc) 6 an unincorporated area of a medium central city 7 Not within an SMSA (within a county) and a small city (10,000 to 49,999) 8 a town or village (2,500 to 9,999) 9 an incorporated area less than 2,500 or an unincorporated area of 1,000 to 2,499 10 open country within larger civil divisions eg, township, division SRCBELT 1 Central city of 12 largest SMSAs 2 Central city of remainder of the 100 largest SMSAs 3 Suburbs of 12 largest SMSAs 4 Suburbs of the remaining 100 largest SMSAs 5 Other Urban (counties having towns of 10,000 or more) 6 Other rural (counties having no towns of 10,000 or more)

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

Design weight to adjust for unequal selection probabilities	No	[ ]
	Yes	[V]
Weight to adjust for non-response bias	No	[V]
	Yes	[ ] → please specify variables used for calculation of weight
Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?	No	[ ] → please specify target population represented by sum of all case weights
	Yes	[V]
Note	The US WEIGHT variable takes into consideration a) the sub-sampling of non-respondents, and b) the number of adults in the household. It also essentially maintains the original sample size.	

<center>**MODE –** Administrative mode of data-collection (OR Data collection method)</center>

Note	The US GSS uses CAPI (Computer Assisted Personal Interview) Method for data collection.
