WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No Yes	[] [X] Design weights based on proportion of household sizes. The weight was derived from data of the Czech Statistical Office.
<i>Weight to adjust for non-response bias</i>	No Yes	[] [] → please specify variables used for calculation of weights Post-stratification weight based on region, community size, sex, age and education. The weight was derived from data of the Czech Statistical Office.
<i>Are the final weights rescaled to net sample size (thus <u>weighted sample size=unweighted sample size</u>)?</i>	No Yes	[] → please specify target population represented by sum of all case weights [X]
<i>Note</i>	Variable WEIGHT include total weight, which was constructed from design and post-stratification weights.

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

Already included in field questionnaire provided with the country data file.

Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for all source variables. Source variables are the country-specific variables before recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: **Czech10bv_fre.doc**

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

ISCO88 is used to code responses directly.

Conversion of national coding scheme to ISCO88. Attached file: **Czech08bv_isco.txt**
